

COURSE OVERVIEW HE0632 Certified HAZID Leader

Hazard Identification, Analysis and Risk-Based Decisions

Course Title

Certified HAZID Leader: Hazard Identification, Analysis and Risk-Based Decisions

Course Date/Venue

Session 1: February 02-06, 2025/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Session 2: September 07-11, 2025/Al Khobar Meeting Room, Hilton Garden Inn, Al Khobar, KSA

Course Reference

HE0632

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

A Hazard identification (HAZID) study is the method of identifying hazards to prevent and reduce any adverse impact that could cause injury to personnel, damage or loss of property, environment and production, or become a liability. HAZID is a component of risk assessment and management. It is used to determine the adverse effects of exposure to hazards and plan necessary actions to mitigate such risks.

HAZID study takes into account all of the process and nonprocess hazards. It helps to design and organize the health, safety and environmental issues in an organization. HAZID involves machine or equipment designers, management and end users, and ensures a full identification of hazards and safeguard procedures in a workplace.

This course is designed to provide participants with a detailed and up-to-date overview of hazard identification, analysis and risk-based decisions. It covers the hazard and risk, accident model, physical and process hazards, the benefits of hazards identification and hazards types by industry; and the hazards through concept of recognition, basic human senses, relationship between senses and higher order processes and what causes hazards?

By the end of the course, participants will be able to recognize the influence of human capabilities and limitations on hazard identification by applying visual detection, sound detection, odor detection, touch detection and hazard recognition; determine explosion hazards, chemical hazards, electrical hazards, weather phenomena hazards and other types of hazards; evaluate hazards covering field surveys, pre-job assessments, facility assessments, incident and near-miss reporting, hazard identification and analysis training; carryout HAZID study, HAZID process, HAZID recording and raising effective corrective actions; implement other hazard identification techniques, HAZOP, failure modes and effects analysis (FMEA), plant walkdowns/audits, what if analysis and task analysis/job hazard analysis (JHA); employ risk-based decisions and risk ranking procedure; follow-up and call to action; and recognize the importance of managing change, published accident databases and resources, revitalized lessons learned, transfer knowledge and learn from incidents.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Get certified as a "Certified HAZID Leader"
- Discuss the hazard and risk, accident model, physical and process hazards, the benefits of hazards identification and hazards types by industry
- Identify hazards through concept of recognition, basic human senses, relationship between senses and higher order processes and what causes hazards?
- Recognize the influence of human capabilities and limitations on hazard identification by applying visual detection, sound detection, odor detection, touch detection and hazard recognition
- Determine explosion hazards, chemical hazards, electrical hazards, weather phenomena hazards and other types of hazards
- Evaluate hazards covering field surveys, pre-job assessments, facility assessments, incident and near-miss reporting, hazard identification and analysis training
- Carryout HAZID study, HAZID process, HAZID recording and raising effective corrective actions
- Implement other hazard identification techniques, HAZOP, failure modes and effects analysis (FMEA), plant walkdowns/audits, what if analysis and task analysis/job hazard analysis (JHA)
- Employ risk-based decisions and risk ranking procedure
- Follow-up and call to action as well as recognize the importance of managing change, published accident databases and resources, revitalized lessons learned, transfer knowledge and learn from incidents

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**®). The **H-STK**® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of HAZID study and leadership for safety/environment professionals, production and facilities managers, design engineers, process engineers, facilities engineers, instrumentation and control engineers, regulatory/enforcement and compliance officers, process and plant operators and maintenance personnel. Further, the course is also beneficial for directors and senior managers with responsibility for implementing systems of effective corporate governance and management of risk; internal auditors involved in assessing systems of internal control across all the functions of their organisations; and those with operational responsibilities who need to appreciate risk management in more detail.

Course Certificate(s)

Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a "Certified HAZID Leader". Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:-

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

British Accreditation Council (BAC)

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. John Burnip, EHS, SAC, STS, NEBOSH-ENV, NEBOSH-IGC, NEBOSH-IFC, NEBOSH-PSM, NEBOSH-IOG, TechlOSH, is a NEBOSH Approved Instructor and a Senior HSE & Management Consultant with over 50 years of practical Offshore & Onshore experience within Oil, Gas, Refinery, Petrochemical and Nuclear industries. His wide experience covers NEBOSH International General Certificate in Occupational Health & Safety, NEBOSH National Certificate in Construction Health & **NEBOSH** Certificate in Process Safety Management, Environmental Management Certificate, NEBOSH Certificate in Fire Safety, NEBOSH International Oil & Gas Certificate, PHA, HAZOP, HAZCOM, HAZMAT, HAZID, Hazard & Risk Assessment, Emergency Response Procedures Behavioural

