

COURSE OVERVIEW PM0090 Construction Project Management

Course Title

Construction Project Management

Course Date/Venue

July 20-24, 2025/Tamra Meeting Room, Al Bandar Rotana Creek, Dubai, UAE

(30 PDHs)

AWAR

Course Reference PM0090

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive various practical sessions exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide participants with a detailed and up-to-date overview of Advanced Project and Construction Management. It covers the principles and frameworks of advanced project management and project lifecycle phases; the key differences between traditional and agile project management; the construction project environment and stakeholders feasibility project includina studies and justification; the scope definition and work breakdown structure (WBS); and the project scheduling techniques and project initiation documentation.

Further, the course will also discuss construction cost estimating and budgeting. value management (EVM) earned construction quality management; the advanced procurement and contracting strategies including vendor and material management; the value engineering and constructability review. construction execution planning and site management and supervision; the health, safety and environmental management (HSE); and the construction productivity, performance optimization and change and claims management.

During this interactive course, participants will learn the progress reporting and communication, advanced project risk management and interface management in complex projects; the integrated project controls, construction information and document control; the digital tools and technologies in construction and interfaces with commissioning and operations; the leadership and team management in construction, commissioning and start-up planning and final project handover and acceptance; the site demobilization and resource release, final contract closure, financial reconciliation and archiving project records; and the performance metrics, stakeholder satisfaction surveys and post-implementation reviews (PIR).

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain advanced knowledge on various functions, techniques, procedures and requirements of project and construction management in line with the PMI standards
- Discuss the principles of advanced project management, project management frameworks, project lifecycle phases and gates and the key differences between traditional and agile project management
- Recognize construction project environment and stakeholders including feasibility studies and project justification
- Review scope definition and work breakdown structure (WBS) and apply project scheduling techniques and project initiation documentation
- Carryout construction cost estimating and budgeting, earned value management (EVM) and construction quality management
- Employ advanced procurement and contracting strategies including vendor and material management
- Apply value engineering and constructability review, construction execution planning and site management and supervision
- Discuss health, safety and environmental management (HSE) and apply construction productivity, performance optimization and change and claims management
- Implement progress reporting and communication, advanced project risk management and interface management in complex projects
- Carryout integrated project controls, construction information and document control as well as discuss digital tools and technologies in construction and interfaces with commissioning and operations
- Apply leadership and team management in construction, commissioning and startup planning and final project handover and acceptance
- Employ site demobilization and resource release, final contract closure, financial reconciliation and archiving project records
- Apply performance metrics, stakeholder satisfaction surveys and postimplementation reviews (PIR)

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials conveniently saved in a Tablet PC.

Who Should Attend

This course provides an advanced overview of project and construction management for managers, engineers and supervisors who already have knowledge of project management techniques and tools as well as for the managers who are directly responsible for projects and need to manage the task professionally. The course is also beneficial for those who want to know about pitfalls in their environments when managing project management consultants.

PMI Recognition of Haward Courses

The Project Management Institute (**PMI**) recognizes Haward's Certificates and Continuing Education Units (CEUs).

The recognition and acceptance of our PDUs/CEUs fall under Categories E, F and G of PMI's "Professional Education" section at the PMP Application. Hence, what the delegates simply need to do is to complete this section as part of the PMP Application and submit it to PMI upon the receipt of Haward's certificates and ANSI/IACET's CEUs. PMI will automatically accept the delegates with 30 Contract Honors as a fulfillment of the required Professional Education.

Haward Technology, being the first **Authorized Provider** of the International Association for Continuing Education & Training (**IACET-USA**) in the Middle East, is authorized to award ANSI/IACET **CEUs** that are automatically accepted and recognized by the Project Management Institute (**PMI**).

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

training methodology before or during the course for technical reasons.

Course Certificate(s)

(1) Internationally recognized Competency Certificates and Plastic Wallet Cards will be issued to participants who completed a minimum of 80% of the total tuition hours and successfully passed the exam at the end of the course. Certificates are valid for 5 years.

