

COURSE OVERVIEW RE0225 Certified Maintenance Planner (CMP)

30 PDHs)

Course Title

Certified Maintenance Planner (CMP)

Course Date/Venue

February 24-28, 2025/Hampstead Meeting Room, Marriott London Regents Park, London, UK

Course Reference

RE0225

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide participants with a detailed and up-to-date overview Certified Maintenance Planner (CMP). It covers the maintenance planning and integrated maintenance production management partnership; the planning, coordination and scheduling to management and operations; the good maintenance practices and the responsible supervisor or team leader; the six planning and scheduling principle; and the wrench time, actual hours to plan estimate, planning variance index and enhancing planner productivity.

During this interactive course, participants will learn the backlog management, existing staffing processes and preventive/predictive maintenance inspections; the steady state backlog relief, deferred maintenance, capital program requirements and other considerations for staffing; the planning process (micro-planning) and detailed planning process-materials, tools and equipment; the work measurement, analytical estimating, scheduling maintenance work and job execution; and the job close-out and follow-up, managing planning, direct and indirect measure of planning effectiveness and project planning and management.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Get certified as a "Certified Maintenance Planner"
- Discuss maintenance planning and integrated maintenance production management partnership
- Explain planning, coordination and scheduling to management and operations as well as identify work sampling, typical maintenance worker's day and symptoms of ineffective job planning
- Carryout good maintenance practices and identify the responsible supervisor or team leader
- Discuss the six planning principles and scheduling principles
- Recognize wrench time and the actual hours to plan estimate
- Explain planning variance index and enhance planner productivity
- Discuss backlog management covering ready backlog and planned backlog as well as review checklist for backlog integrity and develop work programs and backlog weeks trend chart
- Apply existing staffing processes and preventive/predictive maintenance inspections
- Explain steady state backlog relief, deferred maintenance, capital program requirements and other considerations for staffing
- Illustrate planning process (micro-planning) including planning process-screening, scoping, research and detailed planning
- Discuss detailed planning process-materials, tools and equipment
- Employ work measurement, analytical estimating, scheduling maintenance work and job execution
- Carryout job close-out and follow-up, managing planning, direct and indirect measure of planning effectiveness and project planning and management

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

Who Should Attend

This course covers systematic techniques in maintenance planning, scheduling and work control to assist maintenance team responsible for delivering maximum reliability and availability of equipment at the lowest possible cost. It is intended for plant maintenance engineers, planning engineers, maintenance planners and maintenance coordinators.

To maximize the benefits of the course, delegates should be prepared to actively participate in the course and bring examples of standard work plans, a list of plant performance metrics, the work priority system in-place, and any other planning or scheduling material they would like to review and discuss.

Course Certificate(s)

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a "Certified Maintenance Planner". Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants: -

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

* BAC British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Fee

US\$ 8,800 per Delegate + **VAT**. This rate includes H-STK[®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Dimitry Rovas, CEng, MSc, PMI-PMP, SMRP-CMRP, is a Senior Maintenance Engineer with extensive industrial experience in Oil, Gas, Power and Utilities industries. His expertise includes Process Plant Shutdown & Turnaround, Maintenance Optimization & Best Practices, Maintenance Auditing & Benchmarking, Reliability Management, Reliability Centered Maintenance Principles & Application, Machinery Lubrication, Maintenance Planning & Scheduling, Coupling & Shaft Alignment Techniques, Maintenance Management & Cost Control, Preventive & Predictive Maintenance, Effective Reliability Maintenance & Superior Maintenance Strategies, Integrity & Asset

Management, Reliability, Availability & Maintainability (RAM), Total Plant Reliability Centered Maintenance, Turnaround & Outages, Process Plant Shutdown, Troubleshooting, Shutdown & Turnaround Management, Integrity & Asset Management, Maintenance Management Best Practices, Material Cataloguing, Maintenance Planning & Scheduling, Effective Reliability Maintenance, Maintenance Contracting & Outsourcing, Maintenance Inventory, Materials Management, Mechanical & Rotating Equipment Troubleshooting & Maintenance, Rotating Equipment Reliability Optimization, Computerized Maintenance Management System (CMMS), Material Cataloguing & Specifications, Rotating Equipment Maintenance & Troubleshooting, Pump Technology, Pump Selection & Installation, Reciprocating & Centrifugal Compressors, Gas & Steam Turbines, Turbine Valves, Bearings & Lubrication, Rubber Compounding, Elastomers, Thermoplastic, Industrial Rubber Products, Rubber Manufacturing Systems, Heat Transfer, Vulcanization Methods, Energy Conservation, Energy Loss Management, Energy Saving, Thermal Power Plant Management, Cogeneration Power Plant Installation & Commissioning, Auxiliary Steam Boilers Troubleshooting, Piping Racks (Steel Structure, Valves, Pipe Supports) Commissioning, Firefighting Systems, Steel & Welded Tanks, Aluminium Logistics Facilities (Cranes, Laydown Areas, Port Facilities, etc), Equipment Heavy Lifting, Long Term Storage of Equipment, Heat Transfer, Fluid Mechanics, Heating & Cooling Systems, Heat Insulation Systems, Heat Exchanger & Cooling Towers, Mechanical Erection and Heavy Rotating Equipment. He is currently the Project Manager wherein he is managing, directing and controlling all activities and functions associated with the domestic heating/cooling facilities projects.

