

COURSE OVERVIEW HE0127
Occupational Hygiene Certification Program
OHTA507: Health Effects of Hazardous Substances
(Accredited by the Occupational Hygiene Training Association - OHTA)

Course Title

Occupational Hygiene Certification Program:
 OHTA507: Health Effects of Hazardous Substances
(Accredited by the Occupational Hygiene Training Association - OHTA)

Course Reference

HE0127

Course Duration

Five days/4.0 CEUs/40 PDHs

Course Date/Venue

Session(s)	Date	Venue
1	January 26-30, 2025	TBA Meeting Room, City Centre Rotana Doha, Doha, Qatar, Doha, Qatar
2	April 20-24, 2025	Al Aziziya Hall, The Proud Hotel Al Khobar, Al Khobar, KSA
3	June 29-July 03, 2025	TBA Meeting Room, City Centre Rotana Doha, Doha, Qatar, Doha, Qatar
4	September 21-25, 2025	Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE
5	October 26-30, 2025	Slaysel 02 Meeting Room, Movenpick Hotel & Resort Al Bida'a Kuwait, City of Kuwait
6	November 17-21, 2025	Fujairah Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

The course is a core module for the International Certificate in Occupational Hygiene (ICertOHTA). It is designed to be delivered as a 5-day taught programme including participant's assessment.

The aim of the course is :-

- Introduce you to toxicology, physiology and epidemiology
- Identify chemical substances hazardous to health at work and their harmful effects on target organs

On completing this course successfully, the participants will be able to :-

- Define commonly used toxicological terms
- Know the main routes by which hazardous substances can enter the body, and the factors which influence their absorption, distribution, storage and elimination
- Know where to find information on hazardous substances and processes
- Understand the principal target organs affected by hazardous substances at work, and the factors influencing harm
- Know the main routes of exposure and toxic and health effects for hazardous substances commonly encountered in the workplace
- Interpret results from epidemiological studies

This course is designed to provide participants with a detailed and up-to-date overview of OHTA507: Health Effects of Hazardous Substances. It covers the basic toxicological terms and concepts and the physical forms of hazardous substances; the types of health effects and basic human biology and target organs covering respiratory system, skin, nervous system, circulatory system, liver, kidney and reproductive system; basic toxicokinetics comprising of absorption, distribution and storage, metabolism and excretion; the dose-response curves and toxicity testing including allergy assessment methods in humans; and the epidemiology terms, types of epidemiological studies and health effects.

During this interactive course, participants will learn the gases, organic solvents and vapours and other selected organic liquids; the metals and metal compounds, dusts and particulate materials, mineral fibres and common industrial processes; the materials handling, machining, welding and thermal cutting, surface coating, treatment of metals, soldering, brazing, degreasing and painting; the smelting and refining of iron and steel, foundries, mining and quarrying; and the biological hazards covering legionella and humidifier fever, blood borne diseases, zoonoses, moulds, pandemics and genetic modification.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Achieve the OHTA Certificate in OHT507: Health Effects of Hazardous Substances
- Discuss some basic toxicological terms and concepts and the physical forms of hazardous substances
- Identify the types of health effects and the basic human biology and target organs covering respiratory system, skin, nervous system, circulatory system, liver, kidney and reproductive system
- Discuss basic toxicokinetics comprising of absorption, distribution and storage, metabolism and excretion
- Carryout dose-response curves and toxicity testing including allergy assessment methods in humans
- Define epidemiology terms, types of epidemiological studies and health effects
- Identify gases, organic solvents and vapours and other selected organic liquids
- Recognize metals and metal compounds, dusts and particulate materials, mineral fibres and common industrial processes
- Apply materials handling, machining, welding and thermal cutting, surface coating, treatment of metals, soldering, brazing, degreasing and painting
- Discuss smelting and refining of iron and steel, foundries, mining and quarrying
- Identify biological hazards covering legionella and humidifier fever, blood borne diseases, zoonoses, moulds, pandemics and genetic modification