Recertification is FOC for a Lifetime.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:-

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Certificate Accreditations

Haward's certificates are accredited by the following international accreditation organizations: -

British Accreditation Council (BAC)

Haward Technology is accredited by the British Accreditation Council for Independent Further and Higher Education as an International Centre. Haward's certificates are internationally recognized and accredited by the British Accreditation Council (BAC). BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the ANSI/IACET 2018-1 Standard which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET 2018-1 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award 3.0 CEUs (Continuing Education Units) or 30 PDHs (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Fee

US\$ 5,500 per Delegate + VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Dr. Chris Le Roux, PhD, MSc, BSc, PMI-PMP, PMI-CAPM, PMI-ATP, is a Senior Project & Management Consultant with almost 50 years of teaching, training and industrial experience. His expertise lies extensively in the areas of Project & Contracts Management Skills, Project & Construction Management, Project Planning, Scheduling & Control, Project Management, Project Delivery & Governance Framework, Project Planning & Delegating, Risk, Budgeting & Cost Management in Projects, Project Management Practices, Project Management Disciplines, Project Risk Management, Risk Identification Tools &

Techniques, Project Life Cycle, Project Stakeholder & Governance, Project Management Processes, Project Integration Management, Project Management Plan, Project Work Monitoring & Control, Project Scope Management, Project Time Management, Project Cost Management, Project Quality Management, Quality Assurance, Project Human Resource Management, Project Communications Management, Contract Management, Tender Development, Contract Standards & Laws, Dispute Resolution & Risk Identification, Myers-Briggs Type Indicator (MBTI), Organization Development Consultation, Advanced Debriefing of Emotional Trauma, Interpersonal Motivation, Model Based Interviewing, Leadership Orientation Programme, Leading People & Change, Embracing Innovation Culture Coaching & Motivation, Creative Thinking & Problem-Solving Techniques, Techniques for Coaching & Mentoring, Strategies for Setting Annual Goals, Monitoring Progress & Evaluation Performance, Emotional Intelligence, Presentation Skills, Communication & Interpersonal Skills, Effective Communication & Influencing Skills, Effective Business Writing Skills, Writing Business Documents, Business Writing (Memo & Report Writing), Leadership & Team Building, Psychology of Leadership, Interpersonal Skills & Teamwork, Coaching & Mentoring, Innovation & Creativity, Office Management & Administration Skills, Controlling Your Time & Managing Stress, Crisis Management, Strategic Human Resources Management, Change Management, Negotiation Skills, Strategic Planning, Risk Analysis & Risk Management, Situation & Behaviour Analysis, Interpersonal Motivation Skills, Inventory Management and Financial Administration. Further, he is also well-versed in Water Supply System Security, Vulnerability & Terrorism, Integrated Security Systems, Incident Threat Characterization & Analysis, Physical Security Systems, Security Crisis, Security Emergency Plan, Command & Control System, Preventive Actions and Situation Analysis. He was the Psychologist & Project Manager wherein he was responsible in the project management and private psychology practices.

During his career life, Dr. Le Roux has gained his academic and field experience through his various significant positions and dedication as the Director, Medico Legal Assessor Psychologist, Training & Development General Manager, Project Manager, Account Manager, Commercial Sales Manager, Manager, Sales Engineer, Project Specialist, Psychology Practitioner, Senior HR Consultant, Senior Lecturer, Senior Consultant/Trainer, Business Consultant, Assistant Chief Education Specialist, ASI Coordinator, Part-time Lecturer/Trainer, PMP & Scrum Trainer, Assessor & Moderator, Team Leader, Departmental Head, Technical Instructor/Qualifying Technician, Apprentice Electrician: Signals and Part-Time Electrician from various companies and universities such as the South African Railway (SAR), Department of Education & Culture, ESKOM, Logistic Technologies (Pty. Ltd), Human Development: Consulting Psychologies (HDCP) & IFS, Mincon, Eagle Support Africa, Sprout Consulting, UKZN, Grey Campus, Classis Seminars, CBM Training, just to name a few.

