

**COURSE OVERVIEW IE0273**  
**Process Controller, Control Loop & Valve Tuning**

**Course Title**

Process Controller, Control Loop & Valve Tuning

**Course Date/Venue**

Session 1: January 18-22, 2026/Tamra Meeting Room, Al Bandar Rotana Creek, Dubai UAE  
 Session 2: July 19-23, 2026/Crowne Meeting Room, Crowne Plaza Al Khobar, KSA

**Course Reference**

IE0273

**Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

**Course Description**

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.***

This course is designed to provide an introduction to process control to engineers and other technical staff. It teaches the base fundamentals, as well as open and closed loop tuning methods. The course is developed with field tuning in mind, not control design.

The course will discuss the control fundamentals and terminology including the principles, control loop as well as the various types and right selection of control valve and describes the process control methods and characteristics of control valve.

It illustrates the different tuning rules available and explains the fundamentals of control systems, proper tuning of PID controllers, the concepts and application of feed forward control, auto tuning and new developments and troubleshooting tuning.

The various types of control valves, actuators and valve selection will also be discussed during the course.

### Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a basic knowledge on process controller, control loop and valve tuning
- Discuss the control fundamentals and terminology including the principles, control loop as well as the various types and right selection of control valve
- Describe the process control methods and characteristics of control valve
- Illustrate the different tuning rules available and explain the fundamentals of control systems
- Demonstrate the proper tuning of PID controllers and the concepts and application of feed forward control
- Identify auto tuning and new developments and employ good practices and troubleshooting tuning
- Discuss the various types of control valves, actuators and valve selection

### Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

### Who Should Attend

This course provides an overview of all significant aspects and considerations of process controller, control loop & valve tuning for engineers and other technical staff who are willing to learn more about single loop controllers, PID and tuning. The course explains the essence of feedback control without going in-depth into math.

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Barry Pretorius** is a **Senior Instrumentation Engineer** with almost **30 years** of extensive experience within the **Oil, Gas, Petrochemical, Refinery & Power** industries. His expertise widely covers in the areas of **Cyber Security** Practitioner, **Cyber Security** of Industrial Control System, **IT Cyber Security** Best Practices, **Cybersecurity** Fundamentals, **Ethical Hacking & Penetration Testing**, **Cybersecurity** Risk Management, **Cybersecurity** Threat Intelligence, **OT Whitelisting** for Better Industrial Control System Defense, **NESA** Standard and Compliance Workshop, **OT, Cyber Attacks** Awareness - Malware/Ransom Ware / Virus /Trojan/ Phishing, **Information Security Manager**, **Security System** Installation and Maintenance, Security of Distributed Control System (**DCS**), Process Control, Instrumentation, Safeguarding & Security, Programmable Logic Controller (**PLC**), **Siemens PLC** Simatic S7-400/S7-300/S7-200, **PLC & SCADA** for Automation & Process Control, **Artificial Intelligence**, **Allen Bradley PLC** Programing and Hardware Trouble Shooting, Schneider **SCADA System**, **Wonder Ware**, **Emerson**, **Honeywell**, **Honeywell** Safety Manager PLC, **Yokogawa**, Advanced **DCS Yokogawa**, **Endress & Hauser**, Field Commissioning and Start up Testing Pre Operations, System Factory Acceptance Test (**FAT**), System Site Acceptance Test (**SAT**), **SCADA HMI & PLC** Control Logic, Implementation, Systems Testing, Commissioning and Startup, **Foxboro DCS & Triconics**, **SIS** Systems, **Drives**, Motion Control, **Hydraulics**, **Pneumatics** and **Control Systems** Engineering, **Electrical & Automation Control Systems**, **HV/MV Switchgear**, **LV & MV Switchgears & Circuit Breakers**, **High Voltage Electrical Safety**, **LV & HV Electrical System**, **HV Equipment** Inspection & Maintenance, **LV Distribution Switchgear & Equipment**, **Electrical Safety**, **Electrical** Maintenance, **Transformers**, **Medium & High Voltage Equipment**, **Circuit Breakers**, **Cable & Overhead Line** Troubleshooting & Maintenance, **Electrical Drawing & Schematics**, **Voltage Distribution**, **Power Distribution**, **Filters**, **Automation System**, **Electrical Variable Speed Drives**, **Power Systems**, **Power Generation**, **Diesel Generators**, **Power Stations**, Uninterruptible Power Systems (**UPS**), **Battery Chargers**, **AC & DC Transmission**, **CCTV** Installation, **Data & Fire Alarm** System, **Evacuation** Systems and **Electrical Motors & Variable Speed Drives**, & Control of Electrical and Electronic devices.

