

COURSE OVERVIEW HE1260 Safety, Health & Environmental Issues in the Iron & Steel Industry

Course Title

Safety, Health & Environmental Issues in the Iron & Steel Industry

Course Date/Venue

Session 1: April 06-10, 2025/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Session 2: November 16-20, 2025/Crowne Meeting Room, Crowne Plaza Al Khobar, KSA

Course Reference

HE1260

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This course is designed to provide participants with a detailed and up-to-date overview of safety, health and environmental issues in the iron and steel industry. It covers the industry characteristics, iron and steel making and occupational hazards; the safety and health occupational management systems; the industry-specific prevention protection; the coke ovens and by-product plants; the hazard control and other methods of producing coke; the iron and steel-making; and the prevention of fires and explosions, carbon monoxide poisoning, steam explosion, lighting of furnaces, and handling of molten metal, dross or slag.

During this interactive course, participants will learn the surface preparation and hazard control; the iron and steel foundries, safety specifications for handtilted transport ladles, tapping, bottom drop, protective egipment and first aid; the hazard control strategies on rolling mills; the assessment of risk, control strategies and work practices on coating lines, heat treating and internal transport; the personal protective equipment (PPE); the noise and assessment of noise risk; the operational safety, monitoring techniques and transport of chemicals; and the monitoring and protection of chemicals and the environment.

Course Objectives

Upon the successful completion of this course, each participant will be able to: -

- Apply and gain a comprehensive knowledge on safety, health and environmental issues in the iron and steel industry
- Discuss industry characteristics, iron and steel making and occupational hazards
- Employ occupational safety and health management systems as well as industryspecific prevention and protection
- Describe coke ovens and by-product plants as well as apply hazard control and other methods of producing coke
- Carryout iron and steel-making, prevent fires and explosions, light furnaces, prevent carbon monoxide poisoning, prevent steam explosion and handle molten metal, dross or slag
- Describe hazard and employ surface preparation and hazard control
- Discuss iron and steel foundries, safety specifications for hand-tilted transport ladles, tapping, bottom drop, protective equipment and first aid
- Apply hazard control strategies on rolling mills
- Employ assessment of risk, control strategies and work practices on coating lines, heat treating and internal transport
- Discuss personal protective equipment (PPE) covering its general provisions, head protection, face and eye protection, upper and lower limb protection, respiratory protective equipment, hearing protection, protection from falls and work clothing
- Recognize noise and perform noise risk assessment covering sound level meters, frequency analysis, personal noise dosimetry and noise measurements and assessments
- Describe the hazard of vibration and perform assessment of risk, control strategies, isolation, substitution and engineering controls
- Employ operational safety, monitoring techniques and transport of chemicals in a professional manner
- Monitoring and protect chemicals and the environment

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

Who Should Attend

This course provides an overview of all significant aspects and considerations of safety, health and environmental issues in the iron and steel industry for health and safety professionals, occupational health specialists including physicians and nurses. Specialists in subjects such as acoustics, ergonomics, human factors, occupational psychology, work organisation, biosafety, engineering, analytical chemistry and those who want a broader appreciation of how their role interfaces with other professions over health issues in the workplace.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

*** *BAC

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

USA International Association for Continuing Education and Training (IACET)

 Training (IACET)

Haward Technology is an Authorized Training Provider by the International Association for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 1-2013 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 1-2013 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.25 CEUs** (Continuing Education Units) or **32.5 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Francis Almeida, PgDip, BSc, NEBOSH-ENV, NEBOSH-IGC, NEBOSH-IFC, NEBOSH-IOGC, NEBOSH-PSM, is a Senior Health, Safety & Environmental (HSE) Consultant with over 30 years of practical experience within the Oil and Gas industry. He is a **NEBOSH Approved Instructor** for various certification programs. His expertise lies extensively in the areas of Accident/Incident Investigation & Risk Management, NEBOSH Environmental Management, NEBOSH International General Certificate, NEBOSH

