

# **COURSE OVERVIEW PE0910-IH Refinery Production Operations & Petroleum Products**

## **Course Title**

Refinery Production Operations & Petroleum Products

## **Course Date/Venue**

As per proposal/Yasref Premises, KSA

**Course Reference** 

PE0910-IH

Course Duration/Credits AWA

Five days/3.25 CEUs/32.5 PDHs

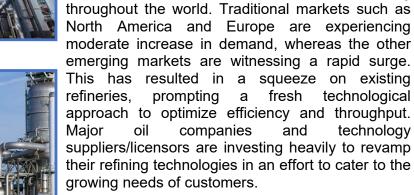

# **Course Description**

This practical and highly-interactive course includes various practical sessions exercises. Theory learnt will be applied using our state-of-the-art simulators.

The demand for petroleum products is increasing

Even though the nature of crude oil is changing, refineries are here to stay in the foreseeable future, since petroleum products satisfy wide-ranging energy requirements/demands that are not fully catered to by natural gas, liquefied petroleum gas (LPG), or coal. Refineries are eager to adapt to changing circumstances and are amenable to trying new technologies that are radically different in character. This is evident from the increasing use of different types of refinery process technology and novel separation methods.

This course will give an up-to-date overview of most of the refinery production technologies employed by refineries around the world and it is designed provide an extensive and deep knowledge as well as the description of the technology. Further, this course will guide the participants to develop key concepts and techniques to operate, select and optimize refinery processes.

The course covers a wide range of topics such general chemistry, organic, chemical used in refinery processes, refinery infrastructure, refinery feedstocks, crude distillation, coking & thermal processes, catalytic cracking, catalytic hydrocracking, hydroprocessing & resid processing, hydrotreating, catalytic reforming & isomerization, alkylation & polymerization, product blending, supporting processes, lubricating oil blending stocks, petrochemical feedstocks, additives production from refinery feedstocks, maintenance & safety and environmental considerations

### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply systematic techniques and procedures on refinery production operations and petroleum products
- Analyze the usage, optimization, hazards & preventions, storage and specifications of chemicals used in the refinery process
- Discuss refinery infrastructure and refinery products
- Enumerate refinery feedstocks and illustrate the types of crude distillation, crude products, types & properties of coking & thermal processes
- Carryout types and new designs of catalytic cracking, catalytic hydrocracking, feed pretreating, process variables, heat recovery, hydroprocessing and resid processing
- Employ hydrotreating catalyst as well as catalytic reforming and isomerization yields
- Demonstrate alkylation types, process variables, feedstocks and reactions along with product blending and supporting processes
- Determine lubricating oil blending stocks & processes and discuss petrochemical feedstocks, types of production and additives production from refinery feedstocks

#### **Who Should Attend**

This course provides an overview of all significant aspects and considerations of refinery production operations and petroleum products for all engineering and operations staff. Further, the course is suitable for maintenance, facility integrity, pipelines/piping, quality, Health, Safety and Environmental personnel who are seeking to improve their knowledge and skills on refinery processes and gain exposure on refinery concepts and technology including the operation, safety and control aspects.

#### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

## Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

## **Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations:-

#### British Accreditation Council (BAC)

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.25 CEUs (Continuing Education Units) or 32.5 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

#### **Course Fee**

As per proposal

# Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

Day 1	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Industry Background
0930 - 0945	Break
0945 - 1100	General Chemistry Basic Material ● Basic Chemical Reaction ● Theory of Gases
1100 – 1215	Organic Chemistry  Structure of Organic Compounds ● Reaction of Organic Compounds ● Detail  Study of Alkenes ● Alkenes ● Aromatics & Alcohol ●Nitrogen Compounds
1215 - 1230	Break
1230 – 1330	Chemical Used in Refinery Processes  Nature of Chemical ● Optimization Usage ● Chemical Hazards and Prevention ● Safe Storage of the Chemicals ● Petroleum Product Specification and Testing
1330 – 1420	Refinery Infrastructure Refinery Products • Characteristics of Crude and Products • Product Specifications and Tests • Low-Boiling Products • Gasoline • Gasoline Specifications • Distillate Fuels • Jet and Turbine Fuels • Automotive Diesel Fuels • Railroad Diesel Fuels • Heating Oils • Residual Fuel Oils
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	End of Day One

