

## **COURSE OVERVIEW OE0072** **Rig Inspection**

### **Course Title**

Rig Inspection

### **Course Date/Venue**

Please refer to page 4

### **Course Reference**

OE0072

### **Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

### **Course Description**

***This practical and highly-interactive course includes real-life case studies where participants will be engaged in a series of interactive small groups and class workshops.***

This course is designed to provide participants with a comprehensive overview of Rigs inspection and Audit. It covers the roles and responsibilities of rig inspectors and auditors; the safety considerations during rig inspections and audits; the drilling rig systems and equipment and types of drilling rigs and components of rig floor, drill string, mud system, and power system; the regulatory compliance requirements, inspections and audits; permitting and licensing processes; the environmental regulations and considerations; the rig inspection or audit and checklists; the potential issues and hazards; and the electrical and control systems, mechanical systems and safety systems.

During this interactive course, participants will learn the inspection and audit requirements; the best practices for maintaining and operating electrical and control systems, mechanical systems and equipment, drilling equipment and safety systems and procedures; the documentation requirements for rig inspections and audits; the reporting and recordkeeping requirements; the common issues and challenges with documentation and reporting; and the advanced rig inspection and audit techniques; the use of technology for rig inspections and audits; and the third-party inspections and audits.

### Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on rigs inspection and audit
- Discuss the roles and responsibilities of rig inspectors and auditors and the safety considerations during rig inspections and audits
- Recognize drilling rig systems and equipment, types of drilling rigs and components of rig floor, drill string, mud system, and power system
- Perform regulatory compliance requirements for drilling rigs, compliance inspections and audits, permitting and licensing processes, and environmental regulations and considerations
- Plan and prepare rig inspection or audit, develop and customize checklists, identify potential issues and hazards and communicate with rig personnel and management
- Explain the electrical and control systems, mechanical systems and safety systems
- Recognize inspection and audit requirements for electrical and control systems, mechanical systems and equipment, drilling equipment and safety systems and procedures
- Identify hazards and potential issues and apply best practices for maintaining and operating electrical and control systems, mechanical systems and equipment, drilling equipment and safety systems and procedures
- List the documentation requirements for rig inspections and audits including the reporting and recordkeeping requirements
- Identify common issues and challenges with documentation and reporting as well as communicate and follow-up after the inspection or audit
- Employ advanced rig inspection and audit techniques, use technology for rig inspections and audits and apply third-party inspections and audits

### Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

### Who Should Attend

This course provides an overview of all significant aspects and considerations of completion selection and design for those who are involved in drilling operations and want to expand their knowledge on completion design and selection. This course is suitable for drilling engineers, well completion engineers, reservoir engineers, production engineers, and any other professionals involved in the design and execution of drilling operations.

### **Course Certificate(s)**

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### **Certificate Accreditations**

Haward's certificates are accredited by the following international accreditation organizations: -

-  British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

-  The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Course Date/Venue

Session(s)	Date	Venue
1	May 10-14, 2026	Meeting Plus 9, City Centre Rotana, Doha, Qatar
2	June 21-25, 2026	Pierre Lotti Meeting Room, Movenpick Hotel Istanbul Golden Horn, Istanbul, Turkey
3	July 27-31, 2026	Ruben Boardroom, The Rubens at The Palace, Buckingham Palace Road, London, United Kingdom
4	September 20-24, 2026	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE
5	November 09-13, 2026	Salon Expo, NH Hotel Plaza de Armas, Seville, Spain
6	December 13-17, 2026	Meeting Room 4, Four Seasons Hotel Cairo at Nile Plaza, Corniche El Nil, Garden City, Cairo, Egypt
7	January 10-14, 2027	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE
8	March 14-18, 2027	Meeting Plus 9, City Centre Rotana, Doha, Qatar

### Course Fee

Doha	<b>US\$ 8,500</b> per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Istanbul	<b>US\$ 8,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
London	<b>US\$ 8,800</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Dubai	<b>US\$ 8,000</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Seville	<b>US\$ 8,800</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Cairo	<b>US\$ 8,000</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Stan Constantino**, MSc, BSc, is a **Senior Petroleum Engineer** with over **30 years** of **Offshore & Onshore** experience in **Drilling/Reservoir/Petroleum Engineering** and **Well Service Operations**. His area of expertise includes **Reservoir Surveillance & Management**, **Reservoir Engineering & Simulation**, **Reservoir Monitoring**, **Reservoir Engineering Applications** with ESP and Heavy Oil, **Reserve Evaluation**, **Directional Drilling**, **Drilling Production & Operations**, **Field Development & Production of Oil & Gas**, **Wireline Logging**, **Mud Logging**, **Production Logging**, **Slick Line**, **Coil Tubing**, **Exploration Wells Evaluation**, **Horizontal Wells**, **Well Testing**, **Well Workover Supervision**, **Pressure Transient Analysis** and **Petrophysical Log Analysis**. Currently, he is the **Managing Director** of **Geotech** wherein he is responsible in managing the services and providing technical support to underground energy related projects concerning **field development**, **production**, **drilling**, **reservoir engineering** and **simulation**.

Throughout his long career life, Mr. Stan has worked for many international companies such as the **Kavala Oil**, **North Aegean Petroleum Company** and **Texaco Inc.**, as the **Managing Director**, **Operations Manager**, **Petroleum Engineering & Exploration Department Head**, **Assistant Chief Petroleum Engineer**, **Senior Petroleum Engineer** and **Petroleum Engineer**.

