

COURSE OVERVIEW HE0913 **Certified Occupational Health, Safety & Industrial Hygiene**

CEUS

(30 PDHs)

Course Title

Certified Occupational Health, Safety & Industrial Hygiene

Course Reference

HE0913

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Date/Venue

Session(s)	Date	Venue
1	July 20-24, 2025	Olivine Meeting Room, Fairmont Nile City, Cairo, Egypt
2	August 11-15, 2025	Fujairah Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE
3	November 16-20, 2025	Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE
4	January 18-22, 2026	Meeting Plus 9, City Centre Rotana, Doha Qatar

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

The course covers the importance of occupational health, safety and industrial hygiene in the workplace with special emphasis on industrial plants. It presents the majority of the latest aspects in risk management and accident investigation. The course highlights how to identify safety training needs. Near miss, incident and accident reporting is handled to show how these statistics can help to prevent losses to the company and employees.

Industrial hygiene will be thoroughly discussed in this course including the anticipation, recognition, evaluation and control of health hazards in the workplace. The course will explain the necessity for backup information through laboratory research and field studies in all aspects of recognition, evaluation and control in order to assume a healthful working environment.

The need for formal working procedures is stressed so that all employees have conformity in their operations. A change in employee attitude is needed to improve the safety situation in a plant. The management of hazardous materials is covered by giving full details of storage, handling and safe disposal of spills.

HE0913 - Page 1 of 12

Dangerous operations relating to confined space entry, scaffolding, hot work and gases are discussed in detail. A number of case histories will be covered to analyze the reasons for accidents and how they could have been prevented. The types and uses of safety equipment and personal protective equipment are also discussed.

Safety Programme auditing is covered to show how this can gauge the company's safety status. The "Permit to Work" system is described in detail to show how it can save lives. Emergency procedures are covered to ensure minimum additional loss in the case of an accident. Further, this course covers the training requirement by OSHA for PSM (Process Safety Management) as per OSHA 29 CFR 1910.119.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on occupational health, safety and industrial hygiene to improve safety conditions in industrial plants and production facilities
- Identify the safety management methodologies including employee attitudes towards safety, staff motivation, safety statistics and reporting, risk assessment, hazard management, emergency procedures, safety training and assessment, permit to work system, etc.
- Recognize accident causation in the workplace and apply industrial preventive measures and safety procedures
- Discuss occupational health including legal requirements, information sources, job description, accident statistics, task analysis, job safety analysis, etc.
- Apply the safety management system in a professional manner
- Practice accident investigation by using safety legislation as it pertains to industrial applications
- Discuss the industrial hygiene including the anticipation, recognition, evaluation and control of health hazards in the workplace
- Follow emergency procedures, safety training and assessments and apply permit to work system to reduce future risk

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**[®]). The **H-STK**[®] consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of occupational health, safety and industrial hygiene for those who are working in hazardous areas like refineries, petrochemical plants, gas processing units, gas gathering units, gas transportation terminals, hazardous materials factories, oil/gas complex (onshore/offshore), power plants, etc. The course is essential for managers, section heads, engineers, superintendents, supervisors, foremen and other staff in the above-mentioned industries. The course is a must for those in-charge of occupational health, safety and industrial hygiene (HSE).

HE0913 - Page 2 of 12

Course Certificate(s)

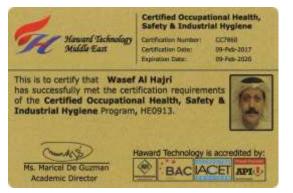

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:-

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:

BAC

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

HE0913 - Page 5 of 12

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Peter Christian is an International Expert in Safety, Health, Environmental and Quality with over 25 years of practical and industrial experience in Lifting & Rigging Equipment HAZOP, HAZWOPER, HAZMAT, HAZCOM, PHA (Process Hazard Analysis), FMEA, HAZID, ISO 14001, OHSAS 18001, ISO 9001, Process Safety Management (PSM), Safety, Health, Environmental & Quality Management (SHEQ), Behavioral Safety Management, Industrial Hygiene, Human Factors Engineering, Risk Assessment, Fire Fighting, Rope Rescue Operations,

Emergency Response within process industries. He is currently the **President** of **NKWE** and spearheads the companies major projects and business ventures, where he specializes in the areas of **SHEQ** solutions, **ISO**, **Quality Control** and **OSHA systems**. Previously, he has had much on-hand experience in the initiation and management of projects (technical as well organizational development) including involvement in **design of process plants**; **the commissioning & decommissioning** of process plants; the **operational and financial responsibility** for large process operations; **risk management**; **operational and maintenance management**, **crisis and emergency management**, **accident investigation**, **risk assessment**, **hazard identification** and **emergency preparedness & response** (oil spillage and gas explosions).