#### Day 2

Duy L	
0730 - 0930	Refinery Feedstocks Crude Oil Properties • Crudes Suitable for Asphalt Manufacture • Crude Distillation Curves
0930 - 0945	Break
0945 - 1030	Crude Distillation  Desalting Crude Oils • Atmospheric Topping Unit •Vacuum Distillation •  Auxiliary Equipment • CDU Overhead Condenser Control • Crude Distillation Unit Products
1030 - 1100	Case Study Problem # 1 Crude Units
1100 – 1215	Coking and Thermal Processes  Types, Properties & Uses of Petroleum Coke • Process Description-Delayed Coking • Operation-Delayed Coking • Process Description-Flexicoking • Process Description-Fluid Coking • Yields from Flexicoking & Fluid Coking • Capital Cost & Utilities for Flexicoking& Fluid Coking • Visbreaking
1215 - 1230	Break

1230 – 1420	Case Study Problem # 2
	Delayed Coker
1420 - 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today & Advise Them of the Topics to be Discussed
	Tomorrow
1430	End of Day Two

# Day 3

Catalytic Cracking	Day 3	
Catalytic Cracker  0930 - 0945  Break  Catalytic Hydrocracking Hydrocracking Reactions • Feed Preparation • The Hydrocracking Process • Hydrocracking Reactions • Feed Preparation • The Hydrocracking Process • Hydrocracking Catalyst • Process Variables • Hydrocracking Yields • Investment & Operating Costs • Modes of Hydrocracker Operation  1100 - 1130  Case Study Problem #4 Hydroprocessing and Resid Processing Composition of Vacuum Tower Bottoms • Processing Options • Hydroprocessing • Expanded-Bed Hydrocracking Process • Moving-Bed Hydroprocessors • Solvent Extraction • Summary of Resid Processing Operations  1215 - 1230  Break  Hydrotreating Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  1300 - 1330  Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Costs • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  1400 - 1420  Case Study Problem #6 Naptha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	0730 – 0830	Fluidized-Bed Catalytic Cracking • New Designs for Fluidized-Bed Catalytic Cracking Units • Cracking Reactions • Cracking of Paraffins • Olefin Cracking • Cracking of Naphthenic Hydrocarbons • Aromatic Hydrocarbon Cracking • Cracking Catalysts • FCC Feed Pretreating • Process Variables • Heat Recovery • Yield Estimation • Capital & Operating Costs
Catalytic Hydrocracking Hydrocracking Reactions • Feed Preparation • The Hydrocracking Process • Hydrocracking Catalyst • Process Variables • Hydrocracking Yields • Investment & Operating Costs • Modes of Hydrocracker Operation  1100 - 1130  Case Study Problem #4 Hydroprocessing and Resid Processing Composition of Vacuum Tower Bottoms • Processing Options • Hydroprocessing • Expanded-Bed Hydrocracking Process • Moving-Bed Hydroprocessors • Solvent Extraction • Summary of Resid Processing Operations  1215 - 1230 Break  Hydrotreating Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Catalyst • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  1400 - 1420  Case Study Problem #6 Naphtha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	0830 - 0930	
Hydrocracking Reactions • Feed Preparation • The Hydrocracking Process • Hydrocracking Catalyst • Process Variables • Hydrocracking Yields • Investment & Operating Costs • Modes of Hydrocracker Operation  1100 - 1130  Case Study Problem #4 Hydrocracker  Hydroprocessing and Resid Processing Composition of Vacuum Tower Bottoms • Processing Options • Hydroprocessing • Expanded-Bed Hydrocracking Process • Moving-Bed Hydroprocessors • Solvent Extraction • Summary of Resid Processing Operations  1215 - 1230  Break  Hydrotreating Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization  Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Catalyst • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  Case Study Problem #6 Naphha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	0930 - 0945	Break
Hydrocracker  Hydroprocessing and Resid Processing Composition of Vacuum Tower Bottoms • Processing Options • Hydroprocessing •Expanded-Bed Hydrocracking Process • Moving-Bed Hydroprocessors • Solvent Extraction • Summary of Resid Processing Operations  1215 - 1230 Break  Hydrotreating Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Catalyst • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  1400 - 1420  Case Study Problem #6 Naptha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	0945 – 1100	Hydrocracking Reactions • Feed Preparation • The Hydrocracking Process • Hydrocracking Catalyst • Process Variables • Hydrocracking Yields •
Composition of Vacuum Tower Bottoms • Processing Options • Hydroprocessing • Expanded-Bed Hydrocracking Process • Moving-Bed Hydroprocessors • Solvent Extraction • Summary of Resid Processing Operations  1215 - 1230 Break  Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  1300 - 1330 Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Catalyst • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  1400 - 1420 Case Study Problem #6 Naptha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	1100 - 1130	
1230 - 1300  Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  1300 - 1330  Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Catalyst • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  1400 - 1420  Case Study Problem #6 Naptha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	1130 – 1215	Composition of Vacuum Tower Bottoms • Processing Options • Hydroprocessing • Expanded-Bed Hydrocracking Process • Moving-Bed Hydroprocessors • Solvent Extraction • Summary of Resid Processing
Hydrotreating Hydrotreating Catalysts • Naphtha & Distillate Hydrotreating • Aromatics Reduction • Reactions • Process Variables • Construction & Operating Costs  1300 - 1330  Case Study Problem #5 Hydrotreaters  Catalytic Reforming and Isomerization Platforming • Reactions • Feed Preparation • Catalytic Reforming Processes • Reforming Catalyst • Reactor Design • Yields and Costs • Isomerization • Capital & Operating Costs • Penex Processes • Isomerization Yields  Case Study Problem #6 Naptha Hydrotreater, Catalytic Reformer & Isomerization Unit  Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow	1215 - 1230	· · · · · · · · · · · · · · · · · · ·