Fire Safety & Risk Management International Certificate, NEBOSH International Oil & Gas Certificate, NEBOSH Process Safety Management, HAZOP & HAZID, HAZMAT & HAZCOM Storage & Disposal, As Low as Reasonably Practicable (ALARP), Process Hazard Analysis (PHA), Process Safety Management (PSM), Hazardous Materials & Chemicals Handling, Pollution Control, Environment, Health & Safety Management, Process Risk Analysis, Effective Tool Box Talks, Construction Sites Safety, HSSE Management System, HSSE Audit & Inspection, HSEQ Procedures, Authorized Gas Testing, Confined Space Entry & Rescue, Risk Management, Quantitative & Qualitative Risk Assessment, Working at Height, Firefighting Techniques, Fire & Gas Detection System, Fire Fighter & Fire Rescue, Fire Risk Assessment, HSE Industrial Practices, Manual Handling, Rigging Safety Rules, Machinery & Hydraulic Lifting Equipment, Warehouse Incidents & Accidents Reporting, Incident & Accident Investigation, Emergency Planning, Emergency Response & Crisis Management Operations, Waste Management Monitoring, Root Cause Analysis, Hazard & Risk Assessment, Task Risk Assessment (TRA), Incident Command, Job Safety Analysis (JSA), Behavioral Based Safety (BBS), Fall Protection, Work Permit & First Aid and various international codes and standards such as the ISO 9001, OHSAS 18001, ISO 14001, SA8000, ISO 9001-2000 and ISO 9002. He was the Offshore Safety Specialist of Chevron wherein he was in-charged in HSE inspections, hazard analysis, incident investigation and implementing corrective actions.

During his career life, Mr. Almeida has gained his practical and field experience through his various significant positions and dedication as the Quality Manager, HSE Specialist/Acting On-Scene Commander, Quality Auditor, Quality Supervisor, QHSE Engineer, Metallurgical Engineer, HSE Coordinator, Suppliers Auditor, Senior Instructor/Consultant, Oil & Gas Construction Specialist, Business Administration Specialist and Oil & Gas Management Technology Specialist for various international companies and institutions such as the IBEC, Lopes & Almeida, IMA, EXPRO Group, UNESA, Vetco Aibel, ABB Oil & Gas, Brazilian Aluminum Foundry, DNV and ABIFA.

Mr. Almeida has a Bachelor degree in Metallurgical Engineering and a Post Graduate Diplomas in Safety Engineering and Industrial Administration. Further, he is a Certified Instructor/Trainer, an Approved Lead Tutor in NEBOSH Environmental Management Certificate, NEBOSH International General Certificate, NEBOSH International Oil & Gas Certificate and NEBOSH Process Safety Management Certificate and an Approved Practical Assessor/Lead Tutor in NEBOSH Fire Safety & Risk Management. Moreover, he is a Certified ISO 9001:2000 Lead Auditor, a Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership and Management (ILM) and has further delivered numerous trainings, courses, seminars, conferences and workshops globally.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons

Course Fee

US\$ 10,000 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Day 1

Day I	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Introduction
0030 - 0330	Industry Characteristics ● Iron & Steel Making ● Occupational Hazards
0930 - 0945	Break
	Occupational Safety & Health Management Systems
0945 - 1100	Introduction • OSH Management Systems • Reporting, Recording &
0545 - 1100	Notification of Work-Related Injuries & Diseases & incidents • Occupational
	Health Services
1100 – 1215	Industry-Specific Prevention & Protection
	Hazards & Health • Physical Hazards • Chemical Hazards • Safety Hazards
	• Ergonomics
1215 – 1230	Break
1230 – 1420	Coke Ovens & By-Product Plants
	Hazard Description ● Hazard Control on By-Product Coke Batteries ● Hazard
	Control in Non-Recovery Batteries • Hazard Control in By-Product Recovery
	Plants ● Other Methods of Producing Coke
1420 – 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day One

