

## COURSE OVERVIEW ME0562 Pump Selection, Installation, Performance & Control

### Course Title

Pump Selection, Installation, Performance & Control

### Course Date/Venue

October 20-24, 2024/Collosseum Meeting Room, Radisson Blu Hotel, Sisli, Istanbul, Turkey

### Course Reference

ME0562

### Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

### Course Description

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulator.***

This course is designed to provide delegates with a detailed and up-to-date overview on the proper selection, installation, performance and control of pumps. It covers pump construction covering centrifugal pump, pump curves, characteristics, most common end-suction and in-line pump types, impeller and casing types, single-stage and multistage pumps, long coupled and close-coupled pumps as well as various types of pumps and mechanical shaft seals including its components, functions and factors affecting the seal performance.

The course will enable the participants to describe motors, liquids and materials and employ proper installation of pumps as well as analyze pump performance, system characteristics and pumps connected in series and parallel. Participants will be able to adjust pump performance and describe speed controlled pump solutions for constant pressure and temperature control, constant differential pressure in a circulating system and flow compensated differential pressure control.

Further, the advantages of speed control and pumps with integral frequency converter as well as its basic function, characteristics, components and special conditions will be discussed and lifecycle costs equation and calculation will be illustrated during the course.

### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on the selection, installation, performance and control of various types of industrial pumps
- Recognize pump construction covering centrifugal pump, pump curves, characteristics, most common end-suction and in-line pump types, impeller and casing types, single-stage and multistage pumps as well as long coupled and close-coupled pumps
- Identify the various types of pumps and mechanical shaft seals including its components, functions and factors affecting the seal performance
- Describe motors, liquids and materials as well as employ proper installation of pumps
- Analyze pump performance, system characteristics and pumps connected in series and parallel
- Adjust pump performance and describe speed-controlled pump solutions for constant pressure and temperature control, constant differential pressure in a circulating system and flow compensated differential pressure control
- Explain the advantages of speed control and pumps with integral frequency converter
- Enumerate the basic function, characteristics, components and special conditions of frequency converter
- Illustrate life cycle costs equation and calculation

### **Who Should Attend**

This course covers systematic techniques and methodologies in the selection, installation, performance and control of pumps for plant and maintenance engineers, process engineers, maintenance personnel, supervisors and reliability specialists working in a wide variety of process plant environments, such as petrochemical, plastics, power utilities, oil, gas, water utilities, wastewater etc. The course is also highly valuable to senior maintenance technical staff who are involved with pumps, their operation and their maintenance.

### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

**Course Certificate(s)**

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

**Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations: -

-  The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology’s courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant’s involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant’s CEU and PDH Transcript of Records upon request.

-  British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

**Mr. Saleh Aich** is a **Senior Mechanical & Maintenance Engineer** with over **20 years** of extensive experience within the **Oil & Gas, Petrochemical** and **Refining** industries. His expertise widely covers in the areas of **Combustion** Techniques, **Combustion** System Performance, **Pump** Operation & Maintenance, **Compressor** Maintenance & Troubleshooting, **Gas Turbine** Control & Protection Systems, **Valve** Troubleshooting & Maintenance, **Vibration** Analysis, **Oil** Analysis, **Dry Gas Seals,**

**Packing & Mechanical Seals, Seal** Support Systems, **Mechanical Seal** Failure Analysis & Troubleshooting, **Seal** Maintenance & Repair, **Bearing** Care & Maintenance, **Couplings & Alignment, Alignment** Methods, Troubleshooting **Piping & Pipe Support** Systems, **Heat Exchangers** Maintenance & Inspection, **Pressure Vessel** Design, Fabrication & Testing, **Burners, Blowers,** Piston & Plunger **Gearboxes,** Fin-Fans, Separators, Expansion Drums, Filters, Molecule Sieve, Tanks, Fittings, Root Cause Failure Analysis (**RCFA**), Computerized Maintenance Management System (**CMMS**), **Maintenance** Management, **Planning & Scheduling** Work Management, **Parts & Inventory** Management, **Turnaround & Shutdowns, Condition** Monitoring, Regeneration Unit, NGL & Condensate, **Furnace** Operation & Troubleshooting, Performance Measure & Indicators, Total Productive Maintenance (**TPM**), **Preventive & Predictive** Maintenance Analysis, **Rotating & Static** Equipment, **Machinery & Equipment** Failure Analysis, **Gas & Steam** Turbines, **Boilers, Coolers, Diesel & Gas** Engines, **Heaters, Separators, Storage** Tanks, H<sub>2</sub>S and ISO 9001:2008 Internal Quality Management System.

During his career life, Mr. Saleh has gained his practical and field experience through his various significant positions and dedication as the **Maintenance Instructor, Mechanical Supervisor, Maintenance Engineer, Mechanical Engineer, Contract Engineer, Planning Engineer** and **Senior Instructor/Lecturer** for various multi-national companies such as the ADNOC Gas Processing (**GASCO**), **ConocoPhillips** and Syrian Gas Company.

Mr. Saleh has a **Bachelor** degree in **Mechanical Engineering**. Further, he is a **Certified Instructor/Trainer** and has acquired various certifications and has further delivered numerous training, courses, workshops, seminars and conferences worldwide.

