

COURSE OVERVIEW TM0790
Certified Reliability Engineer (CRE)
American Society for Quality (ASQ)
Exam Preparation Training

Course Title

Certified Reliability Engineer (CRE): American Society for Quality (ASQ) - Exam Preparation Training

Course Date/Venue

Session 1: February 01-05, 2026/Crowne Meeting Room, Crowne Plaza Al Khobar, Al Khobar, KSA
 Session 2: September 06-10, 2026/Tamra Meeting Room, Al Bandar Rotana Creek, Dubai UAE

Course Reference

TM0790

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

Reliability engineers are professionals who understand the principles of performance evaluation and prediction to improve product/systems safety, reliability, and maintainability. This course complies with the Body of Knowledge (BOK) specified for ASQ's Reliability Engineer certification, which includes reliability fundamentals covering leadership foundations and reliability foundations; the benefits of reliability engineering; the supplier reliability assessments and performance monitoring; the basic reliability terminology; the corrective and preventive action, root cause analysis, six sigma methodologies, systems engineering and integration.

During this interactive course, participants will learn the risk management identification, risk management analysis and risk management mitigation; the basic concepts and data management of probability and statistics for reliability; the reliability, planning, testing and modelling; and the lifecycle reliability covering reliability design techniques, parts and system development and maintainability.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Prepare for the next ASQ CRE exam and have enough knowledge and skills to pass such exam in order to be certified as a “*Certified Reliability Engineer (CRE)*” from an internationally recognized Accreditation Body (American Society for Quality – ASQ)
- Discuss reliability fundamentals covering leadership foundations and reliability foundations
- Identify the benefits of reliability engineering and carryout supplier reliability assessments and performance monitoring
- Define the basic reliability terminology and perform corrective and preventive action, root cause analysis, six sigma methodologies, systems engineering and integration
- Employ risk management identification, risk management analysis and risk management mitigation
- Recognize the basic concepts and data management of probability and statistics for reliability
- Employ reliability, planning, testing and modelling
- Illustrate lifecycle reliability covering reliability design techniques, parts and system development and maintainability

Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

Who Should Attend

This course is essential for those who desire to reinforce their skills, knowledge and capacity to understand the reliability of the organizational excellence body of knowledge in preparation for taking ASQ certified reliability manager examination. Further, the course is also beneficial for reliability managers, reliability engineers, maintenance managers, maintenance engineers, HSE managers, HSE engineers, safety engineers, quality engineers, quality auditors, process engineers, quality managers, instrumentation & control engineers and those who are primarily involved in implementing reliability, quality and compliance within their organizations.

Exam Eligibility & Structure

- You must have eight years of on-the-job experience in one or more of the areas of the Certified Reliability Engineer Body of Knowledge
- A minimum of three years of this experience must be in a decision-making position. “Decision making” is defined as the authority to define, execute, or control projects/processes and to be responsible for the outcome. This may or may not include management or supervisory positions
- If you are now or were previously certified by ASQ as:-
 - Quality Engineer
 - Quality Auditor
 - Software Quality Engineer
 - Software Quality Professional or,
 - Manager of Quality/Organizational Excellence, experience used to qualify for certification in these fields applies to certification as a Reliability Engineer
- Candidate who have completed a degree from a college, university, or technical school with accreditation accepted by ASQ, part of the eight-year experience requirement will be waived, as follows (only one of these waivers may be claimed):-
 - Diploma from a technical or trade school—one year will be waived
 - Associate’s degree—two years waived
 - Bachelor’s degree—four years waived
 - Master’s or doctorate—five years waived

Degrees or diplomas from educational institutions outside the United States must be equivalent to degrees from U.S. educational institutions

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

ASQ-CRE Certificate(s)

- (1) ASQ-CRE certificates will be issued to participants who have successfully passed the ASQ-CRE examination.

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ASQ accredited Continuing Education Units (CEUs) earned during the course

Howard Technology Middle East
Continuing Professional Development (HTME-CPD)

CEU Official Transcript of Records

TOR Issuance Date: 14-Nov-23
HTME No: 74881
Participant Name: Waleed Al Habeeb

Program Ref.	Program Title	Program Date	No. of Contact Hours	CEUs
REG017	Certified Maintenance & Reliability Professional (CMRP) - Silver Exam Preparation Training	November 10-14, 2023	30	3.0

Total No. of CEUs Earned as of TOR Issuance Date: **3.0**

TRUE COPY
Jury Castillo
Academic Director

Howard Technology is accredited by:
BAC, IACET, ilm, etc.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Dimitry Rovas, CEng, MSc, PMI-PMP, SMRP-CMRP is a **Senior Mechanical & Maintenance Engineer** with extensive industrial experience in **Oil, Gas, Power and Utilities** industries. His expertise includes **Pipeline** System Design, Construction, Maintenance and Repair, Facilities & **Pipeline** Integrity Assessment, **Pipeline** Welding Practices, Internal **Corrosion of Pipelines**, **Pipeline Integrity Management & Risk Assessment**, **Thermal Insulation**, **Insulation Standards & Regulations**, **Insulation Materials & Selection**, **Piping System Insulation**, **Insulation Installation** Techniques, **Insulation** Inspection & Quality Control, **Insulation** Thickness Calculation, **Insulation & Corrosion Protection**, **Heat Exchanger & Boiler Insulation**, **Tanks & Vessels Insulation**, **Pipeline & Piping Insulation**, **Insulation**

