

COURSE OVERVIEW IE0012

Certified Fiber Optics Professional (CFOP)
Fiber Optics Access Network Planning

Course Title

Certified Fiber Optics Professional (CFOP):
Fiber Optics Access Network Planning

Course Date/Venue

November 09-13, 2025/Boardroom 1, Elite Byblos
Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Course Reference

IE0012

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes practical sessions and exercises where participants carryout fiber optic splicing, testing and troubleshooting. Theory learnt in the class will be applied using our state-of-the-art equipment.

The rapidly changing face of data communications and telecommunications has seen a continued growth in the need to transfer enormous amounts of information across large distances. The technologies that were used extensively in the past such as coaxial cable, satellite and microwave radio for transferring information were running out of capacity. With the introduction of fiber optic communications systems, the solution to the problems of transmission capacity shortage and to noisy industrial environments has been successfully found.

Fiber optic transmission has become one of the most exciting and rapidly changing fields in telecommunications engineering. An optical fiber is simply a very thin piece of glass which acts as a pipe, through which light can pass. The light that is passed down the glass fiber can be turned on and off to represent digital information or it can be gradually changed in amplitude, frequency or phase represent analog information.

Fiber optic transmission systems have many advantages over more conventional transmission systems. They are less affected by noise, do not conduct electricity and therefore provide electrical isolation, carry extremely high data transmission rates and carry data over very long distances. These and other advantages will be discussed in detail in this course.

Fiber optic transmission systems are not perfect and there are difficulties involved in designing, implementing, and operating fiber optic communications systems. This course is designed to provide a thorough background to fiber optic communications systems and to illustrate the design and installation of these systems. The many pitfalls associated with the implementation of fiber optic systems will be discussed and workable solutions to these problems will be provided in this course.

This course will provide an extensive overview of the construction, operation and applications of optical fiber, with more emphasis on installation and troubleshooting. The course will give both the novice and the experienced participant a solid grasp of the principles and practical implementation of fiber optic cabling for industrial applications.

The course is designed to provide delegates with a detailed and up-to-date overview on the fiber optics access network planning. Participants will be provided with knowledge and skills to analyze optical fiber cables problems and adjust the splicing and termination of the optical fiber cables; employ optical fiber systems configurations and calculations; identify its components; evaluate optical fiber networks working in SDH; and follow the errors of the SDH networks.

The course will also cover the SDH fundamentals graphical introduction; SDH fundamentals revision; SDH & PHD comparison; SDH overview; network topology structures, protection classification, directional and fiber protection; SDH networks problems and its solutions; SDH networks graphical introduction; and WDM.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Get certified as a “*Certified Fiber Optics Professional (CFOP)*”
- Specify and describe fiber optic communications systems in total
- Gain **practical hands-on experience** in jointing, splicing and testing fiber optic systems and use correct procedures for cable installation and termination
- Recognize fiber optic termination patch panels and identify the various types of adapters and its merits/demerits
- Design and install a fully operational fiber optics system
- Evaluate optical fiber networks working in SDH and follow the errors of the SDH networks
- Discuss the SDH fundamentals graphical and revision and the SDH and PDH comparison and SDH overview
- Identify the network topology structures, protection classification, directional and fiber protection as well as explain the SDH networks problems and its solutions
- Explain the SDH networks graphical and WDM

Exclusive Smart Training Kit - H-STK

Participants of this course will receive the exclusive “Haward Smart Training Kit” (**H-STK®**). The **H-STK®** consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor’s actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of fiber optics technology and fiber optics access network planning for engineers and other technical staff within instrumentation, control, communications, telecommunications, electrical and IT fields. This includes project, maintenance and consulting staff, systems and applications engineers.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Fee

