

**COURSE OVERVIEW EE1030**  
**Certified Electrical Safety Compliance Professional**  
*(NFPA - CESCO Exam Preparation Training)*

**Course Title**

Certified Electrical Safety Compliance Professional  
*(NFPA - CESCO Exam Preparation Training)*

**Course Date/Venue**

November 15-19, 2026/TBA Meeting Room, Aloft  
 Dharan Hotel, Al Khobar, KSA

**Course Reference**

EE1030

**Course Duration/Credits**

Five days/4.0 CEUs/40 PDHs

**Course Description**

***This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.***

This comprehensive course is designed to prepare participants for the NFPA Certified Electrical Safety Compliance Professional (CESCP) certification and to develop competence in implementing and managing electrical safety programs based on NFPA 70E: standard for electrical safety in the workplace. The CESCP certification validates an individual's knowledge of electrical safety compliance, hazard identification, risk assessment, safe work practices, program management and regulatory compliance.

Further, the course will also discuss the fundamentals of electrical hazards, electrical injuries and accidents; the OSHA and regulatory compliance requirements and electrical safety program fundamentals; the roles and responsibilities in electrical safety and electrical hazard identification; the electrical risk assessment procedures, shock risk assessment and arc flash risk assessment; the risk control methods, electrical hazard analysis and establishing an electrically safe work condition (ESWC); and the lockout/tagout (LOTO) requirements, energized electrical work and personal protective equipment (PPE).

During this interactive course, participants will learn the electrical tools, test equipment, job planning and safety briefings; the electrical equipment maintenance requirements, switchgear and circuit breaker safety, motor control centers and industrial systems; the transformers and power distribution systems and electrical safety auditing and compliance; the incident investigation, root cause analysis, electrical safety program management and contractor electrical safety management; and the emergency response and electrical rescue and advanced electrical safety applications.

### **Course Objectives/Outcomes & Benefits for the Participants**

Upon the successful completion of this course, each participant will be able to:-

- Get prepared for the next CESC Exam and have enough knowledge and skills to pass such exam in order to get the Certified Electrical Safety Compliance Professional from The National Fire Protection Association (NFPA)
- Discuss the fundamentals of electrical hazards, electrical injuries and accidents and OSHA and regulatory compliance requirements
- Explain electrical safety program fundamentals, roles and responsibilities in electrical safety and electrical hazard identification
- Apply electrical risk assessment procedures, shock risk assessment and arc flash risk assessment
- Carryout risk control methods, electrical hazard analysis and establishing an electrically safe work condition (ESWC)
- Identify lockout/tagout (LOTO) requirements, energized electrical work and personal protective equipment (PPE)
- Recognize electrical tools and test equipment and perform job planning and safety briefings
- Discuss electrical equipment maintenance requirements, switchgear and circuit breaker safety and motor control centers and industrial systems
- Recognize transformers and power distribution systems and carryout electrical safety auditing and compliance
- Employ incident investigation and root cause analysis, electrical safety program management and contractor electrical safety management
- Implement emergency response and electrical rescue and advanced electrical safety applications

### **Exclusive Smart Training Kit - H-STK®**

*Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

**Who Should Attend**

This course provides an overview of all significant aspects and considerations of electrical safety compliance for electrical engineers, electrical supervisors, maintenance engineers, reliability engineers, safety managers, HSE professionals, electrical inspectors, facility managers, operations supervisors, electrical contractors, personnel preparing for CESC certification, those who are involved in the selection, commissioning, operation, maintenance, testing or troubleshooting of the generator excitation systems and AVR including engineers, supervisors and other technical staff.

