

COURSE OVERVIEW RE0085 Certified Advanced Maintenance Management (CAMM)

Course Title

Certified Advanced Maintenance Management (CAMM)

Course Date/Venue

September 07-11, 2025/The Mouna Meeting Room, The H Hotel, Sheikh Zayed Rd - Trade Centre, Dubai, UAE

Course Reference

RE0085

Course Duration/Credits

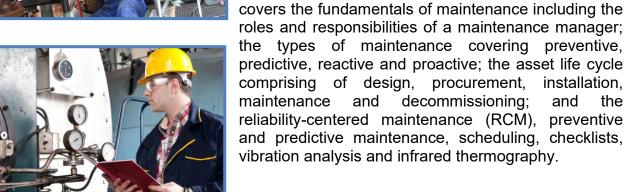

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-ofthe-art simulators.

This course is designed to provide participants with a detailed and up-to-date overview of Certificate in Advanced Maintenance Management (CAMM). It

Further, the course will also discuss the maintenance strategy and planning, work planning and scheduling, resource allocation and inventory and spares management; the maintenance key performance indicators KPIs covering downtime metrics and costs and ROI; the reliability engineering and modelling; the root cause analysis (RCA), fishbone diagrams and failure mode analysis; and the maintenance safety protocols, safety guidelines, personal protective equipment (PPE), hazard identification and risk assessment.

installation.

During this interactive course, participants will learn the incident reporting and management and emergency response planning; the features of maintenance management software; the implementation, data input and management of computerized maintenance management system (CMMS); the internet of things (IoT) in maintenance, digital twin technology and cybersecurity concerns; the data analytics and decision making, leadership skills for maintenance managers and communication skills; and the team building and motivation, training and development and future trends in maintenance management.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on advanced maintenance management
- Discuss the fundamentals of maintenance including the roles and responsibilities of a maintenance manager
- Identify the types of maintenance covering preventive, predictive, reactive and proactive
- Illustrate asset life cycle comprising of design, procurement, installation, maintenance and decommissioning
- Carryout reliability-centered maintenance (RCM), preventive and predictive maintenance, scheduling, checklists, vibration analysis and infrared thermography
- Employ maintenance strategy and planning, work planning and scheduling, resource allocation and inventory and spares management
- Apply maintenance key performance indicators (KPIS) covering downtime metrics and costs and ROI
- Illustrate reliability engineering and modelling, root cause analysis (RCA), fishbone diagrams and failure mode analysis
- Implement maintenance safety protocols, safety guidelines, personal protective equipment (PPE), hazard identification and risk assessment
- Carryout incident reporting and management and emergency response planning
- Discuss the features of maintenance management software including the implementation, data input and management of computerized maintenance management system (CMMS)
- Identify internet of things (IoT) in maintenance, digital twin technology and cybersecurity concerns
- Apply data analytics and decision making, leadership skills for maintenance managers and communication skills
- Employ team building and motivation, training and development and future trends in maintenance management

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

Who Should Attend

This course provides an overview of all significant aspects and considerations of advanced maintenance management for maintenance managers, facility managers, operations managers, reliability engineers, maintenance engineers, maintenance planners and schedulers, maintenance supervisors, and maintenance technicians.

Course Certificate(s)

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations:

British Accreditation Council (BAC)

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Fee

US\$ 5,500 per Delegate + **VAT**. This rate includes H-STK[®] (Haward Smart Training Kit). buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Karl Thanasis, PEng, MSc, MBA, BSc, is Senior Mechanical & Maintenance Engineer with over 30 years of extensive industrial experience. His wide expertise includes Shutdown, Turnaround & Outages, Maintenance & Reliability Management, Mechanical Maintenance Planning, Scheduling & Work Control, Advanced Techniques in Maintenance Management, Predictive & Preventive Maintenance & Operation Cost Maintenance, Reduction Techniques, Reliability Centered Maintenance (RCM), Machinery