Testing & Quality Assurance, **Insulation** Maintenance & Repair, **Insulation** Retrofitting, **Impulse Tube** Installation & Inspection, **Parker Compression Fittings**, **Pipes & Fittings**, **PSV** Inspection, **Boiler** Operation, Maintenance & Inspection, **Root Cause Failure Analysis**, **Tank Design & Engineering**, **Tank Shell**, **Tanks & Tank Farms**, **Vacuum Tanks**, **Gas Turbine** Operating & Maintenance, **Diesel Engine**, **Engine Cycles**, **Governors & Maintenance**, **Crankshafts & Maintenance**, **Lubrication** System Troubleshooting & Maintenance, **Engines/Drivers**, **Motor** Failure Analysis & Testing, **Motor** Predictive Maintenance, **Engine** Construction & Maintenance, **HP Fuel Pumps & Maintenance**, **Fired Equipment** Maintenance, **Combustion Techniques**, **Process Heaters**, **Glass Reinforced Epoxy (GRE)**, **Glass Reinforced Pipes (GRP)**, **Glass Reinforced Vent (GRV)**, **Mechanical Pipe Fittings**, **Flange Joint Assembly**, **Adhesive Bond Lamination**, **Butt Jointing**, **Joint & Spool Production**, **Isometric Drawings**, **Flange Assembly Method**, **Fabrication & Jointing**, **Jointing & Spool Fabrication**, **CAESAR**, **Pipe Stress Analysis**, **Pipe Cuttings**, **Flange Bolt Tightening** Sequence, **Hydro Testing**, **Pump** Technology, **Fundamentals of Pumps**, **Pump** Selection & Installation, **Centrifugal Pumps & Troubleshooting**, **Reciprocating & Centrifugal Compressors**, **Screw Compressor**, **Compressor** Control & Protection, **Gas & Steam Turbines**, **Turbine** Operations, **Gas Turbine** Technology, **Valves**, **Process Control Valves**, **Bearings & Lubrication**, **Advanced Machinery Dynamics**, **Rubber Compounding**, **Elastomers**, **Thermoplastic**, **Industrial Rubber Products**, **Rubber** Manufacturing Systems, **Heat Transfer**, **Vulcanization Methods**, **Process Plant Shutdown & Turnaround**, **Professional Maintenance Planner**, **Advanced Maintenance Management**, **Maintenance Optimization & Best Practices**, **Maintenance Auditing & Benchmarking**, **Material Cataloguing**, **Reliability** Management, **Rotating Equipment**, **Energy Conservation**, **Energy Loss Management** in Electricity Distribution Systems, **Energy Saving**, **Thermal Power Plant Management**, **Thermal Power Plant** Operation & Maintenance, **Heat Transfer**, **Machine Design**, **Fluid Mechanics**, **Heating & Cooling Systems**, **Heat Insulation Systems**, **Heat Exchanger & Cooling Towers**, **Mechanical Erection**, **Heavy Rotating Equipment**, **Material Unloading & Storage**, **Commissioning & Start-Up**. Further, he is also well-versed in MS project & AutoCAD, EPC Power Plant, Power Generation, Combined Cycle Powerplant, Leadership & Mentoring, Project Management, Strategic Planning/Analysis, Construction Management, Team Formation, Relationship Building, Communication, Reporting and Six Sigma. He is currently the **Project Manager** wherein he is managing, directing and controlling all activities and functions associated with the domestic heating/cooling facilities projects.

During his life career, Mr. Rovas has gained his practical and field experience through his various significant positions and dedication as the **EPC Project Manager**, **Field Engineer**, **Thermal Insulation Engineer**, **Mechanical Engineer**, **Preventive Maintenance Engineer**, **Senior Thermal Insulation Technician**, **Researcher**, **Instructor/Trainer**, **Telecom Consultant** and **Consultant** from various companies such as the Podaras Engineering Studies, Metka and Diadikasia, S.A., **Hellenic Petroleum Oil Refinery** and COSMOTE.

Mr. Rovas has a **Master's** degree in **Energy Production & Management** and **Mechanical Engineering** from the **National Technical University of Athens (NTUA)**, **Greece**. Further, he is a **Certified Instructor/Trainer**, a **Certified Maintenance and Reliability Professional (CMRP)** from the Society of Maintenance & Reliability Professionals (**SMRP**), **Certified Project Management Professional (PMI-PMP)**, **Certified Six Sigma Black Belt**, **Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership & Management (ILM)**, **Certified Construction Projects Contractor**, **Certified Energy Auditor** and a **Chartered Engineer**. Moreover, he is an active member of **American Society for Quality**, **Project Management Institute (PMI)**, **Body of Certified Energy Auditors** and **Technical Chamber of Greece**. He has further received various recognition and awards and delivered numerous trainings, seminars, courses, workshops and conferences internationally.

