

COURSE OVERVIEW IE0139

Advanced Process Control/Field Device Manager

Course Title

Advanced Process Control /Field Device Manager

Course Date/Venue

Session 1: August 02-06, 2026/Tamra Meeting Room, Al Bandar Rotana Creek, Dubai UAE
Session 2: December 13-17, 2026/Crowne Meeting Room, Crowne Plaza Al Khobar, KSA

Course Reference

IE0139

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

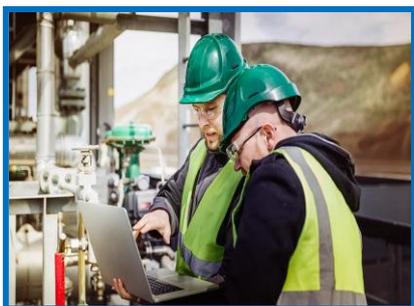

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This APC/FDM course covers the practical application of Advanced Process Control (APC) or Field Device Manager (FDM) systems to a variety of continuous process plants. The course discuss automation and its importance, types of plants and controls, automation hierarchy, control system architecture, instrumentation and control, different types of computer-based control systems including PLCS and DCS. Basic requirements for good operator interface, industrial communication, information interchange, man-machine communication, enterprise level, engineering & commissioning, performance & dependability, dependable control systems, safety & hazard analysis, concepts & implementation of alarm & trip systems, device management protocols and Honeywell field device manager (FDM) will be illustrated during the course.

The course will provide hands-on training sessions in PLC and HMI (OIU and SCADA) programming techniques using one of our state-of-the art Allen Bradley SLC 500, Siemens S7-200, AB Micrologix 1000 (Digital or Analog), AB SLC5/03 and AB WS5610 PLC simulators. Please refer to the last page of this course overview for details of simulators.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a comprehensive knowledge on advanced process control (APC) or field device manager (FDM)
- Explain automation and its importance and identify the various types of plants and controls
- Describe automation hierarchy, control system architecture and control
- Enumerate the different types of computer-based control systems including PLCs and DCSs as well as the basic requirements for good operator interface
- Determine industrial communication, information interchange and man-machine communication
- Recognize enterprise level, engineering, commissioning, performance and dependability
- Carryout dependable control systems, safety and hazard analysis, concepts and implementation of alarm and trip systems
- Discuss device management protocols and Honeywell field device manager (FDM)

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of advanced process control or field device manager for those who are responsible for the selection and implementation of APC or field device manager systems and other process plant control systems. Personnel in technical positions who want to know more about APC or field device manager systems will also benefit from this course.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Course Accreditations

Certificates are accredited by the following international accreditation organizations:

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Fee

US\$ 5,500 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Barry Pretorius is a **Senior Instrumentation Engineer** with almost **30** years of extensive experience within the **Oil, Gas, Petrochemical, Refinery & Power** industries. His expertise widely covers in the areas of **Cyber Security Practitioner, Cyber Security of Industrial Control System, IT Cyber Security Best Practices, Cybersecurity Fundamentals, Ethical Hacking & Penetration Testing, Cybersecurity Risk Management, Cybersecurity Threat Intelligence, OT Whitelisting** for Better Industrial Control System Defense, **NESA Standard and Compliance Workshop, OT, Cyber Attacks Awareness - Malware/Ransom Ware / Virus /Trojan/ Phishing, Information Security Manager, Security System Installation and Maintenance, Security of Distributed Control System (DCS), Process Control, Instrumentation, Safeguarding & Security, Programmable Logic Controller (PLC), Siemens PLC Simatic S7-400/S7-300/S7-200, PLC & SCADA for Automation & Process Control, Artificial Intelligence, Allen Bradley PLC Programing and Hardware Trouble Shooting, Schneider SCADA System, Wonder Ware, Emerson, Honeywell, Honeywell Safety Manager PLC, Yokogawa, Advanced DCS Yokogawa, Endress & Hauser, Field Commissioning and Start up Testing Pre Operations, System Factory Acceptance Test (FAT), System Site Acceptance Test (SAT), SCADA HMI & PLC Control Logic, Implementation, Systems Testing, Commissioning and Startup, Foxboro DCS & Triconics, SIS Systems, Drives, Motion Control, Hydraulics, Pneumatics and Control Systems Engineering, Electrical & Automation Control Systems, HV/MV Switchgear, LV & MV Switchgears & Circuit Breakers, High Voltage Electrical Safety, LV & HV Electrical System, HV Equipment Inspection & Maintenance, LV Distribution Switchgear & Equipment, Electrical Safety, Electrical Maintenance, Transformers, Medium & High Voltage Equipment, Circuit Breakers, Cable & Overhead Line Troubleshooting & Maintenance, Electrical Drawing & Schematics, Voltage Distribution, Power Distribution, Filters, Automation System, Electrical Variable Speed Drives, Power Systems, Power Generation, Diesel Generators, Power Stations, Uninterruptible Power Systems (UPS), Battery Chargers, AC & DC Transmission, CCTV Installation, Data & Fire Alarm System, Evacuation Systems and Electrical Motors & Variable Speed Drives, & Control of Electrical and Electronic devices.**

