

## **COURSE OVERVIEW PE0814** Hydrocracker and Base Oil Process - Basic

#### **Course Title**

Hydrocracker and Base Oil Process - Basic

#### Course Date/Venue

Session 1: February 17-21, 2025/Fujairah Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE

AWAR

Session 2: September 14-18, 2025/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

## **Course Reference**

PE0814

## **Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

### **Course Description**

practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

This course is designed to provide participants with a complete and up-to-date overview of the hydrocracking and hydrotreating process technology. It covers the hydrocracking and hydrotreating reactions; the feed hydrocracking preparation and process; the variables hydrocracking catalyst, process hydrocracking yields; the investment and operating costs and modes of hydrocracker operation; the isocracking-hydrocracking for superior fuels and lubes; and the UOP unicracking process for hydrocracking.

The course will also discuss the hydrotreating catalysts; the naphtha and distillate hydrotreating and aromatics reduction; the reactions, process variables and construction and operating costs; the Chevron lummus global RDS/VRDS hydrotreating-transportation fuels from the bottom of the barrel; the selective hydrogenation processes, UOP unionfining technology, UOP RCD unionfining technology and UOP catalytic dewaxing process; and the UOP unisar process for saturation of aromatics including Chevron lummus alobal ebullated bed bottom-of-the-barrel hydroconversion (LC-fining) process.

### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a comprehensive knowledge on hydrocracking and hydrotreating process technology
- Discuss the hydrocracking and hydrotreating reactions
- Illustrate feed preparation and hydrocracking process
- Identify hydrocracking catalyst, process variables and hydrocracking yields
- Carryout investment and operating costs and modes of hydrocracker operation
- Recognize isocracking-hydrocracking for superior fuels and lubes
- Apply UOP unicracking process for hydrocracking
- Identify hydrotreating catalysts and apply naphtha and distillate hydrotreating and aromatics reduction
- Determine reactions, process variables and construction and operating costs
- Explain chevron lummus global RDS/VRDS hydrotreating-transportation fuels from the bottom of the barrel
- Carryout selective hydrogenation processes, UOP unionfining technology, UOP RCD unionfining technology and UOP catalytic dewaxing process
- Illustrate UOP unisar process for saturation of aromatics including Chevron lummus global ebullated bed bottom-of-the-barrel hydroconversion (LC-fining) process

## **Exclusive Smart Training Kit - H-STK®**

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

#### **Who Should Attend**

This course provides an overview of all significant aspects and considerations of hydrocracking and hydrotreating process technology for all engineering and operations staff. Further, the course is suitable for maintenance, facility integrity, pipelines/piping, quality, Health, Safety and Environmental personnel who are seeking to improve their knowledge and skills on refinery processes and gain exposure on refinery concepts and technology including the operation, safety and control aspects.

#### **Training Methodology**

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### **Course Certificate(s)**

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

#### **Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations: -

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

ACCREDITED PROVIDER

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:-

Mr. Mohammad Hamami, is a Senior Process Engineer with an extensive practical experience within the Oil, Gas, Refinery, Petrochemical and Power industries. His experience covers Clean Fuel Technology & Standards, Clean Fuel Specification, Emission Regulation, Crude Oil Production, Desulphurization, Synthesis Gas Production, Naphtha Isomerization, Diesel Fuel Additives, Storage Tanks Filtration, Fuel Quality Inspection, Process Plant Troubleshooting &

Engineering Problem Solving, Process Equipment Operation, Process Plant Operation, Process Plant Start-up & Commissing, Process Plant Optimization, Oil & Gas Field Operation, Oil Movement, Storage & Troubleshooting, Petroleum Refinery Process, Process Reactor Operation & Troubleshooting, LPG Oil & Gas Operation & Troubleshooting, Crude Oil & LNG Storage, LNG & LPG Plants Gas Processing, Refinery Process Operations Technology, Liquid Bulk Cargo Handling, Gas Conditioning & Processing Technology, Distillation Column Design & Operation and Gasoline & Diesel Fuel Technology. Further he is also well-versed in Refinery Operational Economics & Profitablity, Aromatics Manufacturing Process, Hydrogen Production Operation, Steam Reforming Technology, Gas Treating, Hydro-treating & Hydro-Cracking, Catalyst Material Handling, Gas Sweetening & Sulfur Recovery, Hydro Carbon Dew Point (HCDP) Control, Heat Exchangers & Fired Heaters, Amine Gas Sweetening, Plastic Additives Selection & Application, Crude & Vaccum Process Technology, Flare & Pressure Relief Systems, Stock Management & Tank Dipping Calculation, NGL Recovery & Fractionation, Refrigerant & NGL Extraction and Catalytic Craking & Reforming.

During his long professional carreer, Mr. Mohammad worked as a Refinery Manager, Operations Manager, Section Head/Superintendent and Process Engineer for Process Units, Utilities & Oil Movement in various companies. He has been responsible for a number of technological-driven world-scale hydrocarbon processing projects from beginning to successful start-up.

Mr. Mohammad has a Bachelor degree in Chemical Engineering. He is an active member of the American Institute of Chemical Engineers (AIChE) and has presented technical papers at its several national meetings. He has largely participated in the start-up of seven world-scale process plants which made him an International Expert in Process Plant Start-Up and Oil Movement and a Certified Instructor/Trainer.

#### Course Fee

US\$ 5,500 per Delegate + VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

#### Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

## **Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### Day 1

0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Introduction to Hydrocracking
0930 - 0945	Break
0945 - 1030	Hydrocracking Reactions
1030 - 1130	Feed Preparation
1130 - 1230	The Hydrocracking Process
1230 - 1245	Break
1245 - 1420	Hydrocracking Catalyst
1420 - 1430	Recap
1430	Lunch & End of Day One

## Dav 2

-u, -	
0730 - 0930	Process Variables
0930 - 0945	Break
0945 - 1030	Hydrocracking Yields
1030 - 1130	Investment & Operating Costs
1130 - 1230	Modes of Hydrocracker Operation
1230 - 1245	Break
1245 - 1420	Isocracking-Hydrocracking for Superior Fuels & Lubes
1420 - 1430	Recap
1430	Lunch & End of Day Two

#### Day 3

UOP Unicracking Process for Hydrocracking
Break
Hydrotreating Catalyst
Naphtha & Distillate Hydrotreating
Aromatics Reduction
Break
Reactions
Recap
Lunch & End of Day Three

#### Day 4

0730 - 0930	Process Variables
0930 - 0945	Break
0945 - 1030	Construction & Operating Costs
1030 - 1130	Chevron Lummus Global RDS/VRDS Hydrotreating-Transportation
	Fuels from the Bottom of the Barrel
1130 - 1230	Selective Hydrogenation Processes
1230 - 1245	Break
1245 - 1420	UOP Unionfining Technology
1420 - 1430	Recap
1430	Lunch & End of Day Four

#### Day 5

0730 - 0930	UOP RCD Unionfining Process
0930 - 0945	Break
0945 - 1030	UOP Catalytic Dewaxing Process
1030 - 1130	UOP Unisar Process for Saturation of Aromatics
1130 – 1230	Chevron Lummus Global Ebullated Bed Bottom-of-the-Barrel
	Hydroconversion(LC-Fining) Process
1230 - 1245	Break
1245 - 1345	General Discussion: Question & Answers
1345 - 1400	Course Conclusion
1400 - 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

## **Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises:-
