

# <u>COURSE OVERVIEW DE0490(DP1)</u> <u>Directional Drilling</u>

# <u>Course Title</u>

**Directional Drilling** 

# Course Date/Venue

Session 1: January 19-23, 2025/Meeting Plus 8, City Centre Rotana Doha Hotel, Doha, Qatar Session 2: July 20-24, 2025/Meeting Plus 8, City Centre Poteno Doha Hotel

City Centre Rotana Doha Hotel, Doha, Qatar

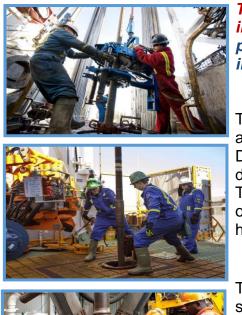

o CEUs

(30 PDHs)

Course Reference DE0490(DP1)

Course Duration/Credits Five days/3.0 CEUs/30 PDHS

# Course Description

This practical and highly-interactive course includes real-life case studies where participants will be engaged in a series of interactive small groups and class workshops.

This course is designed to provide participants with a good working knowledge on directional drilling. Design considerations and operational aspects of directional drilling will be highlighted in the course. The course will increase the understanding of the operations carried out by directional drillers and how directional wells are planned and optimized.

The course will provide participants with necessary skills to plan and execute the drilling of directional wells. It emphasizes the planning of well paths with single and multiple targets and selection of appropriate bottomhole assembly and drillstring for a given well path trajectory. The course also provides several opportunities for practical learning using videos.

DE0490(DP1) - Page 1 of 7

DE0490(DP1)-01-25|Rev. 12|27 October 2024

Specific problems associated with directional drilling such as torque, drag, hole cleaning, logging, and drill string component design are included. Participants will receive instruction on planning and evaluating directional wells based on the objectives of the well. They will become familiar with the tools and techniques used in directional drilling such as survey instruments, bottomhole assemblies, motors, steerable motors, and steerable rotary systems. Participants will be able to predict wellbore path based on historical data and determine the requirements to hit the target.

# **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a comprehensive knowledge on directional drilling
- Discuss the directional drilling and terminology of fundamentals, applications limitations including its, well objectives, target issues and well planning positioning and coordinate systems
- Employ systematic techniques on survey calculation methods, anti-collision and well planning, and advanced well planning covering survey surveying tools, MWD, LWD and mudlogging
- Identify downhole equipment that include drilling tools, deflection methods, drilling motors, BHA design and rotary steerable systems
- Illustrate well planning and path design including directional well path design, horizontal well planning and calculations, horizontal drilling planning, drill sting design torque, drag, shocks and vibrations
- Carryout hole cleaning and discuss wellbore stability and geo-steering
- Recognise directional drilling problems and its solutions

# Exclusive Smart Training Kit - H-STK<sup>®</sup>

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**<sup>®</sup>). The **H-STK**<sup>®</sup> consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet **PC**.

# Who Should Attend

This course provides an overview of all significant aspects and considerations of directional drilling for drilling engineers, wellsite geologist and operation geologists.

# Course Fee

**US\$ 8,500** per Delegate. This rate includes H-STK<sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

## **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

DE0490(DP1) - Page 2 of 7

# Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

## Course Accreditations

Certificates are accredited by the following international accreditation organizations: -

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### • \*\*\* \* BAC

# British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

#### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Dr. Chris Kapetan, PhD, MSc, is a Senior Petroleum Engineer with over 30 years of international experience within the onshore and offshore oil & gas industry. His wide experience covers Asset Management Principles, Risks & Economics, Petroleum Economics, Decision Analytic Modelling Methods for Economic Evaluation, Probabilistic Risk Analysis (Monte Carlo Simulator) Risk Analysis Foundations, Global Oil Demand, Crude Oil Market, Global Oil Reserves, Oil Supply & Demand, Governmental Legislation, Contractual Agreements, Financial Modeling, Oil Contracts, Project Risk Analysis, Feasibility Analysis Techniques, Capital Operational Costs, Oil & Gas Exploration Methods, Reservoir Evaluation, Extraction

