

# **COURSE OVERVIEW HE1110 Certified HAZOP Member**

(30 PDHs)

AWARI

### **Course Title**

Certified HAZOP Member

**Course Date/Venue** 

please see page3

**Course Reference** 

HE1110

**Course Duration/Credits** 

Five days/3.0 CEUs/30 PDHs

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

Old approaches to safe design in the process industry relied on the application of codes of practice and the design was usually based upon experience from specialists and operators in the industry. Such methods were able only to take into account problems and accidents that had already happened. introduction of new technologies, unconventional complex plants and short experience, a proper PHA study is now a mandatory tool to identify potential hazards and operability problems.

PHA is a systematic multidisciplinary team study intended to identify and analyze the significance of potential process hazards and make initial recommendations eliminating for hazards. for reducing the consequences of potential accidents and for improving general facility safety.

PHA methods are used for new plants as well as for modifications to existing design. The methods have been developed primarily for the process industry and have been applied in great scale in the Oil and Gas sector. However, the PHA techniques are now applied with success for other industries such as offshore construction, power and water projects, space and military industries, and environment studies.

This course is designed to provide participants with a detailed and up-to-date overview of hazard operability (HAZOP). It covers the meaning of HAZOP, who does it, how it is done, where is it done and when is it done; the process hazard analysis and HAZOP covering process safety management versus personal safety, process hazard analysis and the use of HAZOP as preferred PHA technique; and the HAZOP methodology that include deviation, cause, consequences, safeguards and action.

### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Get a certificate as a "HAZOP Member"
- Define HAZOP and discuss who does it, how it is done, where is it done and when is it done
- Discuss process hazard analysis and HAZOP covering process safety management versus personal safety, process hazard analysis and the use of HAZOP as preferred PHA techniques
- Carryout HAZOP methodology that include deviation, cause, consequences, safeguards and action

## Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

## **Who Should Attend**

This course provides an overview for carrying out a HAZOP study for operators, maintenance personnel and technicians.

#### **Course Date/Venue**

Session(s)	Date	Venue
1	June 22-26, 2025	Crowne Meeting Room, Crowne Plaza Al Khobar, an IHG Hotel, Al Khobar, KSA
2	August 25-29, 2025	Glasshouse Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE
3	October 19-23, 2025	Meeting Plus 9, City Centre Rotana, Doha, Qatar
4	November 16-20, 2025	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE
5	January 04-08, 2026	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE

## **Course Certificate(s)**

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a "Certified HAZOP Member". Certificates are valid for 5 years.

#### Recertification is FOC for a Lifetime.

## **Sample of Certificates**

The following are samples of the certificates that will be awarded to course participants:-

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course

#### **Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations: -

## British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

• The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

#### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Dimitry Rovas, CEng, MSc, PMI-PMP, SMRP-CMRP is a Senior **HSSE** (Health, Safety, Security & Environmental Management System) Consultant with extensive industrial experience in Oil, Gas, Power and Utilities industries. His expertise include Industrial Security Planning & Operations, Asset Protection, Security Investigations & Inspection, Criminal Evidence & Crime Scene Control, Industrial Plant Security Management, Fire & Loss Prevention, Emergency Management, Fire Alarm, Fire Fighting System, Fire Rated Insulation Materials, Risk Assessment, Hazardous Materials (HAZMAT), Fire Protection, Fire Precautions, Incidents & Accidents Reporting, Fire and Explosion

Risk Assessment (FERA), Security Operations Planning, Security Crisis Management, Strategic Security Management, Security Survey Design, Information Technology and Security, Security Threat Identification, Risk Analysis Evaluation & Management, API-780: Security Risk Assessment Methodology for the Petrochemical Industries, Safety, Security & Environmental Codes of Practice, Power System Security Assessment, Hazard Communication (HAZCOM), Hazard Recognition & Assessment, & Managing Risk in Process Plant, Risk Assessment & Hazard Identification, Risk Control, Cryogens, MSDS, Liquified Natural Gas, Hazard Monitoring Techniques, Environmental Pollution Prevention, Hazardous Classification, Packaging & Labelling, Chemical Spill Clean Up, Risk Assessments, Safety & Emergency Plans, Working at Heights, Firefighting, Rescue & Operation, Fall Protection, Confined Space Entry, Construction Health & Safety, HSSE Principles & Practices, HSE Quantitative Risk Assessment (QRA), Root Cause Analysis & Techniques, Hazardous Materials & Chemicals Handling, Chemical Spills, Safety Precaution & Response Action Plan, PSM, PHA, HAZOP, HAZID, Hazard & Risk Assessment, Task Risk Assessment (TRA), Incident Command, Accident & Incident Investigation, Emergency Response Procedures, Job Safety Analysis (JSA), Behavioural Based Safety (BBS), Work Permit & First Aid, Emergency Response, H<sub>2</sub>S, ERP Preparation, Project HSE Management System, Health & Hygiene Inspection, PTW Control, Process Modules Fire & Gas Commissioning, Ergonomics, Lockout/Tagout, Fire Safety & Protection and Spill Prevention & Control. He is currently the Project Manager wherein he is managing, directing and controlling all activities and functions associated with the domestic heating/cooling facilities projects.