Dr. Le Roux has a PhD in Commerce Major in Leadership in Performance & Change, a Master's degree in Human Resource Management, a Bachelor's degree (with Honours) in Industrial Psychology, a National Higher Diploma and a National Technical Diploma in Electrical & Mechanical Engineering. Further, he is a Certified Project Management Professional (PMI-PMP), a Certified Associate in Project Management (PMI-CAPM), a Certified Authorized Training Partners (PMI-ATP), a Certified Scrum Master Trainer by the VMEdu, a Certified Instructor/Trainer and a Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM). Moreover, he is a Registered Industrial Psychologist by the Health Professions Council of South Africa (HPCSA), a Registered Educator by the South African Council for Educators (SACE) and a Registered Facilitator, Assessor & Moderator with Education, Training and Development Practices (ETDP) SETA. He has further delivered numerous trainings, courses, seminars, conferences and workshops globally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 20th of July 2025

Day 1:	Sunday, 20 th of July 2025
0730 – 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Principles of Advanced Project Management Overview of Project Management Frameworks (PMI, IPMA, PRINCE2) • Project Lifecycle Phases and Gates • Key Differences Between Traditional and Agile Project Management • Organizational Maturity in Project Execution
0930 - 0945	Break
0945 - 1030	Construction Project Environment & Stakeholders Identifying Internal and External Stakeholders • Defining Roles and Responsibilities in EPC Projects • Managing Stakeholder Expectations and Influence • Techniques for Stakeholder Communication and Engagement
1030 - 1130	Feasibility Studies & Project Justification Technical and Economic Feasibility Assessments • Market Demand and Competitive Analysis • Social and Environmental Impact Evaluations • Creating a Compelling Business Case
1130 – 1215	Scope Definition & Work Breakdown Structure (WBS) Importance of Scope Management in Construction • Developing the WBS: Best Practices • Integration with Project Schedules and Budgets • Controlling Scope Changes and Creep
1215 - 1230	Break
1230 - 1330	Project Scheduling Techniques Critical Path Method (CPM) and Precedence Diagramming Method (PDM) • Gantt Charts and Milestone Charts • Schedule Compression Techniques: Crashing and Fast-Tracking • Use of Software Tools (Primavera P6, MS Project)
1330 - 1420	Project Initiation Documentation Project Charter Development • Assumptions and Constraints Logging • Initial Risk Register Creation • Alignment with Corporate Strategy
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2: Monday, 21st of July 2025

0730 - 0830	Construction Cost Estimating & Budgeting Classes of Estimates and Accuracy Ranges • Bottom-Up versus Top-Down Estimating • Contingency and Escalation Allowances • Cash Flow Projections and S-Curves
0830 - 0930	Earned Value Management (EVM) Key Performance Indicators: CPI, SPI, EV, AC, PV • Variance Analysis and Trend Forecasting • Implementing an EVM System in Construction • Performance Forecasting (EAC, ETC)
0930 - 0945	Break

	Construction Quality Management
0945 – 1100	Quality Assurance versus Quality Control • Developing Inspection and Test
	Plans (ITPs) • Non-Conformance Management and Corrective Actions • Total
	Quality Management (TQM) Applications
	Advanced Procurement & Contracting Strategies
1100 – 1215	Selecting Appropriate Contract Types (Lump Sum, EPC, Reimbursable) •
1100 1210	Prequalification and Bid Evaluation Techniques • Managing Subcontractors
	and Suppliers • Dispute Resolution and Claims Prevention
1215 - 1230	Break
	Vendor & Material Management
1230 – 1330	Procurement Scheduling and Lead Time Analysis • Supplier Performance
	Metrics • Material Tracking and Logistics Coordination • Construction
	Inventory Controls
	Value Engineering & Constructability Review
	VE Methodology and Workshop Structure • Cost-Benefit Analysis and
1330 – 1420	Functional Performance • Constructability Analysis Tools • Integration into
	Design and Execution Stages
1420 – 1430	Recap
	<i>Using this Course Overview, the Instructor(s) will Brief Participants about the</i>
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Two
1430	Lunch & Line of Day 1 wo

Day 3: Tuesday, 22nd of July 2025

Construction Execution Planning Mobilization and Site Preparation Strategies • Resource Allocation (Labor, Materials, Equipment) • Phased and Modular Execution Approaches • Managing Construction Packages and Work Fronts	Day 3.	ruesuay, 22 ° Or Jury 2025