US\$ 6,000 per Delegate + VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

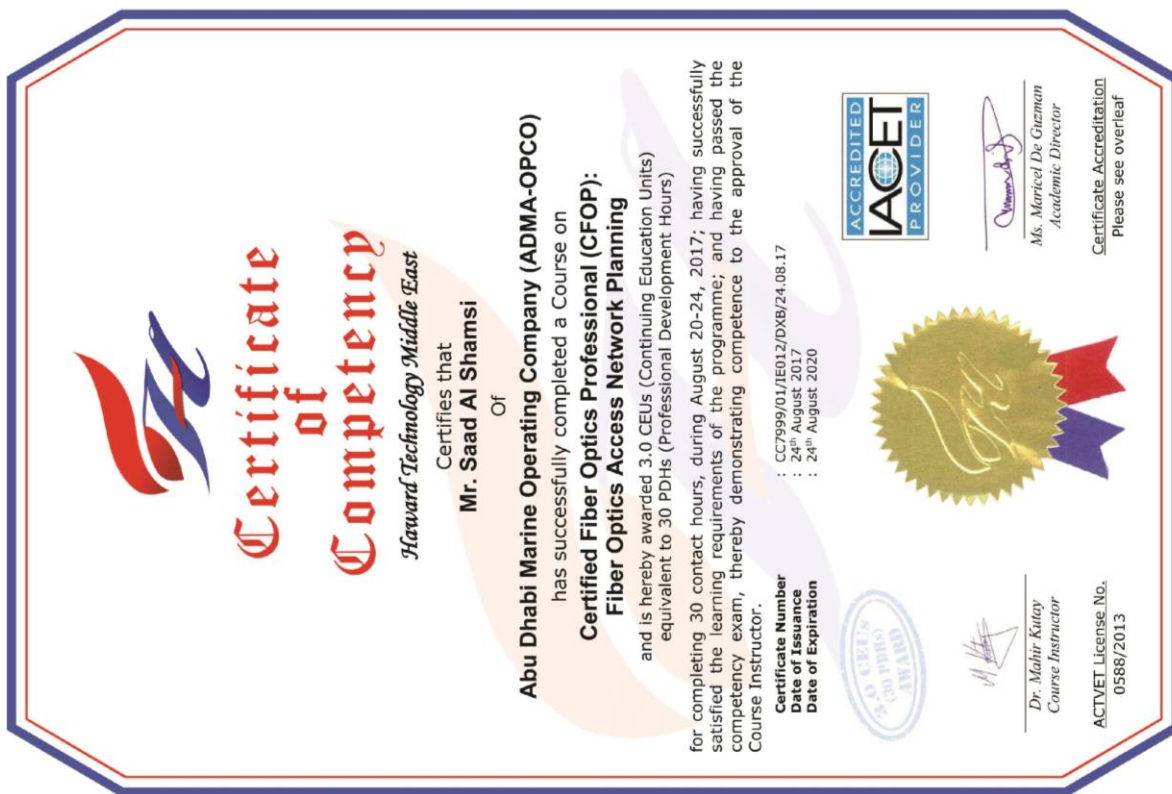

Course Certificate(s)

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified as a “Certified Fiber Optics Professional (CFOP)”. Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:-

- (2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Academic Director

Haward Technology has been approved as an Authorized Provider by the International Association for Continuing Education and Training (IACET), 1760 Old Meadow Road, Suite 500, McLean, VA 22102, USA. In obtaining this approval, Haward Technology has demonstrated that it complies with the ANSI/IACET 1-2013 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2013 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology is accredited by

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3091 714 | Fax: +971 2 3091 716 | E-mail: info@haward.org | Website: www.haward.org

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

- 

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council for Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ahmed Sabry is a **Senior Communications & Control Engineer** with extensive experience in the **Petroleum, Petrochemical, Power, Pipelines and Communication** industries. His specialization covers the areas of **Fiber Optic Professional, Fiber Optics Access Network Planning, Fiber Optic Technologies & Installation, Practical Fiber Optics Technology, Certified Fiber Optics Professional (CFOP), Practical Fiber Optic Cables (Joining & Termination), Practical Fiber Optics** for