**Exam Eligibility & Structure**

Exam candidates shall have the following minimum prerequisites:

<b>A) All Candidates</b>	
All CESC Candidates (Regardless of Job function) must meet the following minimum requirements:-	Acceptable Documentation
<ul style="list-style-type: none"> <li>Attendance of Haward's EE0625 Course</li> </ul>	<ul style="list-style-type: none"> <li>Certificate or proof of attendance/completion</li> </ul>
<ul style="list-style-type: none"> <li>Holding a high school diploma or equivalent</li> </ul>	<ul style="list-style-type: none"> <li>No documentation required</li> </ul>

<b>B) Electricians</b>	
In addition to the minimum requirements found in Table A, all Electricians applying for entry into the CESC program must meet ONE of the following:-	Acceptable Documentation
<ul style="list-style-type: none"> <li>Licensed electrician with 8,000 hrs (4 years) of verifiable work experience with electrical power systems</li> </ul> <p style="text-align: center;"><b>OR,</b></p> <ul style="list-style-type: none"> <li>In lieu of licensure, must show proof of electrician job role and 8,000 hrs (4 years) of verifiable work experience with electrical power systems</li> </ul>	<ul style="list-style-type: none"> <li>Proof of Licensure <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>
	<ul style="list-style-type: none"> <li>Copy of job description (signed by supervisor) <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>

<b>C) Electrical Engineers</b>	
In addition to the minimum requirements found in Table A, all Electrical Engineers applying for entry into the CESC program must meet ONE of the following:-	Acceptable Documentation
<ul style="list-style-type: none"> <li>Associate degree in electrical engineering from an accredited college or university with 8,000 hrs (4 years) of verifiable work experience with electrical power systems (field work)</li> </ul> <p style="text-align: center;"><b>OR,</b></p> <ul style="list-style-type: none"> <li>Bachelor's degree (or higher) in electrical engineering from an accredited college or university with 4,000 hrs (2 years) of verifiable work experience with electrical power system (field work)</li> </ul> <p style="text-align: center;"><b>OR,</b></p> <ul style="list-style-type: none"> <li>Licensed Registered Professional Electrical Engineer</li> </ul>	<ul style="list-style-type: none"> <li>Proof of degree <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>
	<ul style="list-style-type: none"> <li>Proof of degree <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>
	<ul style="list-style-type: none"> <li>Proof of licensure</li> </ul>

D) Non- Electrician/Electrical Engineer (Other) Candidates	
In addition to the minimum requirements found in Table A, all other candidates applying for entry into the CЕСCP program must meet ONE of the following:-	Acceptable Documentation
<ul style="list-style-type: none"> <li>Certified Safety Professional (CSP) with 6,000 hrs (3 years) of verifiable work experience with electrical power systems</li> </ul> <p style="text-align: center;"><b>OR,</b></p>	<ul style="list-style-type: none"> <li>Proof of CSP <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>
<ul style="list-style-type: none"> <li>Bachelor's degree (or higher) in engineering, technology, or other related technical discipline from an accredited college or university with 6,000 hrs (3 years) of verifiable work experience with electrical power systems</li> </ul> <p style="text-align: center;"><b>OR,</b></p>	<ul style="list-style-type: none"> <li>Proof of degree <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>
<ul style="list-style-type: none"> <li>Facilities/Plant/Factory safety professional with 20,000 hrs (10 years) of verifiable work experience with electrical power systems</li> </ul>	<ul style="list-style-type: none"> <li>Copy of job description (signed by supervisor) <b>AND,</b></li> <li>Letter from supervisor (showing number of hours worked)</li> </ul>

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Learning Design & Customization

This course can be customized to the exact requirements of clients. Haward Technology is so proud of our huge capabilities in tailoring our courses to the training needs of our valued clients.

### Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Training Fee

**US\$ 5,500** per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### Exam Fee

**US\$ 670** per Delegate + **VAT**.

**CESCP Certificate(s)**

- (1) NFPA CESCP Foundation Certificates will be issued to participants who successfully passed the CESCP exam.

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Jari Castillo  
Academic Director

Howard Technology has been approved as an Accredited Provider by the International Association for Continuing Education and Training (IACET), 2901 Corporate Way, Suite 800, Herndon, VA 20171, USA. In obtaining this approval, Howard Technology has demonstrated that it complies with the ANSI/IACET 1-2018 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Standard membership status, Howard Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2018 Standard.

Howard Technology's courses meet the professional education and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules and regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted unit of measurement for qualified courses of continuing education.