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course covers deeper appreciation and wide understanding of health effects of hazardous substances for health and safety professionals, occupational health specialists including physicians and nurses. Specialists in subjects such as acoustics, ergonomics, human factors, occupational psychology, work organisation, biosafety, engineering, analytical chemistry and those who want a broader appreciation of how their role interfaces with other professions over health issues in the workplace will find this course beneficial.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Training Fee

Doha	US\$ 8,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Al Khobar	US\$ 7,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Doha	US\$ 8,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Dubai	US\$ 7,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Kuwait	US\$ 7,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Abu Dhabi	US\$ 7,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Exam Fee

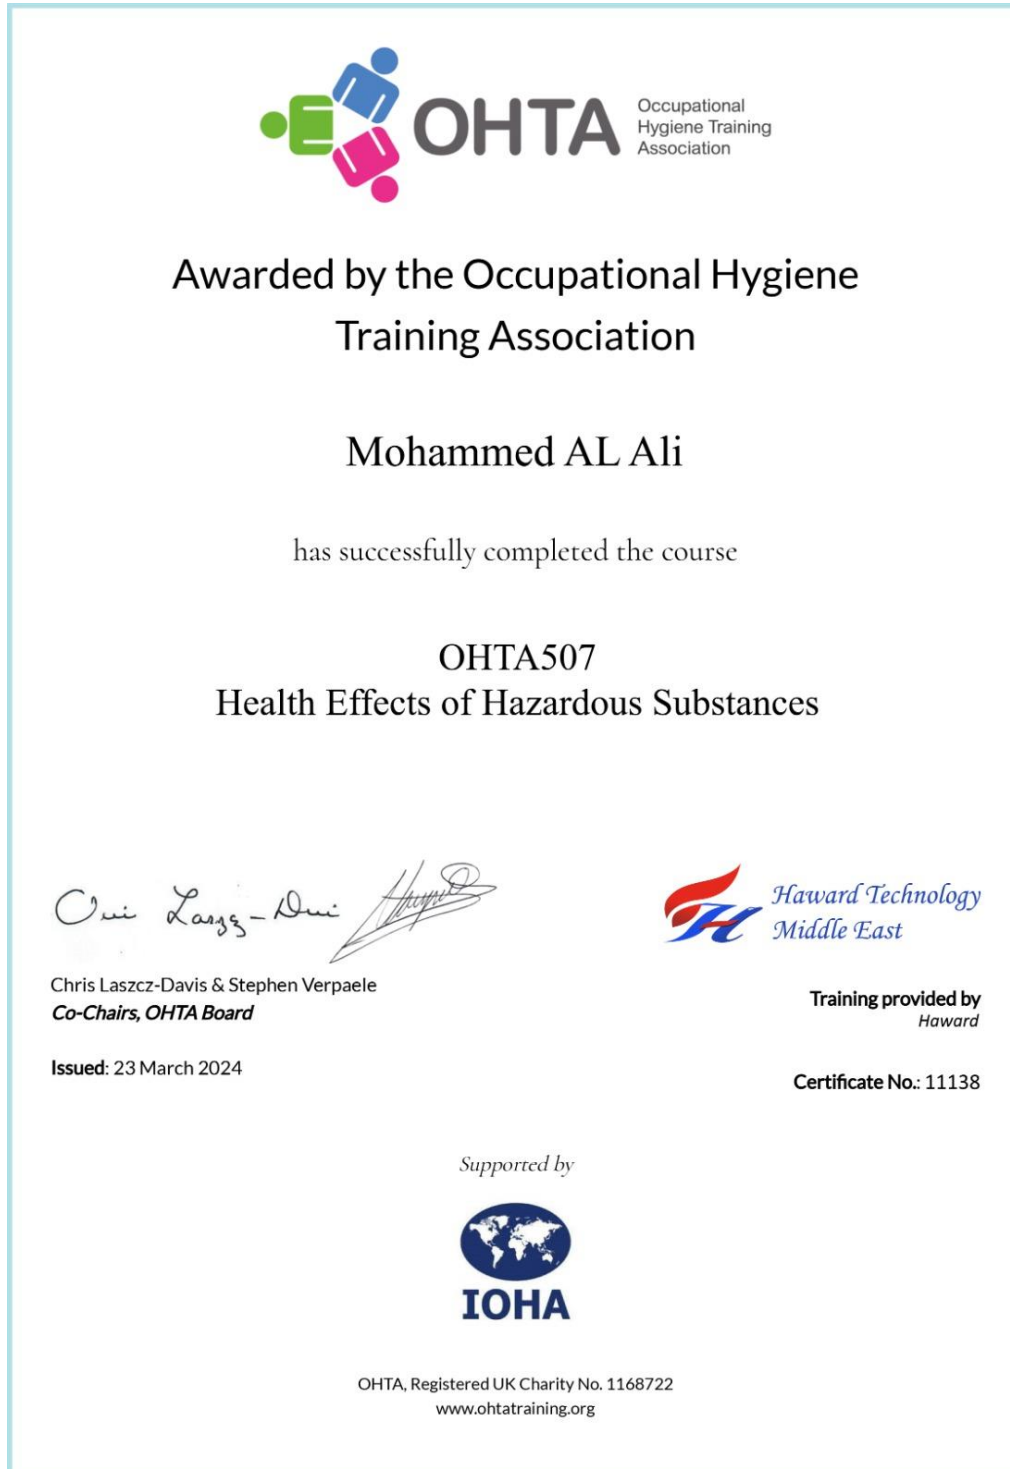

US\$ 280 per Delegate + **VAT**.

Course Certificate(s)

(1) OHTA Certificates will be issued to participants who have successfully completed the course and passed the exam of the course.

OHTA Certificate(s)

The following certificate is a sample of the OHTA certificates that will be issued to successful candidates:-

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course

* Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology *

Jaryl Castillo
 Academic Director

Haward Technology has been approved as an Accredited Provider by the International Association for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this approval, Haward Technology has demonstrated that it complies with the ANSI/IACET 1-2018 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2018 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology is accredited by

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3091 714 | E-mail: info@haward.org | Website: www.haward.org

* Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology *

Certificate Accreditations

Haward Technology is accredited by the following international accreditation organizations:-

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
Occupational Hygiene Training Association (OHTA)