Based Safety (BBS), Confined Space Entry, Fall Protection, Emergency Response, H2S, Safety Management System (ISO 45001), Accident/Incident Investigation System and Report PSM, Risk Assessment, SCE FMEA Failure Investigations, Site Management Safety Training (SMSTS), Occupational Health & Safety and Industrial Hygiene, Overhead & Gantry Crane Safety, HSSE Principles & Practices Advanced, API 780 Security Risk Assessment Methodology for Petroleum & Petrochemical, Advanced Process Safety Management with PHA, Quantitative and Qualitative Risk Assessment, IADC/API Mobile Drilling Rig Inspections, Maintenance and Audits, H2s Training and Rescue with Respiratory Equipment, Job Safety Analysis (JSA), Work Permit & First Aid, Project HSE Management System, Health & Hygiene Inspection, PTW Control, Process Modules Fire & Gas Commissioning, MSDS, Ergonomics, Lockout/Tagout, Fire Safety & Protection, Bracket Scaffolds, Scaffolding Labelling, Pre-fab Scaffolding; Erecting, Maintaining & Dismantling Scaffolding in accordance with the British Standards Code of Practice 5973; Heavy Lifting operations, Cantilevered Hoists, Offshore Operations, Offshore Construction, Basic Offshore Safety Induction & Emergency Training (BOSIET), Onshore Fabrication & Offshore Pipelaying & Hook-Up, Crane Inspection, Crane Operations, Oilfield Startup & Operation, Steel Fabrication, OSHA, ISO 9001, ISO 14001, OHSAS 18001 and IMO (SOLAS) Regulations. Mr. Burnip has greatly contributed in upholding the highest possible levels of safety for numerous International Oil & Gas projects, Generation Systems & Platform Revamp, LPG & Gas Compression, Marine, Offshore and Power Plant Construction. Currently, he is the HSE Advisor of Solvay wherein he is responsible in planning and implementation of the corporate safety program (OSHA codes). Further, he is also well versed in Job Design, Job Evaluation/Job Description, Management and Leadership and Change Management.

During Mr. Burnip's long career life, he had successfully carried out numerous projects in Europe, North America, South America, Southeast Asia, Middle East and the North Sea. He had worked for Delta Offshore Group, Solvay Asia Pacific, Likpin Dubai, SADRA/DOT, ZADCO, McDermott International (USA, Qatar, Egypt, India, Oman, Dubai and Abu Dhabi), PDO, Shell, ARAMCO, Salman Field, Leman Offshore Gas Field, GEC, Harland & Wolff PLC Belfast in North Ireland, Howard Doris - Kishorn in Scotland, Westinghouse Electric in Brazil and South Korea and Chevron Oil in Scotland as the Commissioning Project Engineer, Project & Safety Engineer, Estimating Engineer, Senior Instrument Engineer, Instrument Field Engineer, Lead Instrument Engineer, Instrument Engineer, Engineer, Emergency Response Training Manager, HSE Advisor, HSE Instructor, HSE Supervisor, Instrumentation Supervisor, Instrumentation Specialist, Project Coordinator, Instrumentation Technician and Tank Farm Instrumentation Technician.

Mr. Burnip has a Bachelor's degree in Business Studies from the Somerset University (UK). He is a Certified/Registered Tutor in NEBOSH Certificate in Environmental Management, NEBOSH International General Certificate, NEBOSH International Certificate in Fire Safety & Risk Management, NEBOSH Process Safety Management Certificate and NEBOSH International Oil & Gas Certificate; a Certified Safety Auditor (SAC); a Certified ISO 45001 Auditor; an Environmental Health and Safety Management Specialist on Fall Protection, Elevated Structures, Material Handling, Trenching & Excavations; a Welding Brazing Safety Technician; a Certified Safety Administrator (CSA) - General Industry; a Safety Manager/Trainer – General Industry; a Petroleum Safety Manager (PSM) - Drilling & Servicing; a Petroleum Safety Specialist (PSS) - Drilling & Servicing; a Safety Planning Specialist; a **Training** Specialist; Certified Instructor/Trainer; Certified Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM) and further holds a Certificate in Mechanical Engineering Craft Practice from the City & Guilds of London Institute; a NEBOSH Level 3 Construction Certificate (UK); and holds a Cambridge Teaching Certificate. He is a well-regarded member of the National Association of Safety Professionals, the Association of Cost Engineers (UK), Institution of Occupational Safety & Health (TechIOSH) and an Associate Member of World Safety Organization. Further, he has conducted innumerable trainings, workshops and conferences worldwide.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