of Oil & Gas, Crude Oil Types & Specifications, Sulphur, Sour Natural Gas, Natural Gas Sweeting, Petroleum Production, Field Layout, Production Techniques & Control, Surface Production Operations, Oil Processing, Oil Transportation-Methods, Flowmetering & Custody Transfer and Oil Refinery. Further, he is also well-versed in Enhanced Oil Recovery (EOR), Electrical Submersible Pumps (ESP), Oil Industries Orientation, Geophysics, Cased Hole Formation Evaluation, Cased Hole Applications, Cased Hole Logs, Production Operations, Production Management, Perforating Methods & Design, Perforating Operations, Fishing Operations, Well & Reservoir Testing, Reservoir Stimulation, Hydraulic Fracturing, Carbonate Acidizing, Sandstone Acidizing, Drilling Fluids Technology, Drilling Operations, Directional Drilling, Artificial Lift, Gas Lift Design, Gas Lift Operations, Petroleum Business, Field Development Planning, Gas Lift Valve Changing & Installation, Well Completion Design & Operation, Well Surveillance, Well Testing, Well Stimulation & Control and Workover Planning, Completions & Workover, Rig Sizing, Hole Cleaning & Logging, Well Completion, Servicing and Work-Over Operations, Practical Reservoir Engineering, X-mas Tree & Wellhead Operations, Maintenance & Testing, Advanced Petrophysics/Interpretation of Well Composite, Construction Integrity & Completion, Coiled Tubing Technology, Corrosion Control, Slickline, Wireline & Coil Tubing, Pipeline Pigging, Corrosion Monitoring, Cathodic Protection as well as Root Cause Analysis (RCA), Root Cause Failure Analysis (RCFA), Gas Conditioning & Process Technology, Production Safety and Delusion of Asphalt. Currently, he is the Operations Consultant & the Technical Advisor at GEOTECH and an independent Drilling Operations Consultant of various engineering services providers to the international clients as he offers his expertise in many areas of the drilling & petroleum discipline and is well recognized & respected for his process and procedural expertise as well as ongoing participation, interest and experience in continuing to promote technology to producers around the world.

Throughout his long career life, Dr. Chris has worked for many international companies and has spent several years managing technically complex wellbore interventions in both drilling & servicing. He is a well-regarded for his process and procedural expertise. Further, he was the Operations Manager at ETP Crude Oil Pipeline Services where he was fully responsible for optimum operations of crude oil pipeline, workover and directional drilling, drilling rigs and equipment, drilling of various geothermal deep wells and exploration wells. Dr. Chris was the Drilling & Workover Manager & Superintendent for Kavala Oil wherein he was responsible for supervision of drilling operations and offshore exploration, quality control of performance of rigs, coiled tubing, crude oil transportation via pipeline and abandonment of well as per the API requirements. He had occupied various key positions as the Drilling Operations Consultant, Site Manager, Branch Manager, Senior Drilling & Workover Manager & Engineer and Drilling & Workover Engineer, Operations Consultant, Technical Advisor in several petroleum companies responsible mainly on an offshore sour oil field (under water flood and gas lift) and a gas field. Further, Dr. Chris has been a Professor of the Oil Technology College.

Dr. Chris has PhD in Reservoir Engineering and a Master's degree in Drilling & Production Engineering from the Petrol-Gaze Din Ploiesti University. Further, he is a Certified Surfaced BOP Stack Supervisor of IWCF, a Certified Instructor/Trainer, a Certified Trainer/Assessor/Internal Verifier by the Institute of Leadership & Management (ILM) and has conducted numerous short courses, seminars and workshops and has published several technical books on Production Logging, Safety Drilling Rigs and Oil Reservoir.

AWS

## Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures 20% Practical Workshops & Work Presentations 30% Hands-on Practical Exercises & Case Studies 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

## Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

## Dav 1

Registration & Coffee
Welcome & Introduction
PRE-TEST
Directional Drilling Fundamentals & Terminology
Fundamentals • Applications • Limitations • Terminology
Break
Directional Drilling Fundamentals & Terminology (cont'd)
Well Objectives • Target Issues • Well Planning (Positing & Coordinate
Systems)
Surveying & Advanced Well Planning
Survey Calculation Methods <ul> <li>Anti-Collision</li> <li>Well Planning</li> </ul>
Break
Surveying & Advanced Well Planning (cont'd)
Surveying Tools • MWD, LWD & Mudlogging
Recap
Lunch & End of Day One

#### Dav 2

Downhole Equipment
Drilling Tools & Deflection Methods
Break
Downhole Equipment (cont'd)
Drilling Motors Overview
Downhole Equipment (cont'd)
BHA Design
Break
Downhole Equipment (cont'd)
Rotary Steerable Systems
Recap
Lunch & End of Day Two

DE0490(DP1) - Page 5 of 7

#### Day 3

0730 - 0915	Well Planning & Path Design           Directional Well Path Design         Horizontal Well Planning & Calculations
0915 - 0930	Break
0930 – 1100	Well Planning & Path Design (cont'd) Horizontal Drilling Planning
1100 – 1215	Well Planning & Path Design (cont'd)
1215 – 1230	Drill String Design Break
1230 – 1420	Well Planning & Path Design (cont'd)TorqueDragShocksVibration
1420 – 1430	Recap
1430	Lunch & End of Day Three

## Day 4

0730 - 0915	Hole Cleaning & Wellbore Stability Hole Cleaning
0015 0020	
0915 – 0930	Break
0930 - 1100	Hole Cleaning & Wellbore Stability (cont'd)
	Well Bore Stability
1100 – 1215	Hole Cleaning & Wellbore Stability (cont'd)
	Well Bore Stability (cont'd)
1215 – 1230	Break
1230 – 1420	Hole Cleaning & Wellbore Stability (cont'd)
	Introduction to Multilateral Wells
1420 – 1430	Recap
1430	Lunch & End of Day Four

## Day 5

Geo-steering
Break
Geo-steering (cont'd)
Directional Drilling Problems & Solutions
Break
Directional Drilling Problems & Solutions (cont'd)
Course Conclusion
POST-TEST
Presentation of Course Certificates
Lunch & End of Course
