

**COURSE OVERVIEW ME0240**  
**Advanced Valve Technology**

Design, Selection, Installation, Applications, Sizing, Inspection,  
Maintenance & Troubleshooting

**Course Title**

Advanced Valve Technology *Design, Selection, Installation, Applications, Sizing, Inspection, Maintenance & Troubleshooting*

**Course Date/Venue**

April 13-17, 2025/TBA Meeting Room, The H Hotel, Sheikh Zayed Road, Dubai, UAE

**Course Reference**

ME0240

**Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

**Course Description**

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.***

The Valve industry has become increasingly digital during the last ten years. Even a casual examination of available smart or intelligent positioners reveals significant differences in design philosophies, on-board intelligence, and application options being employed by manufacturers. This course will focus on the new process plant applications for smart valve technology found since 1998. Further, this course offers complete coverage of the operation, application, and pros and cons of today's newest smart valves with digital positioners and actuators. Also includes updates on HART and FieldBus valve technology.

The course will cover the latest spectrum of available valves from gate, plug, butterfly, check, pressure-relief, globe valves to control valves equipped with microprocessors, which provide single-loop control of the process. Further, the course will cover valve materials: steel, iron, plastic, brass, bronze, and a number of special alloys.

Today the global valve industry involves hundreds of global manufacturers who produce thousands of designs of manual, check, pressure-relief and control valves. In addition to the traditional manufacturers in North America and Europe, the course will discuss the emerging Asian market, Japan, Korea, Taiwan, and China.

This course is offering everything the professional and the novice need to know about designing, selecting, installation, application, sizing, maintaining, and troubleshooting of nowadays valves. In addition to serving as an invaluable update for the experienced engineer, this course provides the beginner with a solid understanding of modern valve technology.

### **Course Objectives**

This AVT (Advanced Valve Technology) course encourages attendees to advance from basic installation and maintenance to selection, upgrading and troubleshooting of valve failures. It includes modern technology of new materials that have been made available recently. Upon the successful completion of this AVT course, each participant will be able to:-

- Apply advanced techniques in design, selection, installation, sizing, inspection, maintenance and troubleshooting of valves
- Apply knowledge on control valve theory including cavitation, flashing, choked flow and sizing and identify the various types, features and functions of control valves
- Determine the characteristics of valves and recognize the concept of trims including low noise trim, diffusers & trim selection
- Classify manual valves and identify its components and functions
- Recognize the process considerations for valve technology including pressure classes, materials selection, leakage rates and international standards
- Implement the process of actuator selection by considering the various types and accessories used in valve technology and apply the principle of field communication as applied in valve technology
- Develop knowledge on Smart valves and positioners as well as the Smart partial valve stroke test devices used in valves
- Manage asset of field mounted devices and recognize its importance in advanced valve technology
- Develop in-depth knowledge on check valves, pressure relief valves and fire safe valves by identify their types, features and application in the industry
- List the common valve problems that are encountered including water hammer effects, high noise levels & fugitive emissions and determine how to prevent valve failures
- Apply proven methodology of assessing the valve failures in the oil & gas sector and explain how it affects the maintenance and troubleshooting processes of valves
- Acquire an overview of plant valve management and regulators that are used in valve technology and an overview of extended valve components, hardide & coatings and composite valves including their design, installation, application and sizing
- Apply the proper procedure for corrosion, galling and water testing and carryout proper methodology of valve sizing & selection using the various programs and applications

### **Exclusive Smart Training Kit - H-STK®**

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

### **Who Should Attend**

This course provides an overview of all significant aspects and considerations of valve for those who are involved in the design, selection, installation, applications, sizing, inspection, maintenance and troubleshooting of such equipment. This includes maintenance, application, inspection, electrical, mechanical, control, instrumentation, production, wellhead and drilling engineers, designers and other technical staff. Likewise, it is beneficial for users, distributors, purchasers or buyers of this equipment for them to understand the design and manufacturing principles that dictates faster delivery of safer quality product.

