COURSE OVERVIEW FE0863
AWS-CWEng Certified Welding Engineer Part 3 & 4

Course Title
AWS-CWEng Certified Welding Engineer Part 3 & 4

Course/Date/Venue
January 12-16, 2025/BoardRoom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Course/Exam Date/Venue
Exam Date : TBA
Exam Venue : TBA
Registration Closing Date: 8 weeks before the course date

Course Duration/Credits
Five days/4.0 CEUs/40 PDHs

Course Reference
FE0863

Course Description

This practical and highly-interactive course includes practical sessions and exercises where participants carryout welding inspection. Theory learnt in the class will be applied using the "E-Welding/Fabrication Simulator", the "AWS Tool Kit", the "Structural Weld Replica Kit" and the NDE Equipment (UT, MT & PT).

This course covers the qualification requirements for Welding Engineers. It describes how qualifications are determined, and the practice by which qualification may be attained and maintained.

The course will evaluate the qualifications of each individual, and provide examinations to test the individual's knowledge in engineering skills and knowledge as well as their ability to apply the principles of welding engineering.

The course is intended to supplement the minimum requirements of employers, codes, other standards, or documents and shall not be construed as a preemption of the employer's responsibility for the work or for the performance of the work. It shall be the responsibility of employers to determine that their employee, who, having qualified as a Welding Engineer, is capable of performing the specific duties involved in their career assignments.

Further, the course will also discuss the NDE/Weld discontinuities, welding heat sources and arc physics; the differences between CC and CV designs, welding arc characteristics and electron emission; the arc temperature and degree of ionization; the magnetic arc blow, lorentz force, shielding gas drag force and weld penetration and width for different shielding gases; the various arc welding process and controls including resistance welding processes, high energy density welding processes, cutting processes, surfacing processing and solid-state welding processes; and the welding and joining metallurgy.

During this interactive course, participants will learn the weld design, brazing and soldering; the safety and health hazards relating to welding, safety hazards, precautions to avoid injury and possess a working knowledge of safety and fire codes; and the practical welding and related applications of welding engineering concepts in the areas of welding safety, weldment design, welding metallurgy, materials, welding process selection, NDE including visual weld inspection, quality assurance, quality control in accordance with codes, specifications other standards and/or drawings.

Moreover, a person with the demonstrated education, experience, and knowledge as defined by this information and who successfully passes the required examinations is considered qualified as an AWS Certified Welding Engineer (CWEng).

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Get prepared for the AWS Certified Welding Engineer (CWEng) Part 3 and Part 4 exam and have enough knowledge and skills to pass such exam in order to get the AWS-CWEng Certification
- Recognize the NDE/Weld discontinuities covering NDE processes and symbols
- Determine welding heat sources and arc physics including power source static and dynamic characteristics as well as the differences between CC and CV designs, welding arc characteristics and electron emission
- Discuss arc temperature and degree of ionization as well as magnetic arc blow, lorentz force, shielding gas drag force and weld penetration and width for different shielding gases
- Explain the various arc welding process and controls including resistance welding processes, high energy density welding processes, cutting processes, surfacing processing and solid-state welding processes
- Describe welding and joining metallurgy covering crystal structure of metals, melting and solidification, phase transformations and phase diagrams, metallurgy and weld-ability of typical engineering materials, microstructure, mechanical properties, carbon equivalent, hydrogen assisted cracking, etc
- Illustrate weld design, brazing and soldering

- Employ safety and recognize health hazards relating to welding, safety hazards, precautions to avoid injury and possess a working knowledge of safety and fire codes
- Review practical welding and related applications of welding engineering concepts in the areas of welding safety, weldment design, welding metallurgy, materials, welding process selection, NDE including visual weld inspection, quality assurance, quality control in accordance with codes, specifications other standards and/or drawings

Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK®**). The **H-STK®** consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.*

Who Should Attend

This course provides a wide understanding and deeper appreciation of welding engineering for inspection, piping and welding engineers who are seeking AWS CWEng certification. Other engineers, managers and technical staffs who are dealing with welding and fabrication will also benefit from this course.