Haward Technology is an Approved OHTA Trainer under the OHTA201 and OHTA500 series modules that promote better standards of occupational hygiene practice throughout the world.

Haward Technology supports hygiene professionals who wanted people around the world to enjoy the benefits of healthy working environments.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **4.0 CEUs** (Continuing Education Units) or **40 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Peter Jacobs, is a **Senior HSE Consultant** with almost **25 years** of extensive experience within **Oil & Gas, Refinery and Petrochemical** industries. His wide experience covers in the areas of **Incident Command & Report Writing, HAZOP, HAZMAT, HAZID, Health Risk Assessment, Modern Safety Risk Management, Process Risk Management, Root Cause Analysis Techniques, HSE Management System Development & Implementation, SAESI Hazardous Materials for the First Responder Operations (NFPA 472), Industrial Safety & Housekeeping, Job Safety & Hazard Analysis, Hazardous Substances Measurement, Workplace Control, Physical Agents, Emergency Response, Chemical & Biological Operations, Basic Safety & Loss Prevention, Safety in Chemical Laboratory, Confined Space Safety, Industrial Hygiene, Occupational Health & Hygiene, Ergonomics, Biological Assessment, Radiation with Radon/Thoron Assessment, Radiation Protection Safety, Radiation Monitoring, Natural Radiation Sources, Nuclear Regulatory Act, Industrial Ventilation, Air Pollution Dispersion Modelling, Basic Clasndestine Drug Laboratory Investigation, Chemical Engineering, Fire Safety & Evacuation, Evacuation Safety, Safety Orientation, Hand & Power Tools Safety, Isokinetic Stack Sampling, Dust Exposure, Quantifying Workplace Stressors, Noise & Airborne Pollutants, Thermal Stress, Illumination, Mine Health & Safety, Statistical Method Validation, Legal Audit Compliance, Riot & Crowd Control, ISO 14000, OHSAS 18000, ISO 17025 and ISO 9000.**

During his career life, Mr. Jacobs has gained his practical and field experiences through his various significant positions and dedication as the **Forensic Science Laboratory Manager, Occupational Hygienist, Radiation Protection Officer, Lead Practitioner, Safety, Health & Environmental (SHE) Specialist, First Responder, OHS Inspector, Ambulance Assistant and LPG Distributor Auditor** from various international companies like the Sedulitas, Richards Bay Minerals, Sasol and South African Police Service.