Howard Technology is accredited by

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3091 714 | E-mail: info@howard.org | Website: www.howard.org

### Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations:

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **4.0 CEUs** (Continuing Education Units) or **40 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

**Course Instructor(s)**

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Pan Marave, PE, MSc, BEng, is a Senior Electrical & Instrumentation Engineer with over 30 years of extensive experience in Power & Water Utilities and Other Energy Sectors. His expertise includes Electrical Safety, Certified Electrical Safety (IEC, OSHA, NFPA & EN Standards), NFPA 70E Standard for Electrical Safety, Power System Equipment, Electrical Drawing, Transmission Networks, Substation, Cable & Over Head Line, Substation Automation Systems & Application, Distribution Networks, Circuit Breaker, HV Switchgear Maintenance, HV/LV Electrical Authorisation, Basic Electricity, Electrical & Special Hazards, Personnel Protection, HV/LV Equipment, Motor Controllers, Electrical Switching Practices, Emergency Planning, Safety Management, Safety Instrumented Systems (SIS), Safety Integrity Level (SIL), Emergency Shutdown (ESD); Electrical Installation, Maintenance & Troubleshooting, Electrical Inspection & Testing, Electrical Measurements, Power Flow Analysis of Electrical Power Systems, Electrical Fundamentals, Basic Electricity & Electrical Codes, DCS, SCADA & PLC; Measurement (Flow, Temperature, Pressure); Process Analyzers & Analytical Instrumentation; Process Control, Instrumentation & Safeguarding; Process Controller, Control Loop & Valve Tuning; Industrial Distribution Systems; Industrial Control & Control Systems, Power Systems Protection & Relaying; Earthing, Bonding, Grounding, Lightning & Surge Protection; Electric Power Substation & Systems; Electrical Engineering Principles; Motor Control Circuit; Electrical Fault Analysis; Electrical Networks & Distribution Cables; Circuit Breakers, Switchgears, Transformers, Hazardous Areas Classification and Detailed Engineering Drawings, Codes & Standards. Furthermore, he is also well-versed in Microprocessors Structure, Lead Auditor (ISO 9000:2000), ISO 9002, Quality Assurance, and Projects & Contracts Management.**

Presently, Mr. Marave is the **Technical Advisor of Chamber of Industry & Commerce** in Greece. Prior to this, he gained his thorough practical experience through several positions as the **Technical Instructor, Engineering Manager, Electronics & Instruments Head, Electrical, Electronics & Instruments Maintenance Superintendent, Assistant General Technical Manager and Engineering Supervisor** of various international companies such as the **Alumil Mylonas, Athens Papermill, Astropol** and the **Science Technical Education**.

Mr. Marave is a **Registered Professional Engineer** and has **Master's and Bachelor's** degree in **Electrical Engineering** from the **Polytechnic Institute of New York and Pratt Institute of New York (USA)** respectively. Further, he is a **Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership & Management (ILM)** and an active member of the **Technical Chamber** and the **Institute of Electrical and Electronics Engineer (IEEE)** in Greece. He has presented and delivered **numerous international** courses, conferences, trainings and workshops worldwide.

### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1: Sunday, 15<sup>th</sup> of November 2026**

