

**COURSE OVERVIEW PE0310**  
**Gas Sweetening & Sulphur Recovery**

**Course Title**

Gas Sweetening & Sulphur Recovery

**Course Date/Venue**

October 12-16, 2025/ TBA Meeting Room, Hilton Kuwait Resort, Mangaf, Kuwait City, Kuwait

**Course Reference**

PE0310

**Course Duration/Credits**

Five days/3.0 CEUs/30 PDHs

**Course Description**

***This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.***

Hydrogen sulfide, carbon dioxide, mercaptans and other contaminants are often found in natural gas streams. H<sub>2</sub>S is a highly toxic gas that is corrosive to carbon steels. CO<sub>2</sub> is also corrosive to equipment and reduces the Btu value of gas. Gas sweetening processes remove these contaminants so the gas is suitable for transportation and use.

This course presents a complete and up-to-date overview of the Gas Sweetening, Liquid Hydrocarbon Sweetening and Sulphur Recovery with emphasis on gas plant process operations. The process flow sheets of several Sweetening and Sulphur Recovery Processes will be used to illustrate how the various operations differ. The advantages, limitations, and range of applicability of each process will be discussed so that its selection and integration into the overall plant is fully understood and appreciated.

Upon completing this course, you will have a good understanding of Gas Sweetening, Liquid Hydrocarbon Sweetening and Sulphur Recovery. There are many methods that may be employed to remove acidic components (primarily H<sub>2</sub>S and CO<sub>2</sub>) from hydrocarbon streams. The available methods may be broadly categorized as those depending on chemical reaction, absorption, or adsorption. Processes employing each of these techniques are described. Many of the processes result in acid gas streams that contain H<sub>2</sub>S that may be flared, incinerated, injected or fed to a Sulphur Recovery Unit. Various Sulphur Recovery Processes (primarily The Modified Claus Process) are discussed. You will also learn the basic vocabulary unique to the industry.

### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on gas sweetening and sulphur recovery and identify the safety precautions and the types of contaminants including their effects
- Discuss the concept of process selection as well as the chemical reaction processes used in gas sweetening and sulphur recovery
- Employ systematic methodology of inlet separation and filtration and distinguish their features and importance
- Identify the concept of flash tank and corrosion as applied in gas sweetening and sulphur recovery and acquire knowledge on foaming and materials
- Describe the principles of batch processes, SWS, amines and reclaimer and introduce the topic of liquid redox as applied in gas sweetening and sulphur recovery
- Explain the various physical and combination processes and gain an in-depth knowledge on caustic wash, alkaline process and liquid HC sweetening
- Discuss the amine plant process and modified claus plant as well as their practical application on gas sweetening and sulphur recovery
- Determine the mechanical consideration and process consideration of gas sweetening and sulphur recovery
- Carryout the procedure on re-heating operation as well as instrumentation and degasification and discover their features and functions

### **Exclusive Smart Training Kit - H-STK®**

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor’s actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

### Who Should Attend

This course provides an overview of all significant aspects and considerations of gas sweetening and sulfur recovery for managers, engineers and other technical staff who are directly involved in gas processing operations.

### Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

- 
The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Saad Bedir**, MSc, BSc, is a **Senior Chemical Engineer** with over **30 years** of extensive experience in the **Power, Petrochemical, Oil & Gas** and **Cement** industries. He is well-versed in the areas of Introduction to **Process Troubleshooting, Polyethylene Manufacturing & Process Troubleshooting, Polyethylene Flexible Packaging, Polyethylene Wire & Cable, Polymers, Polymers & Composites, Distillation Column Operation & Control, Polymers & Polymerization, Oil Movement Storage & Troubleshooting, Process Equipment Design, Applied Process Engineering Elements, Polymer & Materials Engineering, Polyethylene Processing Techniques, Advanced Polymer Chemistry, Plastics Technology, LLDPE Productions & Utilization, Process Plant Optimization, Heat & Power Consumption, Heat Transfer, Clean Energy & Power Saving, Fuel Handling System, Oil Movement & Operation, Oil Production, Gas Conditioning & Processing, Plastic Additives, Process Plant Performance & Efficiency, Plant Optimization and Process Operations.** His expertise also includes the implementation of Environmental Impact Assessment (**EIA**), **OHSAS 18001, ISO 9001, ISO 14001, QHSE** Management Planning, Air Quality Management, Health, Fire, Safety, Security & Environmental Codes of Practice, Legislations and Procedures. Crisis & Business Continuity Management Planning, Emergency Response & Procedures, Industrial Security Risk Assessment & Management, , Behavioural Safety, Incident & Accident Investigation, Integrated EHS Aspects, Risk Assessment & Hazard Identification, Environmental Audits, Hazardous & Non-Hazardous Waste Management, Confined Space Safety, **SHEMS** Principles, Process Safety, Basic & Advanced Construction Safety, Rig & Barge Inspection, , Safety & Occupational Health Awareness, Loss Control, Lifting & Slings, Marine Pollution Hazards & Control, Ground Contamination & Reclamation Processes, Waste Management & Recycling, **HAZOP, HAZID, HSEIA, QRA**, Hazardous Area Classification, Radiation Protection, Active and Positive Fire Fighting, Fire & Gas Detection Systems, Fire Fighting Systems, Fire Proofing, ESD, Escape Routes. Presently, he is the **HSE Director** for one of the largest and renowned companies in the Middle East, wherein he takes charge of all HSE and security operations of the company.

