

# **COURSE OVERVIEW DE0100** Well Control in completion, Workover & Intervention

# **Course Title**

Well Control in completion, Workover & Intervention

# **Course Date/Venue**

Session 1: April 14-18, 2025/Fujairah Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE Session 2: October 05-09, 2025/Boardroom 1, Elite

Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

CEUS

(30 PDHs)

**Course Reference** DE0100

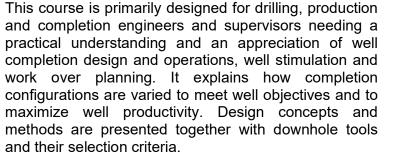

# Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

# **Course Description**

Completion types and design for vertical, horizontal and multilateral wells, design and optimization of tubing based on tubing performance analysis (Inflow performance analysis, liquid and gas hold up during fluid flow and forces on tubing), downhole equipment, tubing accessories, wellhead equipment including sub sea completion. Also, fluid flow through perforations and perforation techniques; communication tests; wireline operations; reservoir stimulation; and hydraulic fracture treatment design and optimization are extensively reviewed. Local case studies are also provided.

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

# **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply systematic techniques in well testing, completion and operations, well stimulation and workover
- Optimize tubing dimensions for maximum production and estimate the pressure • losses in tubing for different rock & fluid properties
- Use different subsurface completion equipments and accessories and select packers and packer settings
- Operate the well head equipments properly and calculate geometries and dimensions casing and tubing hangers
- Identify the different special consideration for horizontal and multilateral completions on wellbore, tubing and casing configuration
- Recognize the components of perforation of oil and gas wells such as completion fishing operations, well stimulation and fracturing, well testing, and well integrity
- Carryout the various procedures of communication tests
- Practice the process of wireline operations
- Discuss the elements of reservoir stimulation and increase the knowledge in understanding of stress and rock properties involved in the simulation techniques

# Exclusive Smart Training Kit - H-STK<sup>®</sup>

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK<sup>®</sup>). The H-STK<sup>®</sup> consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

#### Who Should Attend

This course covers systematic techniques and methodologies on well testing, completion and operation, well stimulation and workover for well and senior petroleum engineers, drilling and senior drilling supervisors, reservoir and senior reservoir engineers, geologists, production and completion engineers and supervisors needing a practical understanding and an appreciation of well completion design and operation, well stimulation and work over planning.

#### Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures 20% Practical Workshops & Work Presentations 30% Hands-on Practical Exercises & Case Studies 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons

DE0100 - Page 2 of 8

# Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

# Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

British Accreditation Council (BAC) BAC

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

#### The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in gualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

# Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

#### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Samer Shukri, BSc, IWCF, is a Senior Drilling & Petroleum Engineer with over 25 years of offshore and onshore experience in the Oil & Gas, Refinery & Petrochemical industries. His wide expertise includes Workovers & Completions, Well Completion Design & Operations, Well Intervention, Well Life Cyle, Well Stimulation & Workover Planning, Workover Practices, Workover Operations, Well Integrity System, Well Control, Oil & Water Wells, Workover/Remedial Operations & Heavy Oil Technology, Plug & Abandonment of Oil & Gas Wells, Petroleum Engineering, Open Hole & Cased Hole Logs,

