

COURSE OVERVIEW RE0096

Advanced Inspection & Performance Evaluation of Rotating Equipment including Turbine Maintenance

Course Title

Advanced Inspection & Performance Evaluation of Rotating Equipment including Turbine Maintenance

Course Date/Venue

Please refer to page 3

Course Reference

RE0096

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide participants with a detailed and up-to-date overview of Advanced Inspection & Performance Evaluation of Rotating Equipment including Turbine Maintenance. It covers the types, applications and significance of rotating equipment in industrial settings; the basic mechanical principles behind turbines; the importance of safety in maintenance practices; the inspection techniques for rotating equipment and the role of lubricants in equipment performance; the techniques and tools for vibration analysis and thermal imaging to identify potential issues; the ultrasonic testing methods for detecting internal flaws; the tools used for precise measurement in maintenance; and the patterns of wear and how to address them.

During this interactive course, participants will learn the key performance metrics and indicators for rotating equipment and data-driven maintenance strategies; the equipment efficiency and the principles and implementation of RCM; the strategies to determine the underlying causes of failures; the components, functions, parts and roles of turbines; the standard practices for maintaining turbines and troubleshooting common turbine issues; the techniques for complex repairs and component replacements and condition monitoring systems (CMS) for turbine maintenance; the maintenance challenges and solutions for wind and hydro turbines; the regulatory compliance and standards as well as the technologies and methodologies in equipment maintenance; and the skills to lead maintenance teams effectively.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an advanced knowledge on inspection and performance evaluation of rotating equipment including turbine maintenance
- Discuss the types, applications and significance of rotating equipment in industrial settings
- Identify the basic mechanical principles behind turbines and emphasize the importance of safety in maintenance practices
- Carryout inspection techniques for rotating equipment and explain the role of lubricants in equipment performance
- Apply the techniques and tools for vibration analysis and thermal imaging to identify potential issues
- Recognize ultrasonic testing methods for detecting internal flaws
- Determine the tools used for precise measurement in maintenance and describe the patterns of wear and how to address them
- Identify the key performance metrics and indicators for rotating equipment and apply data-driven maintenance strategies
- Evaluate and enhance equipment efficiency and discuss the principles and implementation of RCM
- Carryout the strategies to determine the underlying causes of failures
- Discuss the components, functions, parts and roles of turbines as well as apply standard practices for maintaining turbines and troubleshooting common turbine issues
- Demonstrate techniques for complex repairs and component replacements as well as apply condition monitoring systems (CMS) for turbine maintenance
- Define the maintenance challenges and solutions for wind and hydro turbines
- Implement regulatory compliance and standards as well as recognize emerging technologies and methodologies in equipment maintenance
- Carryout the skills to lead maintenance teams effectively

Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.*

Who Should Attend

This course provides an overview of all significant aspects and considerations of advanced inspection and performance evaluation of rotating equipment including turbine maintenance for mechanical engineers, maintenance engineers, plant managers and supervisors, reliability engineers, process engineers, maintenance planners, maintenance and reliability managers, field service engineers, energy industry professionals, pump and compressor specialists and those who are involved in the operation, maintenance, and inspection of rotating machinery, especially turbines.

Course Date/Venue

Session(s)	Date	Venue
1	September 21-25, 2025	Meeting Plus 9, City Centre Rotana, Doha, Qatar
2	October 26-30, 2025	Crowne Meeting Room, Crowne Plaza Al Khobar, an IHG Hotel, Al Khobar, KSA
3	November 16-20, 2025	Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations:

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council for Independent Further and Higher Education** as an **International Centre**. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Karl Thanasis, PEng, MSc, MBA, BSc, is **Senior Mechanical & Maintenance Engineer** with over **30 years** of extensive industrial experience. His wide expertise includes **Piping & Pipeline**, Maintenance, Repair, **Shutdown, Turnaround & Outages**, **Maintenance & Reliability** Management, **Mechanical Maintenance** Planning, Scheduling & Work Control, Advanced Techniques in **Maintenance** Management, **Predictive & Preventive** Maintenance, **Maintenance & Operation Cost Reduction** Techniques, Reliability