Mr. Saad's vast professional experience in directing & managing process operations and health, safety and the environment aspects as per OSHA framework and guidelines can be traced back to his stint with a few international companies like **Saudi ARAMCO, CONOCO, Kuwait Oil Co. (KOC)**, etc, where he worked as the **Field Senior Process Consultant** handling major projects and activities related to the discipline. Through these, he gained much experience and knowledge in the implementation and maintenance of **internationally accepted principles** of process operations. Through this, he has also gained knowledge regarding international safety standards for the National Fire Protection Association (**NFPA**), the American Petroleum Institute (**API**), Safety of Life at Sea (**SOLAS**), and Safety for Mobile Offshore Drilling Unit (**MODU**).

Mr. Saad has a **Bachelor's degree in Chemistry** from the **Ain Shams University** and a **NEBOSH** certificate holder. Further, he is a **Certified Instructor/Trainer**, a **Certified Lead Auditor** for **OHSAS 18001, ISO 9001, ISO 14001** and a **member** of the **Egyptian Syndicate & Scientific Professions**. His passion for development and acquiring new skills and knowledge has taken him all over the Middle East to attend and share his expertise in numerous trainings and workshops.

**Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

**Course Fees**

**US\$ 5,500** per Delegate. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day

**Training Methodology**

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

**Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

**Day 1: Sunday, 12<sup>th</sup> of October 2025**

0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	<b>PRE-TEST</b>
0830 - 0900	<b>Terminology</b>
0900 - 0930	<b>Safety Precautions</b>
0930 - 0945	Break
0945 - 1030	<b>Types of Contaminants</b>
1030 - 1115	<b>Process Selection</b>
1115 - 1200	<b>Chemical Reaction Processes</b>
1200 - 1215	Break
1215 - 1300	<b>General Considerations</b>
1300 - 1345	<b>Inlet Separation</b>
1345 - 1420	<b>Filtration</b>
1420 - 1430	<b>Recap</b>
1430	Lunch & End of Day One

**Day 2: Monday, 13<sup>th</sup> of October 2025**

0730 - 0930	<b>Flash Tank</b>
0930 - 0945	Break
0945 - 1045	<b>Corrosion</b>
1045 - 1200	<b>Foaming, Material</b>
1200 - 1215	Break

1215 - 1330	<b>Batch Processes, SWS, Amines &amp; Reclaimer</b>
1330 - 1420	<b>Liquid Redox</b>
1420 - 1430	<b>Recap</b>
1430	<b>Lunch &amp; End of Day Two</b>

**Day 3: Tuesday, 14<sup>th</sup> of October 2025**

0730 - 0830	<b>Physical Process</b>
0830 - 0930	<b>Combination Process</b>
0930 - 0945	<b>Break</b>
0945 - 1030	<b>Caustic Wash</b>
1030 - 1115	<b>Alkaline Process</b>
1115 - 1200	<b>Case Study</b>
1200 - 1215	<b>Break</b>
1215 - 1330	<b>Liquid HC Sweetening</b>
1330 - 1420	<b>Case Study - Amine Plant Process</b>
1420 - 1430	<b>Recap</b>
1430	<b>Lunch &amp; End of Day Three</b>

**Day 4: Wednesday, 15<sup>th</sup> of October 2025**

0730 - 0930	<b>Amine Plant Process</b>
0930 - 0945	<b>Break</b>
0945 - 1100	<b>Modified Claus Plant</b>
1100 - 1200	<b>Mechanical Consideration</b>
1200 - 1215	<b>Break</b>
1215 - 1420	<b>Process Configuration</b>
1420 - 1430	<b>Recap</b>
1430	<b>Lunch &amp; End of Day Four</b>

**Day 5: Thursday, 16<sup>th</sup> of October 2025**

0730 - 0930	<b>Re-Heating Operation</b>
0930 - 0945	<b>Break</b>
0945 - 1100	<b>Instrumentation, Degassification</b>
1100 - 1200	<b>Instrumentation, Degassification (cont'd)</b>
1200 - 1215	<b>Break</b>
1215 - 1345	<b>Case Study - Tail Gas Clean-up</b>
1345 - 1400	<b>Course Conclusion</b>
1400 - 1415	<b>POST-TEST</b>
1415 - 1430	<b>Presentation of Course Certificates</b>
1430	<b>Lunch &amp; End of Course</b>

**Practical Sessions**

This practical and highly-interactive course includes real-life case studies and exercises:-

**Course Coordinator**

Jaryl Castillo, Tel: +974 4423 1327, Email: [jaryl@haward.org](mailto:jaryl@haward.org)