Exam Eligibility & Structure

To qualify as a Certified Welding Engineer, you must have a combination of qualifying education and work experience, with supporting documentation and should match at least one of the combinations in any one of the grids below:-

MINIMUM EDUCATION	MINIMUM WORK EXPERIENCE
Bachelor of Science or Higher Degree in Engineering	Minimum of one (1) year welding-based work experience
Bachelor of Science or Higher Degree in Engineering Technology	Minimum of two (2) years welding-based work experience
Other Related Bachelor of Science Degree	Minimum of five (5) years welding-based work experience
Associate in Applied Science (A.A.S.) degree	Minimum of ten (10) years welding-based work experience
High School Diploma or Approved High School Equivalent Program	Minimum of fifteen (15) years welding-based work experience

- Candidates are required to successfully complete Parts 1 and 2 of the CWEng examination before progressing to Parts 3 and 4. Upon passing Parts 1 and 2, candidates have one (1) year to apply for Parts 3 and 4.

Required Codes & Standards

Listed below are the effective editions of the publications required for the current Welding Engineer Certification Examination. **Each student must purchase these documents separately and have them available for use during the class as their cost is not included in the course fees**:-

Reference Title	Author	Publisher
ANSI Z49.1 Safety in Welding, Cutting and Allied Processes		AWS

References for Taking the Part 4 Examination

The AWS D1.1/D1.1M 24th Edition, 2020 is the only reference material that can be used during the exam. An electronic PDF copy of D1.1 will be available on the screen during the exam.

IMPORTANT! Candidates are allowed to bring a hard copy of D1.1 to test centers.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures
20% Practical Workshops & Work Presentations
30% Hands-on Practical Exercises & Case Studies
20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Training Fee

US$ 6,000 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Exam Fees

US$ 1,110 per Delegate + **VAT**.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Course Accreditations

Haward Technology is accredited by the following international accreditation organizations:-

- American Welding Society (AWS)

  Haward Technology is the **International Agent** of the **American Welding Society (AWS)** and the Authorized Provider of AWS international certification examinations outside the USA. Haward Technology exhibits compliance and adherence to **AWS Quality Control Standards** in the development, conduct and delivery of certification courses and exams for welding and inspection professionals on behalf of the American Welding Society.

  The American Welding Society's certification programs are internationally recognized and are used as a benchmark of quality workmanship and skills within the welding industry around the world.

- The International Accreditors for Continuing Education and Training (IACET - USA)

  Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

  Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

  Haward Technology Middle East will award **4.0 CEUs** (Continuing Education Units) or **40 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- British Accreditation Council (BAC)

  Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Geoff Kaschula is a **Senior Welding Engineer** with over **30 years** of extensive experience within the **oil**, **gas**, **petrochemical**, **process** and **power industries**. His fields of specialization cover the areas of **welding technology**; **design**, **fabrication**, **construction**, **installation**, **commissioning**, **inspection** & **maintenance** of **process equipment** such as **boilers**, **pressure vessels**, **piping systems**, **structures** & **storage tanks**; **condition assessment** of rotating & auxiliary equipment like **compressors**, **steam turbines**, **pumps**, **heat exchangers** & **valves**; Risk Based Inspection (**RBI**), Fitness-For-Service (**FFS**); **welding** & **fabrication engineering**, **failure analysis**, flaw evaluation, remnant life determination, capacity reviews for process and power equipment, asset management and project management. He has also worked extensively with international industry standards such as **ASME**, **API**, **TEMA**, **BS/EN**, **ANSI** & **AWS** to name a few. Mr. Kaschula is currently the **Director** of **RBI-Asset Management**.

Mr. Kaschula has handled wide-ranging responsibilities and assumed various important positions over the past 30 years in his career. Prior to founding his own company, he was the **Quality Manager** of **Parsons Brinckerhoff**, a power company, where he handled **design verification** of equipment such as boilers, pressure equipment, heat exchangers & pumps in addition to the overall development of management systems in compliance with **international safety**, **quality** and **technical standards**. He also worked as the **Inspection Manager** of **Weltech** where he was in charge of all major **inspection activities** and **plant condition evaluation** of **petrochemical plants** and **power stations**. He also worked extensively as a **Project Manager** for the design, fabrication and manufacturing of pressure vessels, heat exchangers and piping in accordance with **ASME** III & VIII standards. He also served as **Technical Assessor**, **Inspection Engineer**, **Welding Engineer** and **QA/QC Engineer** for companies like Arnot & Hendrina Power Station, Projects Expedited, Airtech Davidson & the Department of Transport. As the current **Director** of **RBI-Asset Management**, he oversees the overall operations of the company in providing technical and advisory services in the field of infrastructure asset management, design review, verification, inspection and condition assessment of major refinery equipment such as pressure vessels, storage tanks and piping systems.