During Mr. Pretorius’s career life, he has gained his practical experience through several significant positions and dedication as the **Senior Technical Analyst, Team Leader, Pre-operations Startup Engineer, Automation System’s Software Manager, Automation System’s Senior Project Engineer, PLC Specialist, Site Manager, Senior Project & Commissioning Engineer, Technical Director, Project Engineer, Radio Technician, A T E Technician and Senior Instructor/Trainer** from various companies like the **ADNOC Sour Gas, Ras Al Khair Aluminum Smelter, Johnson Matthey Pty. Ltd, Craigcor Engineering, Unitronics South Africa Pty (Ltd), Bridgestone/Firestone South Africa Pty (Ltd) and South African Defense Force.**

Mr. Pretorius’s has a Higher Diploma in **Electrical Engineering Heavy Current**. Further, he is a **Certified Instructor/Trainer** and delivered numerous trainings, courses, workshops, seminars and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0900	Automation & Its Importance
0900 – 0930	Types of Plants & Controls Continuous Processes • Discrete Processes • Mixed Processes
0930 – 0945	Break
0945 – 1230	Automation Hierarchy
1230 – 1245	Break
1245 – 1420	Control System Architecture
1420 – 1430	Recap
1430	Lunch & End of Day One

Day 2

0730 – 0930	Instrumentation Binary & Analogue Instruments • Instrumentation Diagrams • Measurement Instrumentation for Flow, Level, Temp, Pressure
0930 – 0945	Break
0945 – 1100	Instrumentation (cont'd) Instrument Calibration Concepts • Final Control Elements (Control Valves,- Actuators, Control Valve Instrumentation)
1100 – 1230	Control Plant Modeling • Loop Dynamics • PID Controller • Various Forms of PID Algorithms • Optimal Tuning Theory and Calculations
1230 – 1245	Break
1245 – 1420	Control (cont'd) Transforming Process Operating Information into Controller Tuning • Identifying Process Dynamics based on DCS Trends and Historical Data • Nested Controllers • Impact of Control Valves on Control Loop Performance
1420 - 1430	Recap
1430	Lunch & End of Day Two

Day 3

0730 – 0930	Different Types of Computer-Based Control Systems including PLCs & DCSs as well as Basic Requirements for Good Operator Interface PLCs Functions & Construction • DCS Attributes & Features • Continuous & Discrete Control • IEC 61131 Languages
0930 – 0945	Break
0945 – 1100	Industrial Communication Field Bus Principles • Field Bus Operation • Physical Layer (Media & Wiring) • Link Layer (Determinism & Redundancy) • Application Layer (Shared Memory & Messages Paradigm)
1100 – 1230	Information Interchange Device Access Protocols: HART • OPC
1230 – 1245	Break

1245 – 1420	Man-machine Communication Hardware & Software Structure • Tools
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4