During his life career, Mr. Rovas has gained his practical and field experience through his various significant positions and dedication as the EPC Project Manager, Maintenance Manager, Mechanical Engineer, Field Engineer, Preventive Maintenance Engineer, Lead Rotating Equipment Commissioning Engineer, Construction Commissioning Engineer, Offshore Lead Maintenance Engineer, Researcher, Instructor/Trainer, Telecom Consultant and Consultant from various companies such as the Mytilineos Aluminium Group, Podaras Engineering Studies, Metka and Diadikasia, S.A., Hellenic Petroleum Oil Refinery and COSMOTE.

Mr. Rovas is a Chartered Engineer of the Technical Chamber of Greece. Further, he has Master degrees in Mechanical Engineering and Energy Production & Management from the National Technical University of Athens. Moreover, he is a Certified Instructor/Trainer, a Certified Maintenance and Reliability Professional (CMRP) from the Society of Maintenance & Reliability Professionals (SMRP), a Certified Project Management Professional (PMP), a Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM) and a Certified Six Sigma Black Belt. He is an active member of Project Management Institute (PMI), Technical Chamber of Greece and Body of Certified Energy Auditors and has further delivered numerous trainings, seminars, courses, workshops and conferences internationally.

Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Monday, 24th of February 2025 **Day 1:**

0720 0000		
0730 – 0800	Registration & Coffee	
0800 - 0815	Welcome & Introduction	
0815 - 0830	PRE-TEST	
0830 - 0930	Introduction to Maintenance Planning Integrated Maintenance & Production Management Partnership • Definitions •	
	Why Plan, Coordinate & Schedule Maintenance Jobs? • Objectives of Work	
	Preparation • Prerequisites • Understanding the Nature of Maintenance	
	Activities & Organizing Accordingly • Organization by Work Type	
0930 - 0945	Break	
	Selling Planning, Coordination & Scheduling to Management &	
	Operations	
0945 - 1045	Selling Management • Work Sampling • Typical Maintenance Worker's Day –	
	With & Without Planning & Scheduling • Symptoms of Ineffective Job Planning	
	• Convey the Many Benefits that Accrue to Each Stakeholder	
	Where Planning Fits into Good Maintenance Practices	
	Should Work Preparation be a Separate and Distinct Function? • The Assigned	
1045 - 1145	Craftsman • The Responsible Supervisor or Team Leader • The Proven Answer •	
1045 - 1145	Channels of Coordination and Communication • Working Liaisons •	
	Maintenance Liaisons • Should Planning be Separate from Scheduling? •	
	Clarification of Roles • Relationship with other Functions	
1145 – 1200	Break	
1200 – 1300	Planning Principles	
	Six Principles • The Planning Vision; The Mission • Planning Principle 1:	
	Separate Department • Principle 2: Focus on Future Work • Principle 3:	
	Component Level Files • Principle 4: Estimates Based on Planner Expertise •	
	Principle 5: Recognize the Skill of the Crafts • Principle 6: Measure Performance	
	with Schedule Compliance	

1300 – 1420	Scheduling Principles Why Maintenance does not Assign Enough Work • Advance Scheduling in an Allocation • Principle 1: Plan for Lowest Required Skill Level (Prerequisites of Scheduling) • Principle 2: Schedules & Job Priorities are Important (Prerequisites of Scheduling) • Principle 3: Schedule from Forecast of Highest Skills Available (Advance Scheduling Process) • Principle 4: Schedule for Every Work Hour Available • Principle 4 Brings the Previous Scheduling Principles Together • Principle 5: Crew Leader Handles Current Day's Work • Principle 6: Measure Performance with Schedule Compliance
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2: Tuesday, 25th of February 2025

Day Z.	ruesuay, 25° or February 2025
	Wrench Time
0730 - 0930	Definition • Objectives • Formula • Qualifications • Ample Calculation •
	Observations • Management of Planners
0930 - 0945	Break
	Actual Hours to Planning Estimate
0945 - 1150	Definition • Objectives • Formula • Component Definitions • Actual Work
0943 - 1130	Order Hours • Planned Work Order Hours • Qualifications • Sample
	Calculation • Best in Class Target Value
	Planning Variance Index
1150 – 1215	Definition • Objectives • Formula • Component Definitions • Sample
	Calculation
1215 - 1230	Break
	Planner Productivity
1230 - 1330	Definition • Objectives • Formula • Sample Calculation • Sample #2 Using
	Job Plans
	Backlog Management: Ready Backlog
1330 - 1420	Definition • Objectives • Formula • Component Definition • Sample
	Calculation • Best in Class Target Value: 2 to 4 Weeks
1420 - 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3: Wednesday, 26th of February 2025