Mr. Kaschula is a qualified **Welding Engineer**. He is also a **certified API 510 Pressure Vessel Inspector**, **certified API 570 Piping Inspector**, **certified API 580 Risk Based Inspector**, a **Registered Inspector** & **Competent Person** for Boilers, Pressure Vessels & Pressure Equipment as well as a **Registered International Professional Welding Technologist** by the International Institute of Welding (**IIW**) and a **Certified Instructor/Trainer**.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: ***Sunday, 12th of January 2025***

0730 – 0800	*Registration & Coffee*
0800 – 0815	*Welcome & Introduction*
0815 – 0830	***PRE-TEST***
0830 – 1000	***Part 3 – Welding Related Disciplines: NDE/Weld Discontinuities*** *NDE Processes (Radiographic, Ultrasonic, Magnetic Particle, Liquid Penetrant, Eddy Current, Etc. – Characteristics, Advantages and Limitations)*
1000 – 1015	*Break*
1015 - 1200	***Part 3 – Welding Related Disciplines: NDE/Weld Discontinuities (cont'd)*** *NDE Symbols*
1200 – 1300	*Lunch*
1300 – 1500	***Part 3 – Welding Related Disciplines: Welding Heat Sources & Arc Physics*** *Power Source Static and Dynamic Characteristics (Open Circuit Voltage and Short Circuiting Current, Slope) • Differences between CC and CV Designs (Principle of Self-Adjusting) • Welding Arc Characteristics (Current and Voltage Relationship, Arc Length Effect) • Electron Emission (Ionization Potential, Work Function, Electrode Material, Shielding Gas, Arc Stability)*
1500 – 1515	*Break*
1515 – 1630	***Part 3 – Welding Related Disciplines: Welding Heat Sources & Arc Physics (cont'd)*** *Arc Temperature and Degree of Ionization (Shielding Gas Influence) • Magnetic Arc Blow (Work Lead Location and Condition) • Lorentz Force (Effect on Droplet Detachment and on Adjacent Power Cables) • Shielding Gas Drag Force (Effect on Droplet Detachment and Metal Transfer Mode) Weld Penetration and Width for Different Shielding Gases*
1630 – 1730	***Distribute Homework & Recap***
1730	*End of Day One*

Day 2: ***Monday, 13th of January 2025***

0730 – 0830	***Homework Review***
0830 – 1000	***Part 3 – Welding Related Disciplines: Welding Processes & Controls*** *Arc Welding Processes (SMAW, GMAW, FCAW, GTAW, SAW, PAW) • Resistance Welding Processes (RW, High Frequency RW), High Energy Density Welding Processes (LBW, EBW)*
1000 – 1015	*Break*
1015 – 1200	***Part 3 – Welding Related Disciplines: Welding Processes & Controls (cont'd)*** *Cutting Processes (OFC, CAC, and PAC) • Surfacing Processing (SW, THSP) • Solid-State Welding Processes (FRW, FW)*

1200 – 1300	*Lunch*
1300 – 1500	***Part 3 – Welding Related Disciplines: Welding & Joining Metallurgy*** *Crystal Structure of Metals (FCC, BCC, HCP, Unit Cells, Lattice Parameter, C/A Ratio, Atom Positions, Interstitial Positions) • Melting and Solidification, Phase Transformations and Phase Diagrams (Eutectic, Eutectoid, Peritectic and Monotectic, Lever Rule Calculation) Metallurgy & Weld-Ability of Typical Engineering Materials (Low Carbon Structural Steels, Cast Irons, Stainless Steels, Nickel Alloys, Aluminum Alloys, Titanium Alloys, Etc.) Microstructure (e.g., Ferrous Alloys – Grain Boundary Ferrite, Acicular Ferrite, Bainite, Martensite, Austenite, Delta Ferrite, etc.) and Mechanical Properties • Carbon Equivalent (CE_{IIW}, P_{cm}, Expressions, Alloying Content and Carbon Content Effect)*
1500 - 1515	*Break*
1515 – 1630	***Part 3 – Welding Related Disciplines: Welding & Joining Metallurgy (cont'd)*** *Hydrogen Assisted Cracking (Heat-Affected Zone Cracking, Cold Cracking) Base Metal Matching (e.g., Electrodes with High Strength Steels) • Solidification Cracking (Segregation of Impurity Atoms, Shrinkage Cracking, Lamellar Tearing) • Delta Ferrite in Stainless Consumables, Specifications for Consumables (Categories: All Position, Rutile, Basic) • Flux-Metal Reactions (Oxygen and Sulfur Control in Weld Pool) • Typical Temperature Range of a Heat Source*
1630 – 1730	***Distribute Homework & Recap***
1730	*End of Day Two*

