

COURSE OVERVIEW EE0043 Basic Electrical Inspection

<u>Course Title</u> Basic Electrical Inspection

Course Date/Venue

December 15-19, 2024/ Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

CEUS

ing ppl

Course Reference EE0043

Course Duration/Credits Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

The deterioration of electrical equipment is normal, and this process begins as soon as the equipment is installed. If deterioration is not checked, it can cause electrical failures and malfunctions

In addition, load changes or circuit alterations may be made without overall design coordination, which can result in improper selection of equipment, or settings of protective devices, or wrong trip devices installed in the circuits.

A well-organized and implemented electrical inspection and testing program minimizes accidents, reduces unplanned shutdowns, and lengthens the mean time between failures (MTBF) of electrical equipment.

This course is designed to provide delegates with proper techniques for the inspection and testing of various electrical equipment and systems. It covers the inspection and testing of cables, transformers, switchgears, circuit breakers, motors and generators. Further, the course discusses the importance of electrical safety including practices and precautions and the electrical power system grounding.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on electrical inspection and testing
- Discuss direct-current/voltage testing of electrical equipment as well as carryout proper AC voltage testing methods
- Identify cables types and applications and explain cable failures and analysis as well as apply systematic cable inspection/testing techniques including cable fault locating methods
- Define switchgear and perform switchgear maintenance and electrical switchgear testing
- Review motor types and applications and carryout motor testing and inspection including generator operation, testing and maintenance
- Analyze electrical power system grounding and employ electrical safety practices and procedures
- Illustrate the effect of electrical shock and carryout first aid

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**[®]). The **H-STK**[®] consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of electrical inspection and testing for electrical engineers, electrical supervisors and electrical technicians engaged in the inspection and testing of electrical equipment.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures20% Practical Workshops & Work Presentations30% Hands-on Practical Exercises & Case Studies20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

US\$ 5,500 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

EE0043-12-24|Rev.02|17 July 2024

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

• ACCREDITED

<u>The International Accreditors for Continuing Education and Training</u> (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

• **BAC**

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ahmed Abozeid is a Senior Electrical Engineer with over 25 years of Onshore & Offshore experience within the Oil & Gas, Refinery, Petrochemical and Power industries. His wide expertise covers HV Cable Design, Cable Splicing & Termination, Cable Jointing Techniques, High Voltage Electrical Safety, HV/MV Cable Splicing, High Voltage Circuit Breaker Inspection & Repair, High Voltage Power System Safe Operation, High Voltage Safety, High

Voltage Transformers, Safe Operation of High Voltage & Low Voltage Power Systems, Electric Distribution System Equipment, Practical Troubleshooting of Electrical Equipment & Control Circuits, Electrical & Control System Testing & Commissioning, LV/MV/HV Circuit Breakers Inspection & Maintenance, Electrical Power Substation Maintenance, Practical High Voltage Safety Operating Procedures, Modern Power System Protective Relaying, Electrical & Control System Testing, Design, Commissioning, Operation and Maintenance of Switchgears, Transformers, Substations, Medium & High Voltage Equipment and Circuit Breakers, Electrical Motors & Variable Speed Drives, Motor Speed Control, Power Electronic Converters, AC Converters Section, Electromagnetic Compatibility (EMC), Motor Failure Analysis & Testing, Machinery Fault Diagnosis, Bearing Failure Analysis Process Control & Instrumentation, Process Control Measurements, Control System Commissioning & Start-Up, Control System & Monitoring, Power Station Control System, Instrumentation Devices, Process Control & Automation, PID Controller, Distributed Control Systems (DCS), Programmable Logic Controllers (PLC), ABB PLC & DCS System, Gas Analyzers, Simulation Testing, Load Flow, Electrical Load Forecasting, Short Circuit, Vibration Sensors, Cable Installation & Commissioning, Smart Grid Calibration Commissioning and Site Filter Controller. Further, he is also wellversed in Fundamentals of Electricity, Electrical Standards, Electrical Power, PLC, Electrical Wiring, Machines, Transformers, Motors, Power Stations, Electro-Mechanical Systems, Automation & Control Systems, Voltage Distribution. Power Distribution, Filters. Automation System, Electrical Variable Speed Drives. Power Svstems. Power Generation. Power Transformers, Diesel Generators, Power Stations, Uninterruptible Power Systems (UPS), Battery Chargers and AC & DC Transmission. He is currently the Project Manager wherein he manages, plans and implements projects across different lines of business.

Mr. Ahmed worked as the Electrical Manager, Assistant General Technical Manager, Electronics & Instruments Head, Electrical Power & Machine Expert, Electrical Process Leader, Team Leader, Electrical Team Leader, Electronics & Instruments Maintenance Superintendent, Engineering Supervisor, Technical Instructor and Instructor/Trainer from various companies such as the Lafarge Nigeria, Egyptian Cement Company, ECC Training Center, Alrajhi Construction & Building Company and Ameria Cement Company, just to name a few.

