

COURSE OVERVIEW EE0112 ABB 11kV Distribution Switchgear

Course Title

ABB 11kV Distribution Switchgear

Course Date/Venue

April 27-May 01, 2025/Boardroom, Warwick Hotel Doha, Doha, Qatar

Course Reference

EE0112

Course Duration/Credits

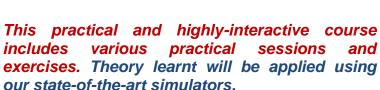

Five days/3.0 CEUs/30 PDHs

Course Description

This course is designed to provide participants with a detailed and up-to-date overview of ABB 11kV electrical safety. It covers the voltage convention, fundamentals of circuit breakers, types of breakers, construction, ratings and tripping characteristics; the ABB switchgear in a network context; the ABB switchgear in historical perspective and ABB switchgear details; the ABB power circuit breakers, reclosers, sectionalizers, surge arresters and ABB main unit; the ABB metal clad switchgear; the ABB instrument and control power transformers; and the ABB 11kV distribution switchgear relaying system.

During this interactive course, participants will learn the general control and metering, control devices and wiring; the ABB 11kV distribution switchgear comprising of nameplates and testing; the ABB switchgear asset management; the testing codes and standards, test requirements and component testing procedures; the circuit breaker diagnostic techniques; the distribution switchgear commissioning and start-up, acceptance and hand over; and the switchgear vital equipments covering batteries condition and monitoring.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a comprehensive knowledge on ABB 11kV distribution switchgear
- Discuss voltage convention, fundamentals of circuit breakers, types of breakers, construction, ratings and tripping characteristics
- Explain ABB switchgear in a network context, ABB switchgear in historical perspective and ABB switchgear details
- Identify ABB power circuit breakers, reclosers, sectionalizers, surge arresters, ABB main unit, ABB metal clad switchgear, ABB instrument and control power transformers
- Illustrate ABB 11kV distribution switchgear relaying system, general control and metering, control devices and wiring as well as ABB 11kV distribution switchgear comprising of nameplates and testing
- Carryout ABB switchgear asset management, testing codes and standards, test requirements and component testing procedures
- circuit breaker diagnostic techniques, distribution switchgear commissioning and start-up, acceptance and hand over
- Recognize switchgear vital equipments covering batteries condition and monitoring

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

Who Should Attend

This course provides an overview of all significant aspects and considerations of ABB 11kV distribution switchgear for electrical engineers, industrial and utility engineers and other technical staff.

Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accreditation by the following international accreditation organizations:

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ahmed Abozeid is a Senior Electrical Engineer with over 25 years of Onshore & Offshore experience within the Oil & Gas and Power industries. His wide expertise covers Electrical Motors & Variable Speed Drives, Motor Speed Control, Power Electronic Converters, AC Converters Section, Electromagnetic Compatibility (EMC), Motor Failure Analysis & Testing, Machinery Fault Diagnosis, Bearing Failure Analysis Process Control & Instrumentation,

Process Control Measurements, Control System Commissioning & Start-Up, Control System & Monitoring, Power Station Control System, Instrumentation Devices, Process Control & Automation, PID Controller, Distributed Control Systems (DCS), Programmable Logic Controllers (PLC), ABB PLC & DCS System, Gas Analyzers, Simulation Testing, Load Flow, Short Circuit, Smart Grid, Commissioning. Vibration Sensors. Cable Installation & Commissioning and Site Filter Controller. Further, he is also well-versed in Fundamentals of Electricity, Electrical Standards, Electrical Power, PLC. Electrical Wiring, Machines, Transformers, Motors, Power Stations, Electro-Mechanical Systems, Automation & Control Systems, Voltage Distribution, Power Distribution, Filters, Automation System, Electrical Variable Speed Drives, Power Systems, Power Generation, Power Transformers, Diesel Generators, Power Stations, Uninterruptible Power Systems (UPS), Battery Chargers and AC & DC Transmission. He is currently the Project Manager wherein he manages, plans and implements projects across different lines of business.

Mr. Ahmed worked as the Electrical Manager, Electrical Power & Machine Expert, Electrical Process Leader, Team Leader, Electrical Team Leader, Technical Instructor, and Instructor/Trainer from various companies such as the Lafarge Nigeria, Egyptian Cement Company, ECC Training Center, Alrajhi Construction & Building Company and Ameria Cement Company, just to name a few.

Mr. Ahmed has a Bachelor's degree in Electrical Engineering. Further, he is a Certified Instructor/Trainer and has delivered numerous trainings, seminars, courses, workshops and conferences internationally.