0730 – 0930	Enterprise Level Enterprise Resource Planning
0930 – 0945	Break
0945 – 1100	Engineering & Commissioning Life Cycle • Project
1100 – 1230	Performance & Dependability Real-Time & Performance Evaluation
1230 – 1245	Break
1245 – 1420	Dependable Control Systems Dependability, Overview & Definitions • Dependability Evaluation
1420 – 1430	Recap
1430	Lunch & End of Day Four

Day 5

0730 – 0930	Safety & Hazard Analysis Fault Tolerance • Reliability & Safety • Fault Tolerance
0930 – 0945	Break
0945 – 1100	Concepts & Implementation of Alarm & Trip Systems
1100 – 1230	Device Management Protocols
1230 – 1245	Break
1245 – 1345	Honeywell Field Device Manager (FDM)
1345 – 1400	POST-TEST
1400 – 1415	Course Conclusion
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

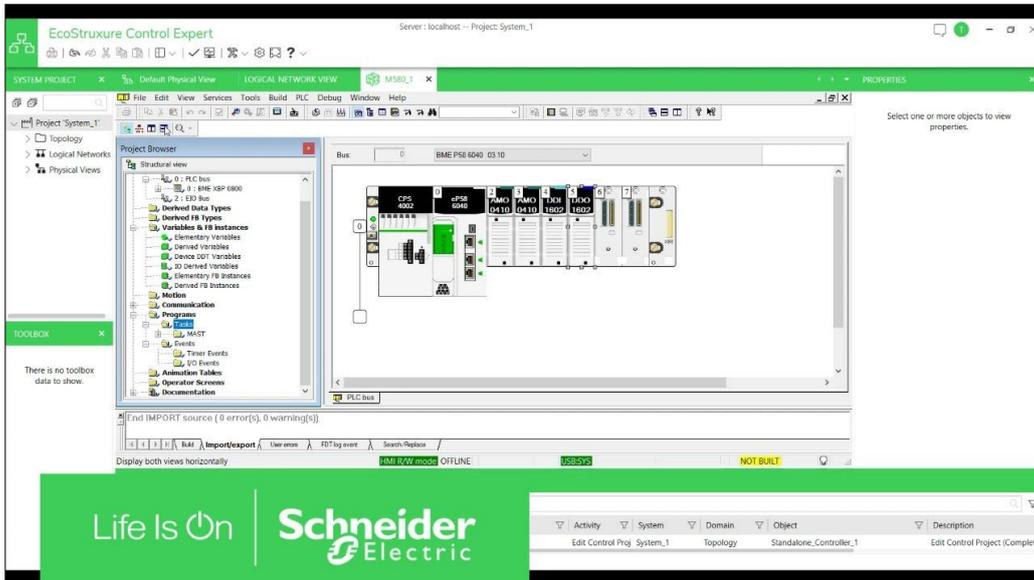

Simulator (Hands-on Practical Sessions)

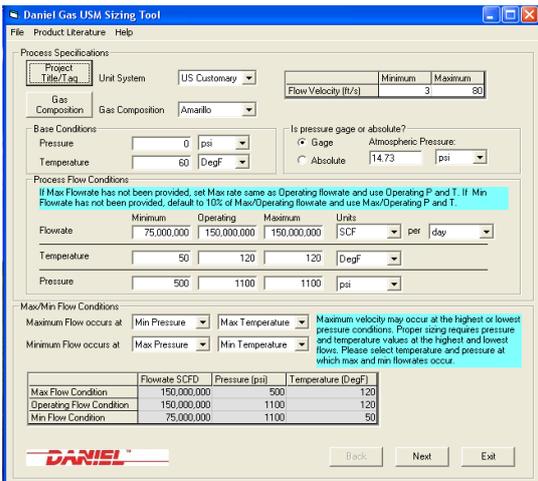

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using one of our state-of-the-art simulators “Modicon M340”, “EcoStruxure Expert Classic”, “Gas Ultrasonic Meter Sizing Tool”, “Liquid Turbine Meter and Control Valve Sizing Tool”, “Liquid Ultrasonic Meter Sizing Tool”, “Orifice Flow Calculator” and “Automation Simulator”.