Mr. Jacobs has a **Master's degree in Public Health – Occupational Hygiene, a National Diploma in Purchasing Management** and held an Intermediate Certificate in Mine Environmental Control an **Accredited South African Emergency Services Institute (SAESI)**. Further, he is a **Certified Instructor/Trainer**, an Appointed Commissioned Officer, a SAIOH/ IOHA President, an Assessor/Moderator of Health & Welfare SETA, a **Registered Occupational Hygienist** of the Southern African Institute for Occupational Hygiene, awarded as a SAIOH **Occupational Hygienist of the Year Award** and a well-regarded member of the British Occupational Hygiene Society (**BOHS**), Mine Ventilation Society of South Africa (MVSSA) and South African Radiological Protection Association (SARPA). He has further delivered numerous trainings, courses, seminars, workshops and conferences worldwide.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0745	<i>Registration & Coffee</i>
0745 – 0800	<i>Welcome & Introduction</i>
0800 – 0815	PRE-TEST
0815 – 0930	Introduction to Toxicology <i>Introduction & Historical Perspective • Some Basic Toxicological Terms & Concepts (Acute & Chronic Effects, Local & Systemic Effects, Xenobiotic, Stochastic & Non-Stochastic, Types of Combined Effects, Limitations of Toxicity Testing Data) • Physical Forms of Hazardous Substances</i>
0930 – 0945	<i>Break</i>
0945 – 1230	Types of Health Effects <i>Asphyxiation • Irritation • Narcosis • Systemic Toxicity</i>
1230 – 1330	<i>Lunch</i>
1330 – 1530	Types of Health Effects (cont'd) <i>Genotoxicity & Carcinogenicity (Genotoxicity, Carcinogenicity, Benign & Malignant Tumours, Difficulties in Identifying Carcinogens, Classifications of Carcinogens) • Sensitisation - (Allergic Reaction) • Reproductive Effects</i>
1530 – 1545	<i>Break</i>
1545 – 1650	Basic Human Biology & Target Organs <i>Respiratory System (Structure of the Respiratory System, Particle Deposition in the Respiratory System, Particle Size Fractions, Absorption of Gases & Vapours, the Lung as a Target Organ, Respiratory Sensitisation) • Skin (Structure & Function, the Skin as a Route of Entry & the Skin as a Target Organ)</i>
1650 – 1700	Recap <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow</i>
1700	<i>End of Day One</i>

Day 2

0730 – 0930	Basic Human Biology & Target Organs (cont'd) <i>Nervous System (Structure & Function & Nervous System as a Target Organ) • Circulatory System (Components & Function, Blood as a Target Organ) • Liver (Structure & Function, the Liver as a Target Organ)</i>
0930 – 0945	<i>Break</i>
0945 – 1230	Basic Human Biology & Target Organs (cont'd) <i>Kidney (Structure & Function of the Kidney, Kidney as a Target Organ) • Reproductive System</i>
1230 – 1330	<i>Lunch</i>
1330 – 1530	Basic Toxicokinetic <i>Absorption (Inhalation, Direct Contact (Skin or Dermal Absorption), Ingestion, Injection) • Distribution & Storage</i>

1530 – 1545	Break
1545 – 1650	Basic Toxicokinetic (cont'd) Metabolism (Biotransformation of Benzene, Biotransformation of Dichloromethane, Biotransformation of Methanol) • Excretion
1650 – 1700	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Two

