

COURSE OVERVIEW IE0780
Compressor Control & Protection

Course Title

Compressor Control & Protection

Course Reference

IE0780

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Date/Venue

Session(s)	Date	Venue
1	May 25-29, 2025	Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE
2	July 06-10, 2025	Safir Meeting Room, Divan Istanbul, Turkey
3	September 14-18, 2025	Meeting Plus 9, City Centre Rotana Doha, Doha, Qatar
4	December 21-25, 2025	Olivine Meeting Room, Fairmont Nile City, Cairo, Egypt
5	January 04-08, 2026	Safir Meeting Room, Divan Istanbul, Turkey
6	February 09-13, 2025	Hampstead Meeting Room, Marriott London Regents Park, London, United Kingdom

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide delegates with a detailed and up-to-date overview of compressor control and protection. It covers the various types of compressors and their functions; the characteristics of surge including its consequences; the key aspects of compressor control and anti-surge protection and preventions; and the various applications of advanced compressor control and how to control using loop decoupling.

The course will also discuss the effects of operating conditions and improves knowledge on surge curve plotting methods; the turbine control objectives and principles according to actuator speed kW droop control; and the turbine system availability objectives and the correct level of redundancy.

During this interactive course, participants will learn to apply several integrated turbine and compressor control approaches as well as the technology updates and distinguish the functions of various control and protection devices in relation to internal relief valve, internal motor temperature sensors and crankcase heaters.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on compressor control and protection
- Identify the various types of compressors as well as their functions
- Determine the characteristics of surge including its consequences
- Employ the key aspects of compressor control and anti-surge protection and preventions
- Recognize the various applications of advanced compressor control and train how to control using loop decoupling
- Illustrate the effects of operating conditions and improves knowledge on surge curve plotting methods
- Implement the turbine control objectives and principals according to actuator speed and kW droop control
- Recognize the turbine system availability objectives and choose the correct level of redundancy
- Apply several integrated turbine and compressor control approaches as well as the technology updates
- Distinguish the functions of various control and protection devices in relation to internal relief valve, internal motor temperature sensors, and crankcase heaters

Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

Who Should Attend

This course provides an overview of all significant aspects and considerations of compressor control and protection for engineers and other technical and operation staff who are responsible for the implementation and efficient operation, control and protection of compressors.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology’s courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant’s involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant’s CEU and PDH Transcript of Records upon request.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Dr. Ahmed El-Sayed, PhD, MSc, BSc, is a **Senior Engineer** with **35 years** of extensive experience within the **Oil, Gas, Power, Petroleum, Petrochemical** and **Utilities** industries. His experience widely covers in the areas of **Flow Measurement Devices, PLC-HMI Controls, Total Quality Management (TQM), Internal Audit Techniques in TQM, Quality Management System (QMS), Water Network Pipe Materials & Fittings, Mapping & Inventory of Pipes & Fittings in the Water Supply System, Water Distribution System Operator, Sewer System and Sewage Flows, Ultrasonic Inspection, and Advanced**

Visual Techniques of Predictive Maintenance, Water Meter Reading (MMR), **Waste Water System Planning & Design, Network Management & Supervision, Leakage Prevention & Control, Water Leak Detection, Waste Water Treatment, Water Utility Regulation and Economics, Water Network Systems, Health & Safety Rules & Regulations, Safety Procedures in Water Networks, Safety Management, Principles of Routine and Preventive Maintenance, Accident Investigation, Operation & Maintenance of Sewerage System, Advanced Distributed Control System (DCS), DCS Operation & Configuration, DCS Troubleshooting, DCS Yokogawa ProSafe-RS Safety Instrumented System, DCS Yokogawa Centum VP, DCS Emerson DeltaV, DCS GE Mark VI, Programmable Logic Controller (PLC), Supervisory Control & Data Acquisition (SCADA) Systems, Process Control, Control Systems & Data Communications, Instrumentation, Automation, Valve Tuning, Safety Instrumented Systems (SIS), Safety Integrity Level (SIL), Emergency Shutdown (ESD), Telemetry Systems, Boiler Control & Instrumentation, Advanced Process Control (APC) Technology, Practical Fiber-Optics Technology, Compressor Control & Protection, GE Gas Turbines, Alarm Management Systems, Engine Management System, Fieldbus Systems, NEC (National Electrical Code), NESC (National Electrical Safety Code), Electrical Safety, Electrical Hazards Assessment, Electrical Equipment, Electrical Transient Analysis Program (ETAP), Power Quality, Power Network, Power Distribution, Distribution Systems, Power Systems Control, Power Systems Security, Power Electronics, Power System Harmonics, Power System Planning, Control & Stability, Power Flow Analysis, Smart Grid & Renewable Integration, Power System Protection & Relaying, Economic Dispatch & Grid Stability Constraints in Power Plants, Electrical Demand Side Management (DSM), Electrical Substations, Substation Automation Systems & Application (IEC 61850), Distribution Network System Design, Distribution Network Load, Electrical Distribution Systems, Load Forecasting & System Upgrade (Distribution), Overhead Power Line Maintenance & Patrolling, High Voltage Switching Operations, Industrial UPS Systems & Battery Power Supplies, Electric Motors & Variable Speed Drives, Generator Maintenance & Troubleshooting, Generator Excitation Systems & AVR, Transformer Maintenance & Testing, Lock-Out & Tag-Out (LOTO), Confined Workspaces and Earthing & Grounding, He is currently the **Systems Control Manager of Siemens** where he is in-charge of Security & Control of **Power Transmission Distribution & High Voltage** Systems and he further takes part in the Load Records Evaluation & Transmission Services Pricing.**

