

COURSE OVERVIEW FE0862 AWS-CWEng Certified Welding Engineer Part 1 & 2

Course Title

AWS-CWEng Certified Welding Engineer Part 1 & 2

Course/Exam Date/Venue

December 08-12, 2025/Ajman Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE

Exam Window

TBA

Exam Closing Date

Exam Registration Closing Date: 8 weeks before the course date

Course Reference

FE0862

Course Duration/Credits

Five days/4.0 CEUs/40 PDHs

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

This course covers the qualification requirements for Welding Engineers. It describes how qualifications are determined, and the practice by which qualification may be attained and maintained.

The course will evaluate the qualifications of each individual, and provide examinations to test the individual's knowledge in engineering skills and knowledge as well as their ability to apply the principles of welding engineering.

The course is intended to supplement the minimum requirements of employers, codes, other standards, or documents and shall not be construed as a preemption of the employer's responsibility for the work or for the performance of the work. It shall be the responsibility of employers to determine that their employee, who, having qualified as a Welding Engineer, is capable of performing the specific duties involved in their career assignments.

Further, the course will also discuss the basic science fundamentals, simple calculations, special and trigonometric functions; the algebraic equation, graphs and equations, geometry, hyperbola, parabola, complex numbers, calculus, statistics and simple correlation; the unit conversion, mass, weight, volume and density, force, energy, work done, power, stress and strain; the Hooke's Law, moment and momentum; measuring temperature, heat, thermocouples and pyrometers; classifying thermal properties of material; and the various chemistry symbols, molecular weight and stoichiometry, acid and bases and balance chemical equations.

During this interactive course, participants will learn the gas combustion reactions and oxidation-reduction reactions; the ideal gas law, mass balance, bulk and chemical analysis methodologies; the reactivity, toxicity, environmental effect and disposal; the applied science fundamentals, electricity, Ohm's Law and Kirchoff's Law; the resistance loss and current rectification, proper handling of power generation, AC/DC and polarity; and the power factor, electromagnetic properties, right-hand rule, devices and principles of current and voltage measurements.

Moreover, a person with the demonstrated education, experience, and knowledge as defined by this information and who successfully passes the required examinations is considered qualified as an AWS Certified Welding Engineer (CWEng).

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Get prepared for the AWS Certified Welding Engineer (CWEng) Part 1 and Part 2 exam and have enough knowledge and skills to pass such exam in your endeavor to get the AWS-CWEng Certification
- Discuss the basic science fundamentals covering mathematics, physics and chemistry
- Analyse simple calculations, special and trigonometric functions, algebraic equation, graphs and equations, geometry, hyperbola, parabola, complex numbers, calculus, statistics and simple correlation
- Recognize unit conversion, mass, weight, volume and density, force, energy, work done, power, stress and strain
- Employ Hooke's Law and differentiate moment and momentum
- Measure temperature, heat, thermocouples and pyrometers and classify thermal properties of material
- Describe various chemistry symbols, molecular weight and stoichiometry, acid and bases and balance chemical equations
- Evaluate gas combustion reactions and oxidation-reduction reactions as well as recognize the ideal gas law including mass balance, bulk and chemical analysis methodologies and reactivity, toxicity, environmental effect and disposal
- Recognize applied science fundamentals including strength of materials, heat transfer, fluid mechanics and electricity

- Discuss electricity comprising of current, voltage, resistance, impedance and circuits
- Differentiate Ohm's Law and Kirchoff's Law and analyse resistance loss and current rectification
- Perform proper handling of power generation, AC/DC and polarity
- Identify power factor, electromagnetic properties, right-hand rule, devices and principles of current and voltage measurements

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides a wide understanding and deeper appreciation of welding engineering for inspection, piping and welding engineers who are seeking AWS CWEng certification. Other engineers, managers and technical staffs who are dealing with welding and fabrication will also benefit from this course.

