

## COURSE OVERVIEW DE0210

### Basic Reservoir Engineering for Non-Reservoir Engineer

#### Course Title

Basic Reservoir Engineering for Non-Reservoir Engineer

#### Course Date/Venue

Please refer to page 3

#### Course Reference

DE0210

#### Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

#### Course Description

***This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.***

Oil Reservoirs have been created by complex sedimentary and diagenetic processes, and modified by a history of tectonic change. Reservoirs are complex systems on all scales. Decisions such as pumping and injection, new well placement, and drilling in an active oil field, are typical of the complex relationships between reservoir engineering and oil field/reservoir management.

Reservoir engineering is the application of scientific principles to solve issues arising during the development and production of oil and gas reservoirs. This course covers the engineering operations involved in analysing the production behaviour of oil and gas wells, including well performance engineering, reservoir aspects of well performance, restricted flow into the wellbore, rate decline analysis, and fundamentals of artificial lift.

This course is designed to give participants a detailed overview of the fundamental reservoir engineering to better understand its practices, the required data, its interpretations, the processes and its limitations. Further, the course deals with the basic concepts of fluid flow, leading on with laminar and non-Darcy flow, including multiphase situations, oil and gas reservoirs, from fluid and rock characteristics, production injection analysis, material balance applied to oil reservoirs, immiscible displacement and natural water influx. Case studies will be use throughout the course to demonstrate concepts and real situations.

### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a basic knowledge on reservoir engineering
- Discuss the PVT analysis of oil as well as production injection analysis
- Express the general & linear material balance equations applied to oil reservoirs as well as describe Darcy's law and its applications
- Describe the basic differential equation for radial flow in a porous medium as well as the well inflow equations for stabilized flow conditions
- Explain the constant terminal rate solution of the radial diffusivity equation and its application to oilwell testing
- Discuss real gas flow: gas well testing, immiscible displacement and natural water influx

### **Exclusive Smart Training Kit - H-STK®**

*Participants of this course will receive the exclusive “Howard Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

### **Who Should Attend**

This course provides an overview of all significant aspects and considerations of reservoir engineering for geologists, petrophysicists, geophysicists, petroleum engineers, production engineers and other technical staff who wants to know the fundamentals of reservoir engineering.

### Course Date/Venue

Session(s)	Date	Venue
1	May 03-07, 2026	Meeting Plus 9, City Centre Rotana, Doha, Qatar
2	July 05-09, 2026	Meeting Room 4, Four Seasons Hotel Cairo at Nile Plaza, Corniche El Nil, Garden City, Cairo, Egypt
3	August 30-September 03, 2026	Pierre Lotti Meeting Room, Movenpick Hotel Istanbul Golden Horn, Istanbul, Turkey
4	September 21-25, 2026	Ruben Boardroom, The Rubens at The Palace, Buckingham Palace Road, London, United Kingdom
5	October 11-15, 2026	Meeting Plus 9, City Centre Rotana, Doha, Qatar
6	November 09-13, 2026	Salon Expo, NH Hotel Plaza de Armas, Seville, Spain
7	December 13-17, 2026	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE
8	January 10-14, 2027	Meeting Plus 9, City Centre Rotana, Doha, Qatar
9	February 07-11, 2027	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE
10	March 21-25, 2027	Ruben Boardroom, The Rubens at The Palace, Buckingham Palace Road, London, United Kingdom

### Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Course Fee

Dubai	<b>US\$ 8,000</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
London	<b>US\$ 8,800</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Seville	<b>US\$ 8,800</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Cairo	<b>US\$ 8,000</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Istanbul	<b>US\$ 8,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Doha	<b>US\$ 8,500</b> per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### **Course Certificate(s)**

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### **Certificate Accreditations**

Haward's certificates are accredited by the following international accreditation organizations:

-  British Accreditation Council (BAC)  
Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.
-  The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Dr. Steve Ehrenberg**, PhD, MSc, BSc, is a **Senior Geologist & Reservoir Engineer** with over **30 years** of extensive experience within the **Oil & Gas, Petrochemical and Refinery** industries. His wide experience covers in the areas of **Core & Log Integration, Water Saturation, Coring & Core Analysis, Special Core Analysis, Log Interpretation, Cased-Hole Logging, Core Calibration, Core Analysis, Core-to-Log Data Integration (SCAL), Wireline Logging, Mud Logging, Cased Hole Logging, Production Logging, Well Logging, Reservoir**

