Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide the knowledge and tools to assist management personnel in the development of oil spill contingency arrangements and to gain the decision-making skills necessary to make immediate and informed decisions during oil spill incidents.

Participants will also be provided with a knowledge of the fate and behavior of spilled oil, the impacts that oil has on the marine environment, the vulnerability of various to shoreline types and impact that clean-up operations may have.

The course content is designed to be compatible with the IMO OPRC Model Training Course Level 2, for Supervisors and On-Scene Commanders.

The course also includes **'Hands-on' Practical Sessions** for deployment and operating of equipment to reinforce safety and assessments of oiled shorelines.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on oil spill management and response including the behavior, fate and effects of oil spills in the marine environment and the best practices in dealing with oil spill
- Discuss contingency planning, response management and organization
- Explain sensitivity mapping including the behavior, fate, environmental and economic impact of oil spills
- Describe spill assessment and operations planning
- Identify the oil spill response options and the containment, protection and recovery of oil including dispersants and in-situ burning
- Distinguish shoreline clean-up, site safety and waste management
- Develop media relations as well as the communications and sharing of information
- Employ information gathering and record keeping and discuss the liability and compensation
- Explain termination of response and the post-incident debriefing

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor’s actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Who Should Attend