Petroleum Risk & Decision Analysis, Well Testing Analysis, Stimulation Operations, Coiled Tubing Operations, Coiled Tubing Equipment, Rigless Operations, Reserves Evaluation, Reservoir Fluid Properties, Reservoir Engineering & Simulation Studies, Reservoir Monitoring, Geology & Reservoir Engineering, Artificial Lift Design, Gas Operations, Applied Water Technology, Oil & Gas Production, X-mas Tree & Wellhead Operations & Testing, Wellbore Design & Construction, Drilling Fluids & Solids Control, Drilling Fluids & Cementing Operations, Drilling Practices & Techniques, Well Control & Blow Out Prevention, Stuck Piping & Fishing Operations, Rig Equipment Maintenance & Inspection, Rigging & Lifting Operations, WellCAP Driller, WellCAP Supervisor, Artificial Lift Systems (Gas Lift, ESP and Rod Pumping), Well Cementing, Oil Field Cementing, Production Optimization, PLT Correlation, Slickline Operations, Well Testing, Production Logging, Wireline Logging, Wireline Technology, Wireline Fishing Operations, Project Evaluation & Economic Analysis. Further, he is also well-versed in Marine Environment Protection, Maritime Professional Training, Operational Audit, Improvement, Planning & Management, Climate Change & Emissions Trading Services, International Trade & Shipping, Fitness for Service-API 579, Refining Process & Petroleum Products, OSHA (General Industry & Construction), IOSH (Managing Safely, Working Safely), HSE Standards & Procedures in the Oilfield, HSE Principles, Incident Prevention & Incidents, Working at Height, First Aid, H2S Awareness, Defensive Driving, Risk Assessment, Authorized Gas Tester (AGT), Confined Space Entry (CSE), Root Cause Analysis (RCA), Negotiation & Persuasion Skills, ISO-9001 Quality Management System (QMS), ISO-14001 Environmental Management System (EMS), ISO-45001 Occupational Health and Safety Management System (OHSMS), ISO-17020 Conformity Assessment, ISO/TS-29001 Quality Management System, IOS-50001-Energy Management System (EnMS) and Basic Offshore Safety Induction & Emergency. Currently, he is actively involved in Project Management with special emphasis in commissioning of new wells, completion design, well integrity management, production technology and field optimization, performing conceptual studies, economic analysis with risk assessment and field development planning.

During his career life, Mr. Samer has gained his field experience through his various significant positions and dedication as the Senior Production Engineer, Well Services Department Head, Senior Well Services Supervisor, Senior Well Integrity Engineer, Senior HSE Engineer, Well Services Supervisor, Drilling/Workover Supervisor, International oil & Gas Trainer, Leadership & Management Instructor and Senior Instructor/Trainer from the various international companies such as the ADCO, AI Furat Petroleum Company (AFPC), Syrian Petroleum Company (SPC), Petrotech, Global Horizon-UK, HDTC, Petroleum Engineers Association, STC, Basra University and Velesto Drilling Academy, just to name a few.

Mr. Samer has **Bachelor's** degree in **Petroleum Engineering**. Further, he is an **Accredited IWCF Drilling & Well Intervention Instructor**, a **Certified Instructor/Trainer**, a **Certified Train-the-Trainer** and further delivered innumerable training courses, seminars, conferences and workshops worldwide.

DE0100-04-25|Rev.227|29 January 2025

# Course Fee

US\$ 8,000 per Delegate + VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### Dav 1

Day I	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introductions
0815 - 0830	PRE-TEST
0830 - 0930	Well Completion DesignSingle & Dual Completion Design (Packers, Nipples, Tubing, DHSV's, BlastJoints Flow Couplings, Seal Assemblies, Expansion Joints, WLEG, SlidingSleeves, Ported Nipples)• Planning Essentials Prior to Drilling (Safety,Economics)
0930 - 0945	Break
0945 – 1100	Well Completion Design (cont'd)Wellbore Tubing-Casing Configuration• Completion Procedures (WellCompletion Fluids, Well Control & Damage Prevention)
1100 – 1230	Well Completion Design (cont'd)Work Over Considerations• Artificial Lift Requirements on CompletionDesign
1230 – 1245	Break
1245 – 1420	Well Completion Design (cont'd)Inflow PerformanceCompletion Variations (Primary Completion - Oil &Gas Wells, Multiple Completion, Secondary Recovery Production WellCompletion &Completion & Injection Well Completion)Completion
1420 - 1430	Recap
1430	Lunch & End of Day One

