# **COURSE OVERVIEW 0E0095 Bulk Carrier Technical & Operational Aspects**

#### **Course Title**

Buk Carrier Technical & Operational Aspects

#### Course Date/Venue

Session 1: June 22-26, 2025/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Session 2: November 17-21, 2025/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

### Course Reference OE0095

## **Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

## **Course Description**

and highly-interactive course This practical includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

This course is designed to provide participants with a detailed and up-to-date overview of Bulk Carrier Technical and Operational Aspects. It covers the bulk carriers and their role in global trade; the bulk carrier structural design and classification; the types of bulk carriers and their configurations; the key equipment and systems on bulk carriers; the load line and stability regulations including regulatory and environmental compliance; the bulk cargo characteristics, dust control and ventilation measures; and the cargo contamination risks and prevention and temperature and moisture considerations.

Further, the course will also discuss the cargo loading, stowage planning, securing and safety measures, unloading operations and best practices; the ballasting and deballasting operations, risk assessment and emergency response in cargo handling; the navigation considerations for bulk carriers and port entry, docking, and berthing operations; the ship stability, damage control and weather-related challenges in bulk carrier operations; and the propulsion and fuel efficiency considerations and bulk carrier automation and digitalization trends.

During this interactive course, participants will learn the structural integrity monitoring, hull maintenance and machinery and engine room maintenance; the safety management systems (SMS) on bulk carriers; the fire hazards in bulk carriers and regulatory inspections and classification society surveys; the bulk carrier pollution prevention and environmental regulations; and the incident investigation and risk mitigation strategies.

#### **Course Objectives**

Upon the successful completion of this course, each participant will be able to: -

- Apply and gain an in-depth knowledge on bulk carrier technical and operational aspects
- Discuss bulk carriers and their role in global trade as well as bulk carrier structural design and classification
- Identify the types of bulk carriers and their configurations and the key equipment and systems on bulk carriers
- Explain load line and stability regulations including regulatory and environmental compliance
- Describe bulk cargo characteristics and apply dust control and ventilation measures, cargo contamination risks and prevention and temperature and moisture considerations
- Carryout cargo loading, stowage planning, securing and safety measures, unloading operations and best practices
- Employ ballasting and deballasting operations as well as risk assessment and emergency response in cargo handling
- Discuss navigation considerations for bulk carriers and apply port entry, docking, and berthing operations
- Carryout ship stability and damage control and assess weather-related challenges in bulk carrier operations
- Discuss propulsion and fuel efficiency considerations and bulk carrier automation and digitalization trends
- Appy structural integrity monitoring, hull maintenance and machinery and engine room maintenance
- Recognize safety management systems (SMS) on bulk carriers and carryout fire hazards in bulk carriers and regulatory inspections and classification society surveys
- Employ bulk carrier pollution prevention and environmental regulations and incident investigation and risk mitigation strategies

#### Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials, conveniently saved in a Tablet PC.

#### Who Should Attend

This course covers systematic techniques and methodologies on bulk carrier technical and operational aspects handling for marine engineers, deck officers (navigational officers), ship owners and operators, fleet managers, cargo superintendents, port and terminal operators, safety officers, marine surveyors, regulatory and compliance personnel.

## **Course Certificate(s)**

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

## **Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations: -

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

## Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Captain Sergey Kole, is an International Expert in Port Operations & Management with over 25 years of onshore and offshore experience within the Oil & Gas, Petroleum and Refinery industry. His expertise widely covers in the areas of Tanker Vetting & Inspection, International Ship and Port Facility Security Code (ISPS) Code, Marine Vetting & Audit Criteria Manual for Tank Ships, Marine & Ship Vetting, Vetting Process & Marine Safety Criteria, Tanker Vetting for Terminals, Ship Vetting, Marine

Terminal Operations & Management, Marine Hazards Prevention & Control, Marine Communication Systems, Marine Safety, Ship Management, Oil Terminal Planning, Vessels Operations, Terminal Management & Support Operations, Oil Spill Contingency & Emergency Response Plan, Qualitative & Quantitative Risk Assessments, Terminal Planning, Oil Tanker Storage Planning, Cargo Transfer Handling, Loading & Discharging, Ballasting, Tank Cleaning, Crude Oil Washing, Ship Handling, Radar Navigation, Navigational Aids, Meteorological Data Review, Sea & Weather Condition Monitoring, ERT Vessel Coordination and Transport & Distribution Carrier. Further, he is well-versed in Sea-going Personnel Human Resource Management, Survival Craft & Rescue Boats, Dynamic Positioning, Anti-Piracy Preparedness & Response, Shipping Maintenance System, Oil & Chemical Tanker, Liquefied Gas Tanker, Inert Gas System, Crude Oil Tanker & Gas Carrier, Offshore Supply Management, Marine Fleet Management & Operations. International Maritime Conventions & Codes, Marine Radar, Port Traffic Control Systems & Instrumentation, H2S Hazard Awareness, Firefighting, Medical Care Onboard, Carriage of Dangerous & Hazardous Substances and Ballast Water & Sediment Management.