Mr. Ahmed has a **Bachelor** degree in **Electrical Engineering**. Further, he is a **Certified Instructor/Trainer** and has delivered numerous trainings, seminars, courses, workshops and conferences internationally.

<u>Course Program</u> The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1:	Sunday 15 th of December 2024
0730 – 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	IntroductionWhy Maintain & Test • Electrical Preventive Maintenance • Overview of Electrical Maintenance & Testing Strategies • Run-To-failure (RTF) • Inspect & Service as Necessary • Time-based Maintenance (TBM) • Time- based Maintenance (TBM) • The Most Common Predictive Tests • Planning an EPM Program • Maintenance Management Considerations • Responsibilities • Inspection • Scheduling • Work Orders • Record Keeping • Testing & Test Methods • Acceptance Tests • Routine Maintenance Tests • As-left Tests • Special Maintenance Tests
0930 - 0945	Break
0945 – 1100	Direct-Current/Voltage Testing of Electrical Equipment Capacitance Charging Current • Dielectric Absorption Current • Surface Leakage • Volumetric Leakage Current • Advantages of DC Voltage Testing • Disadvantages of DC Voltage Testing • DC Testing Methods • Evaluation of Test Data Readings • What Factors should be Considered to Determine Whether Insulation is Good or bad? • What Physical Factors may Influence the Readings? • Acceptance Criteria for Rating Insulation
1100 – 1230	AC Voltage Testing MethodsPF & DF Test Methods • Principles of PF/DF Testing • Description of thePF Test Equipment • General Instructions for theOperation of the Megger Test Set • Transformer Types • TransformerApplications • Transformer Maintenance • Transformer Oil Testing •Transformer Diagnostic Guide
1230 – 1245	Break
1245 - 1430	Cables Types & ApplicationsLow Voltage Cables • Cable Catalogue • Cable Sizing • T.D.F • BurialDepth Derating Factor • Soil Thermal Resistivity Derating Factor •Adjacent Cables • Voltage Drop Check • Power Cables • LaminatedType • Extruded Type • Finishes & Jackets • Cable Construction
1430	Lunch & End of Day One

Day 2:	Monday 16 th of December 2024
0730 - 0900	Cable Failures & Analysis Corrosion of Sheath Moisture in the Insulation Heating of Cables
0900 - 0915	Fire & Lightning Surges Break
0915 – 1100	Cable Inspections/Testing TechniquesTesting & Acceptance of CablesAC Hi-Pot TestingCable TestConnection for Insulation Resistance MeasurementPF & DF TestingPDPD TestAC Resonance TestAdvantages of DC Hi-pot TestDisadvantages of DC Hi-pot TestDisadvantages of DC Hi-pot TestAdvantages Of 50/60 Hz Hi-pot& Ac Resonant TestDisadvantages Of 50/60 Hz Hi-pot& Ac Resonant TestAdvantages of PD diagnosticsDisadvantages ofPD diagnostics

50

	Cable Fault Locating Methods
1100 – 1230	Bridge Methods • Radar Method • Impulse (Thumper) Method •
	Electromagnetic Impulse Detection Technique
1230 – 1245	Break
1245 – 1430	SwitchgearLow Voltage C.B CharacteristicsL.V.C.B. CharacteristicsLowVoltage C.B. TypesHigh Voltage C.BArc InterruptionMinimumOil Circuit BreakersSF6 Circuit BreakerVacuum Circuit BreakerProtective RelaysRelay Application & PrinciplesOvercurrentRelaysaDirectional RelaysDistance RelayingDifferentialRelayingPilot Wire Relaying
1430	Lunch & End of Day Two

Day 3:	Tuesday 17 th of December 2024
0730 - 0930	Switchgear Maintenance Electrical Switchgear Maintenance • Installation • Maintenance • Oil Circuit Breaker • Vacuum Circuit Breaker
0930 - 0945	Break

0945 – 1100	<i>Electrical Switchgear Testing</i> <i>Insulation Resistance Measurement Test</i> • <i>DC Hi-Pot Test</i> • <i>AC Hi-Pot Test</i> • <i>Circuit Breaker Contact Resistance Measurement Test</i> • <i>Circuit Breaker Time - Travel Analysis</i> • <i>Testing of Protective Relay</i> • <i>Digital Relays</i> • <i>Test List for a Line Protection</i> • <i>Commissioning Methods</i>
1100 - 1215	Motors Types & ApplicationsAccording to Application • Induction Motors • Introduction •Construction • Rotating Magnetic Field • Synchronous Speed • MotorDesign • DC Motors
1215 – 1230	Break
1230 - 1430	Motor Testing & Inspection Dirt & Corrosion • Dirt & Corrosion • Lubrication • Heat, Noise & Vibration • Brushes & Commutators (DC Motors) • Windings & Insulation • Testing Windings • Cleaning & Drying Windings • Voltage Checks • Effects of Voltage Unbalance • Basic voltage tests to identify applied voltage (motor is not running) • Voltage tests to verify "Line to ground" potentials & to isolate a blown fuse • Continuity Test to Confirm Blown Fuse • Megger Testing an Installed Motor • Partial Discharge Test
1430	Lunch & End of Day Three