**Management, Reservoir Appraisal & Development, Carbonate Reservoir Management, Fractured Reservoirs Evaluation & Management, Naturally Fractured Reservoir, Integrated Carbonate Reservoir Characterization, Geological Modelling, Reservoir Characterization, Geomodelling, Development Geology, Petroleum Geology, Exploration Production, Structural Geology, Wellsite Geology, Analytic Modelling Methods, Sedimentary Geology, Geophysics, Geophysical Exploration, Reservoir Engineering, Reservoir Engineering Applications, Reservoir Engineering & Stimulation, Reservoir Characterization, Clastic Reservoir, Carbonate Reservoir Petrology, Subsurface Facies Analysis, Borehole Images, Geophysical Methods, Oil & Gas Exploration, Marine & Petroleum Geology, Reservoir Performance Using Classical Methods, Fractured Reservoir Evaluation & Management, Reservoir Surveillance & Management, Reservoir Monitoring, , Reservoir Volumetrics, Water Drive Reservoir, Reservoir Evaluation, Well Surveillance, Well Testing, Well Testing & Oil Well Performance, Well Log Interpretation (WLI), Rock Physics & Seismic Data, Formation Evaluation, Well Testing & Data Interpretation, Pore Pressure Prediction and Oil & Gas Reserves Estimations, Well Workover Supervision, Description and Prediction of Reservoir Quality, Sequence Stratigraphy of Carbonate Systems and Introductory Geology.**

During his career life, Dr. Ehrenberg held significant positions and dedication as **Consultant, Professor, Senior Reservoir Geologist, Senior Geologist, Research Geologist, Associate Professor, Assistant Professor and Senior Instructor/Trainer** from various international companies and universities such as the Badley Ashton & Associates Ltd., Khalifa University of Science and Technology, Sultan Qaboos University, PanTerra Geoconsultants B.V, UAE University, Statoil, Stavanger, Shell Development Company and Northern Illinois University.

Dr. Ehrenberg has a **PhD, Master's and Bachelor's** degree in **Geology** from the **University of California, USA** and **Occidental College, USA**, respectively. Further, he is a **Certified Trainer/Assessor/Internal Verifier** by the **Institute of Leadership & Management (ILM)**, a **Certified Instructor/Trainer** and has delivered numerous trainings, workshops, courses, seminars and conferences internationally.

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1**

0730 – 0800	<i>Registration &amp; Coffee</i>
0800 – 0815	<i>Welcome &amp; Introduction</i>
0815 – 0830	<b>PRE-TEST</b>
0830 – 0930	<b>Some Basic Concepts in Reservoir Engineering</b> <i>Calculation of Hydrocarbon Volumes • Fluid Properties • Fluid Pressure Regimes • Oil Recovery: Recovery Factor • Volumetric Gas Reservoir Engineering</i>
0930 – 0945	<i>Break</i>
0945 – 1100	<b>Some Basic Concepts in Reservoir Engineering (cont'd)</b> <i>Application of the Real Gas Equation of State • Gas Material Balance: Recovery Factor • Hydrocarbon Phase Behaviour</i>
1100 – 1230	<b>PVT Analysis for Oil</b> <i>Definition of the Basic PVT Parameters • Collection of Fluid Samples • Determination of the Basic PVT Parameters in the Laboratory and Conversion for Field Operating Conditions</i>
1230 – 1245	<i>Break</i>
1245 – 1420	<b>PVT Analysis for Oil (cont'd)</b> <i>Alternative Manner of Expressing PVT Laboratory Analysis Results • Complete PVT Analysis</i>
1420 – 1430	<b>Recap</b> <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow</i>
1430	<i>Lunch &amp; End of Day One</i>