Day 2

	Lucy C. Ctool Making
0730 – 0930	Iron & Steel-Making
	General • Preventing Fires & Explosions • Lighting Furnaces • Dusts &
	Fibres • Preventing Carbon Monoxide Poisoning • Preventing Steam
	Explosion • Handling Molten Metal, Dross or Slag
0930 - 0945	Break
0945 – 1100	Surface Preparation
	Hazard Description ● Hazard Control
	Iron & Steel Foundries
	General • Safety Specifications for Hand-Tilted Transport Ladles • Safety
1100 – 1215	Inspection of Ladles • Tapping • Bottom Drop • Protective Equipment •
	Preventing Fire & Explosion • Abrasive Blasting • Abrasive Wheels •
	Process & Waste Gases • First Aid
1015 1020	
1215 – 1230	Break
1230 - 1420	Rolling Mills
	Hazard Description ● Control Strategies
1420 – 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3

Day 0	
0730 – 0930	Coating Lines
	Hazard Description • Assessment of Risk • Control Strategies • Work
	Practices
0930 - 0945	Break
0945 - 1100	Heat Treating
	Hazard Description • Hazard Control
1100 1215	Internal Transport
1100 – 1215	Hazard Description • Control Strategies
1215 - 1230	Break
	Personal Protective Equipment (PPE)
1220 1420	General Provisions • Head Protection • Face & Eye Protection • Upper &
1230 – 1420	Lower Limb Protection • Respiratory Protective Equipment • Hearing
	Protection • Protection from Falls • Work Clothing
1420 – 1430	Recap
	<i>Using this Course Overview, the Instructor(s) will Brief Participants about the</i>
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Three

Day 4

0730 - 0930	Noise Measurement Units ● Human Response to Noise ● Noise Exposure Limits ● Machinery Noise ● Hazard Description
0930 - 0945	Break
0945 – 1100	Noise (cont'd) Assessment of Risk • Control Strategies • Workers Training & Information • Isolation, Substitution & Engineering Controls

1100 – 1215	Assessment of Noise Risk
	Sound Level Meters • Frequency Analysis • Personal Noise Dosimetry •
	Noise Measurements & Assessments
1215 - 1230	Break
1230 – 1420	Vibration
	Hazard Description • Assessment of Risk • Control Strategies • Training &
	Information ● Isolation, Substitution & Engineering Controls
1420 – 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Four

Dav 5

Day 5	
0730 - 0930	Operational safety Sources of Oxygen & Acetylene ● Gases on Welding & Cutting Operations
0930 - 0945	Break
0945 – 1100	Monitoring Techniques Selected General Analytical Techniques for Monitoring Environmental Pollution ● Gases & Vapours ● Particulates ● Monitoring Water Quality ● Monitoring Land Pollution ● Monitoring Air Pollution
1100 – 1215	Transport of Chemicals Road Transport ● Rail Transport ● Air Transport ● Sea Transport ● Modes of Transport for Liquids, Gases & Solids ● Loading & Unloading ● Container Filling/Discharging ● MSDS
1215 - 1230	Break
1230 – 1345	Chemicals & the Environment: Monitoring & Protection Legislative Control • Waste Management • Environmental Impact Assessment • Control of Atmospheric Emissions • MSDS • Liquid Effluent Treatment Operations • Control of Solid Waste • Monitoring & Auditing
1345 – 1400	Course Conclusion Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1400 - 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

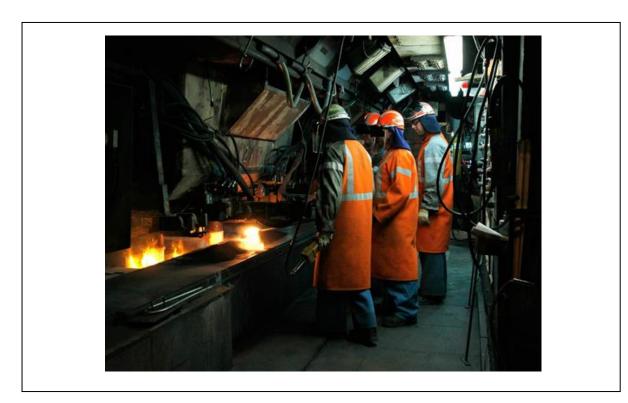

Practical Sessions

This hands-on, highly-interactive course includes real-life case studies and exercises:-

<u>Course Coordinator</u>
Mari Nakintu, Tel: +971 2 30 91 714, Email: <u>mari1@haward.org</u>