### Course Fee

**US\$ 6,000** per Delegate + **VAT**. This rate includes Participants Pack (Folder, Manual, Hand-outs, etc.), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

**Training Methodology**

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

**Course Program**

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

**Day 1: Sunday, 20<sup>th</sup> of October 2024**

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	<b>PRE-TEST</b>
0830 – 0930	<b>Pump Construction</b> The Centrifugal Pump • Pump Curves • Characteristics of the Centrifugal Pump • Most Common End-Suction & In-Line Pump Types • Impeller Types (Axial Forces)
0930 – 0945	Break
0945 – 1100	<b>Pump Construction (cont'd)</b> Casing Types (Radial Forces) • Single-Stage Pumps • Multistage Pumps • Long-Coupled and Close-Coupled Pumps
1100 – 1215	<b>Types of Pumps</b> Standard Pumps • Split-Case Pumps • Hermetically Sealed Pumps • Sanitary Pumps • Wastewater Pumps • Immersible Pumps • Borehole Pumps • Positive Displacement Pumps
1215 – 1230	Break
1230 – 1420	<b>Mechanical Shaft Seals</b> The Mechanical Shaft Seal's Components & Function • Balanced & Unbalanced Shaft Seals • Types of Mechanical Shaft Seals • Seal Face Material Combinations • Factors Affecting the Seal Performance
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

**Day 2: Monday, 21<sup>st</sup> of October 2024**

0730 – 0930	<b>Motors</b> Standards • Motor Start-Up • Voltage Supply • Frequency Converter • Motor Protection
0930 – 0945	Break
0945 – 1100	<b>Liquids</b> Viscous Liquids • Non-Newtonian Liquids • The Impact of Viscous Liquids on the Performance of a Centrifugal Pump • Selecting the Right Pump for a Liquid with Antifreeze • Calculation Example • Computer Aided Pump Selection for Dense and Viscous Liquids

1100 – 1215	<b>Materials</b> What is Corrosion? • Types of Corrosion • Material & Metal Alloys • Ceramics • Plastics • Rubber • Coatings
1215 – 1230	Break
1230 – 1420	<b>Pump Installation</b> New Installation • Existing Installation-Replacement • Pipe Flow for Single-Pump Installation • Limitation of Noise & Vibrations • Sound Level (L)
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

**Day 3 Tuesdays, 22<sup>nd</sup> of October 2024**

0730 – 0930	<b>Pump Performance</b> Hydraulic Terms • Electrical Terms • Liquid Properties
0930 – 0945	Break
0945 – 1030	<b>System Characteristics</b> Single Resistances • Closed and Open Systems
1030 – 1100	<b>Pumps Connected in Series &amp; Parallel</b> Pumps in Parallel • Pumps Connected in Series
1100 – 1215	<b>Adjusting Pump Performance</b> Throttle Control • Bypass Control • Modifying Impeller Diameter • Speed Control • Comparison of Adjustment Methods
1215 – 1230	Break
1230 – 1420	<b>Adjusting Pump Performance (cont'd)</b> Overall Efficiency of the Pump System • Example: Relative Power Consumption when the Flow is Reduced by 20%
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Three

**Day 4: Wednesday, 23<sup>rd</sup> of October 2024**

0730 – 0930	<b>Speed-Controlled Pump Solutions</b> Constant Pressure Control • Constant Temperature Control
0930 – 0945	Break
0945 – 1100	<b>Speed-Controlled Pump Solutions (cont'd)</b> Constant Differential Pressure in a Circulating System • Flow-Compensated Differential Pressure Control
1100 – 1215	<b>Advantages of Speed Control</b>
1215 – 1230	Break
1230 – 1420	<b>Advantages of Pumps with Integral Frequency Converter</b> Performance Curves of Speed-Controlled Pumps • Speed-Controlled Pumps in Different Systems
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Four

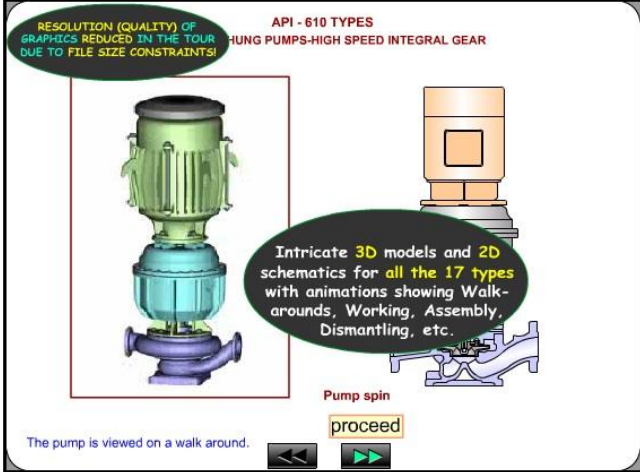

**Day 5: Thursday, 24<sup>th</sup> of October 2024**

0730 – 0930	<b>Frequency Converter</b> Basic Function & Characteristics • Components of the Frequency Converter • Special Conditions Regarding Frequency Converters
0930 – 0945	Break
0945 – 1100	<b>Life Cycle Cost Equation</b> Initial Costs & Purchase Price (Cic) • Installation & Commissioning Costs (Cin) • Energy Costs (Ce) • Operating Costs(Co) • Environmental Costs (Cenv)
1100 – 1215	<b>Life Cycle Cost Equation (cont'd)</b> Maintenance & Repair Costs (Cm) • Downtime Costs, Loss of Production (Cs) • Decommissioning & Disposal Costs (co)
1215 – 1230	Break
1230 – 1345	<b>Life Cycle Costs Calculation-An Example</b>
1345 - 1400	<b>Course Conclusion</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course
1400 – 1415	<b>POST-TEST</b>
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

**Simulator (Hands-on Practical Sessions)**

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art simulator “Centrifugal Pumps and Troubleshooting Guide 3.0”.

**Centrifugal Pumps and Troubleshooting Guide 3.0**

**Course Coordinator**