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	<b>PRE-TEST</b>
0830 – 0930	<b>Introduction to CESCOP Certification &amp; NFPA Standards</b> CESCOP Certification Objectives & Benefits • Examination Structure & Competency Requirements • Overview of NFPA Electrical Safety Standards • Relationship Between NFPA 70E, NFPA 70 (NEC), & OSHA Regulations
0930 – 0945	Break
0945 – 1030	<b>Fundamentals of Electrical Hazards</b> Basic Electrical Theory for Safety Professionals • Current, Voltage, Resistance, & Energy Concepts • Human Body Response to Electrical Current • Common Causes of Electrical Incidents
1030 – 1200	<b>Understanding Electrical Injuries &amp; Accidents</b> Electric Shock & Electrocution Mechanisms • Arc Flash Hazards & Consequences • Arc Blast Effects & Pressure Hazards • Secondary Injuries from Electrical Incidents
1200 – 1300	Lunch
1300 – 1400	<b>OSHA &amp; Regulatory Compliance Requirements</b> OSHA Electrical Safety Regulations • Employer Duties Under OSHA General Duty Clause • Electrical Safety Compliance Obligations • Regulatory Enforcement & Penalties
1400 – 1500	<b>Electrical Safety Program Fundamentals</b> Elements of an Effective Electrical Safety Program • Management Commitment & Leadership • Employee Involvement & Accountability • Documentation & Recordkeeping Requirements
1500 – 1515	Break
1515 – 1650	<b>Roles &amp; Responsibilities in Electrical Safety</b> Employer Responsibilities • Supervisor Responsibilities • Qualified Person Responsibilities • Contractor & Host Employer Responsibilities
1650 – 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day One

#### **Day 2: Monday, 16<sup>th</sup> of November 2026**

0730 – 0930	<b>Electrical Hazard Identification</b> Shock Hazard Recognition • Arc Flash Hazard Identification • Arc Blast Hazard Assessment • Stored Energy Hazards
0930 – 0945	Break
0945 – 1030	<b>Electrical Risk Assessment Procedures</b> Hazard Identification Methodology • Risk Estimation Techniques • Severity Assessment Criteria • Probability & Likelihood Determination
1030 – 1200	<b>Shock Risk Assessment</b> Approach Boundary Requirements • Limited Approach Boundary • Restricted Approach Boundary • Shock Protection Methods

1200 – 1300	Lunch
1300 – 1400	<b>Arc Flash Risk Assessment</b> Incident Energy Concepts • Arc Flash Boundary Calculations • Equipment Labeling Requirements • Arc Flash Study Fundamentals
1400 – 1500	<b>Hierarchy of Risk Control Methods</b> Elimination Strategies • Substitution & Engineering Controls • Administrative Controls • Personal Protective Equipment (PPE)
1500 – 1515	Break
1515 - 1650	<b>Electrical Hazard Analysis Workshop</b> Real-World Hazard Identification Exercises • Risk Ranking Methodologies • Hazard Mitigation Planning • Group Case Study Evaluations
1650 – 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Two

**Day 3: Tuesday, 17<sup>th</sup> of November 2026**

0730 – 0930	<b>Establishing an Electrically Safe Work Condition (ESWC)</b> Planning for De-Energization • Isolation of Electrical Sources • Lockout/Tagout Application • Verification of Absence of Voltage
0930 – 0945	Break
0945 – 1030	<b>Lockout/Tagout (LOTO) Requirements</b> Energy Isolation Procedures • Group Lockout Systems • Temporary Removal of Lockout Devices • LOTO Program Auditing
1030 – 1200	<b>Energized Electrical Work</b> Justification for Energized Work • Energized Electrical Work Permits • Risk Mitigation Requirements • Management Approval Processes
1200 – 1300	Lunch
1300 – 1400	<b>Personal Protective Equipment (PPE)</b> Arc-Rated Clothing Selection • Voltage-Rated Gloves & Tools • Face Shields & Head Protection • PPE Inspection & Maintenance
1400 – 1500	<b>Electrical Tools &amp; Test Equipment</b> Selection of Electrical Test Instruments • Safe Meter Operation Practices • Insulated Hand Tools • Equipment Inspection Requirements
1500 – 1515	Break
1515 - 1650	<b>Job Planning &amp; Safety Briefings</b> Job Safety Planning Procedures • Conducting Job Briefings • Hazard Communication Techniques • Work Coordination & Supervision
1650 – 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Three

**Day 4: Wednesday, 18<sup>th</sup> of November 2026**

0730 – 1000	<b>Electrical Equipment Maintenance Requirements</b> Purpose of Preventive Maintenance • Maintenance-Related Safety Risks • Equipment Reliability Considerations • Maintenance Documentation Practices
1000 – 1015	Break
0945 – 1030	<b>Switchgear &amp; Circuit Breaker Safety</b> Switchgear Construction & Hazards • Circuit Breaker Maintenance Requirements • Inspection Procedures • Failure Modes & Risk Reduction