Exam Eligibility & Structure

To qualify as a Certified Welding Engineer, you must have a combination of qualifying education and work experience, with supporting documentation and should match at least one of the combinations in any one of the grids below:-

MINIMUM EDUCATION	MINIMUM WORK EXPERIENCE
Bachelor of Science or Higher Degree in Engineering	Minimum of one (1) year welding-based work experience
Bachelor of Science or Higher Degree in Engineering Technology	Minimum of two (2) years welding-based work experience
Other Related Bachelor of Science Degree	Minimum of five (5) years welding-based work experience
Associate in Applied Science (A.A.S.) degree	Minimum of ten (10) years welding-based work experience
High School Diploma or Approved High School Equivalent Program	Minimum of fifteen (15) years welding-based work experience

- Candidates are required to successfully complete Parts 1 and 2 of the CWEng examination before progressing to Parts 3 and 4. Upon passing Parts 1 and 2, candidates have one (1) year to apply for Parts 3 and 4.

Training Fee

US\$ 6,000 per Delegate + **VAT**. This rate includes Participants Pack (Folder, Manual, Hand-outs, etc.), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Exam Fees

US\$ 955 per Delegate + **VAT**.

Required Codes & Standards

Listed below are the effective editions of the publications required for the current Welding Engineer Certification Examination. **Each student must purchase these documents separately and have them available for use during the class as their cost is not included in the course fees:-**

Reference Title	Author	Publisher
ANSI Z49.1 Safety in Welding, Cutting and Allied Processes		AWS
Applied Fluid Mechanics, 4th Ed.	Mott	Merrill Publishing Company

References for Taking the Part 1 & Part 2 Examination

There are no specific reference books you should study.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Course Accreditations

Haward Technology is accredited by the following international accreditation organizations:-

- 

American Welding Society (AWS)

Haward Technology is the **International Agent** of the **American Welding Society (AWS)** and the Authorized Provider of AWS international certification examinations outside the USA. Haward Technology exhibits compliance and adherence to **AWS Quality Control Standards** in the development, conduct and delivery of certification courses and exams for welding and inspection professionals on behalf of the American Welding Society.

The American Welding Society's certification programs are internationally recognized and are used as a benchmark of quality workmanship and skills within the welding industry around the world.

- 

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **4.0 CEUs** (Continuing Education Units) or **40 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council for Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Brett Heuchert is a Certified API/AWS/ASNT Inspector & Senior Inspection Engineer with extensive industrial experience in the **Oil & Gas, Refineries, Petrochemical and Power** industries. His expertise lies extensively in the areas of construction, installation fabrication, erection, inspection, maintenance, operation, rating, repair, alteration, reconstruction, pigging, integrity assessment, flaw evaluation, fitness-for-service (FFS) of **Piping, Piping Inspection, Pipelines, Damage Mechanisms, Mechanical & Metallurgical**

Failure Mechanisms, Pressure Vessels, Pressure & Leak Testing, Storage Tank, Welding Technology, Metallurgy, Corrosion, Mechanical Integrity Assessment, Vibration Analysis, Positive Material Identification (PMI), Hydro-Testing, Non Destructive Testing (NDT), Refractory Inspection. He is an **international expert** in several **codes and standards** relating to pipelines, piping, pressure vessel, tanks, welding and corrosion such as **API, ASME, ASNT, AWS, CWB, CGSB, ABSA and NACE.** He is currently the **Senior Inspector** of CNRL Horizon Crude Facility wherein he is responsible for the inspection of all exchanger related components and supervise repairs as per API 510, CNRL specs and relevant codes.

Throughout his career life, Mr. Heuchert has provided significant contributions to the industries by acquiring **key positions** such as being the **Senior Inspector, Quality Control Manager, Engineering Manager, QA Supervisor, Plant Inspector, Technical Mentor, Quality Control Inspector, Quality Assurance Supervisor, Lead QC Inspector, QA Inspector, QA Integrity Inspector, QC Inspector, Foreman, Pipe Fitter, Welder, Technician and Apprentice** for international companies such as **CNRL Horizon Crude Facility, Capital Power Corporation, ADNOC Technical Institute, Nexen, Edmonton Exchanger, Conpac Construction Ltd., Shell Canada Ltd., Acuren Group Inc.-Irving Oil Refinery, Gas Inspection Inc., Stinger Welding Inc.-Husky Oil Refinery, PML Inspection Services Inc., Carber Testing Inc. and UA Local 488 PipeFitter & Welder Union.**

