

**COURSE OVERVIEW HE1192**  
**Certified Fire Protection Specialist**  
*(NFPA-CFPS Exam Preparation Training)*

**Course Title**

Certified Fire Protection Specialist (NFPA-CFPS Exam Preparation Training)

**Course Date/Venue**

July 05-09, 2026/Meeting Room (4F), Four Points by Sheraton Josun, Seoul Myeongdong, Seoul, South Korea

**Course Reference**

HE1192

**Course Duration/Credits**

Five days/4.0 CEUs/40 PDHs

**Course Description**

***This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.***

This course is designed to provide participants with a detailed and up-to-date overview Certified Fire Protection Specialist. It covers the fire combustion, fire tetrahedron, fire behavior and types of fires; the principles of fire protection including fire dynamics and behavior; building construction and fire resistance; the fire hazard identification and risk assessment; the effective fire prevention programs, fire prevention training and proper documentation and record-keeping for compliance; and the fire detection systems, automatic sprinkles systems, fire suppressions systems and standpipe and hose systems.

Further, the course will also discuss the types of portable extinguishers and their applications; the smoke ventilation systems and smoke control systems; the egress system requirement, occupant load, egress capacity calculations and egress markings; the lighting standards and accessibility requirements for emergency egress; the fire safety in building occupancies, emergency evacuation and response plan; the incident command system (ICS) and smoke and fire spread control measures; and the firefighter safety and coordination.

During this interactive course, participants will learn the risk mitigation techniques, fire protection cost-benefit analysis and fire risk management; the classification and identification of hazardous materials; the storage and handling requirements for hazardous materials; the causes and types of explosions, explosion venting and suppression techniques; the explosion-proof equipment and code requirements for explosion hazard; the wildfire risk assessment and mitigation, integrating security and fire protection systems and accessing control and fire door management; the emergency power and lighting systems, principles of fire investigation and legal and regulatory aspects of fire protection; preparing fire incident reports, maintaining accurate fire protection records and documenting for inspections and tests; and the legal requirements for incident documentation.

### **Course Objectives/Outcomes & Benefits for the Participants**

Upon successful completion of this course, each participant will be able to:-

- Get prepared for the next CFPS exam and have enough knowledge and skills to pass such exam in order to get certification from the Fire Protection Specialist certification from the National Fire Protection Association (NFPA)
- Discuss fire science covering combustion, fire tetrahedron, fire behavior and types of fires
- Recognize the principles of fire protection including fire dynamics and behavior
- Build construction and fire resistance as well as apply fire hazard identification and risk assessment
- Design effective fire prevention programs and fire prevention training and apply proper documentation and record-keeping for compliance
- Recognize fire detection systems, automatic sprinkler systems, fire suppressions systems and standpipe and hose systems
- Identify the types of portable extinguishers and their applications including smoke ventilation systems and smoke control systems
- Recognize egress system requirement, occupant load and egress capacity calculations, egress markings and lighting standards and accessibility requirements for emergency egress
- Implement fire safety in building occupancies, emergency evacuation and response plan
- Discuss incident command system (ICS) and apply smoke and fire spread control measures including firefighter safety and coordination
- Carryout risk mitigation techniques, fire protection cost-benefit analysis and fire risk management
- Classify and identify hazardous materials including storage and handling requirements for hazardous materials
- Recognize the causes and types of explosions, explosion venting and suppression techniques, explosion-proof equipment and code requirements for explosion hazard
- Apply wildfire risk assessment and mitigation, integrating security and fire protection systems and access control and fire door management
- Discuss emergency power and lighting systems, principles of fire investigation and legal and regulatory aspects of fire protection
- Prepare fire incident reports, maintain accurate fire protection records, document for inspections and tests and discuss legal requirements for incident documentation

### **Exclusive Smart Training Kit - H-STK®**

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

### **Who Should Attend**

This course provides an overview of all significant aspects and considerations of fire protection specialist for all group of professionals including risk managers, loss control specialists, fire officers, fire marshals, fire inspectors, safety managers, fire protection consultants, designers, engineers, code enforcers, facility managers and for those who have responsibilities dealing with the application of fire safety, protection, prevention and suppression technologies.