1030 – 1200	<b>Motor Control Centers &amp; Industrial Systems</b> MCC Safety Requirements • Inspection & Maintenance Practices • Operational Hazards • Safe Troubleshooting Techniques
1200 – 1300	Lunch
1300 – 1400	<b>Transformers &amp; Power Distribution Systems</b> Transformer Operating Principles • Inspection Requirements • Transformer Safety Hazards • Protection Systems & Controls
1400 – 1500	<b>Electrical Safety Auditing &amp; Compliance</b> Program Audit Requirements • Field Work Audits • Compliance Verification Techniques • Corrective Action Tracking
1500 – 1515	Break
1515 - 1650	<b>Incident Investigation &amp; Root Cause Analysis</b> Electrical Incident Reporting • Investigation Methodologies • Root Cause Determination • Lessons Learned & Corrective Actions
1650 – 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Four

**Day 5: Thursday, 19<sup>th</sup> of November 2026**

0730 – 0930	<b>Electrical Safety Program Management</b> Program Development & Implementation • Safety Performance Indicators • Continuous Improvement Processes • Management Review Systems
0930 – 0945	Break
0945 – 1200	<b>Contractor Electrical Safety Management</b> Contractor Qualification Requirements • Safety Orientation Programs • Performance Monitoring • Compliance Verification
1200 – 1300	Lunch
1300 – 1400	<b>Emergency Response &amp; Electrical Rescue</b> Emergency Preparedness Planning • Electrical Rescue Procedures • First Aid for Electrical Injuries • Incident Command & Communication
1400 – 1500	<b>Advanced Electrical Safety Applications</b> Battery Energy Storage Systems • Capacitor Banks & Stored Energy • Renewable Energy Installations • High-Voltage System Considerations
1500 – 1515	Break
1515 – 1615	<b>CESCP Examination Preparation Workshop</b> Review of Key NFPA 70E Concepts • Examination Question Analysis • Open-Book Examination Strategies • Time Management Techniques
1615 – 1630	<b>Course Conclusion</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1630 – 1645	<b>POST-TEST</b>
1645 – 1700	Presentation of Course Certificates
1700	End of Course

## **MOCK Exam**

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward's Portal. Each participant will be given a username and password to log in Haward's Portal for the MOCK Exam during the 60 days following the course completion. Each participant has only one trial for the MOCK exam within this 60-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

## **Practical Workshops Throughout the Course**

### **Workshop 1: Electrical Hazard Recognition**

- Hazard identification exercises
- Shock hazard assessment
- Arc flash exposure evaluation
- Incident case studies

### **Workshop 2: Risk Assessment and Control Selection**

- Electrical risk assessment exercises
- Boundary determination practice
- PPE selection scenarios
- Risk mitigation planning

### **Workshop 3: Electrically Safe Work Condition**

- Lockout/Tagout simulation
- Absence-of-voltage verification
- Isolation procedures
- Stored energy control

### **Workshop 4: Arc Flash Analysis**

- Arc flash label interpretation
- Incident energy calculations
- PPE determination exercises
- Arc flash risk reduction methods

### **Workshop 5: CESC Mock Exam**

- Timed practice examination
- Exam strategy coaching
- Question interpretation techniques
- Final review session

## **Learning Outcomes**

Upon successful completion of this course, participants will be able to:

- Apply NFPA 70E requirements to workplace electrical safety programs
- Identify and assess shock, arc flash and arc blast hazards
- Conduct electrical risk assessments and implement effective controls
- Establish and verify electrically safe work conditions
- Select appropriate PPE and protective measures
- Manage electrical safety compliance programs and audits
- Investigate electrical incidents and implement corrective actions
- Improve electrical equipment safety and maintenance practices
- Develop comprehensive electrical safety policies and procedures
- Successfully prepare for and attempt the NFPA CESC certification examination

**Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises:-

**Course Coordinator**