Training Fee

US\$ 5,750 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Exam Fee

US\$ 715 per Delegate + **VAT**.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0930	Reliability Fundamentals: Leadership Foundation Benefits of Reliability Engineering • Interrelationship of Safety, Quality & Reliability • Reliability Engineer Leadership Responsibilities • Reliability Engineer Role & Responsibilities in the Product Lifecycle • Function of Reliability in Engineering • Ethics in Reliability Engineering • Supplier Reliability Assessments • Performance Monitoring
0930 – 0945	Break
0945 – 1100	Reliability Fundamentals: Reliability Foundations Basic Reliability Terminology • Drivers of Reliability Requirements & Targets • Corrective & Preventive Action • Root Cause Analysis • Product Lifecycle Engineering Stages
1100 – 1230	Reliability Fundamentals: Reliability Foundations (cont'd) Economics of Product Maintainability & Availability • Cost of Poor Reliability • Quality Triangle • Six Sigma Methodologies • Systems Engineering & Integration
1230 – 1245	Break
1245 – 1400	Risk Management Identification Risk Management Techniques • Types of Risk
1400 – 1410	Recap
1410 – 1430	Quiz
1430	Lunch & End of Day One

Day 2

0730 – 0830	Review of Day 1
0830 – 0930	Risk Management Analysis Fault Tree Analysis (FTA) • Failure Modes & Effects Analysis (FMEA) • Common Mode Failure Analysis • Hazard Analysis • Risk Matrix • System Safety
0930 – 0945	Break
0945 – 1100	Risk Management Mitigation Strategies to Minimize Risk • Product Improvement • End of Life Considerations
1100 – 1230	Probability & Statistics for Reliability: Basic Concepts Basic Statistics • Basic Probability Concepts • Probability Distributions • Probability Functions

1230 – 1245	Break
1245 – 1400	Probability & Statistics for Reliability: Basic Concepts (cont'd) Sampling Plans for Statistics & Reliability Testing • Statistical Process Control (SPC) & Process Capability Studies (C_p , C_{pk}) • Confidence & Tolerance Intervals
1400 – 1410	Recap
1410 – 1430	Quiz
1430	Lunch & End of Day Two

Day 3

0730 – 0830	Review of Day 2
0830 – 0930	Probability & Statistics for Reliability: Data Management Sources & Uses of Reliability Data • Types of Data • Data Collection Methods
0930 – 0945	Break
0945 – 1100	Probability & Statistics for Reliability: Data Management (cont'd) Data Summary & Reporting • Failure Analysis Methods • Failure Reporting, Analysis & Corrective Action System (FRACAS)
1100 – 1230	Reliability Planning Reliability Test Strategies • Environmental & Conditions of Use Factors • Failure Consequences • Failure Criteria • Test Environment
1230 – 1245	Break
1245 – 1400	Reliability Testing Testing • Accelerated Life Tests • Stress Screening • Qualification/Demonstration Testing • Degradation • Software Testing
1400 – 1410	Recap
1410 – 1430	Quiz
1430	Lunch & End of Day Three

Day 4

0730 – 0830	Review of Day 3
0830 – 0930	Reliability Modeling Reliability Block Diagrams & Models • Physics of Failure (Pof) & Failure Mechanisms • Failure Models
0930 – 0945	Break
0945 – 1100	Reliability Modeling (cont'd) Reliability Prediction Methods • Design Prototyping
1100 – 1230	Lifecycle Reliability: Reliability Design Techniques Design Evaluation Techniques (Validation & Verification) • Stress-Strength Analysis • Design of Experiments (DOE) • Reliability Optimization
1230 – 1245	Break
1245 – 1400	Lifecycle Reliability: Reliability Design Techniques (cont'd) Human Factors • Design for X (DFX) • Design for Reliability (DfR)
1400 – 1410	Recap
1410 – 1430	Quiz
1430	Lunch & End of Day Four

Day 5

0730 – 0800	Review of Day 4
0800 – 0930	Lifecycle Reliability: Parts & Systems Development Materials & Components Selection Techniques
0930 – 0945	Break
0945 – 1100	Lifecycle Reliability: Parts & Systems Development (cont'd) Parts Standardization & System Simplification
1100 – 1230	Lifecycle Reliability: Maintainability Maintenance Strategies • Preventive Maintenance (PM) Analysis
1230 – 1245	Break
1245 – 1345	Lifecycle Reliability: Maintainability (cont'd) Corrective Maintenance Analysis
1345 – 1400	Course Conclusion
1400 – 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

MOCK Exam

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward's Portal. Each participant will be given a username and password to log in Haward's Portal for the MOCK exam during the 30 days following the course completion. Each participant has only one trial for the MOCK exam within this 30-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

Book(s)

As part of the course kit, the following e-book will be given to all participants:-

	<p>Title : The Certified Reliability Engineer Handbook ISBN : 9788174890580 Author : Mark Allen Durivage Publisher : ASQ Quality Press</p>
---	---

Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises:-

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