During his career life, Captain Sergey has gained his technical and marine expertise through various challenging key positions such as being the Captain, Operations Director, Project Manager, Port Supervisor, Master of General Cargo Ship, Master of Container Ship, Chief Officer, Marine Operations Specialist, Marine Coordinator, On-call Duty Officer, Crewing Consultant, 2nd Officer, Ship Chandler and Senior Instructor/Trainer for several international companies such as ZADCO, AMEC Foster Wheeler, Fircroft Engineering Services, Ltd., Rusalina Yacht Company, Van Oord Offshore, Exxon Neftegaz Ltd (ENL), Jr Shipping, Carisbrooke Shipping, Unicorn Petrol ve Kimya, Q Shipping BV, m/v Tradeport, Miedema Shipping CV, Rah Management BV, Petrobulk Maritime Inc., Empross Lines Ship Management, Melcard Ltd., Aquarian Shell Marine Inc., Mercy Baaba and Square Ltd.

Captain Sergey has a Bachelor's degree in Navigation in Nautical Studies from the Kiev State Academy of Water Transport, Ukraine and holds a Master Mariner (Unlimited) Certificates of Equivalent Competency from the MCA, UK and NSI, Netherlands. Further, he is a Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM) and has delivered various trainings, courses, seminars, workshops and conferences internationally.

#### Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

## **Course Fee**

US\$ 8,000 per Delegate + % VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

## **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

## Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Overview of Bulk Carrier Industry Introduction to Bulk Carriers and Their Role in Global Trade • Types of Bulk Cargoes (Dry, Liquid, Grain, Coal, Ore) • Key Bulk Carrier Routes and Market Trends• Bulk Carrier Operations and Fleet
0930 - 0945	Break
0945 – 1045	Bulk Carrier Structural Design & Classification Hull Structure and Load-Bearing Considerations • Structural Components (Deck, Frames, Bulkheads, Double Bottom) • Classification Society Rules (ABS, DNV, LR, ClassNK) • Structural Reinforcement for Heavy Cargoes
1045 - 1130	Types of Bulk Carriers & Their Configurations Handysize, Handymax, Supramax, Panamax, Capesize, VLOC • Self-Unloading vs. Conventional Bulk Carriers • Gearless vs. Geared Bulk Carriers • Ballast Water Management Considerations
1130 - 1215	Key Equipment & Systems on Bulk Carriers Cargo Hold and Hatch Cover Designs • Ballast Systems and Stability Control • Propulsion and Power Generation Systems • Steering and Navigation Systems
1215 - 1230	Break

1230 - 1330	Load Line & Stability Regulations Understanding the International Load Line Convention • Freeboard, Draft, and Stability Considerations • Calculation of Cargo Load and Displacement • Stability Enhancement Techniques
1330 -1420	Regulatory & Environmental Compliance  SOLAS (Safety of Life at Sea) Regulations for Bulk Carriers • MARPOL (Marine Pollution Prevention) Guidelines • IMO Bulk Carrier Safety Code (BC Code) • Compliance and Safety Policies
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

#### Dav 2

Day 2	
0730 - 0830	Bulk Cargo Characteristics & Handling Procedures  Density, Angle of Repose, and Flow Properties • Dust Control and Ventilation  Measures • Cargo Contamination Risks and Prevention • Temperature and  Moisture Considerations
0830 - 0930	Cargo Loading & Stowage Planning Weight Distribution and Hull Stress Management • Loading Sequences for Different Cargoes • Use of Load Sensors and Monitoring Systems • Cargo Space Preparation and Cleaning Procedures
0930 - 0945	Break
0945 – 1100	Cargo Securing & Safety Measures IMO Code of Safe Practice for Solid Bulk Cargoes (IMSBC Code) • Cargo Lashing and Securing Techniques • Risks of Cargo Liquefaction and Prevention Methods • Structural Damage Prevention During Cargo Operations
1100 – 1230	<ul> <li>Unloading Operations &amp; Best Practices</li> <li>Methods of Discharging (Grabs, Conveyor Belts, Pneumatic Systems) • Risks</li> <li>Associated with High-Density Cargo Unloading • Hold Cleaning and</li> <li>Preparation for Next Cargo • Inspection and Reporting After Discharge</li> </ul>
1230 – 1245	Break
1245 - 1330	Ballasting & Deballasting Operations Role of Ballast in Bulk Carrier Stability • Ballast Water Treatment and IMO Regulations • Sequential vs. Flow-through Ballasting Techniques • Minimizing Structural Stress During Ballast Exchange
1330 -1420	Risk Assessment & Emergency Response in Cargo Handling Common Accidents During Cargo Operations (Shifting, Fires, Explosions) • Handling Cargo Spills and Emergency Cleanup Procedures • Fire Suppression Systems and Firefighting Readiness • Emergency Response and Safety Drills
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3