Centered Maintenance (RCM), **Machinery Failure** Analysis, **Rotating Equipment Reliability** Optimization & Continuous Improvement, **Material Cataloguing**, **Mechanical & Rotating Equipment** Troubleshooting & Maintenance, **Root Cause Analysis & Reliability** Improvement, **Condition** Monitoring, **Root Cause Failure Analysis** (RCFA), **Steam Generation**, **Steam Turbines**, **Power Generator Plants**, **Gas Turbines**, **Combined Cycle Plants**, **Boilers**, **Process Fired Heaters**, Air Preheaters, Induced Draft Fans, All Heaters Piping Work, Refractory Casting, Heater Fabrication, Thermal & Fired Heater Design, **Heat Exchangers**, Heat Transfer, Coolers, **Power Plant** Performance, Efficiency & Optimization, **Storage Tank** Design & Fabrication, **Thermal Power Plant** Management, **Boiler & Steam** System Management, **Pump** Operation & Maintenance, **Chiller & Chiller Plant** Design & Installation, **Pressure Vessel**, **Safety Relief Valve** Sizing & Selection, **Valve** Disassembling & Repair, Pressure Relief Devices (PSV), **Hydraulic & Pneumatic** Maintenance, Advanced **Valve** Technology, **Pressure Vessel** Design & Fabrication, **Pumps**, Turbo-Generator, Turbine **Shaft Alignment**, **Lubrication**, Mechanical **Seals**, Packing, **Blowers**, **Bearing** Installation, **Couplings**, **Clutches** and **Gears**. Further, he is also versed in **Wastewater Treatment** Technology, **Networking** System, **Water Network Design**, Industrial **Water Treatment** in Refineries & Petrochemical Plants, **Piping** System, Water Movement, Water Filtering, Mud Pumping, **Sludge Treatment** and **Drying**, **Aerobic Process** of **Water Treatment** that includes **Aeration**, **Sedimentation** and **Chlorination** Tanks. His strong background also includes **Design** and **Sizing** of all **Waste Water Treatment Plant Associated Equipment** such as **Sludge Pumps**, **Filters**, **Metering Pumps**, **Aerators** and **Sludge Decanters**.

Mr. Thanasis has acquired his thorough and practical experience as the **Project Manager**, **Plant Manager**, **Area Manager - Equipment Construction**, **Construction Superintendent**, **Project Engineer** and **Design Engineer**. His duties covered **Plant Preliminary Design**, **Plant Operation**, **Write-up** of **Capital Proposal**, **Investment Approval**, **Bid Evaluation**, **Technical Contract Write-up**, **Construction** and **Sub-contractor Follow up**, **Lab Analysis**, **Sludge Drying** and **Management** of **Sludge Odor** and **Removal**. He has worked in various companies worldwide in the **USA**, **Germany**, **England** and **Greece**.

Mr. Thanasis is a **Registered Professional Engineer** in the **USA** and **Greece** and has a **Master's** and **Bachelor's** degree in **Mechanical Engineering** with **Honours** from the **Purdue University** and **SIU** in **USA** respectively as well as an **MBA** from the **University of Phoenix** in **USA**. Further, he is a **Certified Internal Verifier/Trainer/Assessor** by the **Institute of Leadership & Management (ILM)** a **Certified Instructor/Trainer** and has delivered numerous trainings, courses, seminars, workshops and conferences worldwide.

Course Fee

Doha	US\$ 6,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Al Khobar/Dubai	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0800	<i>Registration & Coffee</i>
0800 – 0815	<i>Welcome & Introduction</i>
0815 – 0830	PRE-TEST
0830 – 0930	Overview of Rotating Equipment: Types, Applications & Significance in Industrial Settings
0930 – 0945	<i>Break</i>
0945 – 1030	Fundamentals of Turbine Mechanics: Understanding the Basic Mechanical Principles Behind Turbines
1030 – 1130	Safety Protocols in Equipment Inspection: Emphasizing the Importance of Safety in Maintenance Practices
1130 – 1230	Inspection Techniques for Rotating Equipment: Introduction to Various Inspection Methods & Tools
1230 – 1245	<i>Break</i>
1245 – 1320	Lubrication & Maintenance Basics: Understanding the Role of Lubricants in Equipment Performance
1350 – 1420	Case Studies: Review of Real-life Incidents to Understand Common Failures & Solutions
1420 – 1430	Recap
1430	<i>Lunch & End of Day One</i>

Day 2

0730 – 0830	Vibration Analysis in Equipment Inspection: Techniques & Tools for Vibration Analysis
0830 – 0930	Thermal Imaging for Fault Detection: Utilizing Thermal Imaging to Identify Potential Issues
0930 – 0945	Break
0945 – 1130	Ultrasonic Testing Methods: Advanced Ultrasonic Methods for Detecting Internal Flaws
1130 – 1230	Precision Measurement Tools: Introduction to Tools Used for Precise Measurement in Maintenance
1230 – 1245	Break
1245 – 1345	Wear & Tear Analysis: Understanding Patterns of Wear and How to Address them
1345 - 1420	Interactive Workshop: Hands-on Session with Equipment to Practice Inspection Techniques
1420 – 1430	Recap
1430	Lunch & End of Day Two

