

# **COURSE OVERVIEW EE0441** Switchman High Voltage Switching

O CEUS (30 PDHs)

### **Course Title**

Switchman High Voltage Switching

#### **Course Reference**

EE0441

### **Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

### Course Date/Venue

Session(s)	Date	Venue
1	May 18-22, 2025	Olivine Meeting Room, Fairmont Nile City, Cairo, Egypt
2	August 24-28, 2025	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE
3	November 23-27, 2025	Safir Meeting Room, Divan Istanbul, Turkey

## **Course Description**

This practical and highly-interactive course includes various practical sessions where participants will be engaged in HV/LV power switching and other working practices.

The course covers the knowledge and skills needed to safely work with energized HV/LV electric power systems. It covers electrical safety requirements including the principles and procedures for the safe operation and maintenance of such systems. Insulated hand tools, proper grounding procedures, protective clothing, and thorough job-planning procedures are covered throughout the course. Properties of electric charge, energy, electric potential, dielectric stress, capacitive and inductive coupling, and material behavior in electromagnetic fields are discussed.

The effects of electrical energy on humans and various protection concepts are addressed, as are basic first aid practices. Differential protection schemes, insulation materials, Equi-potential grounding, live-line tools, and isolation techniques are covered from both the technical and practical perspectives.

Various OSHA, IEEE, European and NFPA safety procedures are reviewed. Group exercises include the development of safe-work protocols, use of logout/tagout (LOTO), maintenance task rehearsal, and equipment preparation. Fault current, arc-flash hazards, and proper PPE selection are studied. Other technical topics covered include insulation testing, corona detection by ultrasonic and RF detectors, and signature analysis using an infrared imager.

Successful course participants who attend the course and pass competency exam, will be certified to work on high voltage electrical power systems. Course participants are introduced to the hazards of electrical work and the philosophies of preventing accident and minimizing outage time due to improper safety or work practices. Also included as part of the curriculum are study materials participants may use at their own pace to continue their learning experience. This course addresses OSHA training requirements established in OSHA 29 CFR 1910.269.

#### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Achieve authorization certification to work in LV and HV electrical systems for operation and maintenance team
- Provide an understanding of industrial high and low voltage power systems including statutory regulations, safe operation, protection and fault diagnosis on a wide range of power equipment
- Enable operation team to perform HV switching operations on industrial HV networks up to and including 33KV, and to prepare them for HV authorisation
- Apply and gain an in-depth knowledge on LV/MV electrical safety in accordance with the international standards OSHA, NFPA, IEEE and EN
- Discuss basic electricity covering direct current and alternating current
- Identify electrical hazards including electrical shock, electrical arc and blast as well as special hazards and special operating requirements
- Enumerate personnel protection comprising of rubber gloves/blankets, flash suits, eye protection, hard hats and explosion protection
- Carryout protection against the potential danger
- Explain good earthing and bonding installation, confined space and the general instructions for working with low and medium voltage
- Recognize HV equipment including power transformers, switches, isolators and fuses, circuit breakers, instrument transformers, surge arrestors, capacitor banks as well as earth and shunt reactors
- Discuss the characteristics and applications of gas insulted substations (GIS) as well as review metal-enclosed and metal clad switchgears
- Identify motor controllers, protection relays and carryout testing and commissioning
- Recognize portable cables as well as discuss de-energized and energized work
- Apply electrical switching practices for loads, transformers, capacitors and air switches
- Carryout test equipment, emergency planning and safety management

#### Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**®). The **H-STK**® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

#### Who Should Attend

This course is designed for electrical operation and maintenance team (team leaders, electrical supervisors/senior electrical technicians, electrical technicians and HVAC supervisors/technicians up to 415V system and also electrical engineers, industrial & utility engineers, HSE personnel and electrical team involved in operation and maintenance of HV/LV electrical systems. Supervisors and managers concerned with the safety of electrical workers will find this course especially useful in providing an insight into electrical safety. Course participants are introduced to the hazards of electrical work and the philosophies of preventing accident and minimizing outage time due to improper safety or work practices. Also included as part of the curriculum are study materials participants may use at their own pace to continue their learning experience. This course addresses OSHA training requirements established in OSHA 29 CFR 1910.269.

