

COURSE OVERVIEW IE0010
Certified Fiber Optics Professional (CFOP)
Practical Fiber-Optics Technology

Course Title

Certified Fiber Optics Professional (CFOP):
Practical Fiber-Optics Technology

Course Date/Venue

October 04-08, 2026/TBA Meeting Room, Elite
Byblos Hotel Al Barsha, Sheikh Zayed Road,
Dubai, UAE

Course Reference

IE0010

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes practical sessions and exercises where participants carryout fiber optic splicing, testing and troubleshooting. Theory learnt in the class will be applied using our state-of-the-art equipment.

The rapidly changing face of data communications and telecommunications has seen a continued growth in the need to transfer enormous amounts of information across large distances. The technologies that were used extensively in the past such as coaxial cable, satellite and microwave radio for transferring information were running out of capacity. With the introduction of fiber optic communications systems, the solution to the problems of transmission capacity shortage and to noisy industrial environments has been successfully found.

Fiber optic transmission has become one of the most exciting and rapidly changing fields in telecommunications engineering. An optical fiber is simply a very thin piece of glass which acts as a pipe, through which light can pass. The light that is passed down the glass fiber can be turned on and off to represent digital information or it can be gradually changed in amplitude, frequency or phase to represent analog information.

Fiber optic transmission systems have many advantages over more conventional transmission systems. They are less affected by noise, do not conduct electricity and therefore provide electrical isolation, carry extremely high data transmission rates and carry data over very long distances. These and other advantages will be discussed in detail in this course.

Fiber optic transmission systems are not perfect and there are difficulties involved in designing, implementing, and operating fiber optic communications systems. This course is designed to provide a thorough background to fiber optic communications systems and to illustrate the design and installation of these systems. The many pitfalls associated with the implementation of fiber optic systems will be discussed and workable solutions to these problems will be provided in this course.

This course will provide an extensive overview of the construction, operation and applications of optical fiber, with more emphasis on installation and troubleshooting. The course will give both the novice and the experienced participant a solid grasp of the principles and practical implementation of fiber optic cabling for industrial applications.

Course Objectives/Outcomes & Benefits for the Participants

Upon the successful completion of this course, each participant will be able to:-

- Get certified as a “*Certified Fiber Optics Professional (CFOP)*”
- Apply state of the art fiber optics technology and installation practices
- Specify and describe fiber optic communications systems in total
- Gain **practical hands-on experience** in jointing, splicing and testing fiber optic systems and use correct procedures for cable installation and termination
- Recognize fiber optic termination patch panels and identify the various types of adapters and its merits/demerits
- Convert UTP ethernet to fiber optics and specify media converters
- Design and install a fully operational fiber optics system
- Implement the latest approaches in troubleshooting fiber optics

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Howard Smart Training Kit” (**H-STK®**). The **H-STK®** consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of fiber optics technology for engineers and other technical staff within instrumentation, control, communications, telecommunications, electrical and IT fields. This includes project, maintenance and consulting staff, systems and applications engineers.

Course Certificate(s)

- (1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a “*Certified Fiber Optics Professional (CFOP)*”. Certificates are valid for 5 years.

Recertification Fee is a FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

* Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology *

Maricel De Guzman
Academic Director

Haward Technology has been approved as an Authorized Provider by the International Association for Continuing Education and Training (IACET), 1760 Old Meadow Road, Suite 500, McLean, VA 22102, USA. In obtaining this approval, Haward Technology has demonstrated that it complies with the ANSI/IACET 1-2013 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2013 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology is accredited by

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3091 714 | Fax: +971 2 3091 716 | E-mail: info@haward.org | Website: www.haward.org

Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations:

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Fee

US\$ 5,500 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor (s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Salah Zuriekat, BSc, PMP, is a **Senior Electrical Engineer** with extensive years of experience within the **Power & Water Utilities** and other **Energy** sectors. His expertise widely covers **Fiber Optics** Access Network Planning, **Fiber Optic Applications** in Protective Relaying Systems, Advanced **Fiber Optics** Technology, **Fiber Optic** Termination Equipment Operation & Maintenance, **Cyber Security of Distributed Control System (DCS)**, **SCADA Cyber Security**, **Cyber Security** Fundamentals, **Variable Frequency Drives (VFD)**, **PLC & SCADA** for Automation & Process Control, **DCS** Automated