Engineers & Technicians, Process Control & Instrumentation, Process Control Loop Operations, Process Control Troubleshooting & Problem Solving, Process Analyzer & Analytical Instrumentation, Distributed Control Systems (DCS), Programmable Logic Controller (PLC), Interruptible Power Systems (UPS), Gas turbine, Steam Turbine, Rotational Speed & Guide, Supervisory Control and Data Acquisition (SCADA), High Voltage Electrical Safety, Circuit Breaker, Control System Interface, HV Switchgear Maintenance, Power Generation Operation & Control, Fundamentals of Power System Equipment, Variable Frequency Drives (VFD), Electrical Fault Analysis, Electrical Schematic Drawing, Cable Splicing and Terminating of Low-Voltage Cables, Electrical Transient Analysis Programme (ETAP), AC/DC Motors, Combined Cycle Power Generation, Power System Protective Relaying, Modern Power Systems Protective Relaying, Antisurge Controllers, Cyber Security of Industrial Control System, Data Accuracy & System Function, Network Comprehensive, Systems Analysis, SCADA Security, ESD System Function, Analysis & Control, Custody Measurement & Loss Control, HV/MV Substation Design & Maintenance, PLC & SCADA Automation, SIS, SIL, ESD, Alarm Management Systems and Data Communication. He is currently the **Operations & Maintenance Manager** of National Advanced Control Center (**NATA**) which is a **natural gas** transmission company and at the same time, he is the **Technical Manager** of the **SCADA Innovations**.

Mr. Ahmed has handled wide-ranging responsibilities in **communication, control and instrumentation** engineering throughout his career life. He started as **ODM Engineer, Fiber Optic Engineer, Network Technician and Fiber Optic Technician** for a multinational communication company in their **wireless access** solution department. This gave him the chance to join another multinational communication company working in **Optical Fiber Cables and SDH** transmission providing backbone **communication networks for SCADA projects** in **oil and natural gas** industries. Later on in his career, he worked for a natural gas transmission company as a **Senior SCADA Engineer** and took the responsibility for installation, commissioning, operation and maintenance of **SCADA systems** and its **communication links**.

Mr. Ahmed has a **Bachelor's** degree in **Electronics and Communications Engineering**. He is a **Certified Instructor/Trainer**, a certified **PMP Project Manager**, a **Certified Fiber Optic Technician**. Further, he has certifications in **SDH, Advanced PLC and Advanced SCADA** engineering from **ABB Italy** and he has **published numerous books** such as **"Control Centers", Remote Terminal Units & Communication** and **"SCADA"** just to name a few. He has further delivered and presented innumerable trainings, courses, workshops, seminars and conferences worldwide.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 09th of November 2024

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0930	Introduction to Fiber Optics Systems Introduction • Outline of Course • Historical Background to Fiber Optic • Comparison of Fiber Optics & Copper Systems
0930 – 0945	Break
0945 – 1100	Definitions, Basic Principles Data Communications • Communications Channels • Transmission Modes • The Electromagnetic Spectrum • Revisiting Copper
1100 – 1230	Theory of Fiber Optics Transmission Fundamental Principals of Operation • Light Transmission Nature of Glass • Numerical Aperture • Modal Propagation in Fibers • Multimode/Single Mode/StepIndex/Graded Index • Bandwidth of Fibers • Modal & Chromatic Dispersion • Absorption/Scatter/Bending/Radiation/Mismatches • Other Types of Fibers
1230 – 1245	Break
1245 - 1330	Construction of Fiber Optic Cables Cable Objectives • Tensile Ratings • Structural Elements • Housings – Loose Tube/Slotted Core/Tight Buffered • Sheaths & Moisture Barriers • Classes of Cables – Aerial/Underground/Sub Aqueous/Indoor
1330 - 1420	Connecting Fibers Optical Connection Issues • Fiber End Preparation • Splicing Fibers – Fusion/Mechanical • Connectors • Optical Couplers
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2: Monday, 10th of November 2024

