

<u>COURSE OVERVIEW EE0007</u> <u>Electrical Transformers Faults, Inspection, Testing,</u> <u>Maintenance & Troubleshooting</u>

Course Title

Electrical Transformers Faults, Inspection, Testing, Maintenance & Troubleshooting

(30 PDHs)

Course Date/Venue

April 03-07, 2025/Meeting Plus 9, City Centre Rotana, Doha, Qatar

Course Reference

Course Duration/Credits Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

The high efficiency and reliability of power transformers have contributed to the domination of power networks since the beginning of the last century. Transformers play also a key role in the interconnection of power systems at different voltage levels. Without transformers, it would simply not be possible to use electric power in many of the ways it is used today. Consequently, transformers occupy prominent positions in the electric power system, being the vital links between power generating stations and points of electric power utilization.

This course is designed to provide delegates a detailed and up-to-date overview of transformer operation, maintenance, diagnosis, testing and lifetime extension. It covers the power transformer fundamentals including the main electric parameters and laws, magnetism and electromagnetism, Lenz and Faradays Laws, circuits, star and delta connections, theory, the role of transformers in power systems, standards, regulations and voltages as well as the various types and construction of transformers.

EE0007 - Page 1 of 8

EE0007-08-25|Rev.438|27 April 2025

Further, the course will also discuss the special transformers, transformer components, materials, cooling of transformers, transformer performance, electrical parameters and transformer faults; the power transformer failure and faults; the proper power transformer protection, operation and factory acceptance test (FAT); the transformer installation, testing and commissioning; and the transformer maintenance, routine inspections, diagnostic analysis, life expectancy and extension.

During this interactive course, participants will learn the methods of insulating system and lifetime extension in transformer diagnostic; the insulation system composition, transformer oil types, thermal effects and energy losses; the heat transformer modes, insulation systems oxidation and degradation, corrosive sulphur effect and insulation system aging factors; the aging measurement, electrical diagnosis of insulation system, gas diagnostic analysis and chemical diagnostic analysis; and the physical diagnostics analysis, estimation diagnostic analysis, transformer lifetime extension and remaining life assessment (RLA).

Course Objectives

Upon the successful completion of this course, each participant will be able to: -

- Apply and gain systematic techniques and methodologies of transformer operation, maintenance, diagnosis, testing and lifetime extension
- Operate, maintain, troubleshoot and test power transformers in a professional manner
- Discuss the power transformer fundamentals covering the main electric parameters and laws, magnetism and electromagnetism, Lenz and Faradays Laws, circuits, star and delta connections, theory, the role of transformers in power systems, standards, regulations and voltages
- Identify the various types and construction of transformers
- Describe special transformers as well as enumerate transformer components and materials
- Determine cooling of transformers, transformer performance and electrical parameters
- Recognize power transformer failure and faults as well as employ proper power transformer protection, operation and factory acceptance test (FAT)
- Install, test and commission transformer efficiently
- Carryout transformer maintenance, routine inspections, diagnostic analysis, life expectancy and extension
- Apply the methods of insulating system and lifetime extension in transformer diagnostic
- Discuss the insulation system composition, transformer oil types, thermal effects and energy losses
- Identify the heat transformer modes, insulation systems oxidation and degradation, corrosive sulphur effect and insulation system aging factors
- Carryout aging measurement, electrical diagnosis of insulation system, gas diagnostic analysis and chemical diagnostic analysis
- Perform physical diagnostics analysis, estimation diagnostic analysis, transformer lifetime extension and remaining life assessment (RLA)

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**[®]). The **H-STK**[®] consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of transformer operation, maintenance, diagnosis, testing and lifetime extension for engineers and other technical staff who need a sound understanding of power transformer operation, maintenance, troubleshooting or testing.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-ofthe-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours: -

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

US\$ 6,000 per Delegate. This rate includes H-STK[®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

EE0007 - Page 3 of 8

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

Course Instructor (s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ken Steel is a Senior Electrical & Instrumentation Engineer with over 30 years of extensive experience. His expertise widely covers Process Control Instrumentation, Process Instrumentation & Control, Process Control, Instrumentation, , Instrumentation for Process Optimization and Control, Process Automation and Instrumentation Systems Integration, Troubleshooting in **Process** Control & Control Systems, Process Safeguarding, Troubleshooting & Problem Solving, Process Instrumentation and Control Techniques, Troubleshooting Instrumentation and Control Systems, GC Processes Troubleshooting and Control Systems, Programmable