Process Control Systems, **PLC** for Process Control & Automation, **Process Control** Techniques & Troubleshooting, **Control Valves & Actuators**, Safety Integrity Level (**SIL**), **Transformer Maintenance & Testing**, **Electrical Substation & Design**, **Power Quality** Studies & Load Criteria, **LV/MV Electrical Safety (11 KV, 415 & 220 Voltage)**, **Substation Earthing System**, **Electrical Equipment** Maintenance, **Electrical Power System**, **Electrical** Installations & Utilities, **Electrical Distribution Systems & Control Circuits**, **Electrical Drawings**, **Relay Logic Circuits**, Troubleshooting **Transformers**, **System Grounding**, **Circuit Breakers**, **Protection Devices & Technology**, **Protection Relay**, **Transformers**, **Generators**, **Power Transformers**, **Motors**, **Substations**, **Switchgears & Distribution**, **Power System Analysis**, **Electrical Equipment** Control Systems, **Cables & Wiring**, **Cable & Overhead Line** Quality Control & Inspection, **Overhead Transmission Lines**, **Electrical Safety**, **Electrical Protection**, **Batteries**, **Chargers & UPS**, **Electrical Submersible Pumps (ESP)**, **Power Supply** Substations, Area Classification, Safety Management System, Permit to Work & Issuing Authority, Emergency **Diesel Generator**, High & Low Voltage **Electrical Safety**, **Electrical Inspection & Testing**, **Electrical Control & Monitoring System**, **Electric Power System**, Intensive **Overhead Transmission Line (OHTL)**, **Transmission** Line Networks, **Distribution** Engineering, **HVDC Transmission & Control**, **Substation** Maintenance Techniques, **Electrical Drawings & Schematics**, **Distribution Networks & Load Forecasting**, **Power Generation**, **Overhead Power Line** Construction & Patrolling, and **Generator** Maintenance & Troubleshooting. He is currently the **Electrical Construction Manager** of Hiba Engineering Construction wherein he is involved in managing and supervising electrical engineers, electricians and other electrical personnel to ensure proper staffing levels and effective teamwork.

Mr. Salah gained his expertise and experience through several positions as an **MEP Manager**, **Project Manager**, **Senior Electrical Project Engineer**, **Electromechanical Project Engineer**, **Site Engineer**, **Fiber Optic Sales Engineer**, **Sales Engineer**, **Maintenance Engineer**, **Optical Engineer**, **MEP Coordinator**, **Telecommunications Technician** and **Senior Instructor/Trainer** for various companies such as the Al Menthar of Medical investment, Drake & Scull International Company (DSI), Axal Arabia Contracting Company (SBG), Alsamah Contracting Company, Control & Communication Company (CCC) and Spectrum Company.

Mr. Salah has a **Bachelor's** degree in **Electrical Engineering**. Further, he is a **Certified Instructor/Trainer**, a **Certified Project Manager Professional (PMI-PMP)** and has delivered various trainings, seminars, conferences, workshops and courses globally.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Learning Design & Customization

This course can be customized to the exact requirements of clients. Haward Technology is so proud of our huge capabilities in tailoring our courses to the training needs of our valued clients.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 04th of October 2026

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0930	Introduction to Fiber Optics Systems Introduction • Outline of Course • Historical Background to Fiber Optic • Comparison of Fiber Optics and Copper Systems
0930 – 0945	Break
0945 – 1100	Definitions, Basic Principles Data Communications • Communications Channels • Transmission Modes
1100 – 1230	Definitions, Basic Principles (cont'd) The Electromagnetic Spectrum • Revisiting Copper
1230 – 1245	Break
1245 – 1420	Theory of Fiber Optics Transmission Fundamental Principals of Operation • Light Transmission Nature of Glass • Numerical Aperture • Modal Propagation in Fibers • Multimode/Single Mode/StepIndex/Graded Index
1420 – 1430	Recap
1430	Lunch & End of Day One

Day 2: Monday, 05th of October 2026

0730 – 0930	Theory of Fiber Optics Transmission (cont'd) Bandwidth of Fibers • Modal and Chromatic Dispersion • Absorption/Scatter/Bending/Radiation/Mismatches • Other Types of Fibers
0930 – 0945	Break