### **Exam Eligibility & Structure**

To be eligible to take the CFPS examination, candidates must demonstrate on the CFPS application that they meet one of the following criteria:-

- Bachelor’s or Master’s degree in a Fire Protection-related discipline\* from an accredited college or university, including degrees in engineering fields that are applied to the practice of fire protection; plus TWO years of verifiable work experience dedicated to curtailing fire loss, both physical and financial
- Associate’s degree in a Fire Protection-related discipline\* from an accredited college or university, or a Bachelor’s or Master’s degree in any unrelated field; plus FOUR years of verifiable work experience dedicated to curtailing fire loss, both physical and financial
- High school diploma or equivalent, plus SIX years of verifiable work experience dedicated to curtailing fire loss, both physical and financial

\*Examples include degrees in Fire Protection Engineering, Fire Science, Fire Protection Technology, and Fire Service Administration. Examples of engineering fields that are frequently applied to the practice of fire protection include, but are not limited to, Mechanical, Civil, Chemical, and Electrical engineering.

### **Training Fee**

**US\$ 6,600** per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### **Exam Fee**

**US\$ 560** per Delegate + **VAT**.

**NFPA-CFPS Certificate(s)**

- (1) NFPA-CFPS certificates will be issued to participants who successfully passed the NFPA-CFPS exam.

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Howard Technology has been approved for Accredited Provider by the International Association for Continuing Education and Training (IACET). 2003 Convention Way, Suite 800, Herndon, VA 20171, USA. In obtaining this approval, Howard Technology has demonstrated that it complies with the ANSI/IACET 1-2019 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Provider status, Howard Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2019 Standard.

Howard Technology is an international authority that evaluates programs for Continuing Education Creditability. Continuing Education Units (CEUs) are awarded to individuals who complete the program. The International Association for Continuing Education and Training (IACET) is an international authority that evaluates programs according to strict, research-based criteria and guidelines. This CEU is an internationally accepted uniform unit of measurement in a qualified course of continuing education.

Howard Technology is accredited by:

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3991 714 | E-mail: info@haward.org | Website: www.haward.org

### Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations: -

-  British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

-  The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **4.0 CEUs** (Continuing Education Units) or **40 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly

**Mr. Chris Unsworth** is an **Emergency Response & SAR Operations Specialist** with extensive practical experience within the **Oil & Gas, Refinery, Power, Petroleum** and **Petrochemical** industries. His expertise lies extensively in the areas of **Search & Rescue Operations, Confined Space & High-Angle Rope Rescue** for Oil & Gas Facilities, **Emergency Response Team (ERT) Rescue Coordination, Industrial Fire Search & Rescue, H<sub>2</sub>S & Toxic Gas & Rescue Operations, SAR Planning, Incident Response & Emergency Coordination, Emergency Planning, Emergency Management, HAZMAT & Medical Response, Control Room Operations & CCTV Monitoring, Site Patrols, Access Control & Security Checks, Conflict Management & De-escalation, Health, Safety & Compliance Procedures, Safety Audit, Working at Heights, Root Cause Analysis, HSE Rules & Regulations, Pre-Start-up Safety Reviews, HSE Risk Identification, Accident/Incident Investigation, Firefighting, Fire Rescue & Prevention, Fire Investigation, Fire Extinguishers, Fire Behaviour, Fire Engineering Management, Fire Aviation, Fire Risk Assessment, Fire Detection & Alarm Systems and Fire Equipment & Facilities Inspection.**

During his career life, Mr. Unsworth has gained his practical and field experience through his various significant positions and dedications as the **Rescue Coordination Centre (RCC) Manager, Incident Responder** and **Aviation Firefighter/Aircraft Handler** from various international companies such as Jawar Al Khaleej Shipping LLC, Urenco & Bobcock International and Royal Navy.

Mr. Unsworth is currently taking his **Bachelor's degree in Forensic Psychology** from **The Open University, UK**. Further, he is a **Certified Instructor/Trainer** and a **SIA CCTV License/Level 2 Security Officer**. He has further delivered innumerable courses, trainings workshops and conferences globally.

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Learning Design & Customization

This course can be customized to the exact requirements of clients. Haward Technology is so proud of our huge capabilities in tailoring our courses to the training needs of our valued clients.

**Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

**Day 1: Sunday, 05<sup>th</sup> of July 2026**

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	<b>PRE-TEST</b>
0830 – 0900	<b>Introduction to Fire Science</b> Basic Concepts of Combustion & Fire • The Fire Tetrahedron & Elements of Combustion • Fire Behavior & Spread • Types of Fires & Classifications
0900 – 0930	<b>Principles of Fire Protection</b> Historical Overview of Fire Protection • Key Objectives of Fire Protection Systems • Role of Fire Protection Specialists • Fire Codes & Regulatory Compliance
0930 – 0945	Break
0945 – 1100	<b>Fire Dynamics &amp; Behavior</b> Heat Transfer Mechanisms (Conduction, Convection, Radiation) • Fuel Load & Fire Growth • Flashover & Fire Stages • Smoke Production & Movement
1100 – 1200	<b>Building Construction &amp; Fire Resistance</b> Types of Construction & their Fire Resistance Properties • Fire Barriers, Partitions, & Fireproofing Materials • Structural Stability Under Fire Conditions • Impact of Building Design on Fire Safety
1200 – 1300	Lunch
1300 – 1530	<b>Fire Hazard Identification &amp; Risk Assessment</b> Identifying Potential Fire Hazards • Quantifying Risk Levels • Principles of Fire Risk Assessment • Hazard Control Measures
1530 – 1545	Break
1545 – 1650	<b>Fire Prevention Programs</b> Designing Effective Fire Prevention Programs • Employee Fire Prevention Training • Importance of Maintenance & Inspection • Documentation & Record-Keeping for Compliance
1650 – 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day One

**Day 2: Monday, 06<sup>th</sup> of July 2026**

0730 – 0830	<b>Fire Detection Systems</b> Types of Fire Detectors (Smoke, Heat, Flame) • Principles of Fire Detection Technologies • Detector Selection & Placement • Maintenance & Testing Requirements
0830 – 0930	<b>Automatic Sprinkler Systems</b> Types of Sprinkler Systems (Wet, Dry, Pre-Action, Deluge) • Components & Operation of Sprinkler Systems • Water Supply Requirements & System Design • Inspection & Maintenance Procedures
0930 – 0945	Break
0945 – 1200	<b>Fire Suppression Systems</b> Overview of Different Suppression Systems (Co2, Foam, Halon Alternatives) • Design & Installation Standards • Fire Suppression Agent Properties & Suitability • Testing & Maintenance for Reliability
1200 – 1300	Lunch

1300 – 1530	<b>Standpipe &amp; Hose Systems</b> Types of Standpipe Systems & their Uses • Hose Selection & Hose Cabinet Design • Fire Department Connection Requirements • Inspection & Testing Protocols
1530 – 1545	Break
1545 – 1615	<b>Portable Fire Extinguishers</b> Types of Portable Extinguishers & Their Applications • Classification & Rating of Extinguishers • Placement & Accessibility Guidelines • Maintenance, Inspection, & Testing Requirements
1615 - 1650	<b>Smoke Control &amp; Management Systems</b> Principles of Smoke Control • Smoke Ventilation System Design • Pressurization of Stairwells & Exits • Testing & Maintenance of Smoke Control Systems
1650 - 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Two

**Day 3: Tuesday, 07<sup>th</sup> of July 2026**

0730 – 0830	<b>Life Safety &amp; Egress Design</b> Egress System Requirements (Corridors, Exits, Stairways) • Occupant Load & Egress Capacity Calculations • Egress Markings & Lighting Standards • Accessibility Requirements for Emergency Egress
0830 - 0930	<b>Fire Safety in Building Occupancies</b> Understanding Occupancy Classifications • Fire Protection Strategies by Occupancy Type • Unique Hazards in Various Occupancies (Industrial, Healthcare, Residential) • NFPA Standards for Specific Occupancies
0930 – 0945	Break
0945 – 1200	<b>Emergency Evacuation &amp; Response Plans</b> Developing & Implementing Eoacuation Plans • Fire Drills & Emergency Response Exercises • Roles & Responsibilities During an Emergency • Communication Protocols for Emergencies
1200 – 1300	Lunch
1300 – 1530	<b>Incident Command System (ICS)</b> Overview of ICS Principles • Structure & Roles within ICS • Coordination with Local Fire Departments • ICS in Large-Scale Fire Incidents
1530 – 1545	Break
1545 – 1615	<b>Smoke &amp; Fire Spread Control Measures</b> Fire Doors & Dampers • Firestopping & Compartmentation • Passive & Active Fire Barriers • Managing Smoke Migration in Buildings
1615 - 1650	<b>Firefighter Safety &amp; Coordination</b> Entry & Attack Strategies • Ventilation & Hose Line Tactics • RIT (Rapid Intervention Teams) • Ensuring Firefighter Safety in Various Scenarios
1650 - 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Three