US\$ 5,500 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

Day I	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
	Introduction
0830 - 0930	Hazard and Risk • Accident Model • Physical and Process Hazards • Benefits of
	Hazards Identification • Hazards Types by Industry
0930 - 0945	Break
	Identify Hazards
0945 - 1100	Concept of Recognition • Basic Human Senses • Relationship Between Senses and
	Higher Order Processes • What Causes Hazards?
	Influence of Human Capabilities & Limitations on Hazard Identification
1100 - 1230	Visual Detection • Sound Detection • Odor Detection • Touch Detection •
	Hazard Recognition
1230 - 1245	Break
	Explosion Hazards
1245 - 1420	Reactive Explosion Hazards • Flammable Explosion Hazards • Physical Explosion
	Hazards
	Recap
1420 – 1430	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be Discussed
	Tomorrow
1430	Lunch & End of Day One

Day 2

0730 - 0930	Chemical Hazards
	Toxic Chemical Hazards • Fire Hazards • Corrosive Chemical Hazards
0930 - 0945	Break
0945 – 1100	Electrical Hazards
	Shock/Short Circuit • Fire • Lightning Strikes • Static Electrical Discharge •
	Loss of Power
1100 – 1230	Weather Phenomena Hazards
	Temperature Extreme Hazards • Hurricane • Flood • Wind
1230 - 1245	Break
	Other Types of Hazards
1245 - 1330	Excavation Hazards • Asphyxiation Hazards • Elevation Hazards • Thermal
1245 - 1330	Hazards • Vibration Hazards • Mechanical Failure Hazards • Mechanical
	Hazards
1420 – 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be Discussed
	Tomorrow
1430	Lunch & End of Day Two

Dav 3

Day 3	
0730 - 0930	Other Types of Hazards (cont'd) Corrosion Hazards • Noise Hazards • Radiation Hazards • Impact Hazards •
	Struck Against Hazards • Visibility Hazards
0930 - 0945	Break
0945 – 1100	Evaluate Hazards
	Field Surveys • Pre-Job Assessments • Facility Assessments • Incident and Near-Miss Reporting • Hazard Identification and Analysis Training
1100 – 1230	HAZID Study The HAZID Team • The HAZID Process • Example HAZID Checklists
1230 - 1245	Break
1245 – 1420	HAZID Study (cont'd) Recording the HAZID (the Hazard Register/Fault Schedule/Hazard Log) • Raising Effective Corrective Actions
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

Day 4

0730 – 0930	Other Hazard Identification Techniques
	HAZOP • Failure Modes and Effects Analysis (FMEA) • Plant
	Walkdowns/Audits • What If? Analysis • Task Analysis/Job Hazard Analysis
	(JHA)
0930 - 0945	Break
0945 – 1100	Make Risk-Based Decisions
	Hazard Ranking • Understanding Risk • Risk Ranking
1100 – 1230	Risk Ranking Procedure
	Severity • Hierarchy of Safeguards or Layers of Protection • Likelihood • Risk
	Ranking • Example 1 – Flammable/Explosive Hazard • Example 2 – Flammable
	Hazard • More Detailed Matrices • Similarities between More Sophisticated
	Process Hazard Evaluation Techniques

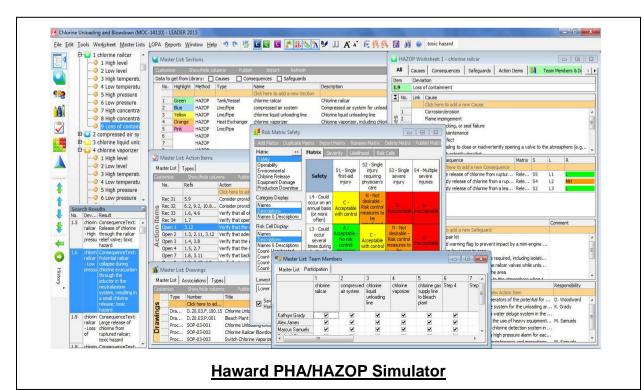

1230 - 1245	Break
1245 – 1420	Follow-up & Call to Action Safety Culture • Management Commitment • Employee Ownership • Implement an Effective Hazard Management Program Action • Hazard Communication • Call to
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