Mr. Heuchert is a **Certified Instructor/Trainer, Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership & Management (ILM)**, Certified Welding Inspector (**AWS**), Certified Corrosion & Materials Professional (**API 571**), Certified Pressure Vessel Inspector (**API 510**), Certified Piping Inspector (**API 570**), Certified Aboveground Storage Tank Inspector (**API 653**), Certified Welding Inspection & Metallurgy Professional (**API 577**), Certified Refractory Installation Quality Control (**API 936**), **Certified Level II Inspector** by the Canadian Welding Bureau (**CWB**) as well as a **Certified Level II Technician** in **Magnetic Particle, Liquid Penetrant and X-Ray Florescence** by the Canadian General Standards Board (**CGSB**).

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Monday, 08th of December 2025

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 1000	Part 1 – Basic Sciences Fundamental: Mathematics Simple Calculations (Multiple Choice) • Special Functions (Exp, Log) • Trigonometric Functions (Sin, Cos, Tan, Cot, Sec, Csc, Degrees, Radians) • Algebraic Equations (Linear, Quadratic, Polynomial)
1000 – 1015	Break
1015 - 1200	Part 1 – Basic Sciences Fundamental: Mathematics (cont'd) Graphs & Equations (Slope, Intercept, Roots, Derivatives, Minimum, Maximum, Interpolation & Extrapolation) • Geometry (Common Geometric Shapes)
1200 – 1300	Lunch
1300 – 1500	Part 1 – Basic Sciences Fundamental: Mathematics (cont'd) Hyperbola & Parabola • Complex Numbers • Calculus (Fundamentals of Differential Equations)
1500 – 1515	Break
1515 – 1630	Part 1 – Basic Sciences Fundamental: Mathematics (cont'd) Statistics (Population & Samples: Normal Distribution, Mean, Standard Deviation, Variance) • Simple Correlation: Linear Regression Via Least Squares Method, r^2 Correlation)
1630 – 1730	Distribute Homework & Recap
1730	End of Day One

Day 2: Tuesday, 09th of December 2025

0730 – 0830	Homework Review
0830 – 1000	Part 1 – Basic Sciences Fundamental: Physics Unit Conversion (Dimension, Mass, Temperature, Time, Energy, Power) • Mass, Weight, Volume, Density; Force, Energy, Work Done & Power • Stress, Strain & Hooke's Law (Elasticity)
1000 – 1015	Break
1015 – 1200	Part 1 – Basic Sciences Fundamental: Physics (cont'd)

	Moment & Momentum • Temperature, Heat, Temperature Measurement, Thermocouples & Pyrometers • Thermal Properties of Materials (Thermal Conductivity, Thermal Expansion, Thermal Stress & Strain)
1200 – 1300	Lunch
1300 – 1500	Part 1 – Basic Sciences Fundamental: Chemistry Symbols (Elements & Inorganic Compounds – Gases, Fluxes, Etc.) • Molecular Weight & Stoichiometry • Acids & Bases • Balance Chemical Equations • Gas Combustion Reactions (Chemical Heat Generation) & Oxidation-Reduction Reactions
1500 - 1515	Break
1515 – 1630	Part 1 – Basic Sciences Fundamental: Chemistry (cont'd) Ideal Gas Law (Pressure, Volume, Temperature) • Mass Balance (as in E7018 Coating Decomposition to Gas, Slag & Metal) • Bulk & Chemical Analysis Methodologies) • Reactivity, Toxicity, Environmental Effect & Disposal
1630 – 1730	Distribute Homework & Recap
1730	End of Day Two

Day 3: Wednesday, 10th of December 2025

0730 – 0830	Homework Review
0830 – 1000	Part 2 – Applied Sciences Fundamental: Strength of Materials Load, Deformation (Elastic & Plastic, Buckling), Stress-Strain, Young's Modulus, Shear Modulus, Stress-Strain Curve (Yield Stress, Ultimate Tensile Stress, Elongation), Tensile Stress & Shear Stress Computation
1000 – 1015	Break
1015 – 1200	Part 2 – Applied Sciences Fundamental: Strength of Materials (cont'd) Welded Member Cross-Section Effect • Mechanical Testing (Tensile, Bend, Fracture Toughness, Hardness, Creep & Fatigue) & Data Interpretation
1200 – 1300	Lunch
1300 – 1500	Part 2 – Applied Sciences Fundamental: Strength of Materials (cont'd) Law of Conservation of Energy/Momentum • Stress Analysis
1500 - 1515	Break
1515 – 1630	Part 2 – Applied Sciences Fundamental: Strength of Materials (cont'd) Typical Engineering Material Properties
1630 – 1730	Distribute Homework & Recap
1730	End of Day Three