Course Fee

US\$ 6,000 per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 27th of April 2025

| Day I. | Suriday, 27 or April 2025 |
|-------------|--|
| 0730 - 0800 | Registration & Coffee |
| 0800 - 0815 | Welcome & Introduction |
| 0815 - 0830 | PRE-TEST |
| | Introduction |
| 0830 – 0930 | Voltage Convention • Fundamentals of Circuit Breakers • Types of |
| | Breakers, Construction • Ratings, Tripping Characteristics |
| 0930 - 0945 | Break |
| 0945 - 1100 | ABB Switchgear in a Network Context |
| | Basic Construction • Safety • Single Line • Utilization |
| 1100 – 1215 | ABB Switchgear in Historical Perspective |
| | Oil Circuit Breakers • Air Blast CB • SF6 and Vacuum CB • Operating |
| | Mechanisms |
| 1215 – 1230 | Break |
| | ABB Switchgear Details |
| 1230 – 1420 | Ratings Ur, Īk, Ip, Va • Degree of Protection • Service Conditions • |
| | Ancillary Equipment |
| 1420 - 1430 | Recap |
| 1430 | Lunch & End of Day One |

Day 2: Monday, 28th of April 2025

| , -· | |
|-------------|---|
| 0730 – 0830 | ABB Power Circuit Breakers Moulded Case Circuit Breakers Medium-voltage Circuit Breakers Medium-voltage Circuit Breakers |
| 0830 - 0930 | Reclosers |
| 0930 - 0945 | Break |
| 0945 - 1030 | Sectionalizers |
| 1030 - 1130 | Surge Arresters |
| 1130 – 1215 | ABB Ring Main Unit |
| 1215 – 1230 | Break |
| 1230 - 1330 | ABB Metal Clad Switchgear |
| 1330 - 1420 | ABB Instrument & Control Power Transformers |
| 1420 – 1430 | Recap |
| 1430 | Lunch & End of Day Two |

Day 3: Tuesday, 29th of April 2025

| | 100000, 100000 |
|-------------|---|
| 0730 - 0930 | ABB 11kV Distribution Switchgear Relaying System |
| 0930 - 0945 | Break |
| 0945 - 1100 | ABB 11kV Distribution Switchgear General Control & Metering |
| 1100 – 1215 | ABB 11kV Distribution Switchgear Control Devices & Wiring |
| 1215 – 1230 | Break |
| 1230 – 1420 | ABB 11kV Distribution Switchgear |
| | Nameplates • Testing |
| 1420 - 1430 | Recap |
| 1430 | Lunch & End of Day Three |

Wednesday, 30th of April 2025 Day 4:

| 0730 – 0930 | ABB Switchgear Asset Management |
|-------------|--|
| | Equipment Register • CBM and RCM Process • Switchgear Diagnostic |
| | Techniques • Tripping Devices & Maintenance & Testing |
| 0930 - 0945 | Break |
| 0945 – 1100 | Testing Codes & Standards |
| | Management of Commissioning Projects • About NETA • Certification |
| | of Test Technicians • Certification Test Examples • NETA - ANSI |
| | Standards • NETA − Frequency of Tests • ANSI IEC 62337 • NEC |
| | 2011 |
| 1100 – 1215 | Test Requirements |
| | Development of Test Regime • Outline of Typical Tests • Interpretation |
| | of Test Results • Troubleshooting |
| 1215 - 1230 | Break |
| 1230 – 1420 | Component Testing Procedures |
| | Types of Commonly Used Test Equipment Insulation Resistance |
| | Testing • Contact Resistance Testing • Current Injections, CT Testing |
| | • DC Voltage Testing Techniques • AC Voltage Testing Techniques |
| 1420 - 1430 | Recap |
| 1430 | Lunch & End of Day Four |
| | |

Thursday, 01st of May 2025 Day 5:

| | Circuit Breaker Diagnostic Techniques |
|-------------|---|
| 0730 – 0930 | Diagnostic Techniques • Maintenance Procedures for Medium-voltage Oil |
| | Circuit Breakers • Maintenance Procedures for Medium-voltage Vacuum |
| | Circuit Breakers • Recommended Annual Maintenance |
| 0930 - 0945 | Break |
| 0945 – 1100 | Distribution Switchgear Commissioning |
| | Capacitors • Current Transformers • Instrument Transformers, Test |
| | Switches, Metering & Relaying Devices • NETA Recommended |
| | Acceptance Test |
| 1100 – 1215 | Start-up, Acceptance & Hand Over |
| | Systems & Their Integration • Energizing Sequence • Safety |
| | Considerations • Load Checks • Documentation • Correction of Defects |
| | ● Spare Parts ● Warranty ● Final Acceptance ● Training for |
| | Operations & Maintenance Personnel |
| 1215 – 1230 | Break |
| 1230 – 1345 | Switchgear Vital Equipments |
| | Batteries Condition & Monitoring • Discussions |
| 1345 - 1400 | Course Conclusion |
| 1400 – 1415 | POST-TEST |
| 1415 - 1430 | Presentation of Course Certificates |
| 1430 | Lunch & End of Course |

Simulators (Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art "GE Multilin Relay 469" and "GE Multilin Relay 750".

GE Multilin Relay 469 Simulator

GE Multilin Relay 750 Simulator