Failure Analysis, Rotating Equipment Reliability Optimization & Continuous Cataloguing, Mechanical & Improvement, Material Rotating **Equipment** Troubleshooting & Maintenance, Root Cause Analysis & Reliability Improvement, Condition Monitoring, Root Cause Failure Analysis (RCFA), Steam Generation, Steam Turbines, Power Generator Plants, Gas Turbines, Combined Cycle Plants, Boilers, Piping & Pipeline, Maintenance, Repair, Process Fired Heaters, Air Preheaters, Induced Draft Fans, All Heaters Piping Work, Refractory Casting, Heater Fabrication, Thermal & Fired Heater Design, Heat Exchangers, Heat Transfer, Coolers, Power Plant Performance, Efficiency & Optimization, Storage Tank Design & Fabrication, Thermal Power Plant Management, Boiler & Steam System Management, Pump Operation & Maintenance, Chiller & Chiller Plant Design & Installation, Pressure Vessel, Safety Relief Valve Sizing & Selection, Valve Disassembling & Repair, Pressure Relief Devices (PSV), Hydraulic & Pneumatic Maintenance, Advanced Valve Technology, Pressure Vessel Design & Fabrication, Pumps, Turbo-Generator, Turbine Shaft Alignment, Lubrication, Mechanical Seals, Packing, Blowers, Bearing Installation, Couplings, Clutches and Gears. Further, he is also versed in Wastewater Treatment Technology, Networking System, Water Network Design, Industrial Water Treatment in Refineries & Petrochemical Plants, Piping System, Water Movement, Water Filtering, Mud Pumping, Sludge Treatment and Drying, Aerobic Process of Water Treatment that includes Aeration, Sedimentation and Chlorination Tanks. His strong background also includes Design and Sizing of all Waste Water Treatment Plant Associated Equipment such as Sludge Pumps, Filters, Metering Pumps, Aerators and Sludge Decanters.

Mr. Thanasis has acquired his thorough and practical experience as the Project Manager, Plant Manager, Area Manager - Equipment Construction, Construction Superintendent, Project Engineer and Design Engineer. His duties covered Plant Preliminary Design, Plant Operation, Write-up of Capital Proposal, Investment Approval, Bid Evaluation, Technical Contract Write-up, Construction and Subcontractor Follow up, Lab Analysis, Sludge Drying and Management of Sludge Odor and Removal. He has worked in various companies worldwide in the USA, Germany, England and Greece.

Mr. Thanasis is a Registered Professional Engineer in the USA and Greece and has a Master's and Bachelor's degree in Mechanical Engineering with Honours from the Purdue University and SIU in USA respectively as well as an MBA from the University of Phoenix in USA. Further, he is a Certified Internal Verifier/Trainer/Assessor by the Institute of Leadership & Management (ILM) a Certified Instructor/Trainer and has delivered numerous trainings, courses, seminars, workshops and conferences worldwide.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 07th of September 2025

Day 1:	Sunday, 07" of September 2025
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Maintenance Management Fundamentals
	Defining Maintenance Management • History & Evolution
0930 - 0945	Break
0945 - 1045	Role & Responsibilities of a Maintenance Manager
	<i>Job Descriptions</i> ● <i>Expectations</i> & <i>Goals</i>
1045 – 1145	Types of Maintenance
	Preventive • Predictive • Reactive • Proactive
1145 - 1200	Break
1200 – 1300	Asset Life Cycle
	Design • Procurement • Installation • Maintenance • Decommission
1300 – 1420	Industry Best Practices
	ISO Standards • Reliability-Centered Maintenance (RCM)
1420 – 1430	Recap
1430	Lunch & End of Day One

Day 2: Monday, 08th of September 2025

0730 - 0830	Preventive Maintenance (PM)
	Scheduling • Checklists
0830 - 0930	Predictive Maintenance (PdM)
	Vibration Analysis • Infrared Thermography
0930 - 0945	Break
0945 – 1045	Maintenance Strategy & Planning
	Maintenance Strategy • Work Planning • Work Scheduling
1045 - 1145	Resource Allocation
1043 - 1143	Budgeting • Manpower
1145 – 1200	Break
1200 – 1245	Inventory & Spares Management
	Stock Levels • Vendor Management
1245 – 1420	Maintenance Key Performance Indicators (KPIs)
	Downtime Metrics • Costs & ROI
1420 – 1430	Recap
1430	Lunch & End of Day Two