During his life career, Mr. Rovas has gained his practical and field experience through his various significant positions and dedication as the EPC Project Manager, Field Engineer, Instructor/Trainer. Maintenance Engineer, Researcher, Preventive Telecom Consultant and Consultant from various companies such as the Podaras Engineering Studies, Metka and Diadikasia, S.A., Hellenic Petroleum Oil Refinery and COSMOTE.

Mr. Rovas has Master's degree in Energy Production & Management and Mechanical Engineering from the National Technical University of Athens (NTUA), Greece. Further, he is a Certified Instructor/Trainer, a Certified Maintenance and Reliability **Professional (CMRP)** from the Society of Maintenance & Reliability Professionals (SMRP), Certified Project Management Professional (PMI-PMP), Certified Six Sigma Black Belt, Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM), Certified Construction Projects Contractor, Certified Energy Auditor and a Chartered Engineer. Moreover, he is an active member of American Society for Quality, Project Management Institute (PMI), Body of Certified Energy Auditors and Technical Chamber of Greece. He has further received various recognition and awards and delivered numerous trainings, seminars, courses, workshops and conferences internationally.

#### **Training Methodology**

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### **Course Fee**

Al Khobar	<b>US\$ 5,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK <sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Abu Dhabi	<b>US\$ 5,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK <sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Doha	<b>US\$ 6,000</b> per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Dubai	<b>US\$ 5,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK <sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

#### **Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### Day 1

Day 1	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0900	Video
0900 - 0930	Meaning & Overview of HAZOP
0930 - 0945	Break
0945 - 1015	Meaning & Overview of HAZOP (cont'd)
	What is HAZOP?
1015 – 1100	Meaning & Overview of HAZOP (cont'd)
1013 - 1100	Who Does it?
1100 - 1230	Meaning & Overview of HAZOP (cont'd)
1100 - 1230	How it is Done?
1230 - 1245	Break
1245 - 1330	Video
1330 - 1420	Case Studies
1420 - 1430	Recap
1430	Lunch & End of Day One

Day 2

0730 - 0830	Video
0830 - 0930	Meaning & Overview of HAZOP (cont'd)
	Where is it Done?
0930 - 0945	Break
0945 – 1045	Meaning & Overview of HAZOP (cont'd)
	When is it Done?
1045 - 1230	Process Hazard Analysis & HAZOP
1230 - 1245	Break
1245 - 1330	Video
1330 - 1420	Case Studies
1420 - 1430	Recap
1430	Lunch & End of Day Two

Dav 3

Day 3	
0730 - 0830	Video
0830 - 0930	Process Hazard Analysis & HAZOP (cont'd)
	Process Safety Management Versus Personal Safety
0930 - 0945	Break
0945 – 1045	Process Hazard Analysis & HAZOP (cont'd)
	What is Process Hazard Analysis?
1045 – 1230	Process Hazard Analysis & HAZOP (cont'd)
	Why use HAZOP as Preferred PHA Technique
1230 - 1245	Break
1245 - 1330	Video
1330 - 1420	Case Studies
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4

0730 - 0830	Video
0830 - 0930	HAZOP Methodology
0930 - 0945	Break
0945 - 1045	HAZOP Methodology (cont'd)
	Deviation
1045 - 1230	HAZOP Methodology (cont'd)
	Cause
1230 - 1245	Break
1245 - 1330	Video
1330 - 1420	Case Studies
1420 - 1430	Recap
1430	Lunch & End of Day Four

Day 5

, -	
0730 - 0930	Video
0930 - 0945	Break
0945 – 1100	HAZOP Methodology (cont'd)
	Consequences
1100 – 1215	HAZOP Methodology (cont'd)
	Safeguards
1215 - 1230	Break

1230 – 1315	HAZOP Methodology (cont'd)
	Case Studies
1315- 1345	HAZOP Methodology (cont'd)
	Action
1345 - 1400	Course Conclusion
1400 - 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

# **Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises:-