Logic Controllers (PLC), SCADA System, PLC & SCADA - Automation & Process Control, PLC & SCADA Systems Application, Technical DCS/SCADA, Distributed Control System (DCS) Principles, Applications, Selection & Troubleshooting, Electrical Motors Testing, Heat Tracing & Insulation Installation & Testing, HV Terminations, High & Low Voltages on Overhead Cranes, HV/MV Cable Splicing, Cable & Over Head Power Line, HV/MV Switchgear, HV Cable Design, Medium & High Voltage Equipment, High Voltage Circuit Breaker Inspection & Repair, High Voltage Power System, HV Equipment Inspection & Maintenance, HV Switchgear Operation & Maintenance, Resin / Heat Shrink & Cold Shrink Joints, HV/LV Equipment, LV & HV Electrical System, Cable Splicing & Termination, High Voltage Electrical Safety, LV, MV & HV Cable Installations & Properties, LV Substation, MV & LV Cable, UPS Systems, MV & LV Direct on Line Motor Drives, MV & LV VSD Motor Drives, MV & LV Soft Starter Motor Drives, LV Two Speed Motor Drives, Underground Transformer Oil Containment Tank, Electrical & Instrumentation Construction Installation, 1500KW, 1000KW, 1752KW Diesel Power Plant Installation, 110KV Overhead Line, 110KV Outdoor Switchgear, 110KV/10KV 6500KVA Transformer, Transformer Substation, 1600KVA 10KV/0.4KV & 2 Off 1000KVA Diesel Generators, 1600KVA 10KV/0.4KV & 1650KVA Diesel Generator, 110KV/35KV/10KV Substation, 110KV/10KV Transformers, 110KV & 2 Off 6KV Overhead Lines, 34.5KV,13.8KV ,4.16KV & 480V Switchgear, 4.16KV & 480V MCC, Transformers & Motor Drives Substations, Diesel Driven Generators, Overhead Cranes, Overhead Cranes & HVAC Units, AC & DC Drives, Data Logger, Electrical, Instrumentation & Mechanical Installation Maintenance, Slab Mills, Pre Heat Ovens, Hydraulic Shears, Stamping Machine, Gearboxes, Rollers, Pumps, Valves, Electro Magnets & Pump House Operation, Boilers Construction And Commissioning, Valve Calibration & Testing, Level Gauges, Pressure & Flow Transmitters Installation & Calibration, Pressure & Leak Testing of Boilers, Leak Testing, SMP, Elect, I&C, F&G, HVAC & Utility Services, Nitrogen Leak Test Operations, Steam Blowing Activities, SMP, Elect, I&C, F&G, HVAC & Utility Services, PTW Issue (PA/AC), Installation & Mechanical Piping and Hydro Testing & Leak Testing of Lines Installation.

During Mr. Steel's career life, he has gained his practical experience through several significant positions and dedication as the 3GP PBF & Boilers SC Commission Support, SC Site Execution Superintendent, E&I Construction Superintendent, High Voltage Construction Supervisor, Control & Power Construction Supervisor, Electrical & Instrumentation Supervisor, Electrical Technician. Construction Support Electrical Engineer. E&I Engineer. Electrical/Instrumentation Site Supervisor, Q.A/Q.C Inspector, Electrical/ Instrumentation Technician, Maintenance Fitter Instrumentation Technician, Millwright, Apprentice Millwright and Senior Instructor/Lecturer for Tengiz Chevron Oil Kazakhstan, Al Jubail Saudi Arabia, Escravos Delta state Nigeria, Lurgi S.A, SuD Chemie Sasol Catalysts, J C Groenewalds Construction (LTA), Tycon (Goodyear S.A.), Dragline Construction and Iscor Vanderbijlpark.

Mr. Steel has a Diploma in Electronics Mechanic. Further, he is a Certified Instructor/Trainer and delivered numerous trainings, courses, workshops, seminars and conferences internationally.

EE0007 - Page 5 of 8

<u>Course Program</u> The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1:	Sunday, 03 rd of August 2025
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
	Power Transformer Fundamentals
0830 - 0930	Main Electric Parameters & Laws • Magnetism & Electromagnetism • Lenz &
	Faraday's Laws
0930 - 0945	Break
	Power Transformer Fundamentals (cont'd)
0945 -1115	Single & Three-phase Circuits (3 & 4 Wires) • Star (Y) & Delta (Δ) Connections
0945 -1115	Basic Transformer's Theory The Role of Transformers in Power Systems
	Standards & Regulations • Standard Voltages
	Types & Construction of Transformers
1115 - 1230	<i>Oil-filled Transformers with Expansion Tanks</i> • <i>Oil-filled Sealed Transformers</i> •
1115 - 1250	Dry Transformers • Gas Insulated Transformers (GIT) • Two & Three
	Windings Transformers • Applications
1230 - 1245	Break
	Special Transformers
1245 - 1420	Single Phase Transformers • Autotransformers • Arc Furnace Transformers •
1245 - 1420	Rectifier Transformers • Zig-Zag & Grounding Transformers • Instrument
	Transformers
1420 – 1430	Recap
1430	Lunch & End of Day One