Backlog Management: Planned Backlog Definition • Objectives • Formula • Component Definitions • Ready Wo Sample Calculation • Job Status • Checklist for Backlog Integrity Development of Work Programs • A Weekly Example of a Work Program Backlog Weeks Trend Chart	, •
0730 – 0930	, •
Development of Work Programs • A Weekly Example of a Work Program	
	m •
0930 – 0945 Break	
Sizing the Maintenance Staff	
Existing Staffing Processes • Preventive/Predictive Maintenance Inspectio	1s •
0945 - 1045 Steady State Backlog Relief • Deferred Maintenance • Capital Prog	ram
Requirements • Summary of Requirements • Other Considerations for Staff	fing
Another Approach to the Staffing Question	
The Planning Process (Micro-Planning)	
1045 – 1145 Steps of the Planning Process • The Planned Job Package	
1145 – 1200 Break	
The Planning Process-Screening, Scoping, Research & Detailed Plann	ing
Screening of Work Requests • Job Assessment & Scoping Check-list • Dea	ling
1200 – 1420 with Scope Creep • Job Research • Job Preparation • Feedback on the Plan •	Job
Planning Survey • Coordination of Equipment Access, Permitting, Safet	j &
Statutory Permission	
Recap	
Using this Course Overview, the Instructor(s) will Brief Participants about	the
Topics that were Discussed Today and Advise Them of the Topics to	be
Discussed Tomorrow	
1430 Lunch & End of Day Three	

Day 4: Thursday, 27th of February 2025

Day 4:	Thursday, 27 th of February 2025
0730 – 0930	Detailed Planning Process-Materials, Tools & Equipment
	Planner/Scheduler Responsibilities to the Material Management Process •
	Material Related Steps in the Planning of Specific Jobs are Summarized • The
	Planner's Role in Rebuilding • Controlling the Maintenance Storeroom with
	Statistical Inventory Control • JIT Versus SIC
0930 - 0945	Break
	Work Measurement
0945 - 1045	Adjusted Averages • Analytical Estimates • Job Slotting & Labor Libraries •
	Universal Maintenance Standards • Building an Estimate • Job Creep
	Analytical Estimating
1045 1145	Common Job Sequence • Travel-Time Table • Miscellaneous Provision Table •
1045–1145	The Labour Library • Development of Slotting Tables • Slotting Table
	Cataloguing • Job Estimating Worksheet • Coordination with Operations
1145 – 1200	Break
1200 – 1420	Scheduling Maintenance Work
	The Weekly Expectation • Scheduling Techniques • Instruction for Preparing
	Schedules • Completing the Scheduling Process
1420 - 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Four

Day 5: Friday, 28th of F	February 2025
--------------------------	---------------

Day 5:	Friday, 28" of February 2025
0730 - 0930	<i>Job Execution</i> Three Important Functions • Daily Schedule Adjustment • Planner Support of
	Job Execution • The Morning Meeting
0930 - 0945	Break
0945 – 1045	Job Close Out & Follow Up
	Schedule Compliance • Reasons for Non-Compliance • Reason for Schedule
	Non-Compliance • Calculation of Schedule Compliance • Sample Calculation •
	Supplementary Metrics
	Planner & Scheduler Metrics
1045 - 1215	Managing Planning • Direct Measure of Planning Effectiveness • Indirect
1010 1210	Measures of Planning Effectiveness • The Follow-Up Critique • Activity
	Sampling • Using CMMS to Aid Planning and Scheduling
1215 – 1230	Break
	Planning & Management of Projects
1230 - 1300	Project Management Process • Phase One - Project Definition • Phase Two -
	Preliminary Engineering • Phase Three – Justification and Funding • Phase
	Four – Detailed project Planning • Phase Five – Project Execution • Phase Six
	- Project Completion and Close-Out • Phase Seven - Project Review (6
	Months After Completion)
1300 - 1315	Course Conclusion
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1315 – 1415	COMPETENCY EXAM
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

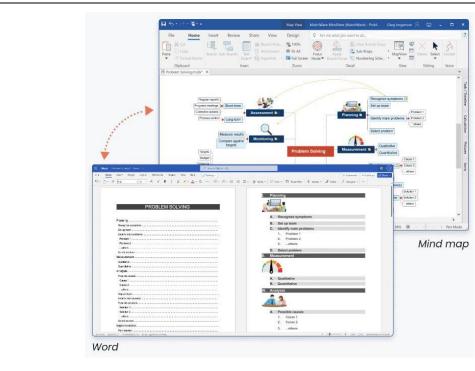

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the "MS Project" and "Mindview Software".

Mindview Software

Course Coordinator

Mari Nakintu, Tel: +971 230 91 714, Email: mari1@haward.org