Day 3

0730 – 0930	Dose - Response Curves & Toxicity Testing Introduction to Dose-Response Curves (No Observed Adverse Effect Level, Threshold, Slope of Curve)
0930 - 0945	Break
0945 – 1230	Dose - Response Curves & Toxicity Testing (cont'd) Toxicity Testing (Types of Toxicity Testing, Toxicokinetic Studies, Acute Toxicity Studies, Sensitisation Studies, Repeated Dose Toxicity Studies, Genotoxicity Studies, Reproductive & Developmental Toxicity Studies, Carcinogenicity Studies) • Allergy Assessment Methods in Humans (Lung Function Tests, Challenge Tests, Skin Prick Allergy Tests, Patch Testing, Serological Tests)
1230 - 1330	Lunch
1330 – 1530	Epidemiology Introduction • Reasons for Undertaking Epidemiological Studies • Epidemiological Terms (Incidence & Prevalence Rates, Measures of Frequency, Causation or Association, Bias, Statistical Significance)
1530 - 1545	Break
1545 - 1650	Epidemiology (cont'd) Types of Epidemiological Studies (Longitudinal Studies, Cross-Sectional Studies)
1650 – 1700	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Three

Day 4

0730 – 0930	Overview of Health Effects Introduction • Gases (Introduction, Simple Asphyxiants, Chemical Asphyxiants, Respiratory Tract Irritants, Other Gases) • Organic Solvents & Vapours (Introduction, Exposure to Organic Solvents, General Health Effects, Specific Information for Selected Organic Solvents) • Other Selected Organic Liquids (Styrene, Isocyanates)
0930 - 0945	Break
0945 - 1230	Overview of Health Effects (cont'd) Metals and Metal Compounds (Aluminium (Al), Arsenic and its inorganic salts (As), Beryllium (Be), Cadmium (Cd), Chromium (Cr), Cobalt (Co), Copper (Cu), Iron (Fe), Lead (Pb), Manganese (Mn), Mercury (Hg), Nickel (Ni), Vanadium (V), Zinc (Zn)) • Dusts and Particulate Materials (Crystalline Silica, Nanoparticles, Diesel Engine Exhaust, Latex, Enzymes, Flour and other Food Components) • Mineral Fibres (Asbestos; Machine Made Mineral Fibres (MMMMF))

1230 - 1330	Lunch
1330 - 1530	Common Industrial Processes <i>Introduction • Materials Handling (Handling of Solids and Powders; Handling of Liquids) • Working with Metals (Grinding, Machining of Metals, Welding and Thermal Cutting) • Surface Coating and Treatment of Metals (Electroplating and Galvanizing)</i>
1530 - 1545	Break
1545 - 1650	Common Industrial Processes (cont'd) <i>Soldering and Brazing • Degreasing (Cold Degreasing, Vapour Degreasing) • Painting (Exposure to Solvents in Painting)</i>
1650 - 1700	Recap <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow</i>
1700	End of Day Four

Day 5

0730 - 0930	Specific Industry Profiles <i>Introduction • Smelting & Refining of Iron and Steel (Chemical Hazards of Smelting and Refining, Other Industrial Hygiene Hazards of Smelting and Refining) • Foundries (Iron Foundries, Other Foundries)</i>
0930 - 0945	Break
0945 - 1230	Specific Industry Profiles (cont'd) <i>Mining and Quarrying (Airborne Particulate Hazards, Other Hazards) • Oil and Petroleum Industry (Petroleum Refining) • Pharmaceutical Industry</i>
1230 - 1330	Lunch
1330 - 1530	Regulatory Considerations <i>Risk and Safety Phrases • Sources of Information (Safety Data Sheets (SDS), Literature, Reach (Registration, Evaluation, Authorisation and Restriction of Chemicals Regulations))</i>
1530 - 1545	Break
1545 - 1615	Biological Hazards <i>Introduction To Biological Hazards • Legionella and Humidifier Fever (Legionella, Humidifier Fever) • Blood Borne Diseases (Hepatitis B, Hepatitis C, HIV - (Human Immuno-Deficiency Virus)) • Zoonoses (Anthrax (ACDP Group 3), Leptospirosis (Hazard Group 2), Salmonellosis) • Moulds • Pandemics • Genetic Modification</i>
1615 - 1630	Course Conclusion
1630 - 1645	POST-TEST
1645 - 1700	<i>Presentation of Course Certificates</i>
1700	End of Course