Day 3: ***Tuesday, 14th of January 2025***

0730 – 0830	***Homework Review***
0830 – 1000	***Part 3 – Welding Related Disciplines: Welding & Joining Metallurgy (cont'd)*** *Temperature Distribution in a Weldment • HAZ Formation • Multipass Thermal Experience, Reheated Weld Metal Properties • Weld Macro and Micro-Graph Interpretation • Solidification Profile and Preferred Grain Orientation (Epitaxial Growth)*
1000 – 1015	*Break*
1015 – 1200	***Part 3 – Welding Related Disciplines: Welding & Joining Metallurgy (cont'd)*** *Origin of Weld Ripples • Special Attributes of Base Metal (As-Cast Structure, Deformation Texture, Oxide on Flame-Cut Surfaces) • Thermal Treatments (Preheat, Postheat, Interpass Influence on Weld Cooling Rate and Residual Stress Distribution) • Solid-State Transformations in Welds (Different Forms of Ferrite, Bainite and Martensite, Sigma Phase in Stainless Steels, Guinier-Preston Type Precipitates Zones and Aging in Aluminum Alloys) • Corrosion (Sensitization In Stainless Steel Welds, Stress Corrosion Cracking*
1200 – 1300	*Lunch*
1300 – 1500	***Part 3 – Welding Related Disciplines: Weld Design*** *Structural Fabrication Requirements, Sectional Properties, Stress Gradient • Stress Triaxiality, Weld Symbols, Hardness and Microhardness (e.g., Across a Weld Cross Section)*

1500 - 1515	*Break*
1515 – 1630	***Part 3 – Welding Related Disciplines: Weld Design (cont'd)*** *Tensile Properties, Ductility, Toughness, Fillet Break Test (Influence of Second Phase & Porosity) • Ductile Fracture, Brittle Fracture, Fatigue (Initiation, Propagation, Failure, High-Cycle, Low-cycle) • Temperature & Strain Rate Effect*
1630 – 1730	***Distribute Homework & Recap***
1730	*End of Day Three*

Day 4: ***Wednesday, 15th of January 2025***

0730 – 0830	***Homework Review***
0830 – 1000	***Part 3 – Welding Related Disciplines: Brazing & Soldering*** *Characteristics of Brazing and Soldering, Fluxes and Substrates, Capillary Action, Wetting and Spreading, Contact Angle, Joint Clearance, Viscosity, Liquidus and Solidus, Flow of Molten Filler in Horizontal and Vertical Joints (Maximum Penetration and Rate), Filler Metal Systems (Sn-Pb Solders, Ni and Cu Based Alloys, Ag-Cu Based Brazing Alloys) and Intermetallic Compound Formation*
1000 – 1015	*Break*
1015 – 1200	***Part 3 – Welding Related Disciplines: Brazing & Soldering (cont'd)*** *Characteristics of Brazing and Soldering, Fluxes and Substrates, Capillary Action, Wetting and Spreading, Contact Angle, Joint Clearance, Viscosity, Liquidus and Solidus, Flow of Molten Filler in Horizontal and Vertical Joints (Maximum Penetration and Rate), Filler Metal Systems (Sn-Pb Solders, Ni and Cu Based Alloys, Ag-Cu Based Brazing Alloys) and Intermetallic Compound Formation (cont'd)*
1200 – 1300	*Lunch*
1300 – 1500	***Part 3 – Welding Related Disciplines: Safety*** *Recognize Health Hazards Relating to Welding, (Fumes, Toxic Gases, Noise, Radiation). Recognize Safety Hazards, (Electric Shock, Compressed Gases, Fire, Welding in a Confined Space, Welding on Containers and Piping, Moving Equipment). Recognize Precautions to Avoid Injury and Possess a Working Knowledge of Safety and Fire Codes*
1500 - 1515	*Break*
1515 – 1630	***Part 3 – Welding Related Disciplines: Safety (cont'd)*** *Recognize Health Hazards Relating to Welding, (Fumes, Toxic Gases, Noise, Radiation). Recognize Safety Hazards, (Electric Shock, Compressed Gases, Fire, Welding in a Confined Space, Welding on Containers and Piping, Moving Equipment). Recognize Precautions to Avoid Injury and Possess a Working Knowledge of Safety and Fire Codes (cont'd)*
1630 – 1730	***Distribute Homework & Recap***
1730	*End of Day Four*

