

COURSE OVERVIEW HE0581-3D

Certified Radiation Protection Officer (RPO)

In-line with the Requirements of the Federal Authority for Nuclear Regulation (FANR)

Course Title

Certified Radiation Protection Officer (RPO):
In-line with the Requirements of the Federal Authority for Nuclear Regulation (FANR)

Course Date/Venue

August 09-11, 2026/TBA Meeting Room, Al Bandar Rotana, Dubai Creek, Dubai, UAE or Online Virtual Training

Course Reference

HE0581-3D

Course Duration/Credits

Three days/1.8 CEUs/18 PDHs

Course Description

This practical and highly-interactive course includes practical sessions and exercises where participants carryout surface contamination and dose rate measurements and surveys. Theory learnt in the class will be applied using our state-of-the-art equipment.

This course is designed to provide delegates with a detailed and up-to-date overview of radiation protection officer/qualified expert in accordance with the Federal Authority for Nuclear Regulations (FANR). It covers the fundamentals review; the quantities and measurements; the biological effects of ionizing radiation; the principles of radiation protection and the international framework; and the regulatory control.

Further, the course will also cover the assessment of external and internal exposures; the protection against occupational exposure; the medical exposures in diagnostic radiology, radiotherapy and nuclear medicine; the exposure of the public owing to practices; the intervention in situations of chronic and emergency exposure; and training the trainers.

The course includes a comprehensive e-book entitled "An Introduction to Radiation Protection", published by CRC Press, which will be given to the participants to help them appreciate the principles presented in the course.

Course Objectives/Outcomes & Benefits for the Participants

Upon the successful completion of this course, each participant will be able to:-

- Get certified as a “*Certified Radiation Protection Officer*”
- Review the fundamentals of physics and mathematics used in radiation protection, interaction of radiation with matter and sources of radiation
- Identify the quantities and measurements as well as the biological effects of ionizing radiation
- Discuss the principles of radiation protection and the international framework covering the conceptual framework, role of international organizations in radiation protection and the development of safety culture
- Apply regulatory control including the legal framework for radiation protection and the safe use of radiation sources, regulatory system and assessment of the effectiveness of the regulatory programmes
- Assess external and internal exposures of radiation due to external sources of radiation and radionuclides and use proper protection against occupational exposure
- Explain medical exposures in diagnostic radiology, radiotherapy and nuclear medicine including the scope and responsibilities, justification of medical exposures, optimization of protection for medical exposures, quality assurance and accidental exposures in medical applications
- Describe exposure of the public owing to practices, intervention in situations of chronic and emergency exposure
- Assess the training needs, presenting how to be a lecturer and setting up a training course

Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

Who Should Attend

This course provides an overview of all significant aspects and considerations of radiation protection for those who are willing to be a Radiation Protection Officer (RPO) such as safety officers, supervisors, engineers, inspectors, X-Ray technicians and other technical and medical staff.

Course Fee

F2F Classroom: US\$ 3,750 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Online Virtual: US\$ 1,875 per Delegate + **VAT**.

Course Certificate(s)

- (1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a “*Certified Radiation Protection Officer*”. Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:-

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

* Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology *

Academic Director

Haward Technology has been approved as an Accredited Provider by the International Association for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this approval, Haward Technology has demonstrated that it complies with the ANSI/IACET 1-2018 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2018 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology is accredited by

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3091 714 | E-mail: info@haward.org | Website: www.haward.org

* Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology * CEUs * Haward Technology *

Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations: -

-  British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council for Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

-  The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **1.8 CEUs** (Continuing Education Units) or **18 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Tony Bunce, PgDip, BSc, RPA, CMIOSH, CRadP, NEBOSH, is an **Accredited Radiation Protection Adviser (RPA)**, and a **Senior Environmental Consultant** with over **20 years**. He is a **NEBOSH Approved Instructor** and his expertise widely covers in **NEBOSH Environmental Management**, **NEBOSH International General Certificate**, **NEBOSH Health & Safety**, **NEBOSH Health & Safety Leadership**, **HAZOP & HAZAN Analysis**, Hazard Identification (**HAZID**), **ALARP System**, **Radiation Safety & Protection**, **Radioactive Waste Management**, **Radiation Protection Instrumentation**, **Nuclear & Radiological Safety**, **Nuclear Engineering**, **Safety Management System**, **Uranium & Plutonium Safe Handling**, **Contamination Control**, **Radiation Protection Design**, **Risk Assessment**, **Personal Protection Equipment**, **Dosimetry Review**, **Nuclear Weapon & Nuclear Reactor Accident Procedures**, **Personal Protective Equipment**, **Machinery & Work Equipment** and **Manual Handling**. Further, he is also well-versed in **ISO 14001:2004** (Environmental Management System), **AERMOD Modeling**, **Incident Reporting & Investigation**, Cause Tree Analysis (**CTA**), Fault Tree Analysis (**FTA**), **HSE Emergency Planning**, **Crisis Management**, **HSSE Practices**, **Emergency Response Plans** and **Emergency Preparedness**. He is currently the **Radiation Protection Advisor** of **IAEA (Austria)** wherein his in-charge of the design and commissioning of IAEA's new Nuclear Material Laboratory.

During Mr. Tony's career life, he held significant positions such as the **Radiation Protection Advisor**, **Radiation Protection Officer**, **Safety Adviser**, **Radiation Monitoring Specialist**, **Lead Safety Adviser** and **Health Physics Monitor** for international companies and agencies such as the International Atomic Energy Agency (**IAEA**), **Thorp Nuclear Processing Plant** and the **Nuclear Department of UK** just to name a few.