During Mr. Pretorius's career life, he has gained his practical experience through several significant positions and dedication as the **Senior Technical Analyst**, **Team Leader**, **Pre-operations Startup Engineer**, **Automation System's Software Manager**, **Automation System's Senior Project Engineer**, **PLC Specialist**, **Site Manager**, **Senior Project & Commissioning Engineer**, **Technical Director**, **Project Engineer**, **Radio Technician**, **A T E Technician** and **Senior Instructor/Trainer** from various companies like the **ADNOC Sour Gas**, **Ras Al Khair Aluminum Smelter**, **Johnson Matthey Pty. Ltd**, **Craigcor Engineering**, **Unitronics South Africa Pty (Ltd)**, **Bridgestone/Firestone South Africa Pty (Ltd)** and **South African Defense Force**.

Mr. Pretorius's has a Higher Diploma in **Electrical Engineering Heavy Current**. Further, he is a **Certified Instructor/Trainer** and delivered numerous trainings, courses, workshops, seminars and conferences internationally.

### **Course Fee**

**US\$ 5,500** per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### **Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1**

0730 – 0800	<i>Registration &amp; Coffee</i>
0800 – 0815	<i>Welcome &amp; Introduction</i>
0815 – 0830	<b>PRE-TEST</b>
0830 – 0930	<b>Control Fundamentals</b> <i>Terminology • Principles of Control • Basic Control Loop</i>
0930 – 0945	<i>Break</i>
0945 – 1100	<b>Control Fundamentals (cont'd)</b> <i>Advanced Control Loop • Control Algorithm • Control System</i>
1100 – 1215	<b>Control Valve Types</b> <i>Butterfly • Eccentric • Rotary Plug • Ball • Plug • Linear Valves • Globe • Cage • Double Port</i>
1215 – 1230	<i>Break</i>
1230 – 1420	<b>Control Valve Types (cont'd)</b> <i>How to Select the Right Valve?</i>
1420 – 1430	<b>Recap</b>
1430	<i>Lunch &amp; End of Day One</i>

#### **Day 2**

0730 – 0930	<b>Process Control Methods</b> <i>Open Loop • Process Behaviour • Time Lags • Selection of Type of Controller • Proportional</i>
0930 – 0945	<i>Break</i>
0945 – 1100	<b>Process Control Methods (cont'd)</b> <i>Integral • Derivative • Feedback • Cascade • Ratio • Feed Forward</i>
1100 – 1215	<b>Control Valve Characteristics</b> <i>Selection of Flow Characteristics • Sizing Steps • Classification</i>
1215 – 1230	<i>Break</i>
1230 – 1420	<b>Control Valve</b> <i>Cavitation • Flashing • Noise</i>
1420 – 1430	<b>Recap</b>
1430	<i>Lunch &amp; End of Day Two</i>

**Day 3**

0730 – 0930	<b>Different Tuning Rules Available</b> Overshoot • Lambda Tuning • Trial Tuning
0930 – 0945	Break
0945 – 1100	<b>Different Tuning Rules Available</b> Cohen Coon Tuning • Process Controlability • Suggestions & Rules of Thumb
1100 – 1215	<b>Fundamentals of Control Systems</b> On-Off Control • Cascade • Ratio • FF • FB
1215 – 1230	Break
1230 – 1420	<b>Fundamentals of Control Systems (cont'd)</b> Prop. Band • Integral • Derivative • Direct/Reverse
1420 – 1430	<b>Recap</b>
1430	Lunch & End of Day Three

**Day 4**

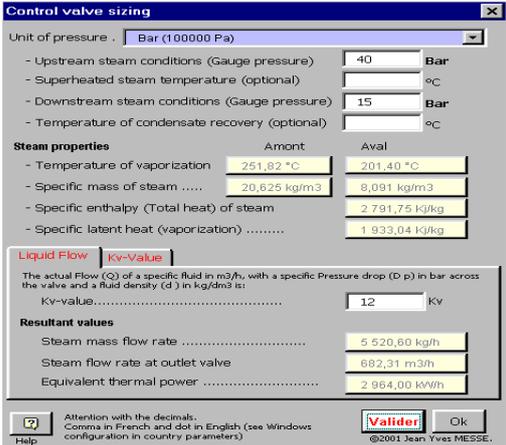

0730 – 0930	<b>Tuning of PID Controllers</b> Open Loop • Ziegler Nichols
0930 – 0945	Break
0945 – 1100	<b>Tuning of PID Controllers (cont'd)</b> Continuing Cycling Method • Response Lags • Closed Loop Control
1100 – 1215	<b>VIDEO Presentation</b> Control Tuning
1215 – 1230	Break
1230 – 1420	<b>Concepts &amp; Application of Feed Forward Control</b>
1420 – 1430	<b>Recap</b>
1430	Lunch & End of Day Four