### **Training Methodology**

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

### **Course Fee**

**US\$ 5,500** per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

### Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Dr. Tony Dimitry, PhD, MSc, BSc, is a Senior Mechanical & Maintenance Engineer with over 35 years of industrial experience within the Petroleum, Oil & Gas, Petrochemical, Nuclear & Power industries. His expertise covers Safety Relief Valves, Process Control Valves, Valves Principles & Operation, Engineering Drawings, Engineering Drawings & Diagrams, AutoCAD & GIS Support, Retailed Engineering Drawings, Codes & Standards, Mechanical Diagrams Interpretation, Reading Engineering Drawings, Process & Project Drawings, Engineering Drawings Interpretation, Piping Layouts & Isometrics, P&ID Reading & Interpretation, Glass Reinforced Epoxy (GRE), Glass Reinforced Pipes (GRP), Glass Reinforced Vent (GRV), Mechanical Pipe Fittings, Flange Joint Assembly, Adhesive Bond Lamination, Butt Jointing, Joint & Spool Production, Isometric Drawings, Flange Assembly Method, Fabrication & Jointing, Jointing & Spool Fabrication, Pipe Cuttings, Flange Bolt Tightening Sequence, Hydro Testing, Failure Analysis Methodologies, Machinery Root Cause Failure Analysis (RCFA), Preventive Maintenance & Condition Monitoring, Reliability Centred Maintenance (RCM), Risk Based Inspection (RBI), Root Cause Analysis (RCA), Planning & Managing Plant Turnaround, Scheduling Maintenance, Data Archive Maintenance, Master Milestone Schedule (MMS), Piping & Mechanical Vibration Analysis, Preventive & Predictive Maintenance (PPM) Maintenance, Condition Based Monitoring (CBM), Risk Based Assessment (RBA), Planning & Preventive Maintenance, Maintenance Management (Preventive, Predictive, Breakdown), Reliability Management, Rotating Equipment, Scheduling & Cost Control, Maximo Foundation, Maximo Managing Work, Asset Management Best Practices, Resource Management, Inventory Set-up & Management, Work Management, Automatic & Work Flows & Escalations, Vibration Analysis, Heat Exchanger, Siemens, Gas & Steam Turbine Maintenance, Pumps & Compressors, Turbo-Expanders, Fractional Columns, Boilers, Cryogenic Pumps for LNG, Electromechanical Maintenance, Machinery Alignment, Lubrication Technology, Bearing & Rotary Machine, Blower & Fan, Shaft Repair, Pipelines, Piping, Pressure Vessels, Process Equipment, Diesel Engine & Crane Maintenance, Tanks & Tank Farms, Pneumatic System, Static Equipment, FMEA, Corrosion, Metallurgy, Thermal and Electrical Modelling of Battery Problems. He is also well-versed in various simulators such as i-Learn Vibration, AutoCAD, Word Access, Aspen One, Fortran, VB, C ANSYS, ABAQUS, DYNA3D, Ceasar, Caepipe, MS Project, Primavera, MS Excel, Maximo, Automation Studio and SAP. Currently, he is the Maintenance Manager of the PPC Incorporation wherein he is responsible for the maintenance and upgrading of all Power Station components.**

During his career life, Dr. Dimitry held a significant positions such as the **Operations Engineers, Technical Trainer, HSE Contracts Engineer, Boilers Section Engineer, Senior Engineer, Trainee Mechanical Engineer, Engineer, Turbines Section Head, Professor, Lecturer/Instructor and Teaching Assistant** from various multinational companies like **Chloride Silent Power Ltd., Technical University of Crete, National Nuclear Corporation, UMIST Aliveri Power Station and HFO Fired Power Station.**

Dr. Dimitry has **PhD, Master and Bachelor** degrees in **Mechanical Engineering** from the **Victory University of Manchester** and the **University of Newcastle, UK** respectively. Further, he is a **Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership & Management (ILM)** and an associate member of the **American Society of Mechanical Engineers (ASME)** and **Institution of Mechanical Engineers (IMechE)**. He has further delivered various trainings, seminars, courses, workshops and conferences internationally.

### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

#### **Day 1: Sunday, 13<sup>th</sup> of April 2025**

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	<b>PRE-TEST</b>
0830 – 0915	<b>Control Valve Theory</b> Introduction • Definition of a Control Valve • Types of Energy • What is Happening Inside a Control Valve • Cavitation • Flashing • Choked Flow • Control Valve Sizing • Turndown vs. Range ability
0915 – 0930	<b>Video Presentation</b> Cavitation
0930 – 0945	Break
0945 – 1030	<b>Control Valve Types</b> Rotary Valves • Linear Valves • Valve Selection • How to Choose the Right Valve • Selection Guidelines • Application Comparisons
1030 – 1100	<b>Video Presentation</b> Control Valve Body Assembly
1100 – 1215	<b>Characteristics &amp; Trims</b> Valve Characteristics • Application Examples • Cavitation Control • Anti-Cavitation Trim • High Pressure Drop-Applications • Low Noise Trim • Diffusers • Trim Selection
1215 – 1230	Break
1230 – 1330	<b>Manual Valves</b> Classification of Manual Valves • Rotating Manual Valves • Stopper Valves • Sliding Valves • Flexible Valves
1330 – 1420	<b>Process Considerations</b> End Connections • Pressure Classes • Face to Face Criteria • Materials Selection • Modes of Failure • Leakage Rates • International Standards
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

#### **Day 2: Monday, 14<sup>th</sup> of April 2025**

0730 – 0900	<b>Actuator Selection</b> Types of Actuators • Linear Actuators • Rotary Actuators • Actuator Forces • Positioners • Fail Safe Systems • Auxiliary Hand wheels • Valve Accessories
0900 – 0930	<b>Video Presentation</b> Actuator Assembly
0930 – 0945	Break
0945 – 1030	<b>Field Communications</b> Analogue Signals • Digital Communications • Fieldbus Technologies
1030 – 1100	<b>Video Presentation</b> HART Protocol

1100 – 1215	<b>Smart Valves &amp; Positioners</b> Introduction • Development • Digital Valve Controllers • Future Development
1215 – 1230	Break
1230 – 1330	<b>Smart Partial Valve Stroke Test Devices</b> Overview
1330 – 1420	<b>Asset Management of Field Mounted Devices</b> Maximizing Asset Uptime
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

**Day 3: Tuesday, 15<sup>th</sup> of April 2025**

0730 – 0930	<b>Check Valves</b> Introduction to Check Valves • Lift Check Valves • Swing Check Valves • Tilting Disc Check Valves • Double Disc Check Valves
0930 – 0945	Break
0945 – 1100	<b>Pressure Relief Valves</b> Introduction • Principles of Operation • Standards (ASME, National Board, etc.) • Applications • Installation
1100 – 1215	<b>Pressure Relief Valves (cont'd)</b> Testing • Assembly • Repair • Troubleshooting • VR Accreditation
1215 – 1230	Break
1230 – 1420	<b>Fire Safe Valves</b> Overview
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

**Day 4: Wednesday, 16<sup>th</sup> of April 2025**

0730 – 0930	<b>Common Valve Problems</b> Water hammer Effects • High Noise Levels • Noise Attenuation • Fugitive Emissions • How to Prevent Valve Failures • Installation Issues • Practical Problems • Maintenance Considerations
0930 – 0945	Break
0945 – 1100	<b>Assessment of Valve Failure in the Oil &amp; Gas Sector</b> Overview
1100 – 1215	<b>Plant Valve Management</b> Overview
1215 – 1230	Break
1230 – 1420	<b>Regulators</b> Overview
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

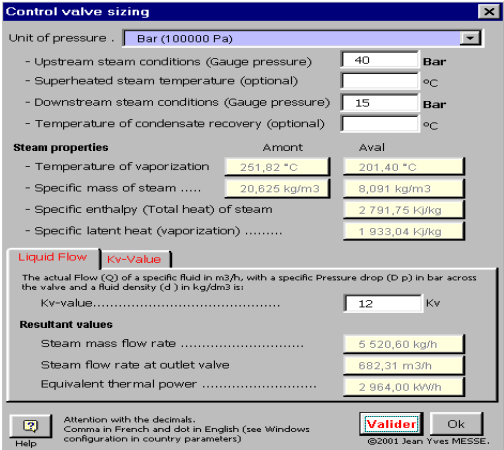

**Day 5: Thursday, 17<sup>th</sup> of April 2025**

0730 – 0930	<b>Extended Valve Components, Hardide &amp; Coatings</b> Overview
0930 – 0945	Break
0945 – 1100	<b>Composite Valves</b> Overview
1100 – 1215	<b>Corrosion, Galling &amp; Water Testing</b> Overview
1215 – 1230	Break
1230 – 1345	<b>Valve Sizing &amp; Selection</b> Computer Program • Liquid & Gas Applications • Linear & Rotary Valves • Actuator Sizing
1345 – 1400	<b>Course Conclusion</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1400 – 1415	<b>POST-TEST</b>
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

### Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art simulators “Valve Sizing Simulator”, “Valve Simulator 3.0”, “Valvestar 7.2 Simulator” and “PRV<sup>2</sup>SIZE Simulator”.