Day 4: Thursday, 11th of December 2025

0730 – 0830	Homework Review
0830 – 1000	Part 2 – Applied Sciences Fundamental: Heat Transfer & Fluid Mechanics Heat Conduction, Convection & Radiation, Thermal Conductivity & Diffusivity, Heat Transfer Coefficients of Engineering Materials, Fourier's Law
1000 – 1015	Break
1015 – 1200	Part 2 – Applied Sciences Fundamental: Heat Transfer & Fluid Mechanics (cont'd) Heating Rate & Cooling Rate • Industrial Heating Methods, Power Consumption, Gas Flow Rates
1200 – 1300	Lunch
1300 – 1500	Part 2 – Applied Sciences Fundamental: Heat Transfer & Fluid Mechanics (cont'd) Laminar & Turbulent Flow (Reynold's Number), Dew Point & Relative Humidity, Pressure & Regulators • Venturi Effect & Gas Velocity Calculation

1500 - 1515	Break
1515 - 1630	Part 2 - Applied Sciences Fundamental: Heat Transfer & Fluid Mechanics (cont'd) Atmospheric Pressure & Hyperbaric Conditions • Vacuum Equipment & Measurements
1630 - 1730	Distribute Homework & Recap
1730	End of Day Four

Day 5: Friday, 12th of December 2025

0730 - 0830	Homework Review
0830 - 1000	Part 2 - Applied Sciences Fundamental: Electricity Current, Voltage, Resistance, Impedance & Circuits • Ohm's Law • Kirchoff's Law
1000 - 1015	Break
1015 - 1200	Part 2 - Applied Sciences Fundamental: Electricity (cont'd) Resistance Loss & Current Rectification • Power Generation • AC/DC, Polarity
1200 - 1300	Lunch
1300 - 1500	Part 2 - Applied Sciences Fundamental: Electricity (cont'd) Power Factor • Electromagnetic Properties
1500 - 1515	Break
1515 - 1645	Part 2 - Applied Sciences Fundamental: Electricity (cont'd) Right-Hand Rule • Current & Voltage Measurements (Devices & Principles)
1645 - 1700	Course Conclusion
1700 - 1715	POST-TEST
1715 - 1730	Presentation of Course Certificates
1730	End of Course

MOCK Exam

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward's Portal. Each participant will be given a username and password to log in Haward's Portal for the MOCK Exam during the 30 days following the course completion. Each participant has only one trial for the MOCK exam within this 30-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

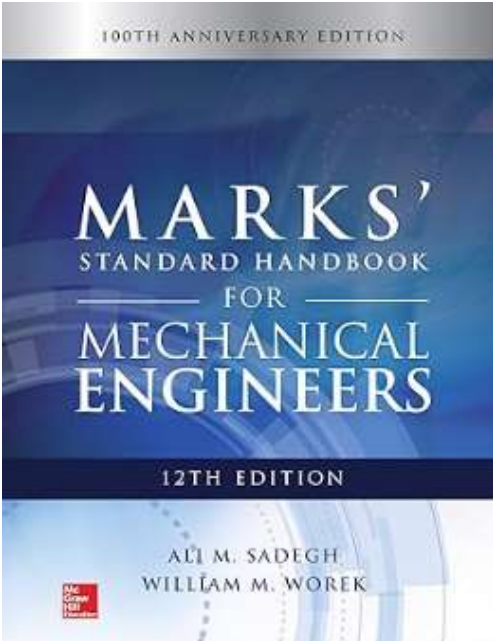

Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises:-

Book(s)

As part of the course kit, the following e-book will be given to all participants:

Title : Marks' Standard Handbook For Mechanical Engineers
ISBN :978-1259588501
Author : Ali Sadegh, William Worek
Publisher : McGraw Hill

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
