

**COURSE OVERVIEW DE0251(AD6)**

**Production Operations in the Oil & Gas Fields & Surface Facilities**

*Operation of Process Equipment, Separation of Oil/Gas/Water, Controlling Flow/Pressure/Temperature, Injection of Water/Gas & Process Troubleshooting*

**Course Title**

Production Operations in the Oil & Gas Fields & Surface Facilities: *Operation of Process Equipment, Separation of Oil/Gas/Water, Controlling Flow/Pressure/Temperature, Injection of Water/Gas & Process Troubleshooting*

**Course Date/Venue**

June 29-July 03, 2025/Al Buraimi Meeting Room, Sheraton Oman Hotel, Muscat, Oman

**Course Reference**

DE0251(AD6)

**Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

**Course Description**

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.***

This course is designed to provide participants with an up-to-date overview of the production operations in the oil and gas fields and surface facilities covering the operation of process equipment, separation of oil/gas/water, controlling flow/pressure/temperature, injection of water/gas and process troubleshooting. It aims to establish an understanding of the processes, technology, equipment, techniques and HSE associated with oil and gas production and operation.

The course covers the different eras of petroleum industry; the similarities and differences of upstream and downstream O&G; the function, operation and equipment of the wellhead tower; the purpose, equipment and uses of production manifold; the well construction; the vertical, deviated and horizontal wells; the well completion consisting of casing design, fracturing, perforating, acid stimulation, sand control, coiled tubing operations and logging; and the processes involved in the separation of oil, gas and water.

During this interactive course, participants will learn the oil and gas production streams, their flows and pressure; the methods of controlling flow, pressure and temperature; the flow assurance covering paraffin, wax, scale, asphaltenes, corrosion and erosion; the types and purpose of production equipment including the need, operations and equipment of artificial lift; the electrical submersible pumps, gas lift and progressive cavity pumps for heavy oil; the water and gas injection technology; and the proper waterflooding and troubleshooting.

### Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on the operation of process equipment, separation of oil/gas/water, controlling flow/pressure/temperature, injection of water/gas and process troubleshooting
- Differentiate upstream versus downstream O&G and discuss the function, operation and equipment of the wellhead tower
- Recognize the purpose, equipment and uses of production manifold
- Illustrate well construction as well as the vertical, deviated and horizontal wells completion design
- Identify the well completion consisting of casing design, fracturing, perforating, acid stimulation, sand control, coiled tubing operations and logging
- Carryout the processes involved in the separation of oil, gas and water
- Discuss the oil and gas production streams, their flows and pressure
- Employ the methods of controlling flow, pressure and temperature
- Explain flow assurance covering paraffin, wax, scale, asphaltenes, corrosion and erosion
- Identify the types and purpose of production equipment including the need, operation and equipment of artificial lift
- Recognize electrical submersible pumps, gas lift and progressive cavity pumps for heavy oil
- Explain water and gas injection technology and employ proper waterflooding and troubleshooting

### Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Howard Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

### Who Should Attend

This course provides an overview of the various operations in oil and gas surface production facilities for engineers and other technical staff working in the oil and gas fields. The course is also suitable for engineers and other technical staff who are not working in the oil and gas field but willing to have an introductory knowledge on the subject.

### Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

#### British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 

#### The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Konstantin Zorbalas, MSc, BSc, is a Senior Petroleum Engineer & Well Completions Specialist with over 30 years of offshore and onshore experience in the Oil & Gas, Refinery & Petrochemical industries. His wide expertise includes Workovers & Completions, Petroleum Risk & Decision Analysis, Acidizing Application in Sandstone & Carbonate, Well Testing Analysis, Stimulation Operations, Reserves Evaluation, Reservoir Fluid Properties, Reservoir Engineering & Simulation Studies, Reservoir Monitoring, Artificial Lift Design, Gas Operations, Workover/Remedial Operations & Heavy Oil Technology, Applied Water Technology, Oil & Gas Production, X-mas Tree & Wellhead Operations & Testing, Artificial Lift Systems (Gas Lift, ESP, and Rod Pumping), Well Cementing, Production Optimization, Production Operations, Well Completion Design, Sand Control, PLT Correlation, Slickline Operations, Acid Stimulation, Well testing, Production Logging, Project Evaluation & Economic Analysis.** Further, he is actively involved in **Project Management** with special emphasis in production technology and field optimization, performing conceptual studies, economic analysis with risk assessment and field development planning. He is currently the **Senior Petroleum Engineer & Consultant of National Oil Company** wherein he is involved in the mega-mature fields in the Arabian Gulf, predominantly carbonate reservoirs; designing the acid stimulation treatments with post-drilling rigless operations; utilizing CT with tractors and DTS systems; and he is responsible for gas production and preparing for reservoir engineering and simulation studies, well testing activities, field and reservoir monitoring, production logging and optimization and well completion design.