	1430	End of Day Three

Day 4

Day 4	
0730 – 0830	Alkylation and Polymerization Alkylation Reactions ● Process Variables ● Alkylation Feedstocks ● Alkylation Products ● Catalyst ● Hydrofluoric Acid Processes ● Sulfuric Acid Alkylation ● Comparison of Processes ● Alkylation Yields & Cost ● Polymerization
0830 - 0930	Case Study Problem # 7 Alkylation & Polymerization
0930 - 0945	Break
0945 – 1100	Product Blending         Reid Vapor Pressure       ● Octane Blending       ● Blending for Other Properties
1100 – 1215	Case Study Problem # 8 Gasoline Blending
1215 - 1230	Break
1230 - 1330	Case Study Problem # 9 Diesel & Jet Fuel Blending
1330 – 1400	Supporting Processes  Hydrogen Production & Purification • Gas Processing Unit • Acid Gas Removal • LPG Treating • Merox Processes • DHDS Processes • Sulfur Recovery Processes • SRU Processes • Ecological Considerations in Petroleum Refining • Waste Water Treatment • Control of Atmospheric Pollution • Noise Level Control
1400 – 1420	Case Study Problem # 10 Saturated Gas Recovery, Amine & Sulfur Rocovery Units
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1430	End of Day Four

#### Day 5

Day 5	
0730 - 0930	Lubricating Oil Blending Stocks  Lube Oil Processing • Propane Deasphalting •Viscosity Index Improvement and Solvent Extraction • Viscosity Index Improvement & Hydrocracking • Dewaxing • Hydrofinishing •Finishing by Clay Contacting • Environmental Impacts
0930 - 0945	Break
0945 - 1100	Petrochemical Feedstocks Aromatics Production ● Unsaturate Production ● Saturate Paraffins
1100 – 1215	Additives Production From Refinery Feedstocks  Use of Alcohols & Ethers • Ether Production Reactions • Ether Production Processes • Yields • Cost of Ether Production • Production of Isobutylene • Commercial Dehydrogenation Processes • Houdry's CATOFIN • Phillips Petroleum's STAR • UOP LLC's OLEFLEX • Snamprogetti/Yarsintez Process • Costs to Produce Isobutylene from Isobutane • International Union of Pure & Applied Chemists
1215 – 1230	Break

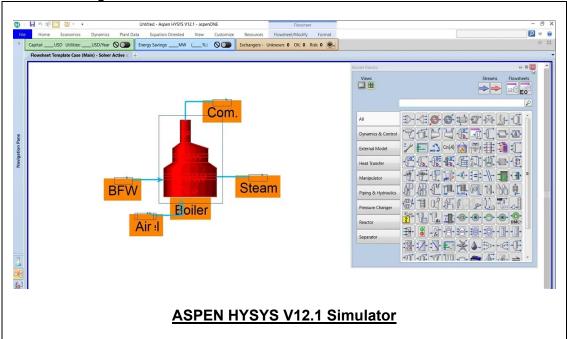

1230 - 1300	Maintenance & Safety
1300 - 1345	Environmental Consideration
1345 – 1400	Course Conclusion Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1400 - 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	End of Course

# **Simulator (Hands-on Practical Sessions)**

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the "ASPEN HYSYS V12.1" simulator.

# Who will Provide the Equipment/Software/Simulators

Haward Technology