## Day 2

0730 – 0830	<b>Production Injection Analysis</b>
0830 – 0930	<b>Material Balance Applied to Oil Reservoirs</b> General Form of the Material Balance Equation for a Hydrocarbon Reservoir • The Material Balance Expressed as a Linear Equation • Reservoir Drive Mechanisms • Solution Gas Drive
0930 – 0945	Break
0945 – 1100	<b>Material Balance Applied to Oil Reservoirs (cont'd)</b> Gascap Drive • Natural Water Drive • Compaction Drive & Related Pore Compressibility Phenomena
1100 – 1230	<b>Darcy's Law &amp; Applications</b> Darcy's Law: Fluid Potential • Sign Convention • Units: Units Conversion • Real Gas Potential
1230 – 1245	Break
1245 – 1420	<b>Darcy's Law &amp; Applications (cont'd)</b> Datum Pressures • Radial Steady State Flow: Well Stimulation • Two-Phase Flow: Effective & Relative Permeabilities • The Mechanics of Supplementary Recovery
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

## Day 3

0730 – 0930	<b>The Basic Differential Equation for Radial Flow in a Porous Medium</b> Derivation of The Basic Radial Flow Equation • Conditions of Solution
0930 – 0945	Break
0945 – 1100	<b>The Basic Differential Equation for Radial Flow in a Porous Medium (cont'd)</b> The Linearization of Equation 5.1 for Fluids of Small & Constant Compressibility
1100 – 1230	<b>Well Inflow Equations for Stabilized Flow Conditions</b> Semi-Steady State Solution • Steady State Solution
1230 – 1245	Break
1245 – 1420	<b>Well Inflow Equations for Stabilized Flow Conditions (cont'd)</b> Example of the Application of the Stabilized Inflow Equations • Generalized Form of Inflow Equation Under Semi Steady State Conditions
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

## Day 4

0730 – 0930	<b>The Constant Terminal Rate Solution of The Radial Diffusivity Equation &amp; Its Application to Oilwell Testing</b> The Constant Terminal Rate Solution • The Constant Terminal Rate Solution for Transient & Semi Steady State Flow • Dimensionless Variables • Superposition Theorem: General Theory of Well Testing • The Matthews, Brons, Hazebrook Pressure Build-Up Theory
0930 – 0945	Break

0945 – 1100	<b>The Constant Terminal Rate Solution of The Radial Diffusivity Equation &amp; Its Application to Oilwell Testing (cont'd)</b> Pressure Build-Up Analysis Techniques • Multi-Rate Drawdown Testing • The Effects of Partial Well Completion • Some Practical Aspects of Well Surveying • Pressure Surveys • Afterflow Analysis
1100 – 1230	<b>Real Gas Flow: Gas Well Testing</b> Linearization & Solution of the Basic Differential Equation for the Radial Flow of a Real Gas • The Russell, Goodrich, Et. Al, Solution Technique • Comparison of the Pressure Squared & Pseudo Pressure Solution Techniques • Non-Darcy Flow • Determination of the Non-Darcy Coefficient F • The Constant Terminal Rate Solution for the Flow of A Real Gas
1230 – 1245	Break
1245 – 1420	<b>Real Gas Flow: Gas Well Testing (cont'd)</b> General Theory of Gas Well Testing • Multi-Rate Testing of Gas Wells • Pressure Build-Up Testing of Gas Wells • Pressure Build-Up Analysis in Solution Gas Drive Reservoirs • Summary of Pressure Analysis Techniques
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

## Day 5

0730 – 0930	<b>Natural Water Influx</b> The Unsteady State Influx Theory of Hurst & Van Everdingen • Application of the Hurst, Van Everdingen Water Influx Theory in History Matching • The Approximate Water Influx Theory of Fetkovitch for Finite Aquifers
0930 – 0945	Break
0945 – 1100	<b>Natural Water Influx (cont'd)</b> Predicting The Amount of Water Influx • Application of Influx Calculations to Steam Soaking
1100 – 1230	<b>Immiscible Displacement</b> Physical Assumptions & Their Implications • The Fractional Flow Equation • Buckley-Leverett One Dimensional Displacement • Oil Recovery Calculations • Displacement Under Segregated Flow Conditions
1230 – 1245	Break
1245 – 1345	<b>Immiscible Displacement (cont'd)</b> Allowance for The Effect of a Finite Capillary Transition Zone in Displacement Calculations • Displacement in Stratified Reservoirs • Displacement When There is a Total Lack of Vertical Equilibrium • The Numerical Simulation of Immiscible, Incompressible Displacement
1345 – 1400	<b>Course Conclusion</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1400 – 1415	<b>POST-TEST</b>
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

### **Practical Sessions**

This practical and highly-interactive course includes the real-life case studies and exercises:-