Day 2:	Monday, 04 th of August 2025
0730 - 0930	Transformer Components & Materials
	Steel Core • Copper & Aluminium Windings • Insulation Materials •
	<i>Expansion Tank & Radiators</i> • <i>Expansion Tank & Radiators</i> • <i>Bushings</i> •
	Cooling System
0930 - 0945	Break
	Cooling of Transformers
0945 - 1100	Heat Dissipation & Load • Environment & Cooling of Transformers • Cooling
0945 - 1100	Fluids • Types of Cooling Systems & Notations (ONAN; ONAF; OFAF; OFWF;
	AN; GIT) • Rated Power & Cooling System
1100 - 1230	Transformer Performance & Electrical Parameters
	Rated Power • Rated Voltages & Ratio • Rated Frequency Losses & Efficiency •
	Impedance Voltage Drop
1230 - 1245	Break
1245 - 1420	Transformer Performance & Electrical Parameters (cont'd)
	Vector Group • Voltage Regulation (On-load Tap Changers & Off-load Tap
	Changers)
1420 – 1430	Recap
1430	Lunch & End of Day Two

EE0007 - Page 6 of 8

Day 3:	Tuesday, 05 th of August 2025
	Power Transformer Failure & Faults
0730 – 0930	Causes of Failure • Oil & Insulation Faults • Windings Faults • Overloads &
0750 - 0950	Overheating • Assessing Risk Failure • Preparing a Risk Based Transformer
	Management Program
0930 - 0945	Break
	Power Transformer Protection
0945 – 1100	Built-on Protections • Differential Protection • Overcurrent Protection • Restricted
	Earth Fault Protection • Overload Protection
	Transformer Operation
1100 – 1230	Inrush Currents & Harmonics • Parallel of Transformers • Power Factor •
	Lightning & Switching Overvoltages • Surge Arresters • Fire Protection
1230 - 1245	Break
1245 1420	Factory Acceptance Tests (FAT)
1245 - 1420	Type Tests • Routine Tests • Routine Tests • Special Tests • Oil Testing
1420 – 1430	Recap
1430	Lunch & End of Day Three
Day 4:	Wednesday, 06 th of August 2025
-	Transformer Installation, Testing & Commissioning
0730 - 0930	General Layout • Floor Mounted Transformers • Pad Mounted Transformers •
	Pole Mounted Transformers • Oil Retention Basin
0930 - 0945	Break
	Transformer Installation, Testing & Commissioning (cont'd)
0945 - 1100	Neutral Grounding • Earthing & Bonding • Transportation & Handling • Site
	Acceptance Tests (SAT)
1100 - 1230	Transformer Maintenance, Routine Inspections & Diagnostic Analysis
	Establishing a Preventive Maintenance & Inspection Program • Safety • Visual
	Inspection • Insulation Resistance (Oil & Solid) • Insulation Power Factor (PF)
	Oil Analysis & Samples Windings
1230 1245	Break

1230 - 1245	Break
1245 – 1420	Transformer Maintenance, Routine Inspections & Diagnostic Analysis(cont'd)Windings • Tank & Conservator • On-load Tap Changer • Bushings • CoolingSystem • Accessories & Auxiliary Equipments • Infrared Thermography •Schedule of Preventive Maintenance Actions & Inspections • Procedures
1420 – 1430	Recap
1430	Lunch & End of Day Four

Day 5:	Thursday, 07 th of August 2025
0730 - 0830	Transformer Life Expectancy
	Mean Time Between Failures (MTBF) • Insulation System Aging Factors
0830 - 0930	Transformer Life Expectancy (cont'd)
	Oil • Paper • Bushings
0930 - 0945	Break
0945 - 1100	Transformer Diagnostic: Methods of Insulating System & Lifetime Extension
	Insulation System Composition • Transformer Oil Types • Thermal Effects •
	Energy Losses
1100 - 1230	Transformer Diagnostic: Methods of Insulating System & Lifetime Extension
	(cont'd)
	Modes of Heat Transfer • Oxidation & Degradation of Insulation Systems •
	Corrosive Sulphur Effect • Insulation System Aging Factors

EE0007 - Page 7 of 8

1230 – 1245	Break
1245 – 1315	Transformer Diagnostic: Methods of Insulating System & Lifetime Extension(cont'd)Aging Measurement • Electrical Diagnosis of Insulation System • Gas DiagnosticAnalysis • Chemical Diagnostic Analysis
1315 - 1345	Transformer Diagnostic: Methods of Insulating System & Lifetime Extension(cont'd)Physical Diagnostics Analysis • Estimation Diagnostic Analysis • TransformerLifetime Extension • Remaining Life Assessment (RLA)
1345 – 1400	Course Conclusion
1400 – 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

<u>Practical Sessions</u> This practical and highly-interactive course includes real-life case studies and exercises:-