**Control valve sizing**

Unit of pressure : Bar (100000 Pa)

- Upstream steam conditions (Gauge pressure) : 40 Bar

- Superheated steam temperature (optional) : °C

- Downstream steam conditions (Gauge pressure) : 15 Bar

- Temperature of condensate recovery (optional) : °C

**Steam properties**      Amont      Aval

- Temperature of vaporization : 251,82 °C      201,40 °C

- Specific mass of steam ..... : 20,625 kg/m<sup>3</sup>      8,091 kg/m<sup>3</sup>

- Specific enthalpy (Total heat) of steam : 2 791,75 kJ/kg

- Specific latent heat (vaporization) ..... : 1 933,04 kJ/kg

**Liquid Flow**      Kv-Value

The actual Flow (Q) of a specific fluid in m<sup>3</sup>/h, with a specific Pressure drop (D p) in bar across the valve and a fluid density (d ) in kg/dm<sup>3</sup> is:

Kv-value..... : 12 Kv

**Resultant values**

Steam mass flow rate ..... : 5 520,60 kg/h

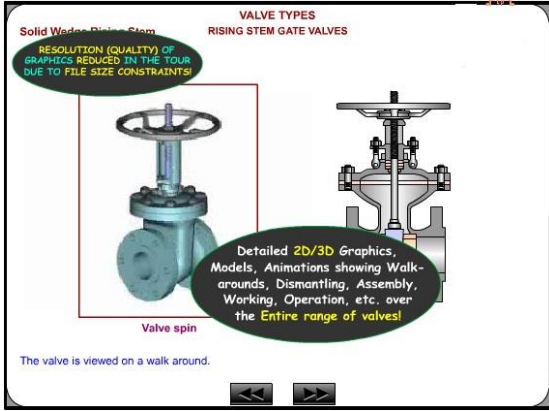

Steam flow rate at outlet valve : 682,31 m<sup>3</sup>/h

Equivalent thermal power ..... : 2 964,00 kW/h

Attention with the decimals, Comma in French and dot in English (see Windows configuration in country parameters)

Validat      Ok

Help      ©2001 Jean-Yves MESSE.

**VALVE TYPES**  
RISING STEM GATE VALVES

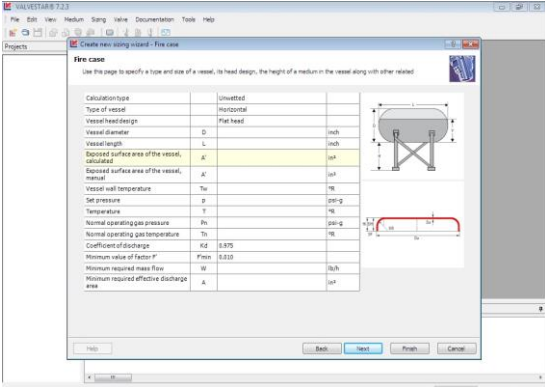

Solid Welded, Rising Stem

RESOLUTION (QUALITY) OF GRAPHICS REDUCED IN THE TOUR DUE TO FILE SIZE CONSTRAINTS

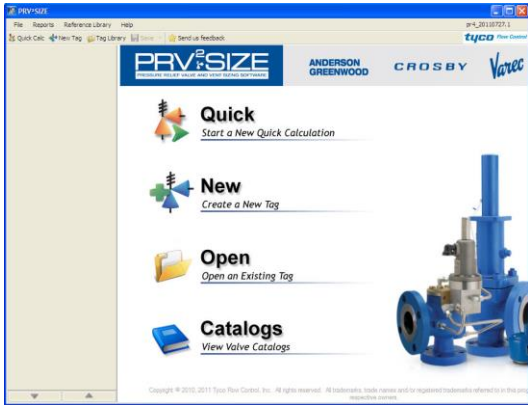

Detailed 2D/3D Graphics, Models, Animations showing Walk-arounds, Dismantling, Assembly, Working, Operation, etc. over the Entire range of valves!

Valve spin

The valve is viewed on a walk around.

**Valvestar 7.2 Simulator**

**PRV<sup>2</sup>SIZE Simulator**

### Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: [mari1@haward.org](mailto:mari1@haward.org)