Day 3

0730 – 0830	Performance Metrics for Rotating Equipment: Identifying Key Performance Indicators
0830 – 0930	Data-Driven Maintenance Strategies: Utilizing Data for Predictive Maintenance
0930 – 0945	Break
0945 – 1130	Efficiency Analysis Techniques: Methods to Evaluate & Enhance Equipment Efficiency
1130 – 1230	Reliability-Centered Maintenance: Principles & Implementation of RCM
1230 – 1245	Break
1245 – 1345	Root Cause Analysis of Failures: Techniques to Determine the Underlying Causes of Failures
1345 - 1420	Group Discussion: Analyzing Different Scenarios & Decision-Making Processes
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4

0730 – 0830	Turbine Components & Functions: Detailed Overview of Turbine Parts & their Roles
0830 – 0930	Routine Maintenance Procedures for Turbines: Standard Practices for Maintaining Turbines
0930 – 0945	Break
0945 – 1130	Troubleshooting Common Turbine Issues: Identifying & Resolving Frequent Problems
1130 – 1230	Advanced Repair Techniques: Techniques for Complex Repairs & Component Replacements
1230 – 1245	Break
1245 – 1345	Condition Monitoring Systems: Understanding & Using CMS for Turbine Maintenance
1345 - 1420	Simulation Exercise: Simulated Troubleshooting Scenarios
1420 – 1430	Recap
1430	Lunch & End of Day Four

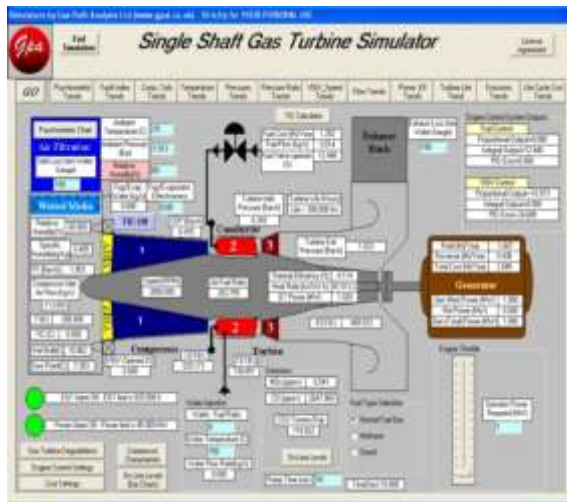

Day 5

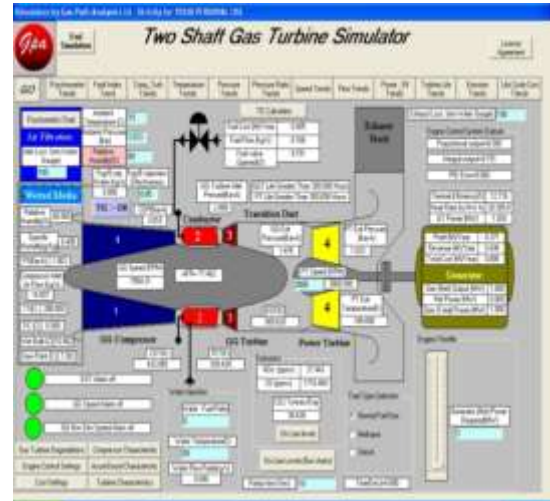

0730 – 0930	Renewable Energy Turbines: Maintenance Challenges & Solutions for Wind and Hydro Turbines
0930 – 0945	<i>Break</i>
0945 – 1030	Regulatory Compliance & Standards: Understanding Relevant Industry Regulations
1030 – 1230	Future Trends in Equipment Maintenance: Emerging Technologies & Methodologies
1230 – 1245	<i>Break</i>
1245 – 1345	Leadership & Management in Maintenance: Skills for Leading Maintenance Teams Effectively
1345 – 1400	Course Conclusion
1400 – 1415	POST TEST
1415 – 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch & End of Course</i>

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art “Single Shaft Gas Turbine Simulator” and “Two Shaft Gas Turbine Simulator”, “Steam Turbine & Governing System”, “Centrifugal Pumps and Troubleshooting Guide 3.0”, “SIM 3300 Centrifugal Compressor Simulator” & “CBT on Compressors” Simulators.