MOCK Exam

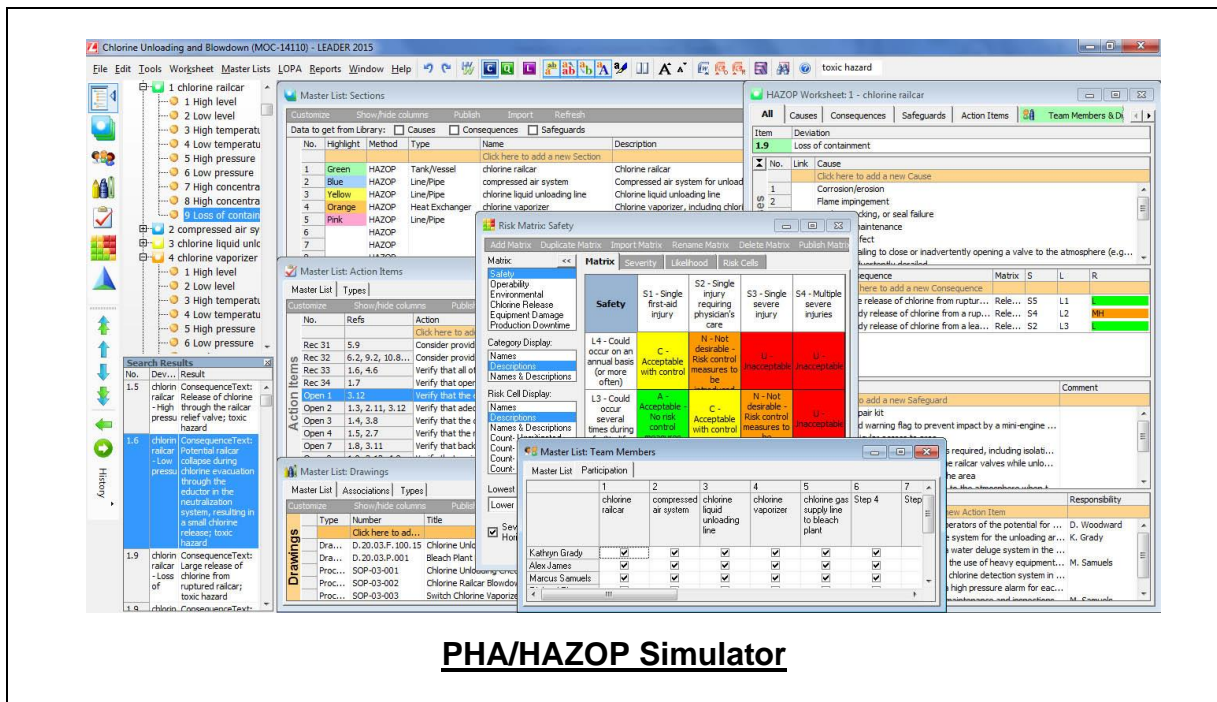

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward's Portal. Each participant will be given a username and password to log in Haward's Portal for the MOCK exam during the 30 days following the course completion. Each participant has only one trial for the MOCK exam within this 30-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

Day 6: OHTA BOHS Online Exam (to be scheduled within 30 days of course completion)

0900 – 0915	OHTA-BOHS Exam Registration/Briefing
0915 – 1145	OHTA-BOHS Exam
1145 – 1200	Closing Ceremony
1200	End of Exam

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art “PHA/HAZOP”, “Workplace Risk Assessment” “Industrial Hygiene Virtual Laboratory” and “CIHprep V9.0 ” simulators.