Day 4:	Wednesday 18 th of December 2024
0730 – 0930	Generators
	Rotor • Stator • DC Generators
0930 - 0945	Break
0945 – 1100	Generator Operation, Testing & Maintenance
	Why Generators Fail • Foreign Object Damage • Stator Winding
	Vibration • Rotor Winding Distortion • Overheating • Contamination
	• Forging Cracks • Water-Cooled Coil Leaks • Stator Wedge Looseness •
	Rotor Vibration • Stator Core Damage • Generator Inspection •
	Generator Testing • Stator Insulation Tests • Direct Current Tests for
	Stator & Rotor Windings • Alternating Current Tests for Stator Windings
	Rotor Windings Generator Testing Low-Core Flux Test (EL-CID)

EE0043 - Page 6 of 9

1100 – 1215	Generator Maintenance
	Stator Frame • Rotor • Stator Winding • Coolers • Bearings
	Brushgear
1215 – 1230	Break
1230 - 1430	 Electrical Power System Grounding Standard In Describing Power System Grounding Selection of Grounding Method Solidly Grounded Systems Grounding Ungrounded Systems Grounding Electrode Resistance Grounding Electrode Ground Resistance Calculation Why Test Grounding Systems? What is a good ground value? Components of a Ground Electrode Spheres of Influence
1430	Lunch & End of Day Four

Day 5:	Thursday 19 th of December 2024
0730 - 0930	Electrical Power System Grounding (cont'd)
	What affects ground resistance? • Types of Ground Systems • Methods of
	Testing • Soil Resistivity • Soil Resistivity – Testing • Soil Resistivity –
	Calculation • Fall of Potential Testing • Fall of Potential Testing (II) •
	Selective Testing • Selective Testing (II) • Stakeless Testing • Stakeless
	Testing – Details • Two Pole Ground Resistance • Selecting a Test
	Method
0930 - 0945	Break
0945 – 1100	Electrical Safety Practices & Precautions
	Electrical Safety Practices & Precautions • Electrical Safety • "On-Site"
	Electrical Safety • Tagging
1100 – 1215	Effect of Electrical Shock
	Human Resistance
1215 – 1230	Break
1230 - 1400	First Aid
	Shock • Resuscitation
1400 - 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

EE0043 - Page 7 of 9

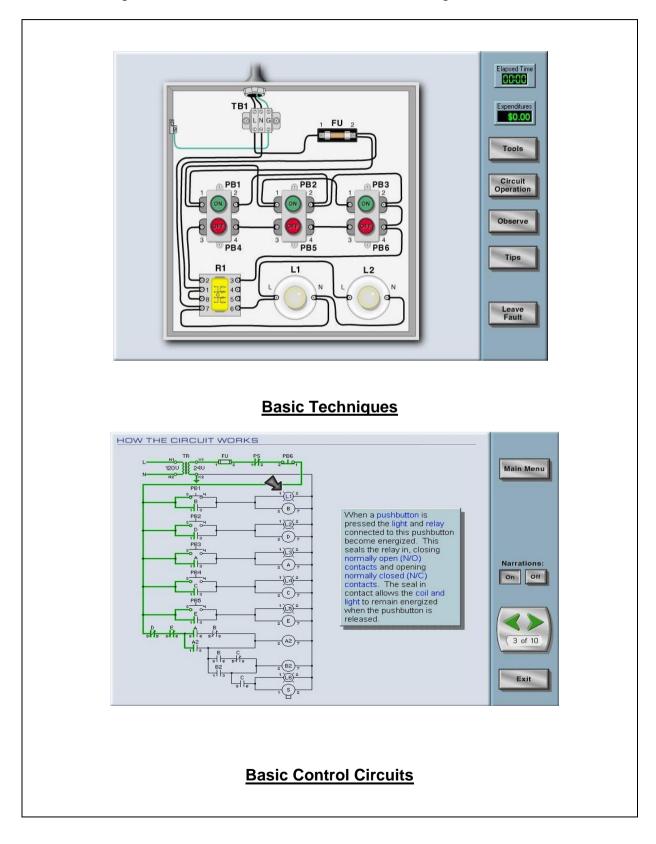

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art "Haward Troubleshooting" simulator.