Mr. Stan has a **Master's in Petroleum Engineering** and a **Bachelor's degree in Geology** from the **New Mexico Institute of Mining & Technology** and from the **Aristotelian University, Greece**, respectively. Further, he is a member of the Society of Petroleum Engineers, USA (**SPE**), Society of Well Log Professional Analysts, USA (**SPWLA**) and European Association of Petroleum Geoscientists & Engineers (**EAGE**).

### Course Program

The following program is planned for this course. However, the course director(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1**

0730 – 0800	<i>Registration &amp; Coffee</i>
0800 – 0815	<i>Welcome &amp; Introduction</i>
0815 – 0830	<b>PRE-TEST</b>
0830 – 0930	<b>Introduction to Rig Inspection &amp; Audit</b> <i>Importance of Rig Inspection and Audit • Regulatory Requirements and Industry Standards • Roles and Responsibilities of Rig Inspectors and Auditors • Safety Considerations During Rig Inspections and Audits</i>
0930 – 0945	<i>Break</i>
0945 – 1100	<b>Rig Systems &amp; Equipment</b> <i>Drilling Rig Systems and Equipment • Types of Drilling Rigs</i>

1100 – 1230	<b>Rig Systems &amp; Equipment (cont'd)</b> <i>Components of the Rig Floor, Drill String, Mud System, and Power System</i>
1230 – 1245	<i>Break</i>
1245 – 1420	<b>Rig Systems &amp; Equipment (cont'd)</b> <i>Rig Maintenance and Inspection Requirements</i>
1420 - 1430	<b>Recap</b>
1430	<i>Lunch &amp; End of Day One</i>

## Day 2

0730 – 0930	<b>Regulatory Compliance</b> <i>Regulatory Requirements for Drilling Rigs • Compliance Inspections and Audits</i>
0930 – 0945	<i>Break</i>
0945 – 1045	<b>Regulatory Compliance (cont'd)</b> <i>Permitting and Licensing Processes • Environmental Regulations and Considerations</i>
1045 – 1230	<b>Rig Inspection &amp; Audit Planning</b> <i>Planning and Preparing for a Rig Inspection or Audit • Checklist Development and Customization</i>
1230 – 1245	<i>Break</i>
1245 – 1420	<b>Rig Inspection &amp; Audit Planning (cont'd)</b> <i>Identifying Potential Issues and Hazards • Communication with Rig Personnel and Management</i>
1420 - 1430	<b>Recap</b>
1430	<i>Lunch &amp; End of Day Two</i>

## Day 3

0730 – 0930	<b>Electrical &amp; Control Systems</b> <i>Inspection and Audit Requirements for Electrical and Control Systems</i>
0930 – 0945	<i>Break</i>
0945 – 1045	<b>Electrical &amp; Control Systems (cont'd)</b> <i>Identifying Hazards and Potential Issues • Best Practices for Maintaining and Operating Electrical and Control Systems</i>
1045 – 1230	<b>Mechanical Systems &amp; Equipment</b> <i>Inspection and Audit Requirements for Mechanical Systems and Equipment</i>
1230 – 1245	<i>Break</i>
1245 – 1420	<b>Mechanical Systems &amp; Equipment (cont'd)</b> <i>Identifying Hazards and Potential Issues • Best Practices for Maintaining and Operating Mechanical Systems and Equipment</i>
1420 - 1430	<b>Recap</b>
1430	<i>Lunch &amp; End of Day Three</i>

## Day 4

0730 – 0930	<b>Drilling Equipment Inspection</b> <i>Inspection and Audit Requirements for Drilling Equipment • Identifying Hazards and Potential Issues with Drilling Equipment</i>
0930 – 0945	<i>Break</i>
0945 – 1045	<b>Drilling Equipment Inspection (cont'd)</b> <i>Best Practices for Maintaining and Operating Drilling Equipment • Drilling Equipment Testing and Certification Requirements</i>
1045 – 1230	<b>Safety Systems &amp; Procedures</b> <i>Inspection and Audit Requirements for Safety Systems and Procedures</i>
1230 – 1245	<i>Break</i>

1245 – 1420	<b>Safety Systems &amp; Procedures (cont'd)</b> <i>Identifying Hazards and Potential Issues with Safety Systems and Procedures</i> • Best Practices for Maintaining and Operating Safety Systems and Procedures
1420 - 1430	<b>Recap</b>
1430	<i>Lunch &amp; End of Day Four</i>

### **Day 5**

0730 – 0930	<b>Documentation &amp; Reporting</b> <i>Documentation Requirements for Rig Inspections and Audits • Reporting and Recordkeeping Requirements</i>
0930 – 0945	<i>Break</i>
0945 – 1045	<b>Documentation &amp; Reporting (cont'd)</b> <i>Common Issues and Challenges with Documentation and Reporting • Communication and Follow-up After the Inspection or Audit</i>
1045 – 1230	<b>Advanced Rig Inspection &amp; Audit Techniques</b> <i>Using Technology for Rig Inspections and Audits</i>
1230 – 1245	<i>Break</i>
1245 – 1345	<b>Advanced Rig Inspection &amp; Audit Techniques (cont'd)</b> <i>Third-Party Inspections and Audits • Continuous Improvement and Lessons Learned</i>
1345 - 1400	<b>Course Conclusion</b>
1400 – 1415	<b>POST-TEST</b>
1415 – 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch &amp; End of Course</i>

### **Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises:-

### **Course Coordinator**

Jaryl Castillo, Tel: +974 6652 9196, Email: [jaryl@haward.org](mailto:jaryl@haward.org)
