

COURSE OVERVIEW FE0110

Fitness-for-Service, Remaining Life Assessment & Repair of Pressure Equipment & Piping
(API-579/ASME FFS-1 & PCC-2 Standards)

Course Title

Fitness-for-Service ,Remaining Life Assessment & Repair of Pressure Equipment & Piping (API-579/ASME FFS-1 & PCC-2 Standards)

Course Date/Venue

May 04-08, 2025/TBA Meeting Room, Taksim Square Hotel, Istanbul, Turkey

Course Reference

FE0110

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

The latest ASME Post-Construction Code is an extension of the current API standards for Risk-Based-Inspection (API 580, API 581), Fitness-For-Service assessment (API 579), Damage Mechanisms (API 571) and repairs. They are a practical and important addition to the ASME design and construction codes, their objective is to prevent failures by timely detection and analysis of degraded conditions, and application of the right repair technique.

In this highly practical course, participants will learn how to (1) plan inspections, (2) evaluate inspection results and calculate the remaining life of corroded and degraded equipment, and (3) select and implement the right repair by applying the new ASME Post-Construction Codes (PCC).

The course will follow the same outline as the ASME PCC Codes, making the course notes a practical and handy reference to illustrate and explain the various requirements of the new ASME PCC codes.

Further, the course will review the recommended practices of API 579 and API 571 and how they can be applied on Fitness-for-Service and damage mechanisms affecting process plant equipment.

The course covers general engineering assessment, damage mechanisms, and specific assessment procedures that include the fitness-for-service of equipment and materials of construction used in refining, petrochemical, and chemical industries. It also covers brittle fracture applications for low temperature refinery and petrochemical services, assessment of corrosion damage, assessment of blisters/laminations, and assessment of crack-like flaws, assessment of fire damage, and the Run-Repair-Replace decision-making process.

The participants will not only be able to apply the rules to calculate the remaining life of corroded and degraded equipment, and make run-or-repair decisions, but will also understand the historical and technical basis of the rules.

The course is illustrated through a large number of case studies and does involve some calculations (with a hand-held calculator) to calculate failure margins and remaining life.

Course Objectives

The aim of this course is to provide the participants with a complete and up-to-date overview of the area of Inspection, Planning, Fitness-For-Service, Damage Mechanisms and Repair of Vessels, Tanks, Piping and Process Equipment in accordance with ASME PCC, API 579 and API 571. Furthermore, participants will learn how to identify damage mechanisms in accordance with API RP 571, evaluate the extent of damage and carry out FFS assessment at damage locations in plant equipment service in order to estimate the remaining life and extend the life of equipment and facilities or make decisions to repair or replace. Upon the successful completion of this course, each participant will be able to:-

- Apply and gain knowledge on fitness-for-service, remaining life assessment and repair of pressure equipment and piping in accordance with API-579/ASME FFS-1 and PCC-2 standards
- Plan the inspection of vessels, tanks, piping and process equipment
- Evaluate the inspection results
- Calculate the remaining life of corroded and degraded equipment
- Select and implement the right repair technique by applying the ASME PCC-2 codes
- Apply repair of pressure equipment and piping in accordance with ASME PCC-2 standard
- Discuss the applicability and limitations of repair methods covered by ASME PCC-2 and choose the correct repair technique for given defects
- Employ cost-effective repairs and detailed repair methods and inspection techniques
- Inspect pressure vessels, rating, repair and alteration and apply remaining life calculation of pressure vessels
- Identify butt-welded insert plates in pressure components, weld overlay to repair internal thinning, welded leak box repair and full encirclement steel reinforcing sleeves for piping
- Recognize fillet welded patches, alternatives to post-weld heat treatment, in-service welding onto carbon steel pressure components or pipelines and weld build-up, weld overlay and clad restoration

- Carryout flange repair, mechanical clamp repair, inspection and repair of shell and tube heat exchangers and examination and testing
- Apply pressure and tightness testing of piping and equipment, pneumatic testing and non-destructive examination in lieu of pressure testing for repairs and alterations
- Discuss the relevance of ASME PCC-2 standard with API 510 and API 570 codes as well as implement proper documentation and records of repairs

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides a wide understanding and deeper appreciation of fitness-for-service, remaining life assessment and repair of pressure equipment and piping for integrity assessment engineers, operations engineers, maintenance engineers, maintenance supervisors, facility integrity supervisors, corrosion engineers, corrosion specialists, site inspection engineers, inspectors, piping engineers, mechanical engineers, plant managers, plant engineers, project engineers and engineers who are responsible for maintaining the integrity of process plant equipment and piping.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

US\$ 6,000 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

- 

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology’s courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant’s involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant’s CEU and PDH Transcript of Records upon request.