Navigation Considerations for Bulk Carriers  Challenges of Navigating Large Bulk Carriers  Shallow Water on Maneuverability  Safe Passage Planning in Narrow  Channels
Port Entry, Docking, & Berthing Operations Pilotage and Tug Assistance for Bulk Carriers • Mooring Arrangements and Line Handling Techniques • Challenges of Berthing at Bulk Terminals • Port Safety Regulations
Break
Ship Stability & Damage Control Impact of Cargo Distribution on Stability • Free Surface Effect and Countermeasures • Flooding Scenarios and Stability Recovery Procedures • Damage Control Techniques for Structural Integrity
Weather-Related Challenges in Bulk Carrier Operations  Handling Bulk Carriers in Rough Seas • Weather Routing and Voyage  Optimization • Impact of Ice Conditions on Bulk Carriers • Case Study: Bulk  Carrier Accidents Due to Severe Weather
Break
<b>Propulsion &amp; Fuel Efficiency Considerations</b> Fuel Consumption Optimization Strategies & Role of Exhaust Gas Scrubbers and Emission Control Systems • Alternative Fuels in Bulk Carrier Operations • Approach to Energy Efficiency in Shipping
Bulk Carrier Automation & Digitalization Trends Smart Ship Technologies and Predictive Maintenance • Role of AI in Cargo Optimization and Route Planning • Digital Twin Technology for Bulk Carriers • Digitalization Strategy for Marine Transport
Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
Lunch & End of Day Three

Day 4

Duy +	
0730 – 0830	Structural Integrity Monitoring & Hull Maintenance Corrosion Prevention and Coating Systems • Ultrasonic Thickness Measurement (UTM) for Hull Inspection • Maintenance Strategies for High-Stress Areas • Dry-Docking and Repairs
0830 - 0930	Machinery & Engine Room Maintenance Diesel Engine Performance Monitoring • Lubrication and Cooling System Maintenance • Emergency Generator and Pump System Readiness • Preventive Maintenance Standards
0930 - 0945	Break
0945 – 1100	Safety Management Systems (SMS) on Bulk Carriers  ISM Code Compliance for Bulk Carriers • Safety Culture and Human Factors in Marine Operations • Marine Safety Procedures • Case Studies on Safety Failures and Lessons Learned
1100- 1230	Fire Prevention & Emergency Procedures  Fire Hazards in Bulk Carriers (Spontaneous Combustion, Electrical Fires) •  Fixed and Portable Fire Suppression Systems • Crew Drills and Firefighting Preparedness • Emergency Response Protocols
1230 - 1245	Break

1245 - 1420	Regulatory Inspections & Classification Society Surveys  Port State Control (PSC) Inspections for Bulk Carriers • Flag State and Classification Society Requirements • Compliance with Maritime Regulatory Bodies • Case Study: Bulk Carrier Detentions and Compliance Failures
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

#### Day 5

Day 5	
	Bulk Carrier Pollution Prevention & Environmental Regulations
0730 – 0930	MARPOL Annex V: Cargo Residue and Garbage Disposal • Oil Spill
	Prevention and Response • Ship Recycling and Green Shipping Initiatives •
	Sustainability and Environmental Policy
0930 - 0945	Break
	Bulk Carrier Operations & Best Practices Case Studies
0934 - 1100	Bulk Carrier Fleet and Operational Standards • Terminal Loading/Unloading
	Procedures • Approach to Ship-Shore Interface Safety
	Practical Bulk Carrier Stability & Load Planning Exercise
1100 - 1230	Hands-on Cargo Stowage and Ballasting Simulation • Cargo Weight
1100 - 1230	Distribution Analysis • Free Surface Effect Demonstration • Emergency
	Response Simulation
1230 – 1245	Break
	Incident Investigation & Risk Mitigation Strategies
1245 - 1345	Case Study: Bulk Carrier Grounding and Structural Failure • Case Study:
	Cargo Liquefaction-Induced Capsizing • Risk Analysis and Preventive
	Measures Discussion • Approach to Marine Risk Management • Risk Analysis
	and Preventive Measures Discussion • Approach to Marine Risk Management
1345 – 1400	Course Conclusion
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1400 - 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

# **Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises:-
