**Course Description**

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.***

The acceptance of project management as a profession indicates that the application of knowledge, processes, skills, tools, and techniques can have a significant impact on project success. A project is a temporary endeavor undertaken to create a unique product, service, or result. The temporary nature of projects indicates that a project has a definite beginning and end. The end is reached when the project's objectives have been achieved or when the project is terminated because its objectives will not or cannot be met, or when the need for the project is no longer exists.

This course is designed to cover the PMI's project management body of knowledge (PMBOK). It provides guidelines for managing individual projects and defines project management related concepts. It also describes the project management life cycle and its related processes, as well as the project life cycle.

The course will take you step-to-step through the latest planning and control techniques, particularly those used by the Project Management Software and the Project Management Body of Knowledge (both APM's book and PMI's PMBOK). The course is in line with the PMI knowledge requirements and with the relevant experience will enable the participant to apply to the PMI for acceptance to their examination for the PMI-PMP registration. (Details of the full PMI requirements are available on the PMI web-page, [www.pmi.org](http://www.pmi.org) )

The course is carefully developed to reflect the best practices that also match the training requirements of distinguished professional organizations such as the Project Management Institute (**PMI**) and **FIDIC**. The Professional Development Units/Hours (**PDUs**) or Continuing Education Units (**CEUs**) awarded to our participants are recognized by the Project Management Institute (**PMI**) and by the International Association for Continuing Education & Training (**IACET-USA**).

### Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the “Mindview Software” and “Raidlog Simulator”.

The screenshot displays the Mindview Software interface. At the top, a mind map titled "Problem Solving" is visible, with branches for "Assessment", "Planning", "Measurement", and "Monitoring". Below the mind map, a Microsoft Word document is open, showing a "PROBLEM SOLVING" template with various sections like "Plan", "Assess", "Measure", and "Monitor". To the right, a checklist titled "Planning" is shown, with sections for "Recognize symptoms", "Set up team", "Identify main problems", and "Select problem". The text "Mind map" is written below the mind map, and "Word" is written below the document.

**Mindview Software**

The screenshot shows the RAIDlog Simulator interface. It features a "FREE RAID Log Template + RAID Analysis" header. Below this, there is a "RAID ANALYSIS" table with columns for Risks, Assumptions, Issues, and Dependencies. The table is color-coded by risk level: Critical (red), High (orange), Moderate (yellow), Low (light green), and Negligible (light blue). A "RAID LOG" table is also present, with columns for ID, Title, Description, Type, Classification, and Comments. The "RAID ANALYSIS" table includes a "PM-TRAINING" logo.

	RISKS	ASSUMPTIONS	ISSUES	DEPENDENCIES
Critical	1	0	1	1
High	0	0	0	1
Moderate	1	1	0	2
Low	0	0	1	0
Negligible	0	0	0	0
Total	2	1	2	2