Day 5: ***Thursday, 16th of January 2025***

0730 – 0830	***Homework Review***
0830 – 1000	***Part 4 – Practical Welding & Related Applications: Exam using References on the Application of Welding Engineering Concepts in the Areas of*** *Welding Safety • Weldment Design*
1000 – 1015	*Break*

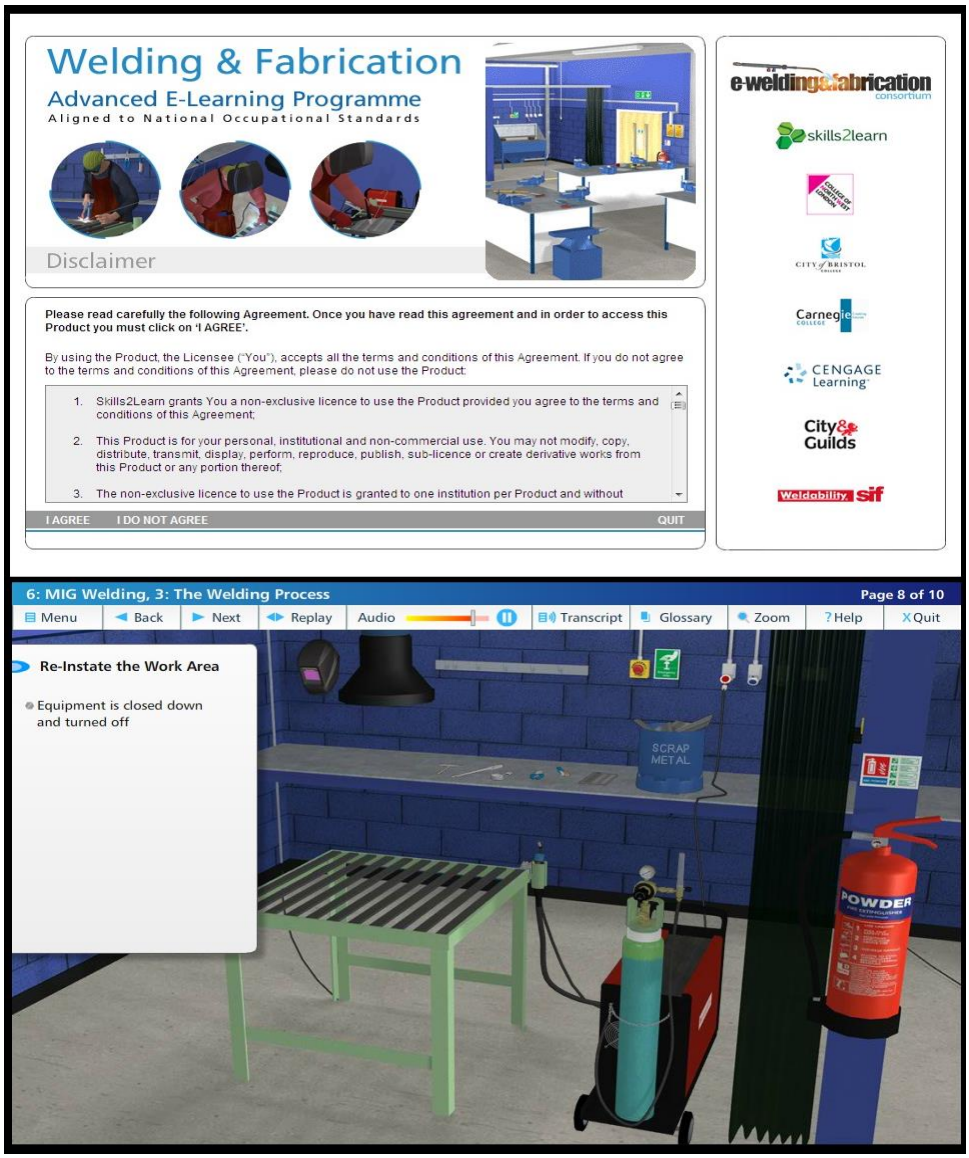
1015 – 1200	***Part 4 – Practical Welding & Related Applications: Exam using References on the Application of Welding Engineering Concepts in the Areas of (cont'd)*** *Welding Metallurgy • Materials • Welding Process Selection*
1200 – 1300	*Lunch*
1300 – 1500	***Part 4 – Practical Welding & Related Applications: Exam using References on the Application of Welding Engineering Concepts in the Areas of (cont'd)*** *NDE including Visual Weld Inspection, Quality Assurance, Quality Control in Accordance with Codes*
1500 – 1515	*Break*
1515 – 1645	***Part 4 – Practical Welding & Related Applications: Exam using References on the Application of Welding Engineering Concepts in the Areas of (cont'd)*** *Specifications • Other Standards and/or Drawings*
1645 – 1700	***Course Conclusion*** *Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course*
1700 – 1715	***POST-TEST***
1715 – 1730	*Presentation of Course Certificates*
1730	*End of Course*