Dav 5

Day 0	
	Learning & Continuous Improvement
0730 - 0930	Importance of Managing Change • Published Accident Databases & Resources •
	Revitalizing Lessons Learned • Transfer of Knowledge • Learning from Incidents
0930 - 0945	Break
0945 - 1100	Practical HAZID Study - Oil Refinery Fire, 2007
1100 - 1230	Practical HAZID Study - Oil Refinery Fire, 2007 (cont'd)
1230 - 1245	Break
1245 - 1300	Practical HAZID Study - Oil Refinery Fire, 2007 (cont'd)
	Course Conclusion
1300 - 1315	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1315 - 1415	COMPETENCY EXAM
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art "Haward PHA/HAZOP", "QRA", "Visio", "Mindview" and "Workplace Risk Assessment" simulators.

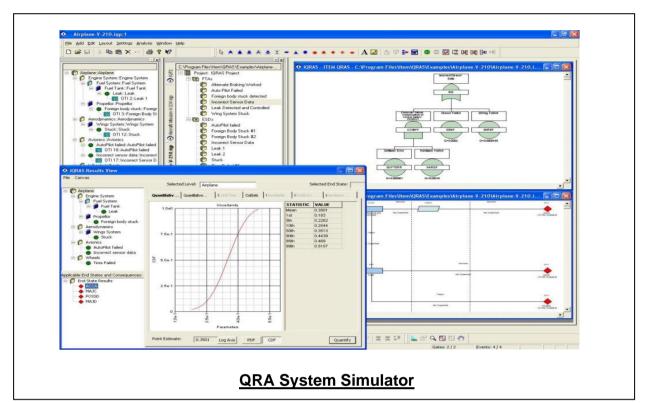

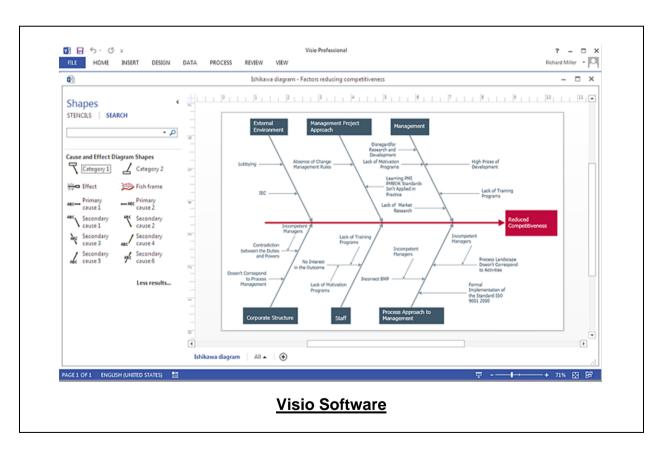

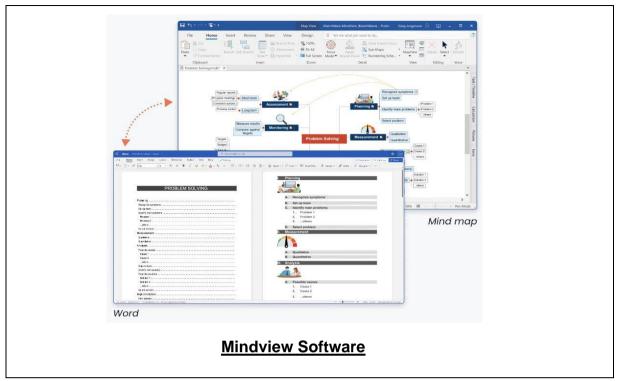

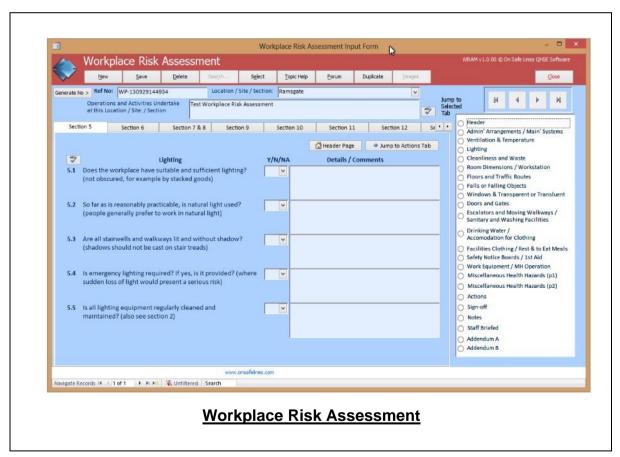

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