During his career life, Mr. Zorbalas worked as a **Senior Production Engineer, Well Completion Specialist, Production Manager, Project Manager, Technical Manager, Technical Supervisor & Contracts Manager, Production Engineer, Production Supervisor, Production Technologist, Technical Specialist, Business Development Analyst, Field Production Engineer and Field Engineer.** He worked for many **world-class oil/gas companies** such as **ZADCO, ADMA-OPCO, Oilfield International Ltd, Burlington Resources** (later acquired by **Conoco Phillips**), **MOBIL E&P, Saudi Aramco, Pluspetrol E&P SA, Wintershall, Taylor Energy, Schlumberger, Rowan Drilling and Yukos EP** where he was in-charge of the **design and technical analysis** of a gas plant with capacity **1.8 billion m<sup>3</sup>/yr gas**. His achievements include **boosting oil production 17.2% per year** since 1999 using **ESP and Gas Lift systems**.

Mr. Zorbalas has **Master's and Bachelor's degree in Petroleum Engineering** from the **Mississippi State University, USA**. Further, he is an **SPE Certified Petroleum Engineer, Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership & Management (ILM)**, an active member of the **Society of Petroleum Engineers (SPE)** and has numerous scientific and technical publications and delivered innumerable training courses, seminars and workshops worldwide.

### Course Fee

**US\$ 8,000** per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1: Sunday 29<sup>th</sup> of June 2025**

|             |  |
|-------------|--|
| 0730 – 0800 | <i>Registration &amp; Coffee</i>   |
| 0800 – 0815 | <i>Welcome &amp; Introduction</i>  |
| 0815 – 0830 | <b>PRE-TEST</b>  |
| 0830 – 0930 | <b>Introduction to the Petroleum Industry</b><br><i>History of the Different Eras</i>  |
| 0930 – 0945 | <i>Break</i>   |
| 0945 – 1100 | <b>Upstream versus Downstream O&amp;G</b><br><i>Similarities and Differences</i>   |
| 1100 – 1230 | <b>The Function, Operation &amp; Equipment of the Wellhead Tower</b>   |
| 1230 – 1245 | <i>Break</i>   |
| 1245 – 1420 | <b>Production Manifold</b><br><i>Purpose • Equipment • Uses</i>  |
| 1420 - 1430 | <b>Recap</b><br><i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow</i> |
| 1430        | <i>Lunch &amp; End of Day One</i>  |

#### **Day 2: Monday 30<sup>th</sup> of June 2025**

|             |  |
|-------------|--|
| 0730 – 0930 | <b>Well Construction Overview</b>  |
| 0930 – 0945 | <i>Break</i>   |
| 0945 – 1045 | <b>Completion Design</b><br><i>Vertical • Deviated • Horizontal Wells</i>  |
| 1045 – 1230 | <b>Overview of the Well Completion</b><br><i>Casing Design • Fracturing • Perforating • Acid Stimulation • Sand Control • Coiled Tubing Operations • Logging</i> |
| 1230 – 1245 | <i>Break</i>   |

|             |   |
|-------------|---|
| 1245 - 1420 | <b>Separation of Oil, Gas &amp; Water</b>   |
| 1420 - 1430 | <b>Recap</b><br>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow |
| 1430        | Lunch & End of Day Two  |

**Day 3: Tuesday 01<sup>st</sup> of July 2025**

|             |   |
|-------------|---|
| 0730 - 0930 | <b>The Oil &amp; Gas Production Streams, Their Flows &amp; Pressure</b>   |
| 0930 - 0945 | Break   |
| 0945 - 1045 | <b>Methods of Controlling Flow, Pressure &amp; Temperature</b>  |
| 1045 - 1230 | <b>Flow Assurance</b><br>Paraffin • Wax • Scale • Asphaltenes • Corrosion • Erosion   |
| 1230 - 1245 | Break   |
| 1245 - 1420 | <b>Type &amp; Purpose of Production Equipment</b>   |
| 1420 - 1430 | <b>Recap</b><br>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow |
| 1430        | Lunch & End of Day Three  |