- 

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Steve Magalios, CEng, PGDip (on-going), MSc, BSc, is a **Senior Welding & Pipeline Engineer** with almost **40 years** of extensive **On-shore/Offshore** experience in the **Oil & Gas, Construction, Refinery and Petrochemical** industries. His expertise widely covers in the areas of **ASME Post Construction Code, Inspection Planning, Fitness-for-Service (FFS) (API 579), Repair Techniques, Assessment & Repair of Pressure Equipment & Piping, Risk-Based Inspection (RBI), API 650: Welded Tanks for Oil Storage, Welding Technology, Welding & Fabrication, Welding Inspection, Pipeline**

Operation & Maintenance, Pipeline Design & Construction, Pipeline Repair Methods, Pipeline Engineering, Pipeline Integrity Management System (PIMS), Pipeline Pigging, Piping & Pipe Support Systems, Piping Systems & Process Equipment, Piping System Repair & Maintenance, Piping Integrity Management, Computer Aided Design (CAD), Building & Road Design Skills, Civil Engineering Design, Structural Reliability Engineering, Road Construction & Maintenance, Concrete Structures & Building Rehabilitation, Reinforced Concrete Structures Protection, Geosynthetics & Ground Improvement Methods, Blueprint Reading & Interpretation, Blue Print Documentation, Mechanical Drawings, P&ID, Flow Diagram Symbols and Land Surveying & Property Evaluation. He is also well-versed in Lean & Sour Gas, Condensate, **Compressors, Pumps, Flare Knockout Drum, Block Valve Stations, New Slug Catcher, Natural Gas Pipeline & Network, Scraper Traps, Burn Pits, Risk Assessment, HSE Plan & Procedures, Quality Plan & Procedures, Safety & Compliance Management, Permit-to-Work Issuer, ASME, API, ANSI, ASTM, BS, NACE, ARAMCO & KOC Standards, MS Office tools, AutoCAD, STAAD-PRO, GIS, ArcInfo, ArcView, Autodesk Map** and various programming languages such as FORTRAN, BASIC and AUTOLISP. Currently, he is the **Chartered Professional Surveyor Engineer & Urban-Regional Planner** wherein he is deeply involved in providing exact data, measurements and determining properly boundaries. He is also responsible in preparing and maintaining sketches, maps, reports and legal description of surveys.

During his career, Mr. Magalios has gained his expertise and thorough practical experience through challenging positions such as a **Project Site Construction Manager, Construction Site Manager, Project Manager, Deputy PMS Manager, Head of the Public Project Inspection Field Team, Technical Consultant, Senior Consultant, Consultant/Lecturer, Construction Team Leader, Lead Pipeline Engineer, Project Construction Lead Supervising Engineer, Lead Site Engineer, Senior Site Engineer, Welding Engineer, Lead Engineer, Senior Site Engineer, R.O.W. Coordinator, Site Representative, Supervision Head and Contractor** for international Companies such as the Penspen International Limited, Eptista Servicios de Ingenieria S.I., J/V ILF Pantec TH. Papaioannou & Co. – Emenergy Engineering, J/V Karaylannis S.A. – Intracom Constructions S.A., Ergaz Ltd., Alkyonis 7, Palaeo Faliro, Piraeus, Elpet Valkaniki S.A., Asprofos S.A., J/V Depa S.A. just to name a few.

Mr. Magalios is a **Registered Chartered Engineer** and has a **Master's and Bachelor's** degree in **Surveying Engineering** from the **University of New Brunswick, Canada** and the **National Technical University of Athens, Greece**, respectively. Further, he is currently enrolled for **Post-graduate in Quality Assurance** from the **Hellenic Open University, Greece**. He has further obtained a Level 4B Certificates in Project Management from the National & Kapodistrian University of Athens, Greece and Environmental Auditing from the Environmental Auditors Registration Association (EARA). Moreover, he is a **Certified Instructor/Trainer, a Chartered Engineer** of Technical Chamber of Greece and has delivered numerous trainings, workshops, seminars, courses and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday 04th of May ,2025

