**Course Description**

***This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.***

This course is designed to provide participants with a detailed and up-to-date overview of Certified Associate in Project Management (PMI-CAPM). It covers the difference between projects and operational work; the process groups, project management challenges, project performance domains, stakeholders and project manager role; the emotional intelligence, people skills, project organizational structures and team performance domain; and the development approach and life cycle performance domain including project activities that deliverables and milestones.

Further, the course will also discuss the predictive-plan based methodology, predictive life cycle, project charter and project team; the project management plan and project schedule; managing, monitoring and controlling a project work and closing the project; planning and managing procurement; engaging with stakeholders and managing project communications and risk; and the quality management including project controls, forecasting and integration.

During this interactive course, participants will learn the adaptive approach and team structure in adaptive projects; the requirements for the adaptive project environment including the typical steps of the adoptive projects and agile life cycles; the Agile Manifesto, Lean, Scrum, Kanban and extreme programming (XP); the feature-driven development, dynamic systems development, crystal methods and scaling adaptive frameworks; the uncertainty and business analysis frameworks; the business analyst role and the influence of project approaches on business analysis; and the business analysis planning, need analysis, elicitation, traceability, monitoring and solution evaluation.

The course is carefully developed to reflect the best practices that also match the training requirements of distinguished professional organizations such as the Project Management Institute (PMI) and FIDIC. The Professional Development Units/Hours (PDUs) or Continuing Education Units (CEUs) awarded to our participants are recognized by the Project Management Institute (PMI) and by the International Association for Continuing Education & Training (IACET-USA).

**MOCK Exam**

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward’s Portal. Each participant will be given a username and password to log in Haward’s Portal for the MOCK Exam during the 30 days following the course completion. Each participant has only one trial for the MOCK exam within this 30-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

**Book(s)**

As part of the course kit, the following e-book will be given to all participants:

	<p><b>Title:</b> A Guide to the Project Management Body of Knowledge (PMBOK Guide)</p> <p><b>ISBN:</b> 978-1628256642</p> <p><b>Author:</b> Project Management Institute</p> <p><b>Publisher:</b> Project Management Institute</p>

	<b>Authors:</b> Giampaolo Marucci & Jean-Luc Favrot
	<b>Publisher:</b> Routledge, Taylor & Francis Group

**Simulator (Hands-on Practical Sessions)**

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the “Mindview Software” and “Raidlog Simulator”.

The screenshot displays the Mindview Software interface. At the top, a mind map titled 'Problem Solving' is visible, with nodes for 'Assessment', 'Planning', 'Measurement', and 'Monitoring'. Below the mind map, a word document is open, showing a table with columns for 'Problem Solving' and 'Planning'. The 'Planning' section lists tasks: 'Recognize symptoms', 'Set up team', 'Identify main problems', and 'Select problem'. The 'Measurement' section lists 'Qualitative' and 'Quantitative' methods. The 'Analysis' section lists 'Possible causes' with sub-points 'Cause 1', 'Cause 2', and 'others'. A red dashed arrow points from the 'Assessment' node in the mind map to the 'Problem Solving' section of the word document. The text 'Mind map' is written to the right of the mind map, and 'Word' is written below the word document.