**Day 4: Wednesday 02<sup>nd</sup> of July 2025**

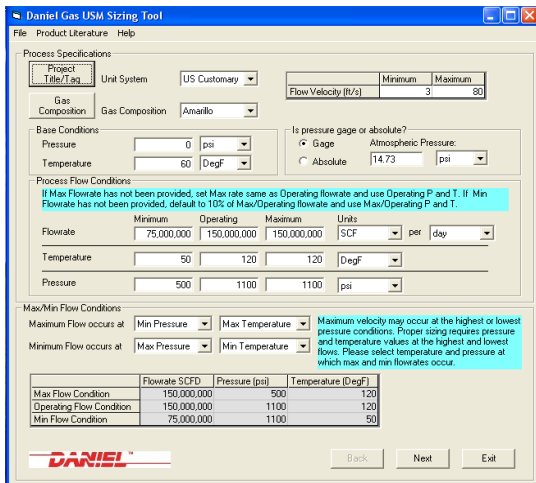

|             |   |
|-------------|---|
| 0730 - 0930 | <b>Introduction to Artificial Lift</b><br>Need • Operations • Equipment   |
| 0930 - 0945 | Break   |
| 0945 - 1045 | <b>Electrical Submersible Pumps</b>   |
| 1045 - 1230 | <b>Gas Lift</b>   |
| 1230 - 1245 | Break   |
| 1245 - 1420 | <b>Progressive Cavity Pumps for Heavy Oil</b>   |
| 1420 - 1430 | <b>Recap</b><br>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow |
| 1430        | Lunch & End of Day Four   |

**Day 5: Thursday 03<sup>rd</sup> of July 2025**

|             |   |
|-------------|---|
| 0730 - 0930 | <b>Water &amp; Gas Injection Technology</b>   |
| 0930 - 0945 | Break   |
| 0945 - 1045 | <b>Waterflooding</b><br>Methods • Equipment   |
| 1045 - 1230 | <b>Waterflooding (cont'd)</b><br>Processes  |
| 1230 - 1245 | Break   |
| 1245 - 1345 | <b>Troubleshooting</b><br>Process • Pump Failure Analysis   |
| 1345 - 1400 | <b>Course Conclusion</b><br>Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course |
| 1400 - 1415 | <b>POST-TEST</b>  |
| 1415 - 1430 | Presentation of Course Certificates   |
| 1430        | Lunch & End of Course   |

## Simulator (Hands-on Practical Sessions)

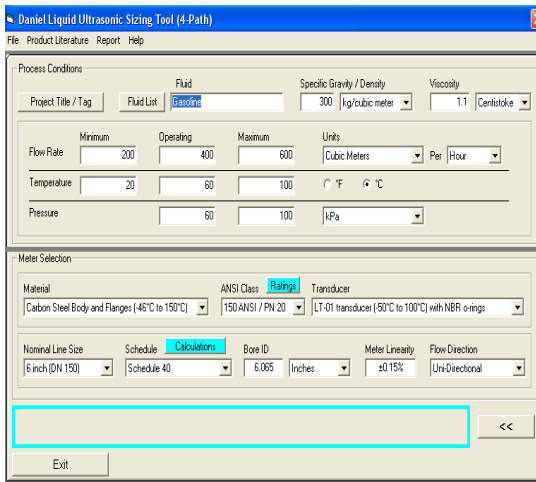

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art “Gas Ultrasonic Meter Sizing Tool”, “Liquid Turbine Meter and Control Valve Sizing Tool”, “Liquid Ultrasonic Meter Sizing Tool”, “Orifice Flow Calculator” “Centrifugal Pumps and Troubleshooting Guide 3.0”, “SIM 3300 Centrifugal Compressor”, “CBT on Compressors” and, “Heat Exchanger Tube Layout” simulators.

**Gas Ultrasonic Meter (USM) Sizing Tool Simulator**

**Liquid Turbine Meter and Control Valve Sizing Tool Simulator**

**Liquid Ultrasonic Meter Sizing Tool Simulator**

**Orifice Flow Calculator Simulator**

**API - 610 TYPES**  
CENTRIFUGAL PUMPS-HIGH SPEED INTEGRAL GEAR

RESOLUTION (QUALITY) OF GRAPHICS REDUCED IN THE TOUR DUE TO FILE SIZE CONSTRAINTS!

Intricate 3D models and 2D schematics for all the 17 types with animations showing Walk-arounds, Working, Assembly, Dismantling, etc.

Pump spin

proceed

The pump is viewed on a walk around.