0945 – 1100	Construction of Fiber Optic Cables Cable Objectives • Tensile Ratings • Structural Elements • Housings – Loose Tube/Slotted Core/Tight Buffered
1100 – 1230	Construction of Fiber Optic Cables (cont'd) Sheaths and Moisture Barriers • Classes of Cables – Aerial/Underground/Sub Aqueous/Indoor
1230 – 1245	Break
1300 – 1420	Connecting Fibers Optical Connection Issues • Fiber End Preparation • Splicing Fibers – Fusion/Mechanical • Connectors • Optical Couplers
1420 – 1430	Recap
1430	Lunch & End of Day Two

Day 3: Tuesday, 06th of October 2026

0730 – 0830	Practical Session #1 - Optical Connectors Each Delegate to Fit One ST & One SC Connector to a Cable and Inspect the Connectors
0830 – 0930	Practical Session #2- Fusion Splicing Each Student to Make a Fusion Splice in their Cable
0930 – 0945	Break
0945 – 1230	Optical Drivers and Detectors Light Emitting Diodes • Lasers • Transmitters Modules • Safety Considerations • PIN Photodiodes • Receiver Modules • Optical Amplifiers
1230 – 1245	Break
1245 – 1345	Fiber Optic Termination Patch Panels Compact Fiber Optic Patch Panel • Wall Mounted Optical Fiber Patch Panels • Rack Mounted Optical Fiber Termination Panel • Splice Trays • Terminal Blocks & Patch Panels • Enclosures, Racks & Equipment Housings • Faceplate Slide-Out Mechanism
1345 – 1420	Types of Adapters & its Merits/Demerits Optical Fiber Connectors – Duplex 568SC Adapter • Optical Fiber Connectors – simplex ST - ST Adapter • Other Fiber Optic Adapters
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4: Wednesday, 07th of October 2026

0730 – 0930	Installing Fiber Optic Cables Initial Preparation – Site Survey/Design • General Installation Rules and Procedures • Bending Radius/Cable Tension/Cable Reels • Cable Trays/Conduits/Lubricants • Indoor Cable Installation/Leaving Extra Cable • Outdoor Cable Installation/Environmental Conditions • Splicing Trays / Organizers / Termination Cabinets/Patch Panels / Distribution Panels / Breakout Boxes
0930 – 0945	Break
0945 – 1100	Fiber Optics System Design Initial Design Considerations • Future Capacity/Reliability/Operation Wavelength • Repeaters and Amplifiers • Design Loss Calculations/Link Loss Budgets • Design Bandwidth Calculations
1100 – 1230	Media Converters Convert UTP Ethernet to Fiber Optics • Specifications for the Media Converters

1230 – 1245	Break
1245 – 1420	Testing of Fiber Optic Systems Concepts of Optical Measurement • Continuity Testing • Insertion Loss Testing • Optical Time Domain Reflectometry (OTDR) • Bit Error Rate (BER) Testing • Eye Diagrams • Laboratory Fiber Tests
1420 - 1430	Recap
1430	Lunch & End of Day Four

Day 5: Thursday, 08th of October 2026

0730 – 0930	Practical Session #3- Insertion Loss Testing Students to Measure the Insertion Loss of their Cable
0930 – 0945	Break
0945 – 1100	Technologies That Use Optical Fibers Low Speed Modems • 10 Base F/FDDI/FIORL
1100 – 1230	Technologies That Use Optical Fibers (cont'd) ATM • LAN's/MAN's/WAN's
1230 – 1245	Break
1245 – 1300	Technologies That Use Optical Fibers (cont'd) Analog Modulators for Video and Microwave Links • HDTV
1300 – 1315	Course Conclusion
1315 – 1415	COMPETENCY EXAM
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Practical Sessions

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout fiber optic splicing, testing and troubleshooting exercises using the following state-of-the-art fiber optics technology and equipment, suitable for classroom training.

Optical Fiber Comprehensive Tester

Optical Fiber Cold Connection Tools Set

Fiber Optic Patch Cables

Fiber Optic Cable Tester

Fiber Optic Adapters

Fiber Optic Connectors

Fiber Optic Sleeves

Fiber Optic Cables

Fiber Optic Cable Box Connection with Multiple Terminations