### **Training Methodology**

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

#### **Course Fee**

Cairo	<b>US\$ 5,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK <sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.	
Dubai	<b>US\$ 5,500</b> per Delegate + <b>VAT</b> . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.	
Istanbul	Istanbul US\$ 6,000 per Delegate + VAT. This rate includes H-STK® (Hawa Smart Training Kit), buffet lunch, coffee/tea on arrival, morning afternoon of each day.	

#### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

## **Course Certificate(s)**

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Successful candidate will be certified to work in LV and HV electrical. Certificates are valid for 5 years.

#### Recertification is FOC for a Lifetime.

## **Sample of Certificates**

The following are samples of the certificates that will be awarded to course participants:-

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

### **Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations:-

## British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

<u>The International Accreditors for Continuing Education and Training</u> (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

### **Course Instructor(s)**

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ahmed Abozeid is a Senior Electrical & Instrumentation Engineer with over 30 years of Onshore & Offshore experience within the Oil & Gas and Power industries. His wide expertise covers HV Cable Design, Cable Splicing & Termination, Cable Jointing Techniques, High Voltage Electrical Safety, HV/MV Cable Splicing, High Voltage Circuit Breaker Inspection & Repair, High Voltage Power System Safe Operation, High Voltage Safety, High Voltage Transformers, Safe Operation of High

Voltage & Low Voltage Power Systems, Electric Distribution System Equipment, ABB 11KV Distribution Switchgear, Rotork Operation & Maintenance, Power System Protection and Relaying, Electrical Motors & Variable Speed Drives, Motor Speed Control, Power Electronic Converters, Control Valve, Flowmetering & Custody Transfer, Meters Calibration, Installation & Inspection, Crude Metering & Measurement Systems, Flow Meter Maintenance Troubleshooting, AC Converters Section, Electromagnetic Compatibility (EMC), Motor Failure Analysis & Testing, Machinery Fault Diagnosis, Bearing Failure Analysis Process Control Instrumentation, Process Control Measurements, Control System Commissioning & Start-Up, Control System & Monitoring, Power Station Control System, Instrumentation Devices, Process Control & Automation, PID Controller, Distributed Control Systems (DCS), Programmable Logic Controllers (PLC), ABB PLC & DCS System, Gas Analyzers, Simulation Testing, Load Flow, Short Circuit, Smart Grid, Vibration Sensors, Cable Installation & Commissioning, Calibration Commissioning and Site Filter Controller. Further, he is also well-versed in Fundamentals of Electricity, Electrical Standards, Electrical Power, Electrical Wiring, Machines, Transformers, Motors, Power Stations, Electro-Mechanical Systems, Automation & Control Systems, Voltage Distribution, Power Distribution, Filters, Automation System, Electrical Variable Speed Drives, Power Systems, Power Generation, Power Transformers, Diesel Generators, Power Stations, Uninterruptible Power Systems (UPS), Battery Chargers and AC & DC Transmission. He is currently the Project Manager wherein he manages, plans and implements projects across different lines of business.

Mr. Ahmed worked as the Electrical Manager, Electrical Power & Machine Expert, Electrical Process Leader, Team Leader, Electrical Team Leader, Technical Instructor, and Instructor/Trainer from various companies such as the Lafarge Nigeria, Egyptian Cement Company, ECC Training Center, Alrajhi Construction & Building Company and Ameria Cement Company, just to name a few.

Mr. Ahmed has a **Bachelor's** degree in **Electrical Engineering**. Further, he is a **Certified Instructor/Trainer, Certified TQUK Level 3 Vocational Achievement (RQF) Assessor** and has delivered numerous trainings, seminars, courses, workshops and conferences internationally.

## **Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Dav 1

Day 1	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0845	Basic Electricity Direct Current (Basic Terms, Ohm's Law, Application, Controls, Power Supplies, Batteries, Control & UPS, Testing and Maintenance) ● Alternating Current (Basic Terms, Sine Wav, Peak & RMS Voltage, Formulas and Calculation, Frequency)
0845 - 0900	Electrical Hazards Electrical Shock ● Electrical Arc ● Blast ● Accident Discussions
0900 - 0915	Break
0915 - 0930	Special Hazards Unique Designs ● Special Operating Requirements
0930 - 0945	Personnel Protection Rubber Gloves/Blankets (Use, Maintenance, Care) ● Flash Suits ● Eye Protection ● Hard Hats ● Explosion Protection
0945 - 1015	Protection Against the Potential Danger
1015 - 1030	Good Earthing & Bonding Installation
1030 – 1045	Confined Space Scope and Application ● Training Requirements ● Duties of Employees
1045 - 1130	General Instructions for Working with High Voltage Electrical Safety • Electrical Work Permit
1130 - 1200	HV Equipment - Power Transformers  Types • Connections • Hazards & Testing • Troubleshooting • High Pot  Testing • Step Regulators
1200 – 1215	Break
1215 – 1245	HV Equipment - Switches, Isolators & Fuses Characteristics and Functions ● Types & Ratings ● Testing & Hazards
1245 – 1315	HV Equipment - Circuit Breakers Characteristics and Functions • Types & Ratings • Testing & Hazards
1315 - 1345	HV Equipment - Instrument Transformers  Characteristics and Functions ● Types & Ratings ● Connections ●  Grounding● Testing
1345 – 1420	HV Equipment - Surge Arrestors Characteristics and Functions ● Types & Ratings ● Testing & Hazards
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2