Tuesday, 09th of September 2025 Day 3:

Day J.	ruesuay, 05 or September 2020
0730 - 0830	Reliability Engineering
	Definitions and Concepts • Reliability Modeling
0830 - 0930	Root Cause Analysis (RCA)
	Fishbone Diagrams • Failure Mode Analysis
0930 - 0945	Break
0945 – 1045	Maintenance Safety Protocols
	Safety Guidelines • Personal Protective Equipment (PPE)
1045 – 1145	Hazard Identification & Risk Assessment
	Methods & Approaches • Mitigation Plans
1145 – 1200	Break
1200 – 1245	Incident Reporting & Management
	Documentation • Follow-Up
1245 – 1420	Emergency Response Planning
	Fire Safety • Chemical Spills
1420 - 1430	Recap
1430	Lunch & End of Day Three

Day 4:	Wednesday, 10 th of September 2025
0730 - 0930	Maintenance Management Software
	Features • Software Selection Criteria
0930 - 0945	Break
0945 - 1045	Computerized Maintenance Management System (CMMS)
	Implementation • Data Input & Management
1045 – 1145	Internet of Things (IoT) in Maintenance
	Smart Sensors • Data Analysis
1145 – 1200	Break
1200 – 1315	Digital Twin Technology
1200 - 1515	Benefits & Limitations • Real-world Case Studies
1315 – 1345	Data Analytics & Decision Making
	Data Collection Methods • Data Interpretation
1345 - 1420	Cybersecurity Concerns
	Risk Factors • Best Practices
1420 - 1430	Recap
1430	Lunch & End of Day Four

Thursday, 11th of September 2025 Day 5:

Day o.	Thaibady, The Or Deptember 2020
0730 - 0830	Leadership Skills for Maintenance Managers Emotional Intelligence • Conflict Resolution
0830 0930	Communication Skills
	Technical Writing • Verbal Communication
0930 - 0945	Break
0945 – 1115	Team Building & Motivation
	Team Dynamics • Incentive Systems
1115 – 1215	Training & Development
	Employee Training Programs • Succession Planning
1215 – 1230	Break
1230 – 1300	Future Trends in Maintenance Management
	Sustainable Practices • Machine Learning & AI
1300 – 1315	Course Conclusion
1315 – 1415	COMPETENCY EXAM
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

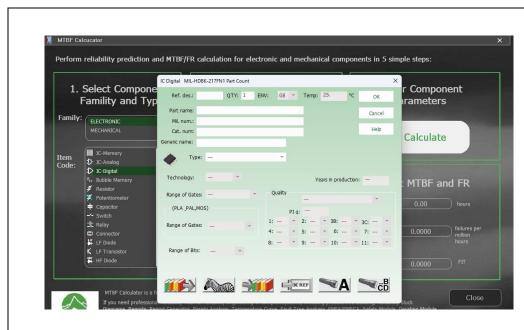

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the state-of-the-art simulator "iLearnVibration", "MTBF Calculator" and "ManWinWin Express CMMS Software".

iLearnVibration

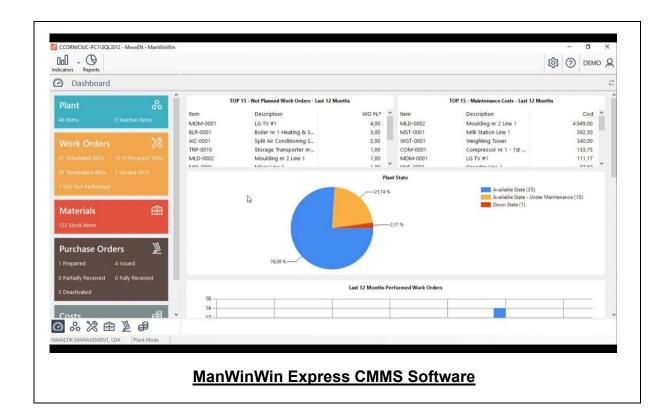

MTBF Calculator