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0930	Inspection Planning Practical Overview & Classification of Degradation Mechanisms • Corrosion Rates & Prediction of Future Damage
0930 – 0945	Break
0945 – 1100	Inspection Planning (cont'd) Inspection Techniques: Classic Methods & Sate-of-the-Art • Risk-Based-Inspections (RBI)
1100 – 1230	Inspection Planning (cont'd) Risk-Based-Inspections (RBI)
1230 – 1245	Break
1245 – 1420	Inspection Planning (cont'd) Inspection Planning • Examples of RBI Programs
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2: Monday 05th of May ,2025

0730 – 0900	API-579: Fitness-for-Service & Remaining Life Introduction to FFS Across Industries • Failure Modes: Leaks & Breaks
0900 – 0915	Break
0915 – 1045	API-579: Fitness-for-Service & Remaining Life (cont'd) Safety Margins for New & Operating Equipment • The Remaining Strength Factor (RSF) of Equipment
1045 – 1230	API-579: Fitness-for-Service & Remaining Life (cont'd) Brittle Fracture & Cryogenic Service • Assessment of General Wall Thinning •
1230 – 1245	Break
1245 – 1420	API-579: Fitness-for-Service & Remaining Life (cont'd) Assessment of Local Thin Areas & B31G for Pipelines • Assessment of Pitting Corrosion
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3: Tuesday 06th of May ,2025

0730 – 0900	API-579: Fitness-for-Service & Remaining Life (cont'd) Assessment of Blisters & Laminations • Assessment of Mechanical Damage & Distortions
0900 – 0915	Break
0915 – 1045	API-579: Fitness-for-Service & Remaining Life (cont'd) Assessment of Crack-Like Flaws • Case Studies
1045 – 1230	API-579: Fitness-for-Service & Remaining Life (cont'd) Creep Damage in Furnace & Boiler Tubes • Assessment of Fire Damage
1230 – 1245	Break
1245 – 1420	API-579: Fitness-for-Service & Remaining Life (cont'd) Assessment of Equipment in Sour Service • Assessment of Overloads: Fatigue, Vibration, Hammer
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

Day 4: Wednesday 07th of May ,2025

0730 – 0900	ASME PCC-2: Repair of Pressure Equipment & Piping Scope, Organization & Intent • Applicability & Limitations of Repair Methods Covered by ASME PCC-2
0900 – 0915	Break
0915 – 1045	ASME PCC-2: Repair of Pressure Equipment & Piping (cont'd) Choosing Correct Repair Technique for Given Defects • Cost-effective Repairs • Detailed Repair Methods & Inspection Techniques •
1045 – 1230	ASME PCC-2: Repair of Pressure Equipment & Piping (cont'd) Inspection of Pressure Vessels, Rating, Repair & Alteration • Remaining Life Calculation of Pressure Vessels
1230 – 1245	Break
1245 – 1420	ASME PCC-2: Welded Repairs Butt-Welded Insert Plates in Pressure Components • Weld Overlay to Repair Internal Thinning • Welded Leak Box Repair • Full Encirclement Steel Reinforcing Sleeves for Piping
1420 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	End of Day Four

Day 5: Thursday 08th of May ,2025

0730 – 0900	ASME PCC-2: Welded Repairs (cont'd) Fillet Welded Patches • Alternatives to Post-Weld Heat Treatment • In-Service Welding onto Carbon Steel Pressure Components or Pipelines • Weld Build-up, Weld Overlay & Clad Restoration
0900 – 0915	Break
0915 - 1045	ASME PCC-2: Mechanical Repairs (Non-Welding Repairs) Flange Repair • Mechanical Clamp Repair • Inspection & Repair of Shell & Tube Heat Exchangers • Examination & Testing
1045 - 1230	ASME PCC-2: Mechanical Repairs (Non-Welding Repairs) (cont'd) Pressure & Tightness Testing of Piping & Equipment • Pneumatic Testing- Do's & Don'ts • Non-destructive Examination in Lieu of Pressure Testing for Repairs & Alterations

1230 - 1245	Break
1245 - 1345	ASME PCC-2: Mechanical Repairs (Non-Welding Repairs) (cont'd) Relevance of ASME PCC-2 Standard with API 510 & API 570 Codes • Documentation & Records of Repairs
1345 - 1400	POST-TEST
1400 - 1415	Course Conclusion Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1415 - 1430	Presentation of Course Certificates
1430	End of Course

Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises:-

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