The screenshot displays the PHA/HAZOP Simulator software interface. It includes several key components:

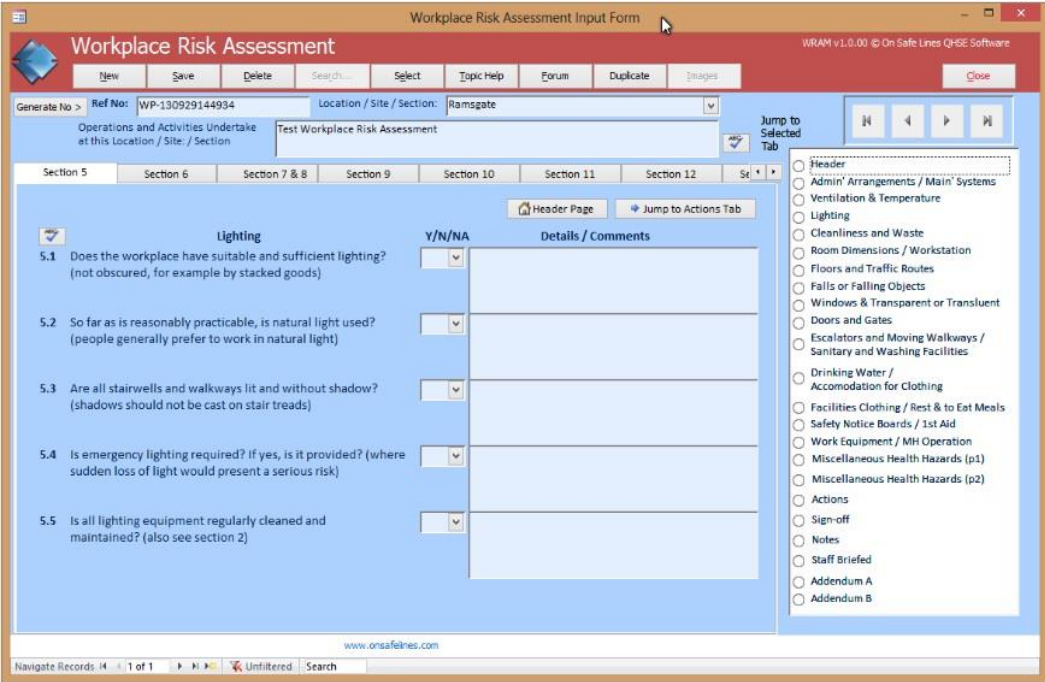

- Master List: Sections:** A table listing sections with columns for No., Highlight, Method, Type, Name, and Description.

No.	Highlight	Method	Type	Name	Description
1	Green	HAZOP	Tank/Vessel	chlorine railcar	Chlorine railcar
2	Blue	HAZOP	Line/Pipe	compressed air system	Compressed air system for unload
3	Yellow	HAZOP	Line/Pipe	chlorine liquid unloading line	Chlorine liquid unloading line
4	Orange	HAZOP	Heat Exchanger	chlorine vaporizer	Chlorine vaporizer, including chlor
5	Pink	HAZOP	Line/Pipe		
6		HAZOP			
7		HAZOP			
- Risk Matrix: Safety:** A matrix showing risk levels based on Severity and Likelihood.

Severity	S1 - Single injury requiring physician's care	S2 - Single injury requiring physician's care	S3 - Single severe injury	S4 - Multiple severe injuries
L4 - Could occur on an annual basis (or more often)	C - Acceptable with control	N - Not desirable - Risk control measures to be	H - Hazardous	U - Unacceptable
L3 - Could occur several times during	A - Acceptable with control	C - Acceptable with control	N - Not desirable - Risk control measures to	U - Unacceptable
- Master List: Team Members:** A table showing team member participation across different sections.