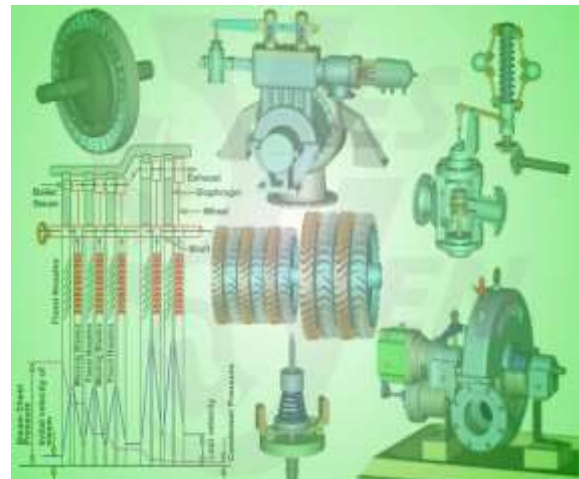

Single Shaft Gas Turbine Simulator

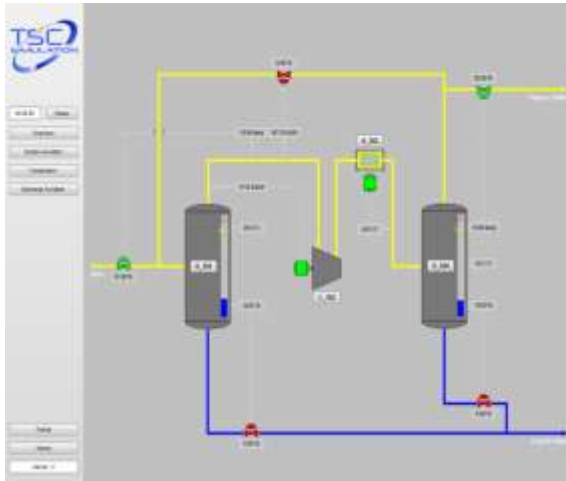

Two Shaft Gas Turbine Simulator

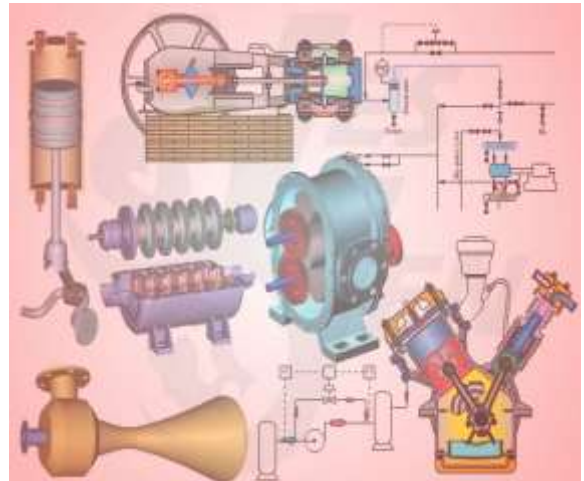

Steam Turbine & Governing System

Centrifugal Pumps and Troubleshooting Guide 3.0

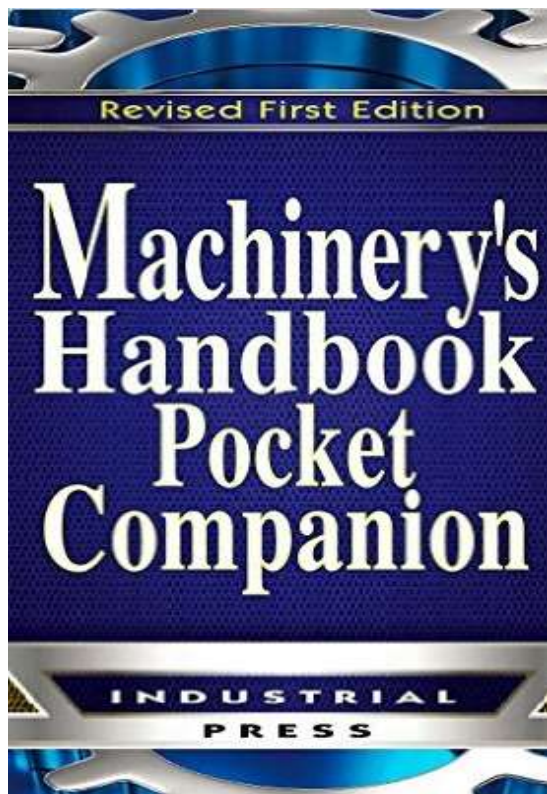

SIM 3300 Centrifugal Compressor Simulator

CBT on Compressors

Book(s)

As part of the course kit, the following e-book will be given to all participants:

Title : Machinery's Handbook Pocket Companion
ISBN : 9780831130954
Author : Christopher McCauley
Publisher : Industrial Press

Course Coordinator

Reem Dergham, Tel: +974 4423 1327, Email: reem@haward.org