#### Dav 2

0730 - 0930	Interval Selection Consideration & Optimization of Tubing Dimensionsfor Maximum ProductionProduction Mechanism for Different Reservoir TypesConsiderationInflow Performance Relationship (IPR)Effect of PartialPenetration on IPR
0930 - 0945	Break
0945 - 1100	Interval Selection Consideration & Optimization of Tubing Dimensionsfor Maximum Production (cont'd)Typical IPR Case Studies for Both Oil & Gas Reservoirs• Bottom HoleFlowing Pressure Requirements

DE0100 - Page 5 of 8

	Interval Selection Consideration & Optimization of Tubing Dimensions
	for Maximum Production (cont'd)
1100 – 1230	Estimation of Pressure Losses in Tubing for Different Rock & Fluid Properties
	Development of Tubing Performance Curve & Optimization of Tubing
	Dimensions for Maximum Production
1230 – 1245	Break
	Interval Selection Consideration & Optimization of Tubing Dimensions
	for Maximum Production (cont'd)
1245 – 1420	Prediction Rate & Selection of Material Properties Based on Analysis of Forces
	on Tubing of Tubing • Specialized Software's are Used for Case Studies &
	Analysis
1420 – 1430	Recap
1430	Lunch & End of Day Two

### Day 3

Subsurface Completion Equipment & Accessories
Forces on Packers & Tubing Movements • Completion Material Selection •
Completion of Running & Retrieving • Selection Consideration of Packers &
Packer Settings
Break
Subsurface Completion Equipment & Accessories (cont'd)
Tubing Accessories & Subsurface Safety and Flow Control Valves • Typical
Case Studies
Well Head Equipment
<i>Geometries &amp; Dimensions Casing &amp; Tubing Hanger</i> • <i>Well Heads for Topside</i>
& Subsea Completions • Christmas & Subsea Trees
Break
Well Head Equipment (cont'd)
Flow Line, Cokes & Other Control • Valves & Flow Regulating Valves
Recap
Lunch & End of Day Three

#### Day 4

Day 4	
0730 – 0930	Special Consideration for Horizontal & Multilateral CompletionsWellbore, Tubing & Casing Configuration • Well Killing • Tubing SizeSelection • Special Equipment for Horizontal & Multilateral Completions •Running & Operational Procedure of Subsurface Equipment
0930 - 0945	Break
0945 – 1100	Perforation of Oil & Gas WellsCompletion Fishing Operations• Perforation Methods & Equipment• WellPerforating & Cased Hole Logs• Well Stimulation & Fracturing• WellTesting• Well Integrity• Well
1100 - 1230	Perforation of Oil & Gas Wells (cont'd)Basics of Shape Charge & its Penetration Mechanism • Selection & Evaluationof Shape Charge • API Testing Procedure of Shape Charge Penetration •Shape Charge Gun Categories & Their Application

DE0100 - Page 6 of 8

1230 - 1245	Break
1245 – 1420	Perforation of Oil & Gas Wells (cont'd)Special Tools & Operations • Calculation of Flow Through Perforation Tunnels& Estimation Production from the Perforation Interval • Nitrogen Lifting •Coiled Tubing Operations
1420 - 1430	Recap
1430	Lunch & End of Day Four

#### Day 5

Communication Tests
Break
Wireline Operations
Reservoir Stimulation
Introduction to Different Stimulation Techniques • Understanding of Stress &
Rock Properties Involved in the Selection of Stimulation Techniques • Design
Procedure of Hydraulic Fracture Treatment
Break
Reservoir Stimulation (cont'd)
Economic Evaluation of Stimulation Treatment Coupled with a Production •
Model Based on NPV • Specialized Softwares Used for Local Case Studies and
Analysis
Course Conclusion
Using this Course Overview, the Instructor(s) will Brief Participants about the
Course Topics that were Covered During the Course
POST-TEST
Presentation of Course Certificates
Lunch & End of Course

DE0100 - Page 7 of 8

# Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises:-

<u>Course Coordinator</u> Mari Nakintu, Tel: +971 2 30 91 714, Email: <u>mari1@haward.org</u>

DE0100 - Page 8 of 8