Master List	Participation	1 chlorine railcar	2 compressed air system	3 chlorine liquid unloading line	4 chlorine vaporizer	5 chlorine gas supply line to bleach plant	6 Step 4	7 Step 5	Responsibility
Kathlyn Grady		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Marcus Samuels		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	

PHA/HAZOP Simulator

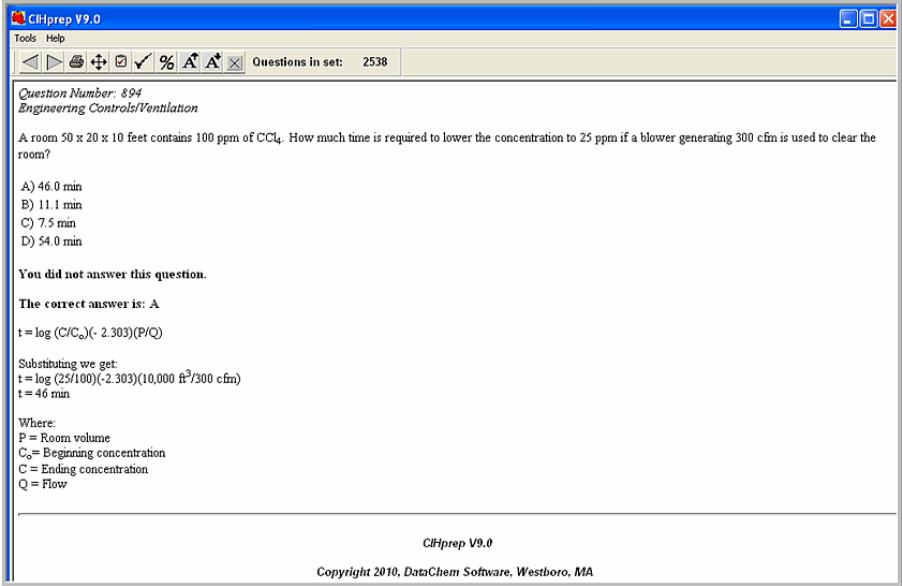

The screenshot shows the 'Workplace Risk Assessment Input Form' software. The main window is titled 'Workplace Risk Assessment' and includes a menu bar with options like 'New', 'Save', 'Delete', 'Search...', 'Select', 'Topic Help', 'Forum', 'Duplicate', and 'Images'. Below the menu, there are fields for 'Generate No >' (WP-13092914934) and 'Location / Site / Section:' (Ramsgate). The interface is divided into sections, with 'Section 5' currently selected. The 'Lighting' section contains five questions (5.1 to 5.5) with dropdown menus for 'Y/N/NA' and a 'Details / Comments' column. A 'Jump to Selected Tab' list on the right includes various categories like 'Admin' Arrangements / Main' Systems', 'Ventilation & Temperature', 'Lighting', 'Cleanliness and Waste', etc. The bottom status bar shows 'Navigate Records: 1 of 1' and 'Unfiltered'.

Workplace Risk Assessment

The screenshot displays the 'Calibrations' section of the 'Industrial Hygiene Virtual Laboratory Simulator'. On the left, a text box titled 'Calibration of a filter cassette sampling train' provides a 'CALIBRATION PROCEDURE' involving a beaker with a weak soap solution and a 1,000 ml burette. The main area shows a virtual setup with a pump, a burette, and a filter cassette. An 'Adjust Pump:' control is visible. On the right, a flow rate scale is set to '4.0 LPM' with various numerical options. The bottom navigation bar includes buttons for 'Quit IH Labs', 'Home IH Labs', 'Calculator', 'Glossary', 'NIOSH Methods', 'Go to Lab Index', and 'Go to Notebook'.

Tools Help

Questions in set: 2538

Question Number: 894
Engineering Controls/Ventilation

A room 50 x 20 x 10 feet contains 100 ppm of CCl₄. How much time is required to lower the concentration to 25 ppm if a blower generating 300 cfm is used to clear the room?

A) 46.0 min
B) 11.1 min
C) 7.5 min
D) 54.0 min

You did not answer this question.

The correct answer is: A

$$t = \log(C/C_0) \cdot (-2.303) \cdot (P/Q)$$

Substituting we get:
 $t = \log(25/100) \cdot (-2.303) \cdot (10,000 \text{ ft}^3 / 300 \text{ cfm})$
 $t = 46 \text{ min}$

Where:
P = Room volume
C₀ = Beginning concentration
C = Ending concentration
Q = Flow