**Day 4: Wednesday, 08<sup>th</sup> of July 2026**

0730 – 0830	<b>Fire Risk Management Strategies</b> Risk Mitigation Techniques • Cost-Benefit Analysis in Fire Protection • Prioritizing Fire Protection Investments • Managing Fire Risk in Complex Environments
0830 - 0930	<b>Hazardous Materials &amp; Fire Protection</b> Classification & Identification of Hazardous Materials • Storage & Handling Requirements for Hazardous Materials • Fire Suppression Considerations for Hazardous Areas • Special NFPA Codes for Hazardous Materials
0930 – 0945	Break
0945 – 1200	<b>Explosion Protection &amp; Prevention</b> Causes & Types of Explosions (Gas, Dust, Vapor) • Explosion Venting & Suppression Techniques • Explosion-Proof Equipment & Enclosures • Code Requirements for Explosion Hazards
1200 – 1300	Lunch
1300 – 1530	<b>Wildfire Risk Assessment &amp; Mitigation</b> Understanding Wildfire Behavior & Risks • Wildland-Urban Interface Considerations • Fire-Resistant Landscaping & Building Design • Evacuation Planning in Wildfire-Prone Areas
1530 – 1545	Break
1545 – 1615	<b>Security &amp; Fire Protection</b> Integrating Security & Fire Protection Systems • Access Control & Fire Door Management • Surveillance Systems in Fire Prevention • NFPA Codes for Security & Fire Coordination
1615 - 1650	<b>Emergency Power &amp; Lighting Systems</b> Emergency Lighting Requirements • Backup Power System Design & Installation • Maintenance & Testing of Emergency Systems • Role of Emergency Power in Fire Safety
1650 - 1700	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1700	End of Day Four

**Day 5: Thursday, 09<sup>th</sup> of July 2026**

0730 – 0830	<b>Principles of Fire Investigation</b> Fire Cause & Origin Determination • Evidence Preservation & Chain of Custody • Investigative Techniques & Tools • Reporting & Documentation Standards
0830 - 0930	<b>Legal &amp; Regulatory Aspects of Fire Protection</b> NFPA Standards & Legal Implications • OSHA Fire Protection Regulations • Insurance & Liability in Fire Protection • Ethical Considerations in Fire Protection
0930 – 0945	Break
0945 – 1100	<b>Incident Reporting &amp; Documentation</b> Preparing Fire Incident Reports • Maintaining Accurate Fire Protection Records • Documentation for Inspections & Tests • Legal Requirements for Incident Documentation
1100 – 1200	<b>Certification Exam Preparation</b> Review of Key NFPA Codes & Standards • Practice Questions & Exam Strategies • Time Management During the Exam • Resources for Ongoing Professional Development
1200 – 1300	Lunch

1300 - 1430	<b>Professional Roles &amp; Responsibilities of CFPS</b> <i>Code of Ethics for CFPS Professionals • Maintaining Certification &amp; Continuing Education • Working with Fire Protection Teams &amp; Stakeholders • Advancing Career Opportunities in Fire Protection</i>
1430 - 1445	<i>Break</i>
1445 - 1615	<b>Final Exam &amp; Mock Scenarios</b> <i>Case Study Reviews &amp; Discussions • Group Exercises on Fire Risk Assessment • Analysis of Past Fire Incidents &amp; Lessons Learned • Final Assessment &amp; Feedback Session</i>
1615 - 1630	<b>Course Conclusion</b> <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course</i>
1630 - 1645	<b>POST-TEST</b>
1645 - 1700	<i>Presentation of Course Certificates</i>
1700	<i>End of Course</i>

**MOCK Exam**

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward’s Portal. Each participant will be given a username and password to log in Haward’s Portal for the MOCK Exam during the 60 days following the course completion. Each participant has only one trial for the MOCK exam within this 60-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

**Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises: -