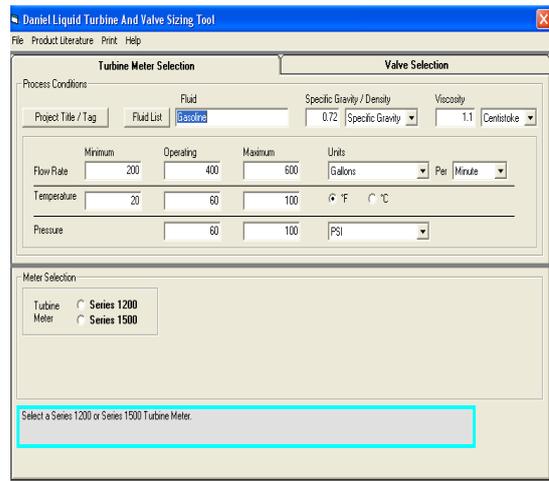

Modicon M340

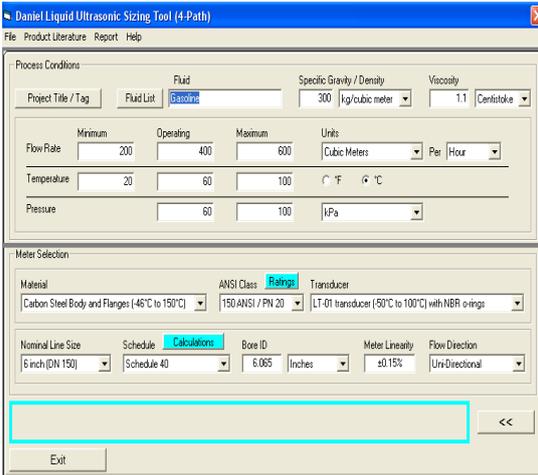

EcoStruxure Expert Classic

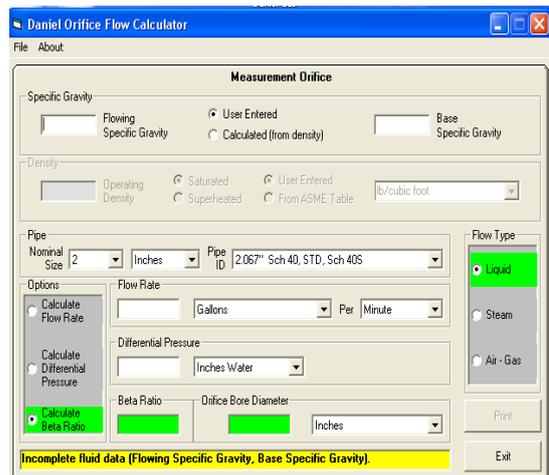

Gas Ultrasonic Meter (USM) Sizing Tool Simulator

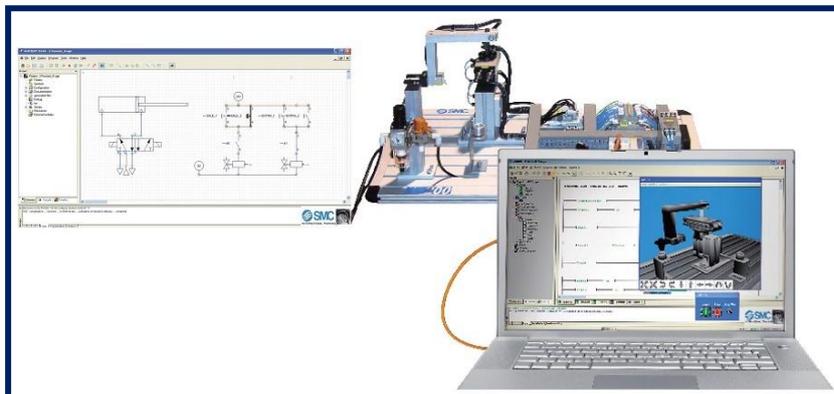

Liquid Turbine Meter and Control Valve Sizing Tool Simulator

Liquid Ultrasonic Meter Sizing Tool Simulator

Orifice Flow Calculator Simulator

AutoSIM – 200 Automation Simulator