0730 – 0830	Practical Session #1 - Optical Connectors Each Delegate to Fit One ST & One SC Connector to a Cable & Inspect the Connectors
0830 - 0930	Practical Session #2- Fusion Splicing Each Student to Make a Fusion Splice in their Cable
0930 – 0945	Break
0945 – 1100	Optical Drivers & Detectors Light Emitting Diodes • Lasers • Transmitters Modules • Safety Considerations • PIN Photodiodes • Receiver Modules • Optical Amplifiers
1100 – 1230	Fiber Optic Termination Patch Panels Compact Fiber Optic Patch Panel • Wall Mounted Optical Fiber Patch Panels • Rack Mounted Optical Fiber Termination Panel • Splice Trays • Terminal Blocks & Patch Panels • Enclosures, Racks & Equipment Housings • Faceplate Slide-Out Mechanism

1230 - 1245	Break
1245 - 1420	Types of Adapters & its Merits/Demerits Optical Fiber Connectors – Duplex 568SC Adapter • Optical Fiber Connectors – simplex ST - ST Adapter • Other Fiber Optic Adapters
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3: Tuesday, 11th of November 2024

0730 – 0830	Installing Fiber Optic Cables Initial Preparation – Site Survey/Design • General Installation Rules & Procedures • Bending Radius/Cable Tension/Cable Reels • Cable Trays/Conduits/Lubricants • Indoor Cable Installation/Leaving Extra Cable • Outdoor Cable Installation/Environmental Conditions • Splicing Trays / Organizers /Termination Cabinets/Patch Panels / Distribution Panels / Breakout Boxes
0830 – 0930	Fiber Optics System Design Initial Design Considerations • Future Capacity/Reliability/Operation Wavelength • Repeaters & Amplifiers • Design Loss Calculations/Link Loss Budgets • Design Bandwidth Calculations
0930 – 0945	Break
0945 – 1145	Testing of Fiber Optic Systems Concepts of Optical Measurement • Continuity Testing • Insertion Loss Testing • Optical Time Domain Reflectometry (OTDR) • Bit Error Rate (BER) Testing • Eye Diagrams • Laboratory Fiber Tests
1145 – 1200	Break
1200 – 1300	Practical Session #3- Insertion Loss Testing Students to Measure the Insertion Loss of their Cable
1300 – 1420	Communication Basics Analog & Digital Signals • Standard Voice Channel • Pulse Code Modulation • Sampling • Bit Rate • Band Width • PDH • Standard E1 Frame
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

Day 4: Wednesday, 12th of November 2024

0730 - 0830	SDH SDH Standards • SDH Multiplexing Principle • SDH Frame • SDH Network Elements
0830 – 0930	SDH Hierarchy SDH Hierarchy Details • Frame Components
0930 - 0945	Break
0945 – 1100	SDH Frame Details & Transport Modules Path Overheads • Section Overheads • STM-1 • STM-n
1100 – 1230	SDH Fundamentals Graphical Introduction & Revision

1230 - 1245	Break
1245 - 1420	SDH & PDH Comparison & SDH Overview
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

Day 5: Thursday, 13th of November 2024

0730 – 0830	Network Topology Structures Classification of Topology Structures (Chain, Star, Tree, Ring & Mesh) • Sub Network • Survival Networks
0830 – 0930	Protection Classification Linear Protection • Protection Rings • PP Ring • MSP Ring • SNCP
0930 – 0945	Break
0945 – 1045	Directional & Fiber Protection Unidirectional & Bidirectional Rings • 2 & 4 Fibers Protection Rings
1045 - 1130	SDH Networks Revision, SDH Networks Problems & Its Solutions
1130 - 1230	SDH Networks Graphical
1230 - 1245	Break
1245 - 1300	WDM
1300 – 1315	Course Conclusion Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1315 – 1415	COMPETENCY EXAM
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Practical Sessions

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout fiber optic splicing, testing and troubleshooting exercises using the following state-of-the-art fiber optics technology and equipment, suitable for classroom training.

Optical Fiber Fusion Splicer

Optical Fiber Comprehensive Tester

Optical Fiber Cold Connection Tools Set

Fiber Optic Patch Cables

Fiber Optic Cable Tester

Termination Box with Two Splicing Distribution

Patch Panel Using Direct Terminal

Fiber Optic Cable Box Connection with Multiple Terminations

Course Coordinator