**Day**

0730 – 0930	<b>Auto Tuning &amp; New Developments</b>
0930 – 0945	Break
0945 – 1100	<b>Good Practices &amp; Troubleshooting Tuning</b>
1100 – 1215	<b>Good Practices &amp; Troubleshooting Tuning (cont'd)</b>
1215 – 1230	Break
1230 – 1345	<b>Types of Control Valves, Actuators &amp; Valve Selection</b>
1345 – 1400	<b>Course Conclusion</b>
1400 – 1415	<b>POST-TEST</b>
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

### Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art simulators “Valve Sizing Software”, “Valve Software 3.0”, “Valvestar 7.2 Software” and “PRV2SIZE Software”.

**Control valve sizing**

Unit of pressure : Bar (100000 Pa)

Upstream steam conditions (Gauge pressure) : 40 Bar

Superheated steam temperature (optional) : °C

Downstream steam conditions (Gauge pressure) : 15 Bar

Temperature of condensate recovery (optional) : °C

**Steam properties**

Property	Amount	Aval
Temperature of vaporization	251,82 °C	201,40 °C
Specific mass of steam	20,625 kg/m <sup>3</sup>	8,091 kg/m <sup>3</sup>
Specific enthalpy (Total heat) of steam	2 791,75 kJ/kg	
Specific latent heat (vaporization)	1 933,04 kJ/kg	

**Liquid Flow** | Kv-Value

The actual Flow (Q) of a specific fluid in m<sup>3</sup>/h, with a specific Pressure drop (D p) in bar across the valve and a fluid density (d) in kg/dm<sup>3</sup> is:

Kv-value : 12 Kv

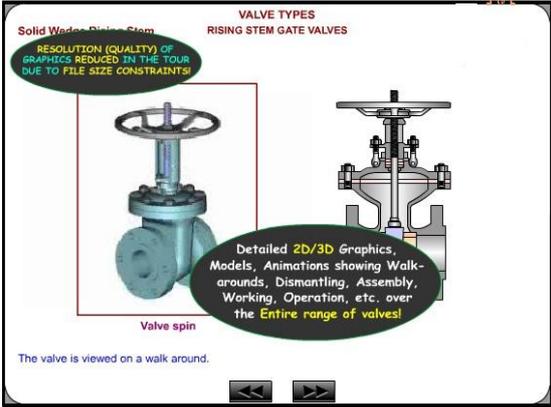

**Resultant values**

Steam mass flow rate	5 520,60 kg/h
Steam flow rate at outlet valve	682,31 m <sup>3</sup> /h
Equivalent thermal power	2 964,00 kW/h

Attention with the decimals. Comma in French and dot in English (see Windows configuration in country parameters)

Validier OK

©2001 Jean-Yves MESSE

**VALVE TYPES**

RISING STEM GATE VALVES

Solid Welder Rising Stem

RESOLUTION (QUALITY) OF GRAPHICS REDUCED IN THE TOUR DUE TO FILE SIZE CONSTRAINTS

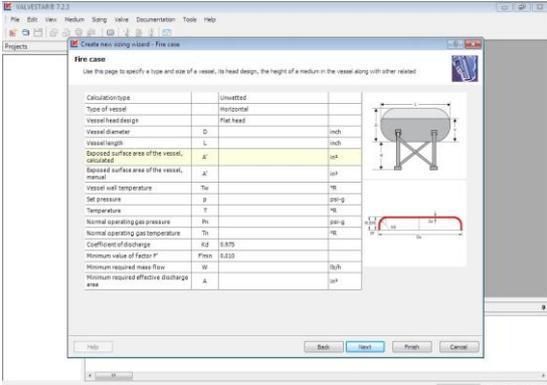

Detailed 2D/3D Graphics Models, Animations showing Walk-arounds, Dismantling, Assembly, Working, Operation, etc. over the Entire range of valves!

Valve spin

The valve is viewed on a walk around.

**Valve Sizing Software**

**Valve Software 3.0**

**Valvestar 7.2 Software**

**PRV<sup>2</sup>SIZE Software**

### Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: [mari1@haward.org](mailto:mari1@haward.org)