Mr. Bunce has a **Post Graduate Diploma** in **Radiation and Environmental Protection** from the **University of Surrey** and a **Bachelor** degree in **Environmental Risk Management** from the **University of Wales Institute Cardiff** in **UK** respectively. Further, he is a **Certified Instructor/Trainer**, an **Approved Tutor** in **NEBOSH Environmental Management Certificate**, **NEBOSH Health & Safety Leadership Excellence**, a **Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership & Management (ILM)**, an **Accredited Radiation Protection Adviser (RPA)** from the **RPA 2000 Board**, a **Qualified Radiological Protection Reviewer**, a Chartered Member of **IOSH (CMIOSH)**, a Chartered Radiological Protection Practitioner (**CRadP**), **Certified Radiation Safety Practice (Stage 1)** from **City and Guilds** and **NEBOSH Diploma** holder. He has further delivered numerous trainings, conferences, workshops and seminars globally.

Virtual Training (If Applicable)

If this course is delivered online as a Virtual Training, the following limitations will be applicable:-

Certificates	Only soft copy certificates will be issued to participants through Haward's Portal. This includes Wallet Card Certificates if applicable
Training Materials	Only soft copy Training Materials (PDF format) will be issued to participant through the Virtual Training Platform
Training Methodology	80% of the program will be theory and 20% will be practical sessions, exercises, case studies, simulators or videos
Training Program	The training will be for 4 hours per day starting at 0800 and ending at 1200
H-STK Smart Training Kit	Not Applicable
Hands-on Practical Workshops	Not Applicable
Site Visit	Not Applicable
Simulators	Only software simulators will be used in the virtual courses. Hardware simulators are not applicable and will not be used in Virtual Training

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Learning Design & Customization

This course can be customized to the exact requirements of clients. Haward Technology is so proud of our huge capabilities in tailoring our courses to the training needs of our valued clients.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 09th of August 2026

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0930	Review of Fundamentals Introduction • Basic Physics & Mathematics Used in Radiation Protection • Interaction of Radiation with Matter • Sources of Radiation
0930 – 0945	Break
0945 – 1100	Quantities & Measurements Quantities & Units • Dosimetric Calculations & Measurements • Principles of Radiation Detection & Measurement
1100 – 1230	Biological Effects of Ionizing Radiation Effects of Radiation at the Molecular & the Cellular Level • Deterministic Effects • Stochastic Somatic Effects • Stochastic Hereditary Effects • Effects on the Embryo & Foetus • Epidemiological Studies & Issues • The Concept of Radiation Detriment
1230 – 1245	Break
1245 – 1420	Principles of Radiation Protection & the International Framework Conceptual Framework • The Role of International Organizations in Radiation Protection • The Development of Safety Culture
1420 – 1430	Recap
1430	Lunch & End of Day One

Day 2: Monday, 10th of August 2026

0730 – 0930	Regulatory Control Legal Framework for Radiation Protection & the Safe Use of Radiation Sources • Regulatory System • Assessment of the Effectiveness of the Regulatory Programmes
0930 – 0945	Break
0945 – 1100	Assessment of External & Internal Exposures Assessment of Occupational Exposure Due to Intakes of Radionuclides • Assessment of Occupational Exposure Due to External Sources of Radiation
1100 – 1230	Protection Against Occupational Exposure Organization & Management • Methods of Protection & the Safe Use of Radiation Sources; Optimization • Individual & Workplace Monitoring • Health Surveillance • Potential Exposures • Protection Against Occupational Exposure in Industrial Radiography • Protection Against Occupational Exposure in Industrial Irradiators and Accelerators • Protection Against Occupational Exposure in the Use of Nuclear Gauges • Protection Against Occupational Exposure in the Use of Tracers • Protection Against Occupational Exposure in Well Logging Devices • Protection Against Occupational Exposure in Diagnostic Radiology • Protection Against Occupational Exposure in Nuclear Medicine • Protection Against Occupational Exposure in Radiotherapy
1230 – 1245	Break
1245 – 1420	Medical Exposures in Diagnostic Radiology, Radiotherapy & Nuclear Medicine Scope and Responsibilities • Justification of Medical Exposures • Optimization of Protection for Medical Exposures • Quality Assurance • Accidental Exposures in Medical Applications
1420 – 1430	Recap
1430	Lunch & End of Day Two

Day 3: Tuesday, 11th of August 2026

0730 – 0930	Exposure of the Public Owing to Practices Sources of Exposure of the Public • Responsibilities & Organization • Safe Transport of Radioactive Material • Safety of Radioactive Waste • Environmental Dose Assessment • Source & Environmental Monitoring • Consumer Products • Dose Assessment • Monitoring of Public Exposures
0930 – 0945	Break
0945 – 1045	Intervention in Situations of Chronic & Emergency Exposure General Principles & Types of Events • Basic Concepts for Emergency Response • Basic Concepts for Emergency Preparedness for a Nuclear Accident or Radiological Emergency
1045 – 1200	Intervention in Situations of Chronic & Emergency Exposure (cont'd) Developing a National Capability for Response to a Nuclear Accident or Radiological Emergency • Overview of Assessment & Response in a Radiological Emergency • Monitoring in a Nuclear Accident or Radiological Emergency • Medical Management of Radiation Injuries • Communication with the Public • International Cooperation
1200 – 1215	Break
1215 – 1330	Training the Trainers Training Needs • Being a Lecturer • Setting Up a Training Course
1330 - 1345	Course Conclusion
1345 - 1415	COMPETENCY EXAM
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Instruments (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art instrument “RadEye B20-ER” model.

Thermo Scientific RadEye B20-ER Model

Book(s)

As part of the course kit, the following e-book will be given to all participants:

Title : An Introduction to Radiation Protection
ISBN : 978-1444146073
Author : Alan Martin, Sam Harbison, Karen Beach, Peter Cole
Publisher : CRC Press

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