MOCK Exam

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward's Portal. Each Participant will be given a username and password to log in Haward's Portal for the Mock exam during the 7 days following the course completion. Each participant has only one trial for the MOCK exam within this 7-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

Simulator (Hands-on Practical Sessions)

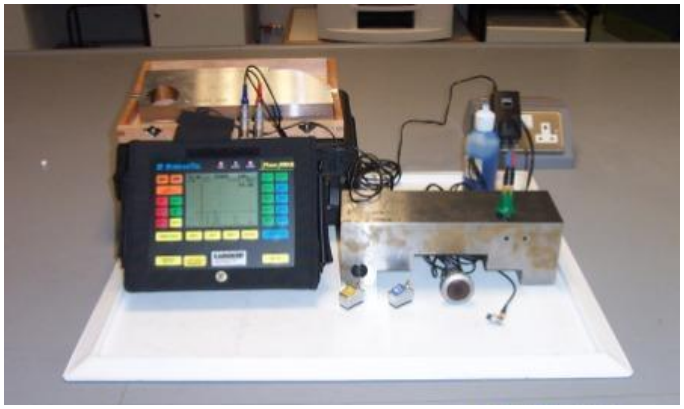
Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the state-of-the-art "E-Welding & Fabrication", "American Welding Society (AWS) Tool Kit, "Structural Weld Replica Kit", "Ultrasonic Testing (UT) Equipment", "Magnetic Yoke Testing Kit", "Liquid Penetrant Testing Kit" and our specifically designed flawed specimen test components.



E-Welding & Fabrication

AWS Tool Kit

Structural Weld Replica Kit



Ultrasonic Testing (UT) Equipment

Ultrasonic Testing Package USM 36

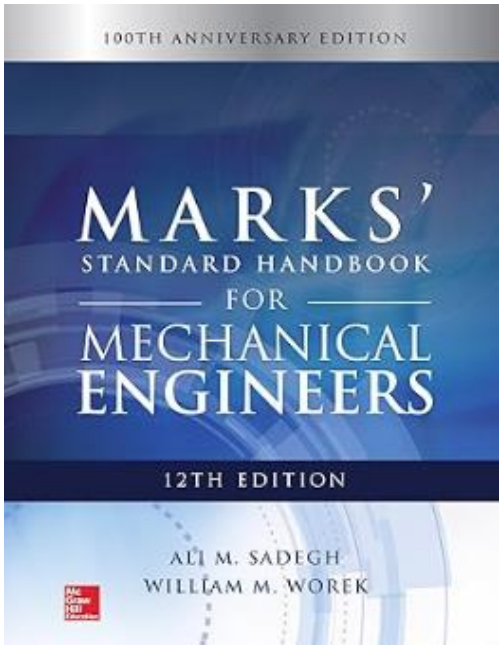
Magnetic Yoke Testing Kit

Liquid Penetrant Testing Kit

Flawed Specimen Test Components

Book(s)

As part of the course kit, the following e-book will be given to all participants:



Title : Marks' Standard Handbook For Mechanical Engineers
ISBN :978-1259588501
Author : Ali Sadegh, William Worek
Publisher : McGraw Hill

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