0730 - 0745	HV Equipment - Capacitor Banks Theory of Operation ● Application & Hazards
0745 - 0815	HV Equipment - Earth & Shunt Reactors Characteristics and Functions ● Types

Gas Insulated Substations (GIS) Characteristics • Applications  0900 - 0930  Metal-Enclosed & Metal Clad Switchgears Characteristics • Cubicles and Equipments  0930 - 0945  Break  0945 - 1015  Motor Controllers  1015 - 1045  Protection Relays  1045 - 1100  Testing & Commissioning  Portable Cables Application • Hazards  Energized Work  1115 - 1200  Policies and Procedures • Recognition (Voltage Classification, Energized Equipment) • Work Zones (Controlled Areas) • Work Clearances • Proper Tools  1200 - 1215  Break  De-Energized Work  1215 - 1245  Policies and Procedures • Voltage Detection Equipment • Lock and Tag Out • Grounds/Grounding • Personal Protective Grounds  Electrical Switching Practices  1245 - 1300  Electrical Switching Practices  Loads (Pickup & Dropout, Sequence) • Transformers • Paralleling • Split Buss • Capacitors • Air Switches (Gloves & Grounds)  Test Equipment Ammeters, Ohnmeters, Voltmeters • Phase Angle Meters • Phasing  Sticks/Devices • Oscilloscopes • Voltage Testers-Wiggy, etc. • Thumpers • Relay & Meter Test Equipment • Insulation Testers (Meggers, Power Factor/Dissipation)  Emergency Planning  Communications • Electrical Fires • Phone Numbers • Panic Button • Tools/Equipment  Safety Management  Audits • Policies • Costs  1420 - 1430  Lunch & End of Day Two		(0.7)

1430	Lunch & End of Day Three

Day 4

0730 - 0930	Practical Sessions (cont'd) Danger Notices & Pre-Cautions
0930 - 0945	Break

0945 – 1100	Practical Sessions (cont'd)
0343 - 1100	Sanction for Test
1100 - 1115	Break
1115 – 1245	Practical Sessions (cont'd)
1113 - 1243	Sanction for Test (cont'd)
1245 – 1420	Practical Sessions (cont'd)
1243 - 1420	Lock-Out & Tag-Out
1420 – 1430	Recap
1430	Lunch & End of Day Four

## Day 5

Day 5	
0730 - 0930	Practical Sessions (cont'd)
0750 0550	Safe Key Systems
0930 - 0945	Break
0945 - 1100	Practical Sessions (cont'd)
0943 - 1100	Electrical Safety Systems- Interlocks-Earthing-Isolation & Access Control
1100 - 1115	Break
1100 1215	Practical Sessions (cont'd)
1100 – 1215	Electrical Safety Systems- Interlocks-Earthing-Isolation & Access Control (cont'd)
1215 – 1245	Practical Sessions (cont'd)
1213 - 1243	Fault Reports
	Course Conclusion
1245 - 1300	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1300 – 1400	COMPETENCY EXAM
1400 – 1415	Evaluation of Competency Exam
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

## **Practical Sessions (Online-Virtual)**

This practical and highly-interactive course includes the following practical sessions using Haward's HV Switchgears: -

- (1) Switching Programs
- (2) Isolation Certificates
- (3) Electrical Permit to Work
- (4) Danger Notices & Pre-Cautions
- (5) Sanction for Test

- (6) Lock-Out & Tag-Out
- (7) Safe Key Systems
- (8) Electrical Safety Systems-Interlocks-Earthing-Isolation & Access Control
- (9) Fault Reports

## **Course Coordinator**