During his career life, Dr. Ahmed has been actively involved in different Power System Activities including Roles in Power System Planning, Analysis, Engineering, **HV Substation Design, Electrical Service Pricing, Evaluations & Tariffs, Project Management, Teaching and Consulting.** His vast industrial experience was honed greatly when he joined many International and National Companies such as **Siemens, Electricity Authority, Egyptian Electricity Holding, Egyptian Refining Company (ERC), GASCO, Tahrir Petrochemicals Project, and ACETO** industries as the **Instrumentation & Electrical Service Project Manager, Energy Management Engineer, Department Head, Assistant Professor, Project Coordinator, Project Assistant and Managing Board Member** where he focused more on dealing with Technology Transfer, System Integration Process and Improving Localization. He was further greatly involved in manufacturing some of **Power System and Control & Instrumentation Components** such as Series of Digital Protection **Relays, MV VFD, PLC and SCADA** System with intelligent features.

Dr. Ahmed has **PhD, Master's & Bachelor's** degree in **Electrical Engineering** from the **University of Wisconsin Madison, USA** and **Ain Shams University, respectively.** Further, he is a **Certified Instructor/Trainer, a Certified Internal Verifier/ Assessor/Trainer** by the **Institute of Leadership and Management (ILM)**, an active member of **IEEE and ISA** as well as numerous technical and scientific papers published internationally in the areas of **Power Quality, Superconductive Magnetic Energy Storage, SMES role in Power Systems, Power System Blackout Analysis, and Intelligent Load Shedding Techniques for preventing Power System Blackouts, HV Substation Automation and Power System Stability.**

Course Fee

Dubai	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Istanbul	US\$ 6,000 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Doha	US\$ 6,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Cairo	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Dubai	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
London	US\$ 8,800 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0800	<i>Registration & Coffee</i>
0800 – 0815	<i>Welcome & Introduction</i>
0815 – 0830	PRE-TEST
0830 – 0930	Overview of Compressors <i>General Types • Centrifugal Compressors • Axial Compressors</i>
0930 – 0945	<i>Break</i>
0945 – 1145	Overview of Surge <i>Surge versus Stall • Static Instability • Dynamic Instability • Characteristics of Surge • Consequences of Surge</i>
1145 – 1230	Compressor Control Introduction & Principals <i>Defining Compressor Surge and its Consequences • Anti-Surge Protection and Prevention • Surge Detection and Recovery • Compressor Control • Performance Control</i>

1230 – 1245	Break
1245– 1420	Case Studies
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2

0730 – 0930	Advanced Compressor Control The Surge Parameter • Changing Parameter Considerations • Compressor Loadsharing • Anti-Surge Control Challenges and Solutions • Train Control Using Loop Decoupling
0930 – 0945	Break
0945 – 1100	Effect of Operating Conditions Surge Curve Plotting Method • Suction Pressure • Suction Temperature • Molecular Weight • Specific Heat Ratio
1100 – 1230	Effect of Operating Conditions (cont'd) Compression Ratio • Speed • Vane Position
1230 – 1245	Break
1245 – 1420	Case Studies
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3

0730 – 0930	Turbine Control Objectives & Principals Speed Control • Actuator Interface and Control • Speed and kW Droop Control • Header Pressure Control
0930 – 0945	Break
0945 – 1100	Turbine Control System Availability Objectives System Reliability and Availability Basics
1100 – 1230	Turbine Control System Availability Objectives (cont'd) Choosing the Correct Level of Redundancy • Control Philosophy Considerations (Integration, Distribution, etc.)
1230 – 1245	Break
1245 – 1420	Case Studies
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

Day 4

0730 – 0930	Integrated Turbine & Compressor Control Approaches <i>DCS, PLC, and Dedicated Controller Philosophies • Compressor-Loop Response Analysis-How Fast is Fast Enough?</i>
0930 – 0945	Break
0945 – 1100	Integrated Turbine & Compressor Control Approaches (cont'd) <i>Case Study: Control Recursion Rates and their Effect on Performance</i>
1100 – 1230	Integrated Turbine & Compressor Control Approaches (cont'd) <i>Technology Update: Upcoming Technologies in Turbine Control</i>
1230 – 1245	Break
1245 – 1420	Case Studies
1420 – 1430	Recap <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow</i>
1430	Lunch & End of Day Four

Day 5

0730 – 0830	Control & Protection Devices <i>High and Low Pressure Controls • Oil Failure Control • Internal Relief Valve</i>
0830 – 0930	Control & Protection Devices (cont'd) <i>Motor Starters and Overload • Internal Motor Temperature Sensors • Crankcase Heaters</i>
0930 – 0945	Break
0945 – 1215	Practical Sessions
1215 – 1230	Break
1230 – 1345	Practical Sessions (cont'd)
1345 – 1400	Course Conclusion <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course</i>
1400 – 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical session will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art simulators “SIM 3300 Centrifugal Compressor”, “CBT on Compressors” and “MARK V” video simulator.

SIM 3300 Centrifugal Compressor Simulator

CBT on Compressors

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