1430	Lunch & End of Day Three

Day 4: Wednesday, 23rd of July 2025

Day 4:	Wednesday, 23 rd of July 2025
0730 - 0830	Advanced Project Risk Management
	Risk Identification and Categorization (Technical, Commercial, External) •
	Qualitative and Quantitative Analysis (Monte Carlo Simulation) • Risk
	Response Planning (Avoid, Transfer, Mitigate, Accept) • Creating and
	Managing the Risk Register
	Interface Management in Complex Projects
0020 0020	Types of Interfaces (Mechanical, Contractual, Operational) • Interface Register
0830 - 0930	Development and Control • Communication and Approval Protocols •
	Integration of Interface Management in Schedule
0930 - 0945	Break
	Integrated Project Controls
0945 - 1100	Scope, Cost, and Schedule Integration • Baseline Management and Control
0945 - 1100	Techniques • Monitoring and Adjusting Integrated Performance • Forecasting
	Completion and Variance Analysis
	Construction Information & Document Control
1100 – 1215	Document Management Systems (DMS) • Engineering Deliverables Tracking
1100 - 1215	Revision Control and Transmittal Processes BIM Integration with
	Document Control
1215 – 1230	Break
	Digital Tools & Technologies in Construction
1220 1220	Digital Twins and Construction Modeling • Use of Drones and Sensors for
1230 – 1330	Monitoring • Construction Management Platforms (Procore, Aconex) • Data-
	Driven Decision-Making
	Interfaces with Commissioning & Operations
1330 - 1420	Preparing Systems for Handover • Construction-to-Commissioning
1330 - 1420	Transitions • Turnover Package Development • Stakeholder Walk-Downs and
	Punch List Tracking
	Recap
1420 – 1430	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today and Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day Four

Day 5: Thursday, 24th of July 2025

	· · · · · · · · · · · · · · · · · · ·
0730 - 0830	Leadership & Team Management in Construction Leading Multicultural and Cross-Functional Teams • Situational Leadership Styles • Conflict Resolution and Team Motivation • Delegation and Accountability Management
0830 - 0930	Commissioning & Start-Up Planning System Completion and Pre-Commissioning Checklists • Integrated Commissioning Planning • Energization and System Turnover • First Oil/Steam/Power Production Readiness

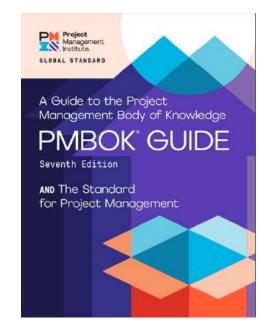

0930 - 0945	Break
0945 – 1030	Final Project Handover & Acceptance
	Handover Planning and Stakeholder Alignment • As-Built Documentation and
	Operation Manuals • Client Acceptance Criteria and Walk-Throughs • Lessons
	Learned Documentation
	Project Close-Out & Demobilization
1030 – 1230	Site Demobilization and Resource Release • Final Contract Closure • Financial
	Reconciliation • Archiving Project Records
1230 - 1245	Break
	Post-Project Evaluation & Lessons Learned
1245 – 1300	Performance Metrics (Cost, Time, Quality, Safety) • Stakeholder Satisfaction
1243 - 1300	Surveys • Post-Implementation Reviews (PIR) • Capturing and Sharing
	Knowledge
	Course Conclusion
1300 – 1315	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1315 – 1415	COMPETENCY EXAM
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Book(s)

As part of the course kit, the following e-book will be given to all participants:-

Title: A Guide to the Project

Management Body of Knowledge (PMBOK Guide)-

ISBN: 978-1628256642

Author: Project Management Institute **Publisher**: Project Management Institute

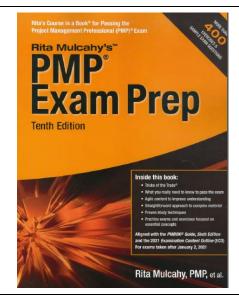

Title : Rita Mulcahy's PMP Exam Prep,

ISBN: 978-1932735659 Author: Rita Mulcahy Publisher: Rmc Pubns Inc

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using "Mindview Software", "Raidlog Simulator" and "MS Excel application.