Much earlier in his career, Mr. Christian was a **HAZOP Team Leader** for numerous **HAZOP** studies and he has further managed the **Health**, **Safety & Environmental** and **Quality** requirements of a large process company. This included responsibilities as an auditor for compliance against **SHEQ standards**, **ISO standards** and the **Fatal Risk Control Protocols**. He then facilitated the development and implementation of the above standards as a group and at site level as part of the SHEQ council. Moreover, he established, trained and led a Rope rescue team and a high level emergency care clinic and ambulance service for many years. He still abseils recreationally and leads adventure groups during abseiling activities and serves as a rescue team member for mountain and water emergencies.

During his career life, Mr. Christian has gained his practical and field experience through his various significant positions as the **Plant Manager**, **Project Metallurgist**, **Metallurgist**, **HSE Team Leader**, **SHEC Superintendent**, **Mentor**, Instructor/Trainer, Acting **Technical Manager**, **Process Plant Superintendent**, Acting **Project Leader**, Acting **Plant Superintendent**, Appointed **Health & Safety & Environmental Superintendent**, Production Technician, Acting **Senior Shiftsman**, Foreman and Learner – Official Extraction Metallurgy from various companies such as the NKWE Consulting, SAMANCOR, Middleburg Mine Services (Pty) Ltd., Koomfontein Mines, Emelo Mine Services, Gencor Group and South African Defence Force.

Mr. Christian has a Postgraduate Studies in Advanced Executive Programme and a National Higher Diploma (NHD) & a National Diploma in Extraction Metallurgy. He is also a Certified Auditor in OHSAS 18001, ISO 14001 & ISO 9001, a Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM), a Six Sigma Black Belt Coach and holds a Certificate in Facilitate Learning Using a Variety of Given Methodologies NQF Level 5 (EDTP-SETA) as a Certified Facilitator. He has further delivered innumerable courses, trainings, workshops and conferences globally.

Course Fee

Cairo	US\$ 5,500 per Delegate + VAT . This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Abu Dhabi	US\$ 5,500 per Delegate + VAT . This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Dubai	US\$ 5,500 per Delegate + VAT . This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Doha	US\$ 6,000 per Delegate. This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

Day 1	
0730 - 0745	Registration & Coffee
0745 - 0800	Welcome & Introduction
0800 - 0815	PRE-TEST
0815 - 0930	Outlines of Safety & Loss Control & Maintenance of HSE StandardsMaintenance of Safety Standards • Moral-The Size of the Problem • Costs of Accidents& Ill-Health • Insurance, Costs & Liabilities • HSE: The Cost of Accidents at Work• Employer's Responsibility • Regulatory Frameworks • Organisational Roles & Responsibilities • Roles & Responsibilities • Regulatory Frameworks • Interface of Safety • Understanding Hazards • The Biggest Hazard is Behavior & Attitude • Involvement • Auditing-Essential Elements to Verify
0930 - 0945	Break
0945 – 1100	HSE Management Health & Safety Policies • What is a Health and Safety Policy? • The Three Elements of a H&S Policy Document • The Statement of Intent • The Organisation • The Organisation–Who Does What? • Arrangements-How it's Done • Arrangements • Health & Safety Policies • International Certificate • The Organisation-Culture • Health & Safety Culture • The Relationship Between Attitude & Safety • Negative Culture
1100 – 1230	HSE Management (cont'd) Health & Safety Culture • Culture-the Four-Cs • Organizing-Control • Communication • Safety Signs & Signals • Definitions Communication • The Cycle of Communication • The Environment of Commutation • Forms of Communication • Methods of Communication • Organising-Cooperation • Organising-Consultation • Functions of Safety Committees
1230 - 1245	Break

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the state-of-the-art "Industrial Hygiene Virtual Laboratory Simulator", "CIHprep V9.0 Simulator", "Extech 445580: Humidity/Temperature Pen" and "Digital Sound Level Meter".

Question Number: 894 Engineering Controls/Ventilation	
A room 50 x 20 x 10 feet contains 100 ppm of CCl ₄ . How much time is required to lower the concentration to 25 ppm if a blower generating 300 cfm is used to cl room?	ear the
A) 46.0 min B) 11.1 min C) 7.5 min D) 54.0 min	
You did not answer this question.	
The correct answer is: A	
$t = \log (C/C_0)(-2.303)(P/Q)$	
Substituting we get: t = log (25/100)(-2.303)(10,000 ft ³ /300 cfm) t = 46 min	
Where: P = Room volume $C_{c} = Beginning concentration$ C = Ending concentration Q = Flow
